Article 595. Officers are to wear their uniform when acting as members of a court-martial, or court of inquiry, or when attending such courts as witnesses, or in any other official capacity.

Article 596. The undress uniform shall be worn upon such courts, unless the officer convening the same, or the president of the court, shall specially order the full dress to be worn.

Article 597. Officers, constituting or appearing before boards of examination, shall wear their undress uniforms.

Article 598. Officers are strictly prohibited from wearing their uniform when suspended from duty by sentence of a court-martial.

Article 599. Officers on furlough are recommended not to wear their uniform except on special occasions.

Article 600. Petty officers shall wear the following marks of distinction:

Boatswains' mates, gunners' mates, carpenters' mates, masters-at-arms, ships' stewards, and ships' cooks, by an anchor on the *right* sleeve of their jackets in winter, and frocks in summer.

Quartermasters, quartergunners, captains of forecastles, captains of tops, armorers, coopers, ships' corporals, and captains of the hold, by an anchor, in the same manner, upon their *left* sleeve.

The anchor shall not be more than three, nor less than two inches in length, placed half way between the elbow and shoulder, upon the front of the sleeve: it shall be white when worn on a blue garment, and blue when worn on a white garment.

Article 601. The outside *dress* clothing of the petty officers, seamen, ordinary seamen, landsmen, and boys, shall consist of blue cloth jackets and trowsers, blue vest, blue cloth cap or black hat, black handkerchief, and shoes, when the weather is cold; when the weather is warm, it shall consist of white frock and trowsers, black or white hats, or blue cloth caps, as the commander may direct, having regard to the convenience and comfort of the crew, black handkerchiefs and shoes.

CHAPTER XLIII.—OFFICERS' APARTMENTS.

Article 602. The commander of a fleet or squadron, in a vessel having more than one cabin, may occupy for his own use whichever he may prefer.

When in any vessel having but one cabin, he will select a part of it for his own accommodation, and the remainder will be occupied by the commander of the vessel.

Article 603. A captain of the fleet will be accommodated with the commander of the vessel, or the flag officer, to whom he may be allowed, as he may direct.

Article 604. Sea lieutenants, masters, pursers, surgeons, captains of marines, chaplains, secretaries, and first lieutenants of marines, will, in ships of the line or frigates, occupy the ward room, and shall constitute the ward room mess. The choice of state rooms or sleeping berths allotted for these officers shall be granted to them according to the order in which they are named above, and to those of the same class according to their rank.

Article 605. Assistant surgeons, second masters, second lieutenants of marines, passed midshipmen, schoolmasters, and clerks, shall constitute the gun room mess, and occupy the gun room in ships of the line, except when it shall be occupied, as above, by the ward room officers, in which case they will mess on the after orlop, and, in frigates, shall occupy the starboard side of the steerage, and the midshipmen shall occupy the larboard side.

Article 606. The sleeping berths of the gun room officers and midshipmen may be determined by the commander of the vessel.

Article 607. In sloops-of-war, and smaller vessels, the captain shall occupy his proper cabin; all other commission officers and the master, the ward room; and passed midshipmen, midshipmen, schoolmasters, and clerks, the steerage.

Article 608. The foregoing regulations shall have the force of general orders from the President of the United States, and no change shall be made in them except by his order or approbation.

They are to supersede all former regulations on the same subjects, so far as they extend, and are inconsistent with former regulations.

D.

If Congress should not pass the proposed law in relation to the compensation of officers of the navy, or give to pursers of the navy a fixed annual compensation, then the following articles are recommended by the board of revision as substitutes for articles No. 281 and 283 of chapter 13, providing rules, &c., for pursers, viz:

Article 281. All articles of slop clothing and small stores issued by the purser shall be charged at an advance of 15 per cent. upon their original net cost, and no more; of which 5 per cent. in ships of the line, 4 per cent. in frigates, 3 per cent. in sloops-of-war, but nothing in brigs or smaller vessels, shall be retained by the United States, to cover their risk and the expense of transportation; and the remainder of the said 15 per cent. shall be allowed to the purser for his profit, and to cover all wasteage and his risk.

Article 283. He shall, in the settlement of his accounts, be charged with slop clothing and small stores at their net cost, and be credited with the value of his issues, after deducting the percentages mentioned in the 7th article of these regulations, when duly authenticated, and made in conformity with the regulations of the navy.

NAVY DEPARTMENT, June 12, 1834.

Sir: As the board of revision in the case of the naval laws and regulations has made its reports on both subjects separately, which reports have been transmitted to Congress by the President, and are now understood to be before the Naval Committee, it is supposed that the legal power of the board and the President, under the resolution relating to these subjects, has probably terminated. But an interesting correspondence between some of the members of the board and other officers has lately taken place, in relation to the regulations recommended by the board; and it having passed through this Department and the hands of the President, and it being deemed useful, by some of the parties concerned, that their views and those of the President and this Department upon them should be known to the Naval Committee, before acting on the subject of the regulations, I take the liberty herewith to enclose the objections and replies made concerning various portions of the regulations. (No. 1 to No. 6.)

After a careful examination of these papers, and the regulations as reported, I subjoin a schedule of the articles to which objections have been presented, with a suggestion, under each article, of the opinion entertained by the President and this Department as to the propriety of any change, and, where a change seemed expedient, with a memorandum of the extent and character of it. (No. 7.)

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

Hon. C. P. WHITE, *Chairman of the Naval Committee, H. R.*

No. 1.

The President of the United States having kindly permitted us to lay before him our views of the code of regulations for the government of the navy, prepared by a board of captains, under a resolution of Congress, dated 19th May, 1832, we have the honor to submit the following remarks:

Duly regarding the vital principle of our profession, we are sure the President will believe that it is not in any spirit of insubordination that we have called his attention to this subject; and we confidently hope to satisfy him, before we conclude, that the certain effect of some of the proposed regulations would be to take from us a high external incentive to useful exertion, and to deprive us of a participation in the harvest which those who have served long and well have a right to expect.

That the board did not execute the duties assigned them in good faith, *according to their views*, we do not mean even to insinuate; it so happens, however, that *our* views differ materially from *theirs*; and conceiving that their functions ceased when they made their report, never having had an opportunity of seeing the result of their labors until the whole had, as we thought, passed out of their hands, and cheered, in the course we have taken, by Executive approbation, we proceed to a task which we wish had fallen into abler hands.

If we succeed in satisfying the President that our views are correct, it will be a proud consummation of our work; if we fail, we shall at least have the satisfaction of believing that we have fulfilled a *duty*, and will cheerfully yield *our* opinions to *his* better judgment.

Taking the *objectionable* regulations in the order in which they stand, we remark, that

Article 2 is objectionable, inasmuch as it gives to the commanding officer power to place a *junior* officer over his *senior*, and opens the door for *favoritism*.

Article 4, inasmuch as it interferes with and alters the assimilated rank already established, by placing a lieutenant colonel of marines *after* instead of *with* a captain under five years, gives to a commander-in-chief power to confer on any citizen rank equal to that of captain of marines, and places officers who have served long and honorably (as captains of marines) on a footing with pursers, chaplains and secretaries; the latter of whom are not even officers of the navy.

Article 9. The President having already the power to employ all officers of the navy as he may think fit, this article is unnecessary, and might, under some circumstances, have an injurious effect on the service.

Article 10. Objectionable, inasmuch as it assigns to masters commandant duties inappropriate to their rank, and belonging to the grade beyond which they have passed; and excludes lieutenants from situations which are considered as affording the best opportunity for the acquisition of experience, and the display of general professional abilities.

Article 11. We conceive that injustice is done to our *junior captains* and masters commandant in this assimilation of rank. By the construction of this section, should *one* captain of fifteen years' standing be created a rear admiral, *then* all other captains below him (though also of fifteen years) take rank with brigadier generals *only*.

Article 18. *The power of appointment* is necessarily conferred upon a commander-in-chief; but it is deemed inadvisable to empower him to *annul* without reference to the Secretary of the Navy.

Article 22. All the reports demanded by this article are embraced in the quarterly returns and muster rolls of a vessel, and provided for in other parts of this code of regulations.

Article 37. The regulations concerning pursers are very objectionable; but an explanation in writing must be lengthy and elaborate, and can be best undertaken by that class of officers. The same may be said of surgeons.

Articles 39 and 40. Objectionable, inasmuch as they make an invidious distinction between the senior and junior captains, excluding the latter from a fair and equal participation in the honors and responsibilities of the service; deprive the Executive of the power of selecting, from at least half the list of captains, officers who may be peculiarly fitted for the command of navy yards, who have been in the navy from twenty-five to thirty-five years, and who, before they can overcome the impediments thrown in their way by article 40, will have almost reached the utmost limit of the life of man. In the present state of the navy, a captain cannot expect to be employed in command at sea until he has been from seven to ten years a captain; then he makes a cruise of three years at most; he returns, but cannot be placed in command of a navy yard, because he has not seen *four years'* sea service; he must then go on the lowest rate of pay, and wait for another command; but other captains want sea service, and he must wait for his second turn; after seven or ten years more, he succeeds; then he has to make a three years' cruise, and comes home *qualified* to command a navy yard; he will then be, taking the average age of the captains now on the list, over sixty years of age, and will have been in the navy more than forty years. If these regulations are sanctioned by Congress, the now senior captains will continue to enjoy, by law, what they have heretofore done by monopoly—all that is desirable, both in gratified professional ambition and emolument in pay, exchanging with each other, to the end of their lives, from Navy Commissioners to the command of squadrons, navy yards, or stations; then back again to be Commissioners, &c. In short, this article will operate to the special benefit of the first *seventeen* captains on the list. Similar remarks will apply to masters commandants and lieutenant.

Article 51. Inasmuch as when a fleet is sufficiently large to require a *captain of the fleet*, it should not be left to the commander-in-chief to say whether or not he will have one.

Article 102. Inasmuch as it authorizes, and even requires, officers of the navy to use military force in aid of the civil authority, on their own judgment.

Article 117. Inasmuch as it may require a senior captain to submit his requisitions for the approval of a junior; the captain of the fleet being usually a junior captain.

Article 121. Objectionable, for the same reasons as article 117.

Article 124. If these reports are intended to be *secret*, this article is highly exceptionable, inasmuch as it puts it in the power of a commanding officer to blast the character of one under his command, without such officer having an opportunity to defend himself, or in any way explain his conduct.

Article 136. This article is most highly objectionable, inasmuch as it places it in the power of one officer to degrade and forever disgrace another, without trial, and on a most superficial inspection of his conduct.

Article 168. So far as a good disciplinarian may succeed an inferior one. Reports made of salutary and necessary punishments may impair the standing of a good officer at the Department, and elevate that of an inferior, in point of capacity, merely in consequence of the mistaken lenity of the latter. Besides, the *law* already provides modes and extent of punishment. A similar regulation is believed to have operated injuriously in the British navy.

Article 173. No private remark book is necessary—the log books and journals are sufficient. All *private* animadversions should be avoided, else espionage and intrigue will follow.

Article 184. This article reduces the commander of a ship, having a superior officer on board, to a mere executive officer, or first lieutenant; its effect would be to make the presence of a flag officer on board a ship odious to the commander, and destroy all harmonious intercourse between them; and, in consequence, it would be injurious to the service.

Article 189. If this article is intended to extend to the officers, it is calculated to do no good, but, on the contrary, to cause dissatisfaction, inasmuch as it places on them a check heretofore only applied to common seamen; and the commander, having it always in his power to regulate the leave of his officers, ought to be expected to exercise a sound discretion on the subject. At all events, it belongs to the ordinary discipline of the ship, and need not be made a law.

Articles 190 and 191. These subjects belong to the ordinary discipline and regulation of the ship, and ought to be left to the discretion of the captain, in whom the law places the responsibility. Both are more conducive to insubordination and discontent, than anything else.

Article 411. This article is considered improper and arbitrary, inasmuch as it may be used to prevent an officer, suffering under oppression, from making an appeal to the head of the Department, his constitutional protector. The same remarks apply, in part, to articles 91, 92, and 413.

Article 427. With respect to this article, it is considered that the survey of an officer, by other than medical officers, is degrading, inasmuch as his health can be the only proper subject of examination, of which a sea officer can be no judge.

Article 429. This article is subject to the same objection as article 427.

Article 452. This article appears unfair and unjust towards a party under trial. If such person shall utter anything untrue or disrespectful, the court has power to punish the accused for contempt. But do not constrain him to say only what may be agreeable to the sensitive ears of his judges. It often happens that one of the judges may be the accuser or witness against the person tried. Heretofore the judge advocate has had the supervision of a defence before delivery. Reasons might be multiplied on this point; a suggestion *merely* is offered. But the whole of this chapter (30) seems to be misplaced, and belongs more properly to the act for the government of the navy, instead of being mingled with regulations which have only the form of general orders from the President of the United States, and subject to be altered from time to time.

Article 498. In part objectionable, so far as the *consent* of a commander is necessary to the punishment of (embarked) soldiers by their own officers.

Article 507. Experience proves that the services of colored or slave laborers are most available in some, or most cases, on our southern stations.

Article 587. Objectionable, on account of the extremely reduced provision made for persons deserving pensions.

Article 602. No commander should be deprived of his allotted accommodation, nor yield, unless at his own option, more than a moiety of his cabin and apartments.

In submitting these objections, we trust the President will believe that weighty considerations only, pertaining to our proud profession, (which we hope may yet become more glorious,) have influenced this action. We again disclaim all personal animadversions upon those who have framed the code, in some details good, but obnoxious to complaint in the cited instances.

We complain *openly*, and are persuaded that we express the sentiments of nine-tenths of the commissioned officers of all classes, aggregately.

Our establishment is susceptible of improvement, and needs it. Well will he deserve gratitude, who may place it on a footing commensurate with the elevated position which our country holds in the estimation of the world.

Whilst the grade of captain only exists among us, *all* should be equally eligible to the highest employments; selections resting with the President. When a higher grade is created, say admirals or generals, which we ardently second, *then* the distinction is made, which discipline, security and success demand.

We have approached *the President*, and he has attentively listened to us. His kindness will be known to the whole of our corps, and will have the good effect of checking the debasing practice (gaining too much favor in the service) of reaching ends by indirect means. We are literally the men of the government and country; not ephemeral political disputants. We wish to be *felt* professionally; generally, however, varied acquirements and intelligence may be found among us. It is time that we should cease to be considered as sailors *merely*. That the authors of "The Spy," and "A Year in Spain," both sprung from among us, ought to defend us from an implied reproach.

We have selected only the most ostensibly offensive articles in this code; many minor ones are omitted, as calculated to swell this analysis. We have rendered it as brief as possible, hoping, if necessary, to have an opportunity for full verbal illustrations.

The whole is offered to the indulgent consideration of the President, with assurances of the highest respect, demanded by his official, and secured by his private character.

We are,

CHARLES W. MORGAN,
Captains in the Navy.

WASHINGTON, April 9, 1834.

No. 2.

WASHINGTON, April 25, 1834.

To the Hon. L. Woodbury, Secretary of the Navy.

SIR: The members of the board of revision, at present in the city, have the honor to acknowledge the receipt of your letter of the 11th inst., covering a communication made to the President of the United States by several captains in the navy.

The course pursued by the officers who presented the objections now under consideration has been such as was to be expected from them, open, frank and responsible.

The objections which they have made have received, as they merit, the most careful and respectful attention; and the board submits, for the consideration and disposition of the President, the following remarks in relation to them:

In presenting the proposed regulations, the board of revision were not so presumptuous as to expect they could give universal satisfaction. A system comprising the whole present and future general administration and police of the persons belonging to or employed in the navy, embraces many points upon which honest differences of opinion have and probably ever will exist among those upon whom they are to operate, and by whom they are to be administered. Such differences of opinion prevailed in the board upon some of the articles; they were freely discussed and carefully considered before a final decision was made. The greater number of the articles were, however, adopted unanimously, some with one dissentient vote, and a few by a simple majority.

Although perspicuity and precision were objects of solicitude with the board, their success has not, in some instances; equaled their wishes, and they are pleased with the present opportunity to notice and amend these as well as other defects which have been discovered.

The first objection is made to the second article, because "it gives to the commanding officer power to place a junior officer over his senior, and opens the door to favoritism."

If the article confers this power, it is one of those instances in which the board have failed to express their intentions; for no such grant of power was contemplated, nor can they now perceive where it is to be found. Although not stated in the objection, it is supposed that reference could only have been intended to the exception in relation to acting appointments. If this supposition be correct, it may be observed that the article makes no provision for, nor has any relation to, the principles and rules which are to govern persons making such appointments. These are to be sought elsewhere. This article supposes them to be properly made; and if so made, the terms of it appear not only unexceptionable, but unavoidable. An officer duly appointed to any rank must, of necessity, and upon every principle of military service, command all of inferior rank while he is so acting. To give him that power is the very object of giving him the appointment. The objection, if applicable at all, must refer to the regulations which give the power and prescribe the limitations under which commanding officers may make such appointments. These are to be found in chapter 2, articles 15, 16, 17, 18, 19, 20 and 33.

The 15th prohibits any officer from making such acting appointments within the jurisdiction of the United States, except in cases of emergency, without the orders or permission of the Secretary of the Navy, who represents the President, and is always supposed to act by his authority.

The 16th grants the power to commanders, when without the jurisdiction of the United States, under certain restrictions.

The 17th requires, in *all* cases, a conformity to the general regulations as regards the *claims of rank and seniority*, and as respects qualifications; and the 33d specifies these claims, as follows:

"Promotion of officers, from passed midshipmen upwards, will be according to seniority, excepting for acts of distinguished bravery or uncommon good conduct, and unless their claim should become forfeited by degradation or suspension from rank, by disgraceful conduct or manifest incapacity;" and Article 18 makes all such appointments temporary in their character, and subject to the revocation of the commander-in-chief for the time being, and of the Secretary of the Navy; and to secure to the Secretary an immediate control in all cases, the earliest information is to be given him of all such appointments, and the reasons for making the same.

The board had supposed these restrictions upon the exercise of a power indispensable to every commander-in-chief, to be as great as the officers could reasonably expect, or as a due regard to the public interest would justify.

The next objection, to the fourth article, had been made sometime since by one of the marine officers, and a modification of it agreed to by the members of the board then in the city, and handed by one of them to the chairman of the Naval Committee, that he might have it offered as an amendment when the regulations should be called up for consideration.

The article, as amended, was represented as being satisfactory to the marine officers, and was as follows:

Substitute for fourth article.

"Article 4. The civil officers of the navy shall have assimilated rank with the sea officers of the navy, as follows:

"Surgeons, pursers, chaplains, and secretaries, next after lieutenants of the navy.

"Passed assistant surgeons, next after masters.

"Other assistant surgeons and schoolmasters with passed midshipmen, and clerks with midshipmen.

"No marine officer or civil officer shall exercise command over any sea officer, except as provided in article 5; but the civil officers of the navy, and marine officers who shall be attached to any vessel of the navy, or to any navy yard, station, or other service, which shall be commanded by a sea officer, shall be under the command of such commanding sea officer, or of any other sea officer who may succeed to such command, or of the officer of the watch for the time being, whatever may be his rank."

Upon this article the board would remark that their object was to place beyond dispute some points in relation to command when *certain officers were employed together under the laws for the government of the navy, and when those officers had been placed under the orders of a navy officer*, but in no other case. On courts-martial, and on all other occasions, it was supposed that the relative rank of the marine officers would necessarily remain on the same footing as those of the army.

To the remark in relation to the secretaries, the board would observe that secretaries to commanders of squadrons have been allowed and recognized by the Department. They are presumed to be gentlemen by education and conduct, and are associated and messed with the officers with whom they are classed in the article. The assimilated rank granted to them is intended merely to secure to them that consideration and respect to which their duties and associations seem to entitle them. It can, in no possible case, give them a right to exercise any authority or command whatever over any other officer.

9. The objections to the ninth article are, that it is unnecessary, because the President has the power to employ all officers as he may see fit, and may, under some circumstances, have an injurious effect on the service.

The objections to the *necessity* of this regulation will apply with equal force to almost every other. The proper employment of the whole military and naval force of the country is a part of the Executive duty; but this does not seem necessarily to imply that he may not with advantage adopt and promulgate certain general rules for the employment of officers in ordinary cases, always reserving to himself the unquestioned right to make such variations as particular circumstances may require. It was the intention of the board to frame this article upon such principles. It declares what is considered the appropriate commands for captains, for commanders (or masters commandant), and for lieutenants; but stating that, when circumstances should require it, they might be ordered to smaller vessels. The board are still of opinion that some declaration of the intended assignment of commands by the Executive, in ordinary cases, would be generally satisfactory to the officers, and liable to no injurious consequences. The same subject was at one time determined by law, and has always been a subject of regulation in our own and in other services.

10. The objections to this article are—

1. That it assigns to one class of officers duties which belong to an inferior rank; and, secondly, deprives those of the inferior rank of some of the most valuable professional advantages.

The regulation comprised in this article is entirely new in our navy. In the navies of some foreign countries it has been long practiced; in others, but recently.

It will be observed that the phraseology of the article is not imperative; it does not *require*, but merely *permits* the appointment, if it should be deemed advisable. The reasons for the introduction of this article were, that under certain circumstances such an arrangement might be conducive to the public interests, and at the same time give an opportunity for a class of officers to acquire practical information in respect to the management and arrangement of ships of the line, which their course of service might have prevented them from gaining when in a lower rank. It was supposed that some officers might be desirous of improving such opportunities, and that, as they would probably be called to command similar vessels, before those of lower rank, the public interest would be promoted by the arrangement. The board were not disposed to go further than to leave an opportunity for testing the utility of such an arrangement by experiment, upon the results of which the Executive might regulate his further action.

11. Section 6. The objection to this section seems to be that, whenever the rank of rear-admiral shall be recognized by law, the relative rank of captains of over fifteen years' standing with officers of the

army will be reduced from that which will exist up to that period, and that the senior captains will have enjoyed advantages which will then be denied to those who are junior.

The whole of this article, as far as the passage objected to, inclusively, was taken from the existing regulations of the army, which had been adopted with the sanction of the President of the United States and of Congress. Upon a question in which the members of the two branches of the military force of the country were equally interested, the board of revision could not, with any propriety, and were not disposed to act independently of the other service, further than to adopt what they had established, and to extend the same principle to the two higher grades of both services, if they should be hereafter established. It is believed, however, that the change objected to would not place the juniors in a worse situation. The captains in the navy, until a superior permanent rank is established, can only acquire a relative rank with the army, which carries with it no advantage whatever: it is purely nominal—a shadow stimulating to no exertion, rewarding no services, conferring no honor.

The chances of realizing a higher *positive* rank, though small and remote, will, it is believed, be more highly prized and of more real value than nominal or comparative rank, arising from mere length of service.

18. The objection to this article is the power given to annul or revoke acting appointments, when made by officers, without reference to the Secretary of the Navy.

The right to make or to continue acting appointments is presumed by the regulations to depend upon the necessity of the case. Many cases may readily be supposed to show the propriety of leaving the power of revocation as proposed. The commander of a vessel detached from a squadron on distant service may, before he return, find it necessary to make acting appointments. On rejoining the squadron, it may be perfectly within the power of the commander-in-chief to supply the vacancy with officers of a proper rank; or, if such should not be the case, there might be others in the squadron having superior claims from seniority. The same state of things might be produced in a squadron by the accidental arrival of supernumerary officers, or other causes. Ought the acting appointments to be continued under such circumstances? The board think not; but remain of opinion that the power to revoke acting appointments, when made by officers, should be equally extensive as the power to make them.

22. The reports required by this article will be condensed, and bring the information before the commander of the squadron in a convenient form, while it would be attended with much trouble and inconvenience to seek it in the general muster rolls and quarterly returns of the vessels, as proposed in the objection.

37. The particular objections to this article are not stated, though it is pronounced "very objectionable." It cannot be expected, therefore, that the board should indulge in any conjectures upon the subject.

They may, however, observe that all the provisions of the article which regulate the employment of pursers, are embraced in special existing regulations which have been adopted by the Secretary of the Navy since the present President of the United States entered upon the duties of his office, and, as the board presume, with his approbation.

These provisions were novel in their character, and at variance with the previous usages of the service, which had, as a general rule, assigned the junior pursers to the smaller vessels, and those who had been longer in the service to those of the larger classes. From the small number of large vessels employed in time of peace, some modification of the old practice seemed to be required, to give the junior pursers a more equal share of the profits, which constitute the sole reward of their services. To effect this in a manner which should give no just cause of complaint, and which would be satisfactory to a majority of the pursers, was undoubtedly the object in view; and as the article, so far as it relates to their employment, refers entirely and exclusively to their personal interests, it might perhaps be well to ascertain their respective opinions upon the subject.

39 and 40. The objections to these two articles are stated to be "an invidious distinction between the senior and junior captains, excluding the latter from a fair and equal participation in the honors and responsibilities of the service;" and that they "deprive the Executive of the power of selecting, from at least half the list of captains, officers who may be peculiarly fitted for the command of navy yards." It is further stated, "if these regulations are sanctioned by Congress, the now senior captains will continue to enjoy by law, what they have hitherto done by monopoly, all that is desirable both in gratified professional ambition and emolument in pay, exchanging with each other to the end of their lives, from Navy Commissioners, to the command of squadrons, navy yards, or stations, then back again, to be Commissioners, &c. In short, this article will operate to the special benefit of the first seventeen captains on the list."

The first objection, so far as relates to the *principles* involved in these articles, when stated as a general proposition, appears to the board to be, that any regulation which makes either length of service or previous employment in any grade a condition for any other employment in the same grade, constitutes an invidious distinction between the officers of that grade.

If this proposition be correct in principle, then the articles referred to, as well as many others, should be expunged from the regulations: for no *invidious* distinctions should be made between officers.

The board regret that, from any cause, they should have recommended, and that the President should have sanctioned, a principle susceptible of such an objection; but, after a careful review of the subject, they are not satisfied that the objection is well founded. On the contrary, they are of opinion that, when qualifications are equal, seniority of rank or length of service are justly entitled to some preferences in employment, but certainly not to the entire exclusion of others. They are also of opinion—as a *general rule*, it may be fairly inferred that the professional qualifications of officers will be increased by active professional employment. They are further of opinion that, among the different situations in which officers of the same grade are employed, there are some who require greater professional experience than others; and among these are the two in question: the command of ships of the line, and the command of and employment in navy yards; and, finally, they are of opinion that the public interests will be promoted by general rules, calculated to ensure a certain degree of professional experience for particular employments.

The board believe that they may, with some propriety, urge, as presumptive proof of the correctness of these opinions, the very facts which form the principal complaint in this case. Every Executive, from the first commencement of the navy, has practiced upon these general rules, by appointing, with few exceptions, the senior and more experienced officers to the most important and responsible situations.

The articles in question were intended to be framed in accordance with these opinions. They are general in their terms, and in principle apply equally to all in the respective ranks to which they refer.

By them no captain, whatever may be the date of his commission, can command a ship of the line until he has performed three years' sea service as captain. In this the public interests alone were consulted. A certain term of sea service is required from officers to entitle them to employment in navy yards; and for captains and commanders, (or masters commandant,) a certain standing in their respective ranks. In this, regard was had both to the public interests and the presumed claims of seniority.

In every part which requires length of sea service, the operation embraces all, without regard to relative seniority. In the same manner, that part which requires length of service in the respective ranks applies to all in those ranks, and will hereafter operate upon all successively. It may, perhaps, be objected that the operation of this part of the regulations will be partial, because those who have been longer in their grade than the term specified will have enjoyed advantages now denied to others. This objection, if valid, would apply with equal force against the adoption of any regulation which should prescribe terms of service for promotion or employment which were not coeval with the first establishment of the service—a position which would seem to preclude the exercise of a highly beneficial power.

In point of fact, it is believed that the practice of the Department has been, with very few exceptions, in conformity with the terms of the proposed regulations, both as respects length of general and sea service.

The board will conclude their remarks upon this branch of the objection with a reiteration of their opinion that the *principles* upon which the articles are framed are in accordance with universal military usage, and conducive to the public interests.

To that part of the objection which relates to the manner in which the principle is carried out by the particular provisions of article 40, the board would observe that, in determining upon the term of years, both for general and sea service, in the respective ranks, their views were directed to their general future operation, and without any examination or reference as to their practical operation upon individuals at this time. From the statements presented by the officers of their probable operation upon the captains, under the present limited employment of our vessels, the board have no hesitation in saying that the article 40, in practice, probably excludes some for a longer time than was contemplated, as an average effect of the rule proposed, and might be productive of individual hardship. They would, therefore, recommend that the general term of service should be reduced to six years, and of sea service to three years, for captains, before their employment in command of navy yards. This would enable the sea service to be performed in an ordinary cruise.

To the objection that these regulations deprive the Executive of the power of selection, the board would only remark that, besides the undisputed constitutional right and duty of the Executive to make selections under extraordinary circumstances, particular provision is made for several cases in article 44.

The board feel it due to the service to offer a few observations upon some of the remarks connected with the last objection, that "if these regulations are sanctioned by Congress, the now senior captains will continue to enjoy by law what they have heretofore done by monopoly," &c.

They will remark, in the first place, that it was not the wish or expectation of the board that these regulations should have the force of law. On the contrary, they inserted an article with the express view of preventing it; and the officers themselves making the objection, do not seem so to consider them, when referring to other articles. The intention was that they should have the force of general orders issued by the President of the United States, subject at all times to such alterations and modifications, by him, as experience should point out to be necessary or expedient; and the board are unwilling to believe that the wisdom of Congress will not leave them with that authority and force, and with no other.

The board do not believe that the officers making the objections would intentionally use language calculated to excite unfriendly feelings between different officers, or which might lead to a misapprehension of facts; but it appears to them that, through haste or inadvertence, due care was not given to the concluding remark upon this article.

That the senior officers have "*monopolized* all that is desirable both in gratified professional ambition and emolument in pay," or that they have exchanged those situations with each other as stated, the board do not believe as strictly correct, according to the ordinary meaning of the terms in which these allegations are made. The phraseology seems to imply that the occupation of the situations and the exchanges made have been the acts of a certain class of officers, and obtained by their concerted and united efforts. Such opinions, expressed on such an occasion, by names of such influence and respectability, must, in the opinion of the board, produce baneful effects upon the service if permitted to pass unnoticed. That the senior officers of the navy have, in point of fact, been very frequently if not constantly employed in the most important and responsible situations, while those of younger date have been less frequently and rarely employed in them, no one will deny. But to suppose that this has been produced by the actions of the officers, is to suppose that every President and Secretary has been either influenced or controlled by them; a supposition which the board believe no one, after reflection, will deem possible. On the contrary, they believe that, in making those appointments, the Executive was principally influenced by a belief that they would conduce to the public interests; and, as a secondary motive, that they were due to the relative seniority and length of service of the officers appointed.

The board again repeat their belief that the phraseology was adopted through inadvertence, and not from design; and their only motive in thus noticing it is to prevent the possible injurious effects which it might make upon the minds of the younger officers of the service if they had suffered it to pass without comment.

51. The board left this article conditional after mature consideration, and still think it preferable to making it imperative. The captain of a fleet is intended merely to aid a commander-in-chief, having no authority as such but what is derived from him. Some commanders may wish such an assistant, others may not. Those who decline them will only have more labor to perform; and of their ability and inclination to do this they may be safely allowed to judge.

102. The duty of military officers, to afford active aid in the execution of criminal process within their commands, seems to be imperative when duly required. The article would undoubtedly be improved by substituting "when lawfully required" for "when necessary."

117. The objection to this article does not seem to be valid. The captain of the fleet, in all such cases, acts in the name of, and for the commander-in-chief, and, by presumption, according to his orders.

It is hoped that the captains of the fleet, if employed, will be among the oldest instead of the youngest captains in the same fleet.

121. The objections to this article are believed to apply with more force than to 117. This article supposes the captain of the fleet to act when separated from the commander-in-chief, and gives to him more of an independent and substantive character when thus employed. The board, therefore, recommend that the words "or cause the captain of the fleet to inspect" should be stricken out.

124. This article merely requires the opinion of the commander of a squadron upon the *professional* skill and attainments of the commanders of the vessels under his charge, for the purpose of collecting in the Department information which may be useful in selecting officers for particular services; and the Executive can well judge if such reports would be useful. The board are indifferent whether they shall be considered public or confidential, as they believe that in either case they will be honorably and conscientiously made.

136. The board are constrained to differ in opinion with the officers who object so strongly to this article.

The circumstances under which the authority is granted are such that, if any useful action is had in the supposed case, it must be in the mode proposed. There is no opportunity for a formal investigation. The time is limited to a time of battle; the cause, to justify the exercise of the power, must be an *evident* avoiding of battle or duty; and the power itself is confined to the commander of a squadron or division, superior in rank. The wanton exercise of such a power, under such circumstances, is not to be supposed; the necessity for its exercise, it is hoped will never occur; but, as it is *possible*, the power should be distinctly recognized. In fact, without such an authority by regulation, no commander of a squadron, it is hoped, would hesitate, under such circumstances, to exercise the power consequent upon his rank, for the interest of his country. The regulation is not new in our own service, and exists in those of England and France, and, it is believed, in most other services. This is a subject upon which the President is peculiarly qualified to decide.

168. This article was adopted after mature deliberation, and upon a conviction that its provisions would prove beneficial to the service. The objection assumes that the Department will consider the standing of different officers affected by the relative number of punishments which they may respectively authorize. The board do not think this assumption correct, but that the offences and the nature of the punishments, with such other circumstances, leading to or connected with them, as may be stated in the explanatory remarks, will also be considered.

The board are led to believe that the operation of a similar regulation in the British navy has not been thought injurious to that service by the admiralty, from the fact that they have recently extended its provisions, so as to prevent corporal punishment from being inflicted, except by a formal warrant, signed by the commanding officer.

173. The nature and object of the remark book seems to have been misapprehended.

It is intended merely to collect geographical, topographical, and statistical information in relation to foreign ports, and arrange it in such form as to render it most readily available for use.

184. This, in its present form, may perhaps be liable to objections on account of some of the indefinite terms used, and which may lead to misapprehensions of the real intentions of the board. It is therefore recommended that it be altered to read as follows:

"The commanding officer of a vessel, in which there shall be a superior officer in actual command, will be particularly careful to carry into execution all orders which he may give in relation to the general movements and evolutions of the vessel; and will order no general exercise or formal punishment, while he is on board, without his knowledge and consent."

The board are aware that the subject of this article has been productive of some dissatisfaction, and of the difficulty of so arranging it as to be generally acceptable. They believe, however, that some general rule is absolutely necessary to the harmony and discipline of the service, and that a rule sanctioned by the President of the United States, as commander-in-chief, will prevent any unpleasant feeling on the part of those upon whom it is to operate.

The board respectfully suggest, in support of the provisions of the article, the following remarks:

The right of a superior to issue orders verbally, which he may issue by signal, will, it is presumed, be admitted; and that he has a right, by signal, to direct the movements of all the vessels subject to his orders, none will deny. When not otherwise directed, the movements of the vessel in which the commander of a squadron may be, regulate the movements of all the others, and her movements are, consequently, signals or orders to them. The commander of the squadron, therefore, should be consulted upon, and sanction all such movements, as much as for any other signal. His power to regulate all general exercises will probably not be disputed. That part of the article which relates to punishments, is intended to secure from all that measure of deference and respect which, the board are well assured, few would voluntarily render.

189. The board are of opinion that this article will give no just ground of dissatisfaction, if extended to the officers, as it was intended to be. The gentleman making the objection under consideration are mistaken in supposing that it has heretofore only been applied to seamen. The practice has been varied, some commanders having adopted it, and others not, from a very early period to a recent date. One of the objects of the article was to render the practice uniform, and deprive it of its former partial character and operation. The board still believe such an article would prove beneficial, from its general and uniform operation; but they respectfully submit the subject to the decision of the Executive, and more particularly as it would still be in the power of every commander, as heretofore, to establish it, if not adopted as a general regulation. It is not intended as a *law*.

190 and 191. It is not perceived why these articles belong more exclusively to the ordinary discipline and regulation of a ship than many others. Very few of the duties to be performed by officers are specially defined by law; they are generally defined by regulations. It does not seem to be any greater interference with the internal police of a vessel to prescribe under what circumstances and in what manner two lieutenants shall be employed upon deck than for one. It was the opinion of the board that, by limiting the number of watches to four, and arranging the officers accordingly, their chances for professional improvement would be greater, and the service of the vessel better performed than if distributed into a greater number. Believing, however, upon reflection, that, with a recommendation to this effect, the captains will probably adopt the course when expedient, they propose that the

word "may" be substituted for the word "shall," in the second line of rule 190, which will leave the article discretionary.

61, 92, 411. In the objection, these articles are considered improper and arbitrary, because they may prevent an officer from making an appeal to the head of the Department; and the same objection, but probably for different reasons, is made to 413.

That part of the article 411, to which the objections and reasons are supposed to have been intended to apply, is that which requires "all communications connected with the public service, when made by officers, to be made, open, to their immediate commander," and which, by its terms, taken in connection with those used in 91 and 92, would also require all complaints to be made in the same manner. These reasons must rest upon the assumption that, when thus made, they may not reach the proper officer, or head of the Department, as the case may require. It is not conceded that such an assumption is admissible. The article requires the superior officer to transmit them, but with such remarks as he may deem proper.

Other objections have been unofficially urged against the principles upon which these articles are presumed to rest, and it may not be amiss to notice them here.

They have been supposed by some to impair the personal rights of officers, and calculated to render their situations unpleasant, upon the presumption that the superior officer, against whom a complaint may be made, might be induced to use his power for the gratification of improper feelings.

The free right of appeal against wrong or oppression is a right which none are more willing to allow than the board. But whilst the right to appeal is recognized, both justice and convenience may, in their opinion, be promoted by rules prescribing the mode of making and deciding upon them.

The board assume that they should be so made, that those who are to decide should be possessed of all the facts in the case, and that this requires that both sides should be heard. If, therefore, the appeal should be direct, and without the knowledge of the person complained of, common justice would seem to require that he should be informed of the complaint before any other action was had in the case.

If this be done, the parties will then stand in precisely the same situation as though the information had been originally communicated to the party complained of; and as the same time will be required to forward the explanations in both cases, the practical operation of the direct appeal would seem to be more unfavorable to the complainant than the proposed course, since it would necessarily leave him longer in the situation which it is presumed his object was to avoid.

Besides this particular view of the case, the article is in strict conformity with the provision of the 51st article of the proposed revision of the laws, recently forwarded by the board, in which it is made imperative that the party against whom complaints are made, upon application for courts-martial, shall be forthwith furnished with a copy, that he may offer and forward explanations, whatever may be the disparity of rank between the parties. It would seem to be hardly consistent with either justice or the usages of the military service to deny to a superior a privilege secured to an inferior.

The board will conclude by offering as their opinion that the discipline of a military or naval force, and the true interests of the country, as connected with those establishments, require, as a general rule, the adoption of some articles similar to those in question; and they believe themselves supported in this opinion by the usages of most, if not all other military establishments.

As respects article 413, the board will merely observe that their opinion remains unchanged; that the subjects prohibited by it are not such as may at all times be left free for *private correspondence*, with safety to the public interests; and as it would be impossible to properly specify cases when it could be safely allowed, and as the subjects are altogether public in their character, it was deemed best to make the prohibition as general as it is expressed.

427. The board cannot agree with the objection that the presence and opinion of a captain in this case is "degrading" to the officer to be examined. But having no other object in view but the public interests, and believing they may be sufficiently secured by a modification of the article, they propose the following as a substitute, which will secure the opinions of medical officers when a sufficient number can be obtained:

"427. Whenever it shall be represented that the ill health of an officer requires that he should leave any foreign station, the commander-in-chief shall direct a survey to be held upon him by three officers, surgeons or assistant surgeons, if so many can be obtained; but if so many cannot be obtained, then the number, if not more than two, shall be completed by commission sea officers, who shall state their opinion upon his case; and if they consider his removal to be necessary, the medical officers shall state the particular disease or complaint which, in their opinion, occasions the necessity for such removal, as per form —."

429. The board do not think that the same objections apply to this as to the 427th; other officers may be fully equal to judge of the general physical ability of persons to perform duties on board of ship as the surgeons, and may be acquainted with facts to determine whether the disabilities, if any exist, did or did not originate after their entry into the service. The certificate to be given may, in certain cases, become the foundation of a claim for pensions, and should have equal formality as is required for them.

452. The main objection to this article is, that it appears unfair and unjust to the party upon trial, and the reason assigned is, that it may constrain him "to say only what may be agreeable to the sensitive ears of his judges, when it often happens that one of the judges may be the accuser or witness against the person tried." It is conceded by the objection that, if any "such person shall utter anything untrue or disrespectful, the court has power to punish the accused for contempt."

In framing this article, the board had in view the prevention of an inconvenience, and, as they conceived, an evil, that had more than once been felt upon courts-martial. Officers, or their counsel for them, have, through inadvertence or other causes, sometimes introduced observations in their defence which the court deemed disrespectful, and which induced them to stop the further reading. Such a course is unpleasant to all parties, and, it is believed, can be productive of benefit to none. By submitting the defence to the court before it is read, if it should contain matter that the court deems disrespectful, they may mark it for omission, and prevent interruption. If the accused deem it essential, and be willing to meet the consequences, he may suffer it to remain, (though not read,) for transmission to the approving power, with such remarks as the court may think proper. If he should think it unessential, he may erase it, and all further difficulty will be prevented. The object is no less to prevent injury to the party accused, by his own inadvertence, or from the effects of sudden feeling, than to preserve the decorum and

dignity of the court. This course is known to have been heretofore pursued in many instances, and, it is believed, with advantage to the persons on trial.

To the observation that the accuser may also be one of the judges, the board can only say that such a case has never happened, to their knowledge, and they would hope that it never may occur. Should it, however, happen from any cause, and a sense of its impropriety should not induce the member himself to offer it as an objection to his sitting upon the trial, the right of challenge secured to the accused would, it is presumed, in any court, secure his removal. That a member may unexpectedly be a witness upon some point of the case, sometimes happens; but very seldom, it is believed, except when called on the part of the accused.

The objection that the whole of this chapter (20) belongs rather to law, than to regulations having the force of general orders only, seems to be somewhat at variance with the objections to other articles of the same regulations, because they are to become law.

In the proposed revision of the laws which have been submitted, such provision has been made for courts-martial as was supposed to require or deserve the sanction of law. The subjects embraced in this chapter of regulations relate rather to the forms of proceeding under the law, and are intended to secure uniformity, and, at the same time, guard against a repetition of errors that have sometimes produced much inconvenience.

498. The objection, if sound, would permit the commanding officer of troops, when embarked as passengers or for mere transportation, to inflict punishment without the consent and against the wishes of the commander of the vessel.

The principle assumed in the article is, that the commander of a vessel has a right to require from all persons, when on board under circumstances like the above, a compliance with the general regulations and the internal police of the vessel, which, as well as the law, require that he alone shall direct punishment.

In the proposed law, an article, No. 43, is introduced upon this subject, allowing of confinement, but deferring other punishment until the troops are landed, when the case may be determined by the proper military tribunals. This and the regulation seem sufficient to prevent any conflict of authority or unpleasant feeling between the two services.

507. The article does not prohibit the employment of slaves, but merely regulates it, which, it is believed, experience has proved to be a salutary provision.

587. The proportions proposed for pensions, according to the degree of disability, were intended to be fair and just. The objection seems to be rather to the extension of the principle adopted, than to the principle itself. The board were of opinion that the lowest rate of disability named deserved some, though a small provision. The objection would seem intended to exclude such cases from any allowance.

602. The objection to this article seems to assume that a captain has an exclusive right to at least one-half of the cabin, even when opposed to the claim of his immediate commander-in-chief. The board did not feel disposed to limit with greater precision the distribution of the apartments in a single cabin, supposing that the commander of a squadron would select a proper part; but if a specific distribution be thought best, they would recommend that the latter clause of article 602 should read as follows:

"When in any vessel having a cabin on one deck only, one state room and gallery and the after cabin shall be allotted to him; the other state room and gallery to the captain, and the forward or dining cabin be common to both, or be divided, as the commander-in-chief may prefer."

Whether the officers have, as they state, expressed the sentiments of nine-tenths of the commission officers of all classes, respectively, in their communication to the President, the board have no means of ascertaining; but as it is only expressed as a matter of persuasion, and not of fact, the board feel authorized to entertain some doubts upon the subject, particularly if the opinion was intended to apply to all the objections which were submitted.

The board, having concluded their remarks upon the communication and the articles particularly objected to, beg leave to recommend a slight amendment to article 604. They suggest that the words—

"Provided that no officer beyond the complement allowed to the ship, by regulations, shall be entitled to a selection, until all those designated as her complement shall have been accommodated," be added to the end of the article. They would also recommend to add to article 603 the following words: "When a master commandant or commander shall be attached to a ship of the line, he shall be accommodated in one of the cabins, and shall not be required to mess with the ward room officers, but only at his request."

The board have been led into more detail than they could have wished, but it seemed necessary to a satisfactory explanation of their views upon the various, and, in some instances, important subjects under consideration.

They submit their remarks, confident of their receiving all the attention which they may deserve, and with equal confidence that the military experience of the President will secure a correct decision upon all points on which the board and their brother officers have differed; that he will reject whatever may be unsound, and confirm that which, according to military principles, is correct, and apply those principles with a due regard to the just claims of individuals, and to that subordination which is necessary for the security and promotion of the public interests.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS, *President of the Board of Revision.*

No. 3.

WASHINGTON, April 29, 1834.

To the Hon. Levi Woodbury, Secretary of the Navy:

Sir: Having attentively examined the remarks made by the board of revision, and transmitted to us with your letter of the 26th instant, and herewith returned, we beg leave now to invite your attention to a few observations, elucidating the objections which we have already so briefly offered to the proposed regulations for the navy, and to reply to, and endeavor to invalidate, the *defence* of the work set up by its authors.

We avail ourselves of the occasion to thank the board for the consideration which they have at-

tached to our very concise representation; it shows that they know its importance, and we will not withhold a compliment for the spirit of conciliation and calmness which promises to mark the discussion into which we have both, doubtless, been reluctantly introduced. We are not, however, aware of *any* responsibility in the course we have taken, further than to make apparent to others the propriety and justness of the views which we entertain; and *that* we think we can do most conclusively.

We do not feel as military men opposing military men in authority, or in active exercise of power over us. We know too well what, in such case, would be the forfeit. We only arraign the soundness of rules originating with military men in the discharge of civil functions.

The board express a fear that the influence of our names may excite prejudice against them, and lead to insubordination. They are too well known, personally, to be affected by any conclusions of ours; and the apprehension of insubordination may be suppressed, relying, as we do, upon the intelligence which marks the character of almost every officer of the service. Where self-respect exists, blended with acquirements, subordination must and will prevail, however strong and insidious the attempt to produce a contrary effect. It is an easy matter to cry out, insubordination! It is thus that oppressive practices may conceal themselves.

As regards our remarks about monopoly, we could not mean anything personal; yet it is assumed to be susceptible of demonstration, and a reference to the records of the Department will show that, in more than one instance, probably, the term might have been properly and justly applied. We will, however, recant it, if offence, whether well grounded or not; but we will observe that monopoly may exist without the agency of an officer, yet in his favor, by arrangements of the Department or Executive; and that it has so existed, (perhaps not designedly,) no one can or will pretend to doubt. We wish to see it corrected, and entertain strong hopes that it will be. We would approach the President on this point fearlessly, but most respectfully; we would not go to the board of revision. The President has nothing to gain in the distribution of employments and honors; they who are to receive and enjoy them are not to be expected to apply the remedy we seek; it is not in the nature of man to do so. What he can get, he will attempt not only to gain, but to hold on to; and we can readily excuse the unwillingness with which the senior officers will allow a partition of privileges, so long accustomed to as to be as familiar to their thoughts and feelings as a morning garment or an easy shoe. We would like to partake of these employments, and promise, when we do, to forego them ere we become equally wedded to the enjoyment. At the expiration of three years new tastes would be created, and rural repose might be sought, to be exchanged for the refreshing influence of the briny ocean.

The board have acquiesced in almost all of our minor points of objection, but most tenaciously adhere to the most oppressive, unjust, and odious of the code. We allude to the provisions of articles 39 and 40. Their concession, so far, avails nothing; and we do not feel flattered that they should pay regard to (comparatively) unimportant points, which we meant barely to glance at, not to present as the moving cause of this present action. The enumeration of assailable articles was intended simply to prove the propriety of another revision by another set of officers. It was not expected that the board would decry its own production, but, in point of fact, the remedies or alterations proposed by them scarcely change the features of the articles, and certainly do not materially alter the effect and bearing of them.

The necessity of another revision is still further apparent from the admission of the board. In page 9 of their remarks, they say "that, in determining upon the term of years, both for general and sea service in the respective ranks, their views were directed to their general future operation, and without any examination or reference as to their practical operation upon individuals at this time. From the statements presented by the officers of their probable operation upon the captains, under the present limited employment of our vessels, the board have no hesitation in saying that the article 40 would in practice probably exclude some for a longer time than was contemplated, as an average effect of the rule proposed, and might be productive of individual hardship."

It is so important to have a good and salutary code of rules, bearing equally in all parts, encompassing the service as the hoop does the barrel, that we see no sufficient reason to delay a suitable production, time and talents being devoted unremittingly to the accomplishment.

The board say that certain of the regulations are intended to receive such and such construction. We say that regulations should be imperative, unsusceptible of any other than a given, intended, and definite interpretation. They say they did not expect to produce a finished and perfect work. Why then hurry it, why conceal it, until approved by the high sanction of the President, and submitted for enactment by the highest power of our country? Why still press its adoption? Why not magnanimously recall it, with the view to the attainment of the best judgments of the service or community? Not only the service in particular, but the country at large, are interested in this matter. What father will permit his gallant son to enter the navy, shackled as his prospects must be by the provisions of which we so solemnly complain? Until other rules, more wholesome, can be devised, let us continue to live and act under the institutions which have already tended to advance our establishment to a degree of the most enviable elevation.

We may have erred in supposing that nine-tenths of the officers concur with us in condemnation of some of the principal provisions of the code. Indeed, we could have no opportunity or data to establish such a fact; we grant it to have been an assumption; but we know no reason to abandon it. We argued that such must be the case when the regulations should be submitted to the service and undergo dispassionate examination. In our intercourse with officers we have not heard one voice in approbation of the code. But grant that a majority are with us: is not that sufficient ground upon which to attempt the arrest of a measure of a doubtful, if not mischievous tendency? Or grant further that we are in a minority: is it not due to us to hear our arguments in vindication of our conduct? Or further, to carry suppositions to extreme lengths, may not the minority *sometimes* be on the right side of a question?

With these crude, preliminary remarks, we would observe that there appears to us an obvious and indisputable propriety in carrying into effect a practice of changing in rotation, or by extended selection from one situation of command, distinction, or responsibility, to that of "leave," free from occupation for a time, with, however, a necessary pay for subsistence, and distinction appropriate to the place which we ought to hold in social intercourse. Or, in plainer words, that the officers who have so long held these situations should be placed for awhile on leave of absence, as we now are, and have been for a long time.

This suggestion leads to a critical and generous canvass of the operation of the 40th article, whereon

hinges all that is important, all that is vital to the military constitution of our establishment. We will examine this special and specious article with the caution with which it is framed; and will avoid the infliction of pain to others, by citing only the effects on ourselves, which we must suffer, willing or otherwise. If this article be retained, it is valueless to us that the board accord other changes in their code; this is the only, or rather principal one, operative upon the destiny of the service. Let it be retained, and we would much prefer, if nature would permit, to return to our rudimental schools, forego entrance into the navy, or at least be midshipmen again therein. It cannot be submitted to patiently, and should be resisted at all risks and absolute sacrifices. We seriously look upon it as derogatory equally to those who have attempted its imposition as to those who acquiesce in it; not only to us, but to those who are to succeed to our places; and although present advantages and considerations may preclude a just conception of the matter, we will not hesitate to express the deep conviction that our conduct in this momentous affair will secure to us, ultimately, lasting praise and reputation. Our only aim is the advancement of the service to a permanent and useful condition; such is, doubtless, the object of our opponents in opinion. They, however, have allowed themselves to be narrowed down to the phraseology, not the intent, of the resolution under which they have proposed the adoption of rules by Congress. We do insist upon it as indispensable that all of us, as captains, should be equally eligible, in the judgment of the President, to any and every species of command leading to honor, or conducive to the public and national weal and eclat. The difference of a few years, in point of entrance into service, forms no argument against our pretensions. Until now we never dreamed that youth, or a man who had passed through all the probationary stages of the profession to the highest grade, up to the age of forty years or more, could be regarded as not qualified to fulfill all the duties enjoined by his commission. If not adequate at such time, when, we would ask, will he be? We would also demand to know of the board at what age were the commanders by whom the most brilliant of our achievements were consummated. Opportunity, to be sure, presented, but an age, far short of the most junior of us, furnished the sinew and genius for these justly boasted exploits. The names of the gallant Decatur, and others scarcely less illustrious, furnish a reply.

But a navy yard, it seems, is considered to be the test of an officer's excellence. Who created navies without navy yards? Who fought squadrons successfully without commodores? We answer, Perry and Macdonough, who were only masters commandant, and had been less than fifteen years in the service from the period of their first entrance as midshipmen. According to the present scale of graduating qualifications, they were absolutely, in comparison with ourselves, in technical parlance, "youngsters." If, then, navy yards are of such difficult management, let us be assigned to duties within them; that when the present incumbents shall, in the course of nature, have passed away, (a period which we by no means desire to hasten,) we may have had a chance of acquiring the necessary knowledge which, it appears, is deemed to be so essential. We would ask, however, if our going to sea for three additional years as *captains* can qualify us for those shore purposes? And we would further inquire if all the captains, or, as is courteously styled, commodores, have had active sea duties of that duration since they first received their captains' commissions? This is proposed with seriousness. It may be asked further, have they accomplished themselves at sea for duties on shore? Or do their shore or bureau duties or functions increase their excellence for commands afloat? Yet we perceive them *drifting* from one into the other as easily as does the ship glide from her ways into our favorite element. How is this adaptation for either situation produced? Is it a gift, is it intuitive, or the magical effect of the act of the Department? Be it what it may, let the cause and source be communicated to us. In fine, let us be tried, and not prejudged as deficient of adequate abilities. If the heir-loom is to descend to us, let us know how we are to prepare ourselves to receive, and consequently how to sustain it. At some period, some of us must, of necessity, assume the burden which our seniors now so willingly shoulder. Let us relieve them for awhile; let them enjoy the leisure, for a time, which we have so long, as captains, revealed in. Their private resources are more ample than ours, and the demands upon them scarcely more extended. Let them be supervisors of the detail management of the service, and, if we fail, they can be at hand to rescue the establishment from deterioration or degeneracy. We would ask, why is it necessary, why is it advisable, to make a distinction, in point of privileges, between captains more than amongst members of the Senate or House of Representatives, or the judges of the Supreme Court? Date of appointment gives no distinction there. Talents, assiduity, and devotion may claim it. Herein we cannot allow ourselves to be inferior to those who precede us. It does appear to us to be marvellously strange that an attempt should be made to deprive us of eligibility to the highest appointments in our profession, merely because we have not attained a specific term of years greater than that prescribed for a representative, senator, or even President of the country. Is it just, is it reasonable? The gift of life happens not to be in a man's own keeping; but, if it was, he must, by the rule, be advanced so far as to be, in a degree, indifferent to this world's honors. Let us look back to the situation of the junior captains of the navy. They entered the service in youth, intending to make it a profession for life; served through the inferior grades of midshipmen, lieutenants, and masters commandant, and have held their present rank (that of captain) from four to over six years. What animated them through the toilsome, and in some respects discouraging, paths of duty, with a mere pittance of pay, and promotion long deferred? It was the fond hope that, when they should have attained the highest rank in the navy, *they too* would be allowed to enjoy a fair participation in honorable, and in some instances profitable, command. What has been our situation through this period of probationary service, on the score of emolument? We answer, an average of about \$700, less certainly than \$800; whilst our seniors have, for the same period of twenty-seven to thirty years, been enjoying the highest possible pay which the law allows. We might with great propriety allege that, if our juvenility is an objection to us, the advanced period of life of some of our seniors presents obstacles to the useful fulfillment of their high callings. There must be some middle point for usefulness; the question then arises, when shall we reach it?

Amongst the explanations furnished by the board, it is stated as intended to be left optional for the masters commandant to be placed as nondescript lieutenants on board of line-of-battle ships for information sake. We do not quote the language, but convey the idea. We ask the question, have all our seniors been in line-of-battle ships, or were they gifted themselves with the knowledge which they prescribe to others? Yet for the command of these ships they are qualified, because they have been fifteen or more years captains, acting as commodores afloat, or holding places in navy yards, or the Navy Board, or board of revision of naval regulations. If seniority must have its weight, then, we say, let the time be determined from *original entry into service*; not the arbitrary term fixed to suit themselves, as deduced from the ter-

mination of the late war. Have we not fully shared the dangers incident to our profession with our seniors? Ought we not then to participate in its honors and advantages?

To get rid of some difficulty, we would again urge the creation of admirals. The ideal rank, based on age of service, will never avail us in our intercourse with foreign navies, and is unimportant at home. Indeed, the desire to assimilate with our army, which has distinctions appropriate to itself, only excites jealousy on its part towards us, and we forego our *just* pretensions in the wish.

It is needless to weary you with further remarks. The subject of the regulations is so vital to our establishment, that it cannot fail to claim a large share of your attention, notwithstanding other momentous matters which engage the deliberations of the Executive.

We do conscientiously believe that the present code, if adopted as offered, will be like a frost or mildew—an incubus on the energies of the service. We pray that it may be dispelled. Not a shade of doubt should rest on any article, however unimportant apparently; and, in point of relative rank, we ought not to pursue a shadow and forego the substance.

In addition to the foregoing remarks, we will simply add that an attenuated discussion, exhibiting in detail all the pernicious operations which the proposed regulations might have on the service generally, formed no part of our plans; on the contrary, we but too well know that such an attempt must necessarily involve an angry contest. Our declared object is to satisfy the President that the proposed code does contain some highly exceptionable provisions, and that the ambiguity which very generally pervades the whole work is well calculated to destroy all that might otherwise be useful.

We believe now, as we did when we first read these regulations, that our objections are valid and incontrovertible, and in nowise weakened or answered by the elaborate reply of the board of revision; on the contrary, their candid admissions of want of perspicuity in some instances, and that the operation of some of the articles (for instance No. 40) would, in the present state of the navy, produce effects not contemplated by the revisers themselves, and might therefore do injustice to some, prove that our warning voice was not raised without good and sufficient reasons.

In closing these remarks, we will ask your attention to an anomaly in the labors of the board, which ought not to pass altogether unnoticed. It is this: that they have submitted *regulations* for the approval of the President and Congress, which are designed to enforce *laws* not yet enacted, or, in fact, as yet but in embryo. The law is the only true basis upon which regulations can or ought to be formed; and if we have no law, how can regulations be made to carry into effect that which has no existence? for it is not pretended that the proposed regulations are at all applicable or adapted to the laws by which the navy is at present governed. If regulations, intended as explanations to laws, are deemed to be so vague and unsavory, and so obnoxious to opposition, what may not the laws themselves be?

All which, with our objections previously furnished, are most respectfully submitted by

Your very obliged and obedient servants,

WOLCOTT CHAUNCEY.
THOS. AP CATESBY JONES.
WM. COMPTON BOLTON,

*For himself, and in behalf of Captains E. P. Kennedy,
Wm. B. Shubrick, and Charles W. Morgan.*

No. 4.

WASHINGTON, June 4, 1834.

To the Secretary of the Navy:

SIR: The members of the board of revision, at present in the city, have the honor to acknowledge the receipt of your letter of the 19th ult., covering a communication to you from Captains Wolcott Chauncey, Thomas Ap Catesby Jones, and William Compton Bolton, for himself, and for Captains E. P. Kennedy, William B. Shubrick, and Charles W. Morgan, and, in compliance with your directions, submit the following remarks:

The communication of these officers refers principally to the 39th and 40th articles of the proposed regulations for the navy. They state that upon these "hinge all that is important; all that is vital to the military constitution of our establishment;" and upon the 40th they subsequently express an opinion, and "insist upon it as indispensable that all of us, as captains, should be equally eligible, in the judgment of the President, to any and every species of command tending to honor, or conducive to the public and national weal and eclat;" and to support this latter opinion, they refer to the gallant deeds of particular officers.

From the above-quoted expressions, and from the general tenor of the communication, the board infer the opinion of these officers to be, that among *captains* seniority is entitled to no preferences for any kind of employment, and that any regulation which recognizes such a claim is derogatory to the whole grade—to seniors as well as to juniors. The board, on the contrary, are of opinion that, other circumstances being equal, seniority is entitled to some preferences as well among captains as among officers of other grades; and that, if the principle be unsound when applied to them, it must be unsound when applied to others having military duties to perform. They perceive no reason why the grade of captains should be exempted from a principle which is to be applied to the lower grades, and consequently none why the 28th, 37th, 41st, and 42d articles are not equally exceptionable as the 39th and 40th.

The board are, however, still of the opinion already expressed, that the principle involved in these articles is strictly in accordance with universal military and naval usage, and, when limited and controlled, as is proposed in the 44th article, not less beneficial to the officers themselves than conducive to the harmony and efficiency of the navy, and to the consequent promotion of the public interests. Uncommon merit, or the distinguished conduct of individuals, constitutes exceptions which cannot properly be taken as the basis of regulations intended to be general in their application.

With respect to the ambiguity which they state "very generally pervades" all the regulations, the board can only say that, if the complaint be well founded, they sincerely regret the defect. They believe, however, that the preparation of a set of regulations, in language which shall, as these gentlemen require,

be free from "a shade of doubt," and "unsusceptible of any other than a given, intended, and definite interpretation," may be found a more difficult task than they are disposed to consider it.

As respects the transmission of the regulations without the proposed amendments to the law, no explanation is necessary to you, sir, who are acquainted with the facts.

That the proposed regulations are not pretended to be applicable to the present law, is a mistake. They were intended to be framed with reference to the existing laws, with the exception of two articles in the chapter for pursers, and for these substitutes were presented, to be used if the law should not be changed; and with the further exception of using for the terms "master commandant" and "sailing-master," those of "commander" and "master," which had been recommended as substitutes.

With reference to some of the general remarks of the officers upon the conduct of the board, the members beg leave to state that they are not aware of having expressed any apprehension that the objections or remarks formerly presented by these captains would lead to "insubordination," or of having made any remarks which justify or authorize the concluding observations of those officers upon that subject.

They would further state that they are not conscious of having improperly hurried the compilation of the regulations, nor of having improperly concealed them, nor yet of having in any degree pressed their adoption.

To the question "what father will permit his gallant son to enter the navy, shackled as his prospects must be by the provisions of which we so solemnly complain?" they answer that a majority of the members of the board of revision have sons in the navy, whose prospects will, in common with others, be shackled with these provisions, should they be adopted.

Whether the board conformed to the intent, or allowed themselves to be "narrowed down to the phraseology" of the law under which they acted, or whether the regulations ought to undergo "another revision by another set of officers," or be recalled "with a view to the attainment or the best judgments of the service or community," the board willingly leave to the decision of the Executive.

Upon those passages of the communication which allude to the members of the board, they are constrained to consider them gratuitous and unnecessary. They believe the propriety or expediency of regulations to depend upon their probable beneficial or injurious tendencies or effects, and not upon their origin or the motives which may have induced them; and entertaining these opinions, they abstain from any further remarks.

The absence of some of the members, usually resident in the city, has occasioned a delay in forwarding these remarks, which would not have otherwise occurred.

I have the honor to be, very respectfully, sir, your obedient servant,

JOHN RODGERS, *President of the Board of Revision, &c.*

No. 5.

WASHINGTON, *May 26, 1834.*

SIR: We request leave to lay before you the following objections to the revised rules and regulations for the navy:

The clause of article 4th of the revised regulations, which assigns assimilated rank to the medical officers *next after* lieutenants, has given great dissatisfaction to these officers. They believe that its tendency is to lessen the respectability of the corps, and place it in an unnatural position in reference to the class with which it is associated, for the following reasons:

Rank to a surgeon is nominal; it confers no authority, nor carries with it any command; it only extends to the observances of respect due to the grade with which it is assimilated. He is forbidden, by the 4th article, from exercising command over any sea officer, in consequence of this assimilated rank, and is placed under the command of "every other sea officer, whatever be his rank, when he succeeds to command, when he is officer of the watch, or when employed on detached service." It is evident then that a surgeon's rank, whatever it may be, cannot interfere with the interests of the service or the ship's duty in any manner. To place him below the lieutenants for any other purpose than to enable them to command when discharging their duties, is giving them a social or personal rank which would be a constant source of annoyance and irritation between the two classes, so closely are they associated on board ship. We have asked what is the object of disgrating the medical corps; and it is replied that it is to be enabled to arraign the surgeon under the stronger charge of disrespect to a superior, in case of a breach of discipline when he and the lieutenant are concerned. It is manifest, from the above quotations of the regulations, that the lieutenant's superiority, and the surgeon's responsibility to him, are clearly pointed out, whenever discipline or the ship's duty is involved, and a provision might be inserted in the penal code to embrace such cases. But wherein is the public interest subserved by punishing the surgeon more severely than the lieutenant for violations of discipline which may occur in their social relations? We will cite an instance, and it is no fiction. A surgeon, going on leave with a portion of his messmates, the lieutenants, takes his seat in the boat, and is ordered by one of them to move further forward for his accommodation; what interest of a public nature requires obedience to such an order, under penalty of disrespect to a superior? We cheerfully grant the lieutenant's superiority in all their military functions, but it is against its being brought down to the private and social relations which must exist in our common apartment that we protest. In the instance above cited, we acknowledge the lieutenant's undoubted right to order a surgeon to any part or out of the boat, if he is in discharge of his duties, and a refusal would be disrespect and disobedience to a superior. As the surgeon's rank is neither seen nor felt in the exercise of power, it is evident he should be assimilated *with* and not *next after* any grade, to secure the respect due to it. The position assigned him has no reality, and, of course, has no military observance. The tendency this will have to lessen him in the estimation of the community in which his services are required, is obvious. In fact, the only value of rank to a surgeon is its being considered an expression of the estimate placed upon his profession in military organization. Hence we feel degraded in being rated below all commissioned officers; and what is calculated to make the corps still more sensible of the inferiority assigned to it is, the fact that secretaries, who hold no commission or warrant in the service,

whose appointment is temporary and derived from the captain, are assimilated with surgeons and pursers in the anomalous rank of *next after* a lieutenant.

Upon what principle of justice can a class of officers who devote their lives and services to the navy, and pass through a subordinate and irksome grade to reach the one they can never leave, be depressed to take in those who are not *officers* of the United States navy?

Article 604, which gives the selection of the state rooms to the lieutenants, does great injustice to the surgeons. They have journals and expenditure books to keep; daily and monthly reports to make; delicate instruments to preserve; and a selection of professional books and plates, to assist them in the discharge of their duties, to carry with them: a good state room is indispensable for these public purposes. The room which will fall to the surgeon by this regulation is entirely unsuitable. The lieutenant has no public duties to perform in his room; personal convenience is his strongest claim. Upon what principle should the surgeon be denied equal comforts and convenience? He is stationary, while the lieutenant passes by him to the higher rank and comforts of the cabin. He has no hope of higher privileges to cheer him under the privations of even the best comforts of the ward room, and he is now deprived of the apartment which the long established custom of the service gave him, to increase, in a very slight degree, the personal convenience of an officer whose occupation is temporary. The berth allotted to us by this regulation is far below that of the boatswain or gunner, in comfort, omitting all notice of its unsuitableness for our public duties.

Article 337 is oppressive, without securing the public interest in the best manner. It may be complied with, and yet the ship may not have the competent medical aid which the article intends shall always be on board. It says the oldest assistant is never to be absent at the same time with the surgeon. The youngest assistant (indeed there may be but a day's difference in the date of their commissions) may be the most trustworthy, yet he and the surgeon may be allowed by the commander to be absent together, and the ship will have the least efficient aid without violating the rule. It will be oppressive, when the surgeon is absent from sickness, on the oldest assistant; be the time long or short, he cannot be allowed the customary indulgence of a few hours' leave for recreation. The surgeon will be confined on board in the same manner, if the oldest assistant should be detained on shore for months at a time.

If the article ran thus, "In the absence of the surgeon, the assistant surgeon oldest in commission will perform his duties, and the ship is never to be left without competent medical aid," there would be no unjust discrimination, and the public interest fully secured by making the commander responsible, should the medical officer lose sight of his duty.

Objections have been made against the contingency expressed in article 322, that part of article 333 referring to the inspection of the journal, and to the 314th article.

The articles commented upon we confidently believe will diminish the respectability and utility of the medical corps, without adding, in the slightest degree, to the efficiency of the general service; and we feel justified, therefore, in respectfully seeking your interposition, should the subject be brought under your consideration, to prevent their becoming laws without being amended.

We are, very respectfully, your obedient servants,

THOMAS J. BOYD.
GEORGE TERRILL.

No. 6.

WASHINGTON, June 4, 1824.

To the Hon. L. Woodbury, Secretary of the Navy:

SIR: The members of the board of revision, at present in the city, have the honor to acknowledge the receipt of a communication from Surgeons Boyd and Terrill to you, which you transmitted to the board for such remarks as they might deem proper.

The first objection of the surgeons is to the assimilated rank in the 4th article of the regulations as proposed to be amended, and the grounds of their objections seem to be, that they are there placed in a lower rank than is due to their duties, and than has heretofore been conceded to them by usage.

The board found no established relative rank for any of the civil officers of the navy, and considered it very important that such relative rank should be clearly defined between them and the sea officers when on duty together, that all might know who had the right to command, and who was bound to obey.

Usage had established nothing upon the subject which was universally recognized. That which existed was based upon habitual association in the same apartments; but it was loose and indefinite, even upon this basis, because sea officers of different ranks were associated together.

In deciding upon the rank to be assigned, when upon duty together, the board had reference to our own usage, to analogies deduced from other services, and to their impressions of what the public interest required.

They conceived these interests to require the surgeons to be subject to the orders of all lieutenants when on duty with them, and to those of any sea officer, even of inferior rank to lieutenants, when they should be in command of a vessel, navy yard, or detachment, or when in temporary charge of the ship as officer of the watch. The regulation was framed accordingly.

The amendment proposed by the surgeons would deprive lieutenants of the power to give them orders, except under circumstances when any sea officer of inferior rank would have the same right, unless the lieutenant was senior in commission. The board consider this exemption from command objectionable, with reference to the public interests; but as they have no other object in view than to determine the relative powers of officers when on duty, and are desirous of consulting personal feeling when not inconsistent with public interests, they suggest a modification of the article, to be used instead of the substitute proposed by them on the 25th April last, viz.:

Substitute for the 4th article.

"The civil officers of the navy shall have assimilated rank with the sea officers of the navy, as follows:

"Surgeons, pursers, chaplains, and secretaries, with sea lieutenants.

"Passed assistant surgeons with masters.

"Other assistant surgeons and schoolmasters with passed midshipmen, and clerks with midshipmen.

"No marine officer or civil officer of the navy shall, in consequence of any relative or assimilated rank, have command over any sea officer of the navy, except as provided in article 5; but the marine officers and civil officers of the navy, who shall be attached to any vessel of the navy, or to any navy yard, station, or other service which shall have been placed under the command of a sea officer, shall be subject to the lawful orders of the sea officer of equal or superior relative or assimilated rank, and to the lawful orders of the sea officer who may be placed in, or who may succeed to, command, and of the officer in charge of the watch for the time being, whatever may be his rank."

The regulation, as thus modified, will secure all the objects proposed by the board, and assigns to the medical officers as high a relative rank as is assigned them in any other service, and fully equal, as the board believe, to that which has ever been recognized in our own by former usage.

The gentlemen state what, as they understand, was the object of introducing the article in relation to the surgeons. On this subject they appear to have greatly misunderstood the members of the board. It was observed by some of the members, in conversation, that, in the present state of the service, there was nothing to determine relative official superiority between the civil and sea officers, and that, consequently, courts-martial must be left without guide to determine whether the high military offences of disobedience to lawful orders, or disrespect to a superior officer, had or had not been committed, when charged upon civil officers, who might have refused to obey the orders of a sea officer, or have been brought into personal collision with him, even when all the facts had been fully proved, and that one of the objects of the article was to supply this general defect.

The power granted to the commander-in-chief of a fleet or squadron by the 314th article, seems to be not only unobjectionable, but necessary, so that the surgeon of the fleet may be placed where his services, from any cause, may be most required.

In article 317, when the board authorized the surgeon of the fleet to make remarks upon the journal of the surgeons, they did not mean or suppose that he should make them in the journal. If deemed necessary, the substitution of the words "in relation to" for the word "upon" will place the matter beyond a doubt.

The condition in 322 is unavoidable; all vessels will not admit of such a store room as is therein named.

In article 337, the original intention of the board was to have inserted the words "by leave" between the words "absent" and "at." They were accidentally omitted. Not conceiving it very material, however, the board have no objection to the omission of the words "who is never to be absent at the same time," leaving it to the responsibility of the commanders.

An amendment to article 604 has already been suggested for your consideration, limiting the choice by the officers to the numbers forming the established complement of the vessel.

In distributing the state rooms, or sleeping berths, among the different officers, reference was had to the ordinary duties and exposure of the officers, and their relative rank. The sea lieutenants are exposed in a much greater degree to fatiguing duties than any of the civil officers, and seemed entitled, from that circumstance, to a preference in the distribution of the rooms; besides, they have other duties to perform, similar in character to those enumerated by the surgeons in their letter. They are required to keep journals: valuable instruments are necessary for the proper performance of their duties as navigators. Books and study are equally necessary for their professional as well as for their general improvement. The usage of the service upon this point has not been uniform, but varied; and every commander has hitherto considered himself at liberty to regulate the subject, according to his views of propriety. To arrange the subject permanently and uniformly, was the purpose of the regulation.

After a careful review of the subject, in connection with the views presented by the surgeons, the board have decided to recommend a modification of the article, instead of that proposed by them on the 25th of April, which will place the surgeons nearer the situation they wish. They propose to strike out all of the *last* sentence of article 604, and to insert in its place the following words, viz:

"The choice of state rooms and sleeping berths for the above officers shall be in the following order: The six senior sea lieutenants in ships of the line, the four senior sea lieutenants in frigates, and the three senior sea lieutenants in sloops, according to their rank; then the master, purser, and surgeon; then the other sea lieutenants, to the number allowed to the ship by regulation, according to their rank; then captains and first lieutenants of marines; then chaplains and secretaries."

The board are well aware of the great importance to the navy of a medical corps possessing high professional qualifications, and feel great gratification in believing that in this respect no other service surpasses, if it equals our own. They would not willingly propose or assent to any regulation which should tend to lessen its present or future usefulness, or its relative respectability; but while the board entertain these feelings, they consider themselves bound to look also to all other branches of the service, and consider the just claims of other officers, upon some of whom duties of at least equal if not of superior importance will devolve, and for the proper performance of which at least equal talents, assiduities, and advantages are requisite.

I have the honor to be, with great respect, sir, your most obedient servant,

JOHN RODGERS, *President of the Board of Revision, &c.*

No. 7.

Schedule of the number of each regulation objected to, and memoranda as to the opinion of the President and Navy Department on the propriety of any change.

Article 2. Amend thus: after the word *appointed*, insert "in conformity to these regulations."

Article 4. Amend, by substituting the following in place of this article: "The civil officers of the navy shall have assimilated rank with the sea officers of the navy, as follows:

"Surgeons, pursers, chaplains, and secretaries, with sea lieutenants.

"Passed assistant surgeons with masters.

"Other assistant surgeons and schoolmasters with passed midshipmen, and clerks with midshipmen.

"No marine officer or civil officer of the navy shall, in consequence of any relative or assimilated rank, have command over any sea officer of the navy, except as provided in article 5; but the marine officers and civil officers of the navy, who shall be attached to any vessel of the navy, or to any navy yard, station, or other service which shall have been placed under the command of a sea officer, shall be subject to the lawful orders of the sea officer of equal or superior relative or assimilated rank, and to the lawful orders of the sea officer who may be placed in, or who may succeed to, command, and of the officer in charge of the watch for the time being, whatever may be their rank."

Article 9. Amendment not deemed necessary.

Article 10. Amendment not deemed necessary.

Article 11. Amendment not deemed necessary.

Article 18. Amendment not deemed necessary.

Article 22. Amendment not deemed necessary.

Article 37. Amendment not deemed necessary.

Article 39. In No. 39, alter the term to two years.

Article 40. In No. 40, reduce service of captains to six years in all, and two years at sea before ordered to a yard.

Article 51. Amendment not deemed necessary.

Article 102. Amend thus: substitute "when lawfully required" for "when necessary."

Article 117. Amendment not deemed necessary.

Article 121. Amend thus: strike out "or cause the captain of the fleet to inspect."

Article 124. Amendment not deemed necessary.

Article 136. Amendment not deemed necessary.

Article 168. Amendment not deemed necessary.

Article 173. Amendment not deemed necessary.

Article 184. Amend, to read thus: "The commanding officer of a vessel, in which there shall be a superior officer in actual command, will be particularly careful to carry into execution all orders which he may give in relation to the general movements and evolutions of the vessel; and will order no general exercise or formal punishment, while he is on board, without his knowledge and consent."

Article 189. Amendment not deemed necessary.

Article 190. Amend thus: alter "shall" to "may."

Article 314. Amendment not deemed necessary.

Article 317. Amend thus: insert after "remarks" "in relation to" in place of "upon."

Article 337. Amend thus: strike out "who is never to be absent at the same time."

Article 411. Amendment not deemed necessary.

Article 413. Amendment not deemed necessary.

Article 427. Substitute as follows: "Whenever it shall be represented that the ill health of an officer requires that he should leave any foreign station, the commander-in-chief shall direct a survey to be held upon him by three officers, surgeons, or assistant surgeons, if so many can be obtained; but if so many cannot be obtained, then the number, if not more than two, shall be completed by commission sea officers, who shall state their opinion upon his case; and, if they consider his removal to be necessary, the medical officers shall state the particular disease or complaint which in their opinion occasions the necessity for such removal, as per form—."

Article 429. Amendment not deemed necessary.

Article 452. Amend thus: at the close adding, "but it shall be filed with the proceedings if the accused desires it."

Article 498. Amendment not deemed necessary.

Article 507. Amendment not deemed necessary.

Article 587. Amendment not deemed necessary.

Article 602. Amendment not deemed necessary.

Article 603. Amend, by adding, "when a master commandant or commander shall be attached to a ship of the line, he shall be accommodated in one of the cabins, and shall not be required to mess with the ward room officers, but only at his request."

Article 604. Amend, by striking out all of the *last* sentence, and insert in its place the following, viz: "The choice of state rooms and sleeping berths for the above officers shall be in the following order: the six senior sea lieutenants in ships of the line, the four senior sea lieutenants in frigates, and the three senior sea lieutenants in sloops, according to their rank; then the master, purser, and surgeon; then the other sea lieutenants, to the number allowed to the ship by regulation, according to their rank; then the captains and first lieutenants of marines; then chaplains and secretaries."

23D CONGRESS.]

 A. Wurts, Oliver S. Glisson, James T. McDonough.
 Midshipmen—James F. Armstrong, Richard Bache, jr., Wm. B. Beverley, Henry L. Chipman, John
 Contee, Henry Eld, James M. Frailey, A. F. V. Gray, William H. B. Johnson, D. Lynch, Wm. E. Le Roy,
 Thomas W. Magruder, Peter U. Murphy, Richard D. McDonald, Jno. S. Neville, Matthew S. Pitcher,
 Ferdinand Pepin, Charles Richardson, John B. Randolph, Richard Wainwright, Maxwell Woodhull, Wm.
 A. Wayne, S. A. Washington.
 Boatswain—Thomas Ring.
 Gunner—Asa Curtis.
 Sailmaker—James Davis.

Marine officers:

Captain—John Harris.
 Lieutenants—William E. Stark, T. M. W. Young.

Frigate United States:

Captain—John B. Nicholson.
 Lieutenants—William E. McKenny, Jno. S. Chauncey, Edmund Byrne.
 Fleet surgeon—William Turk.
 Assistant surgeons—John V. Smith, Robert M. Baltzer.
 Purser—John N. Todd.
 Chaplain—George Jones.
 Acting master—Passed Midshipman Thos. Turner.
 Passed midshipman—Simon B. Bissell.
 Midshipmen—Joseph H. Adams, Charles A. Auzé, Nathaniel G. Bay, Francis E. Barry, George Col-
 vocoressis, Thomas W. Gumming, James L. Heap, Richard L. Love, Allen McLane, David D. Porter, Wm.
 B. Renshaw, Woodhull S. Schneek, Richard M. Tillotson.
 Boatswain—George Blanchard.
 Gunner—Samuel G. City.
 Carpenter—Patrick Dee.
 Sailmaker—Jno. Beggs.

Marine officers:

Lieutenants—Benjamin Macomber, Francis C. Hall, William Lang.

Frigate Constellation:

Captain—George C. Read.
 Lieutenants—John Rudd, David R. Stewart, A. K. Long, Neil M. Howison.
 Surgeon—Mordecai Morgan.
 Assistant surgeons—John C. Mercer, Samuel C. Lawrason.
 Purser—Josiah Colston.
 Chaplain—Walter Colton.
 Passed midshipmen—Geo. M. Hooe, acting master; H. G. Myers.
 Midshipmen—Thomas A. Budd, William L. Herndon, Henry H. Lewis, J. R. M. Mullany, Wm. Ross
 Postell, Fabius Stanley, Richard S. Trapier, George Wickham, James C. Williamson.
 Boatswain—William Brown.
 Gunner—Henry Keeling.
 Sailmaker—Benjamin Crow.

List of officers, received after the greater portion of the register had gone to press:

Sloop John Adams:

Master commandant—P. F. Voorhees.
 Lieutenants—Thomas Pettigru, Edmund Byrne, Charles H. McBlair, Neil M. Howison.
 Surgeon—G. R. B. Horner.
 Assistant surgeon—J. Vaughan Smith.
 Purser—Edward T. Dunn.
 Acting sailingmaster—Passed Midshipman James F. Schenck.
 Midshipmen—Franklin Anderson, Nathaniel G. Bay, Clarence Watkins, Francis E. Barry, Wm. G.
 Ringgold, James H. North, Robert H. Pegram, F. V. Delberghe, Wm. L. Herndon, James Anderson.
 Boatswain—William Waters.
 Acting gunner—David Taggert.
 Acting carpenter—Daniel Baine.
 Acting sailmaker—Maddison Wheeden.

The following were recently ordered to report for duty in the squadron:

Lieutenants—Lloyd B. Newell, John T. Jenkins, John A. Davis.

By recent changes it is not known to what vessels the following are attached:

Midshipmen—Carlisle P. Patterson, E. T. Shubrick, Richard L. Tilghman, J. A. Underwood, John W. D. Ford, Edmund C. Kennedy, Richard M. Harvey, John O. Wilson, Wm. S. Williamson, John. A. Jarvis,

Schooner Shark:

Lieutenant commanding—H. Paulding.

Lieutenants—William G. Woolsey, Charles H. Jackson, James T. Homans, John G. Rodgers.

Assistant surgeon—Edward H. Freeland.

Purser—Andrew McD. Jackson.

Passed midshipmen—John J. Glasson, acting master; A. Griffith, Wm. W. Bleecker, James R. Sully, Ferdinand Piper.

Midshipman—James Riddle.

WEST INDIES.

Sloop Vandalia:

Master commandant—Thomas T. Webb.

Lieutenants—Thos. J. Manning, Z. F. Johnson, John Graham, Charles C. Turner, Gurden G. Ashton, A. B. Fairfax.

Fleet surgeon—John A. Kearney.

Assistant surgeon—Lewis W. Minor.

Purser—Dudley Walker.

Passed midshipmen—J. K. Mitchell, acting master; T. M. Washington, Stephen C. Rowan.

Midshipmen—John G. Anthony, Charles C. Barton, Thomas W. Gibson, A. A. Holcomb, George W. Harrison, James D. Johnston, Edmund Lanier, James McCormick, Lafayette Maynard, Hendrick Norvell, George W. Randolph, James W. E. Reid, George J. W. Thayer, Jno. J. B. Walbach.

Acting boatswain—George Wilmouth.

Acting gunner—John Hay.

Acting carpenter—Joseph Cox.

Sailmaker—William Bennett.

Marine officer:

Lieutenant—Andrew Ross.

Sloop St. Louis:

Master commandant—Thomas M. Newell.

Lieutenants—William S. Harris, Wm. C. Wetmore, Samuel Mercer, Richard H. Morris.

Surgeon—John S. Wily.

Assistant surgeon—Euclid Borland.

Purser—Francis G. McCauley.

Passed midshipman—John W. Cox, acting master.

Midshipmen—T. A. M. Craven, Jas. A. Doyle, Jesse E. Duncan, Charles W. Elliott, Sam'l Garrison, Montgomery Hunt, jr., Ninean E. Lane, Thomas W. Melvill, Thomas M. Mix, John N. Maffit, Richard W. Meade, Wm. E. Newton, Frederick Oakes, J. W. Revere, Wm. W. Smith, Edward C. Ward.

Boatswain—John Ferris.

Gunner—Francis Gardner.

Carpenter—Richard D. Berry.

Sailmaker—Thomas J. Boyce.

Schooner Grampus:

Lieutenant commanding—Joseph Smoot.

Lieutenant—Arthur Lewis.

Assistant surgeon—D. C. McLeod.

Purser—Sterrett Ramsay.

Passed midshipmen—E. T. Doughty, acting master; Sam'l Swartwout, John M. Gardner, A. H. Kilty.

Midshipmen—Geo. W. Chapman, Roger Perry, Wm. L. Parkinson, Charles Steedman, Henry S. Stellwagen.

Schooner Experiment:

Lieutenant commanding—Thomas Paine.

Lieutenants—Hampton Westcott, Stephen Johnston, Augustus R. Strong.

Assistant surgeon—Geo. B. McKnight.

Purser—Peyton A. Southall.

Passed midshipmen—J. W. Jarvis, acting master; Wm. Lambert.

Midshipmen—Wm. Leigh, Francis B. Renshaw.

COAST OF BRAZIL.

Sloop Lexington:

Master commandant—Isaac McKeever.

Lieutenants—Joseph Myers, Jno. Bubier, John H. Little, Thompson D. Shaw.

Surgeon—Robert J. Dodd.

Assistant surgeon—William L. Van Horn.

Purser—Andrew J. Watson.

Passed midshipman—G. G. Williamson, acting master.

Midshipmen—Edwin J. De Haven, Baldwin M. Hunter, Richard H. Lowndes, William Pope, B. F. Shattuck, Samuel A. Turner.

Acting gunner—James M. Cooper.

Acting carpenter—N. S. Lee.

Acting sailmaker—William Ward.

Sloop Peacock:

Master commandant—David Geisinger.

Lieutenants—R. B. Cunningham, H. Y. Purviance.

Surgeon—Benajah Ticknor.
 Purser—F. B. Stockton.
 Passed midshipmen—Arthur Sinclair, acting lieutenant; Thomas W. Brent, acting lieutenant.
 Midshipmen—Wm. H. Brown, acting master; George R. Carroll, D. Ross Crawford, Jno. De Camp,
 Jno. Mooney, Lewis H. Rounfort, Charles Thomas, Henry T. Wingate, John R. Weed, A. H. Wells.
 Acting boatswain—William Stocker.
 Acting gunner—John Barr.
 Acting carpenter—Joseph H. Redding.
 Marine officer:
 Lieutenant—Henry W. Fowler.

Sloop Natchez:

Master commandant—Jno. P. Zantzinger.
 Lieutenants—David G. Farragut, William W. McKean, Alexander R. Pinkham, Edward B. Boutwell,
 John Manning.
 Surgeon—Samuel Mosely.
 Assistant surgeon—William F. McClenahan.
 Purser—Samuel P. Todd.
 Passed midshipman—C. H. Duryee, acting master.
 Midshipmen—John Banister, Francis E. Baker, John W. Bryce, William S. Drayton, William Ross
 Gardner, Thos. O. Glascock, Levin Handy, Thomas T. Hunter, William D. Hurst, Edmund Jenkins, Robert
 P. Lovell, A. M. Pennock, William T. Smith, A. R. Taliaferro.
 Acting gunner—Daniel Kelly.
 Acting carpenter—Francis Russ.
 Acting sailmaker—John Reece.

Sloop Ontario:

Master commandant—William D. Salter.
 Lieutenants—Charles Lowndes, John W. West, Lawrence Pennington, Edward G. Tilton.
 Surgeon—George W. Codwise.
 Assistant surgeon—Daniel S. Green.
 Purser—B. J. Cahoon.
 Passed midshipmen—A. H. Marbury, acting master; John R. Goldsborough, Alexander Gibson.
 Midshipmen—John P. B. Adams, O. H. Berryman, Wm. G. Benham, Robert Burts, Francis Hagerty,
 Robert Patton, jr., Nathaniel Reeder, Joseph P. Sanford, William H. Wallace.
 Boatswain—James Springer.
 Acting gunner—John Martin.
 Carpenter—Alonzo Jones.
 Sailmaker—John Heckle.
 Marine officer:
 Lieutenant—H. N. Crabb.

Schooner Enterprise:

Owing to recent transfers, it is not known what other officers are attached to the Enterprise, at this
 time, than the following:
 Lieutenant commanding—Samuel W. Downing.
 Lieutenant—Joseph Stallings.
 Assistant surgeon—George Blacknall.
 Purser—William P. Zantzinger.
 Midshipman—James H. Strong.
 Gunner—Charles Fales.

Schooner Boxer:

Lieutenant commanding—William F. Shields.
 Lieutenants—T. G. Benham, Thomas T. Craven, Ch. H. Poor, acting lieutenant.
 Assistant surgeon—Edward Gilchrist.
 Passed midshipman—George Hurst, acting master.
 Midshipmen—E. G. Parrott, William Reynolds.

PACIFIC.

Frigate Potomac:

Captain—John Downes.
 Lieutenants—Irvine Shubrick, Stephen H. Wilson, R. R. Pinkham, Henry Hoff, Jonathan Ingersoll.
 Surgeon—Samuel Jackson.
 Assistant surgeons—Jonathan M. Foltz, Henry De Witt Pawling.
 Purser—Wm. A. Slacum.
 Chaplain—John W. Grier.
 Sailingmaster—Robert S. Tatem.
 Passed midshipman—Sylvanus Godon.
 Midshipmen—Eugene Boyle, Theodore B. Barrett, M. G. L. Claiborne, Wm. T. Cocke, Henry C. Hart,
 Charles Hunter, Francis P. Hoban, Levi Lincoln, Jas. B. Lewis, Chas. W. Morris, Wm. May, James L.
 Parker, Geo. T. Sinclair, Jas. G. Stanly, John W. Taylor, Geo. M. Totten.
 Boatswain—John McNelly.
 Gunner—John R. Covington.
 Carpenter—Wm. E. Sheffield.
 Sailmaker—Christian Nelson.
 Marine officers:
 Lieutenants—Alvin Edson, Geo. H. Territt.

Sloop Falmouth:

Master commandant—Francis H. Gregory.

Lieutenants—Thos. Dornin, Chas. M. Armstrong.

Surgeon—W. S. W. Ruschenberger.

Assistant surgeon—Hugh Morson.

Purser—McKean Buchanan.

Passed midshipman—Matthew F. Maury, acting master.

Midshipmen—John S. Booth, Thos. M. Brasher, Thos. F. Davis, Stephen Dod, Frederick Illsley, C. W. Pickering, Wm. H. Pendleton, John H. Roberts, Wm. S. Smith, Wm. B. Whiting.

Boatswain—Robert. H. O'Neal.

Acting gunner—Samuel Daggett.

Carpenter—Wm. L. Shuttleworth.

Sailmaker—Samuel V. Hawkins. —

Marine officer:

Lieutenant—Joseph L. Hardy.

Sloop Vincennes:

Captain—Alex. S. Wadsworth.

Lieutenants—Charles H. Bell, Theodore Bailey, jr., Edmund M. Russel, Chas. H. Davis, Robert L.

Browning:

Fleet surgeon—A. B. Cook.

Assistant surgeon—J. Fred. Sickels.

Purser—Edward M. Cox.

Passed midshipmen—John S. Missroon, acting master; Robert Handy, Theodore P. Green.

Midshipmen—John G. Almy, Washington A. Bartlett, George Butterfield, John Carroll, A. G. Clary, John. B. Dale, Stephen Decatur, John Hall, Daniel D. Henrie, John C. Henry, Hunn Gansevoort, Wm. A. Jones, O. H. Perry, Wm. A. Parker, John H. Sherburne, Strong B. Thompson.

Boatswain—John Morris.

Gunner—Charles Cobb.

Carpenter—John Green.

Sailmaker—Henry Bacon.

Marine officer:

Lieutenant—A. N. Brevoort.

Lieutenant commanding—Ralph Voorhees.

Lieutenants—Elisha Peck, John W. Turk, Pedro C. Valdes.

Assistant surgeon—Henry S. Rennolds.

Passed midshipman—J. Lanman, acting master.

Midshipmen—Wm. M. E. Adams, Latham B. Avery, A. B. Davis, Geo. W. Doty, Chas. Sperry, Wm. P. Taylor.

23D CONGRESS.]

No. 526.

[1ST SESSION.]

ON MAKING PROVISION FOR NAVAL SCHOOLS FOR MIDSHIPMEN, AND FOR INCREASING THE PAY OF CHAPLAINS AND SCHOOLMASTERS OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1834.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom the subject was referred, reported:

The Committee on Naval Affairs, taking into consideration the condition of the naval schools as at present established at Boston, New York, and Norfolk, and their inadequacy to effect the object proposed, deem it a duty to present to the House the accompanying bill. It is presumed no one will question the vital importance of these institutions to the service, both as it respects the well-being of the junior officers, and their future usefulness to their country.

By the subjoined letter (A) from the Secretary of the Navy, it will be found that there are 450 midshipmen in service. Of these, about one-half are supposed to be at sea; one-fifth on duty at shore stations; and the remaining 135 are on leave, waiting orders, on furlough, or sick. Admitting that of the latter class thirty-five are sick, and this would seem to be a very large proportion, there still remain one hundred youths left entirely to their own guidance, freed from those restraints so essential to their period

of life, and subject alone to the influences of their own ardent impulses. The consequences are, in too many instances, fatal. It is believed to be the duty, as it assuredly is within the competency of Congress to arrest the evils resulting from this state of affairs. The appropriation called for in the bill, under the judicious management of the Secretary, will effect much. The third and fourth sections of the bill, which provide an increase of the pay of the two respective grades of the service, the chaplains and schoolmasters, it is hoped will have the effect to enhance greatly the benefits to be derived from the appropriations; while, in truth, they do no more than fulfill the original intention of Congress in creating those grades, by placing them on a footing consistent with their dignity and usefulness. Their present rate of pay is admitted on all hands to be entirely insufficient. A reference to the annexed letter of the Secretary, marked B, with its accompanying statement, A, shows the actual condition of the schools, the amount expended from the contingent fund, but under no law, and the limited number of youths who are enabled to avail themselves of what benefits do result. It is true the Department has lately issued an order requiring all midshipmen, not otherwise employed, to repair to some one of these schools; but as the government does not feel itself authorized to allow the traveling expenses incidental to such an order, few will be able to avail themselves of its benefits. The fifth section of the bill is intended to obviate this difficulty. If, however, the whole number should repair, as required, it would only afford an additional and paramount obligation for the passage of the bill.

All of which is most respectfully submitted.

A BILL relative to naval schools.

Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That the President of the United States be, and he is hereby, authorized to improve the means of instruction now in operation at New York, Norfolk, and the Navy yard at Charlestown, Massachusetts.

Sec. 2. *And be it further enacted,* That the sum of ten thousand dollars be, and the same is hereby, annually appropriated, until otherwise ordered by law, out of any moneys not otherwise appropriated, to carry into effect the provisions of this act.

Sec. 3. *And be it further enacted,* That, from and after the passage of this act, the pay of chaplains in the navy shall be twelve hundred dollars per annum, and that, in addition to the duties now imposed upon them, they shall be required to instruct the junior officers in mathematics, in natural and moral philosophy, in history, and in such other branches of science as may be deemed by the Secretary of the Navy best calculated to advance the interests and elevate the character of the service.

Sec. 4. *And be it further enacted,* That, from and after the passage of this act, the pay of schoolmasters in the navy of the United States shall be twelve hundred dollars per annum; and it shall be the duty of the Secretary of the Navy to see that no individual shall be appointed to said station unless his application be accompanied by the most satisfactory testimonials of intellectual and moral attainments.

Sec. 5. *And be it further enacted,* That each midshipman or junior officer, when not under orders, or furloughed by competent authority, shall be directed by the Secretary of the Navy to attend at such one of the schools as may be designated by the Secretary, and diligently to submit himself to instruction, and while there shall be subject to all the rules and regulations for the better government of the navy, as though actually engaged in service on shipboard; and the order of the Secretary of the Navy, or of any superior officer, competent to give the same to any midshipman to repair to said schools, shall be deemed a sufficient voucher to entitle said midshipman to the full amount of his transportation.

Sec. 6. *And be it further enacted,* That the Secretary of the Navy shall prepare, or cause to be prepared, such rules and regulations as may be deemed necessary for the good order, sound government, and direction of the said schools.

Sec. 7. *And be it further enacted,* That the pay specified above for the chaplains and schoolmasters shall be in lieu of and in full of all compensation and allowances whatever, at present made.

A.

NAVY DEPARTMENT, December 26, 1833.

SIR: Your letter of the 23d instant has been received. I have the honor, in reply, to inform you that the number of midshipmen in service is 450. Of these, about one-half are usually at sea; about one-fifth on duty at the shore stations; and the residue are on leave, waiting orders, on furlough and sick.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

Hon. JOHN G. WATMOUGH, of the Naval Committee, House of Representatives.

B.

NAVY DEPARTMENT, December 23, 1833.

SIR: I have the honor to acknowledge the receipt of your communication of the 20th instant, enclosing a printed bill relative to naval schools, and asking for a statement of those at present organized. The bill is herewith returned.

The enclosed statement (A) is furnished as containing the desired information.

In reply to your other inquiry, I have no doubt that the sum named in the bill could be usefully expended in improving the present means of naval instruction at Norfolk, New York, and Boston.

I am, very respectfully, your obedient servant,

LEVI WOODBURY.

Hon. JOHN G. WATMOUGH, of the Naval Committee, House of Representatives.

A.

Statement of the actual condition of the naval schools as at present organized, the number and character of the professors employed, of youths instructed, and the annual expenditures to maintain them.

Number and character of professors.	No. of youths instructed.	Annual expense.		General remarks.	
		Pay, &c.	Contingencies.		
BOSTON.					
One teacher of mathematics and languages	6	\$881 75	Small amount for books, instruments and stationery.	Since the late order, the numbers will, at the end of this quarter, be probably more than doubled.	
NEW YORK.					
One teacher of mathematics	15	981 75	Quarters or rooms are furnished in receiving ships.		
One teacher of languages		662 50			
NORFOLK.					
One teacher of mathematics and languages	31	981 75			
	52	\$3,607 75			

Extract of a letter from the Secretary of the Navy, dated—

NAVY DEPARTMENT, *January 23, 1832.*

In relation to the other bills concerning naval schools, I have no doubt that two, or, at the most, three, such schools would be amply sufficient for the wants of the service. Not over seventy or eighty midshipmen can at one time be permitted to attend them, in the present state of the service.

Raising the pay of schoolmasters on shipboard, and making provision for teaching the French and Spanish languages at these schools, would, without doubt, be highly useful. The bills are herewith returned.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

Hon. JOHN G. WATMOUGH, *of the Naval Committee of the House of Representatives.*

23d CONGRESS.]

No. 527.

[1st SESSION.]

ON CLAIM OF GAETANO CARUSI FOR REMUNERATION ON ACCOUNT OF AN AGREEMENT BETWEEN HIM, AS A MUSICIAN, AND AN OFFICER OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 15, 1834.

Mr. GRAYSON, from the Committee on Naval Affairs, to whom was referred the petition of Gaetano Carusi, reported:

That it appears from the statement of the petitioner, and from the documents accompanying it, that he and his three sons were employed, in the year 1805, by the officers of the American squadron then in the Mediterranean, for the term of three years: the petitioner continued in the service during the time in which the squadron remained abroad, and came with it to America. On his arrival in this country he was dismissed from the service, half the term for which he had been engaged being yet unexpired: he was thus abandoned in a foreign country, without support, although a promise had been made him to send him back to Europe at the expiration of the three years for which he had been employed. The officers of the squadron appear to have acted under a mistake as to their powers, in procuring his services; but it was not possible for a foreigner to know that the commander of an armed ship had no power to employ a musician, and it appears, therefore, one of those cases in which the liberality of the government should not permit an innocent and ignorant foreigner to suffer for having enlisted in its service. The committee recommend, therefore, that the petitioner be paid one thousand dollars, and for that purpose they report a bill.

No. 528.

[1ST SESSION.]

ON CLAIM OF A CAPTAIN'S CLERK, WHO ACTED AS SECRETARY OF A SQUADRON, FOR THE DIFFERENCE BETWEEN THE PAY OF THOSE OFFICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 15, 1834.

Mr. GRAYSON, from the Committee on Naval Affairs, to whom was referred the petition of Henry Whitney, reported:

That the petitioner was employed by Commodore Thompson in 1829, then about to sail for the Pacific, as captain's clerk on board the frigate *Guerriere*, Captain Smith commander, and that Mr. Homans was employed as secretary of the squadron. During the voyage Homans was ill of a pulmonary complaint, and much of the duty of the two departments was performed by the petitioner. On their arrival at Callao, Homans, continuing ill, obtained leave of absence, and proceeded to Valparaiso, where he remained until his death, in April, 1830. From the time when Homans left the ship, in July, 1829, to the time when he died, the petitioner discharged the duties of secretary of the squadron, at the request and by the command of the commodore, from whom he received repeated assurances of being remunerated. The duties which he was thus obliged to discharge, in addition to his own, were unusually arduous, occupying the whole of his time and attention, and involving him in additional expenses. The petitioner, therefore, claims, as a compensation for the services rendered, the difference between the pay of captain's clerk at thirty-two dollars and fifty cents per month, and that of secretary of the squadron, at eighty-three dollars and thirty-three and one-third cents a month, for the time which elapsed during the absence of Homans from the squadron, up to the time of his death, amounting to four hundred and fifty-seven dollars and fifty cents.

The committee regard the claim as an equitable one, and recommend that the prayer of the petitioner be granted.

No. 529.

[1ST SESSION.]

A STATEMENT OF THE HISTORY OF THE NAVY PENSION FUND, AND SHOWING THE OBLIGATION OF THE GOVERNMENT TO RESTORE ITS LOSSES BY THE FAILURE OF A DEPOSITORY BANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 17, 1834.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom had been referred the memorial of sundry widows and orphans praying for pensions, to be made chargeable to the navy pension fund, reported:

That they have had under consideration the subject of said fund, and the pensions chargeable thereon, and ask leave to report the accompanying bill:

By the act of March 2d, 1799, the navy pension fund was first created. The 8th section of this act enacts that every officer, seaman or marine, disabled in the line of his duty, shall be entitled to receive for his life, and *the life of his wife*, if a married man at the time of receiving his wound, one-half his monthly pay.

The 9th section of same act enacts that all the money accruing, or which has already accrued, from the sale of prizes, shall be and remain forever a fund for the payment of the half pay to the officers and seamen who may be entitled to receive the same; and if the said fund shall be insufficient for this purpose, *the public faith is hereby pledged* to make up the deficiency; but if it should be more than sufficient, the surplus shall be applied, as *Congress may hereafter direct by law*, to the making of further provision for the comfort of the disabled officers, seamen and marines, and for such as may not be disabled, who may merit, by their bravery or their long and faithful services, the gratitude of their country.

This act was repealed by the "*Act for the better government of the navy of the United States*," approved on the 23d of April, 1800. (Vol. 3, page 361.) It is only quoted here to show the spirit in which Congress originally acted in creating this fund. It was evidently too general in its terms, and perhaps left too much to the discretion of the husband to answer the object which it would seem Congress had in view—the relief, under a certain contingency, of the widow and orphan of the individual whose services had entitled him to the benefit proposed.

The 8th section of the act of April, 1800, enacts that every officer, seaman and marine, disabled in the line of his duty, shall be entitled to receive for life, or during his disability, a pension from the United States, according to the nature and degree of his disability, not exceeding one-half of his monthly pay.

The 9th section enacts, that all money accruing, or which has already accrued to the United States from the sale of prizes, shall be and remain forever a fund for the payment of pensions and half pay, should the same be hereafter granted to the officers and seamen who may be entitled to receive the same; and if the said fund shall be insufficient for the purpose, *the public faith is hereby pledged* to make up the deficiency. But, if it should be more than sufficient, the surplus shall be applied to the making of further provision for the comfort of the disabled officers, seamen and marines, and for such as, though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country.

By this section, then, the fund was first created, and for three special purposes.

The first of these purposes is, to support the fund, under the pledge of the public faith to provide pensions and half pay to officers, seamen and marines, disabled by wounds in the line of their duty.

This purpose is fulfilled by the terms of the 8th section of the same act, above quoted. The second purpose of the act is, out of the surplus of the fund to make *further provision for the disabled* officers, seamen and marines.

This purpose was executed by the provisions of the act of April 16, 1816, (vol. 6, p. 66,) section 7th, which enacts "that in cases where the allowance of the half monthly pay, which may now be granted by law to officers, seamen and marines, disabled in the service of the United States, shall, in the opinion of the commissioners of the navy pension fund, from the nature and extent of the disability, and the situation of the party disabled, be inadequate to his necessary subsistence, the said commissioners shall be, and hereby are, authorized, in their discretion, to increase such allowance to any sum not exceeding the full amount of the monthly pay to which the party so disabled was by law entitled in the said service."

By a reference to the laws, the following special cases for disabled persons will be found, specifying the essential particulars of each case:

Captain S. Harding, act February 6, 1807, (vol. 4, p. 78,) at half his monthly pay, to take effect from January 1, 1804, as stated in the act, "who has been so disabled in the line of his duty, while in service, that he is unable to support himself by labor."

Captain Abraham Whipple, act December 12, 1811, (vol. 4, p. 363,) at half monthly pay, to commence January 1, 1810, for the same cause above quoted.

William Munday, act April 16, 1816, (vol. 6, p. 60,) at twenty dollars a month, for "the loss of both his arms in an attack on the enemy, at Leonard's creek, on the 28th day of June, 1814, in lieu of the pension to which he is now entitled by law.

James Merrill, act of May 4, 1820, (vol. 6, p. 494,) to be placed on the navy pension list, to take effect from October 23, 1819, "who, whilst engaged in the discharge of his duty, as an ordinary seaman, on board the United States ship John Adams, in the month of May, 1814, was accidentally injured by falling from the gun deck into the hold of the ship, which injury has disabled him from obtaining a subsistence by his labor."

William Thompson, act of May 20, 1826, (vol. 7, p. 500,) "a seaman, who was wounded on board the cutter *Louisiana*, August 10, 1819, with a musket ball," to be placed "upon the pension list, in the same manner, and upon the same terms, as if he had received the said wound in the naval service of the United States."

In the act of July 26, 1813, (vol. 4, p. 579,) to authorize the President to raise a corps of sea fencibles, of not exceeding ten companies, for a term not exceeding one year, to be employed on land or water for the defence of ports and harbors, sec. 4, it is enacted "that the officers, warrant officers, boatswains, and men, raised pursuant to this act, shall be entitled to the like compensation, in case of disability incurred, by wounds or otherwise, in the service of the United States, as officers, warrant officers, and seamen in the present naval establishment."

The act of April 18, 1814, (vol. 4, p. 690,) enacts "that the officers and seamen of the revenue cutters of the United States, who have been or may be wounded or disabled in the discharge of their duty, whilst co-operating with the navy, by order of the President of the United States, shall be entitled to be placed on the navy pension list, at the same rate of pension, and under the same regulations and restrictions, as are now provided by law for the officers and seamen of the navy."

In the opinion of your committee, it cannot fail to be remarked that, with regard to some of these especial cases, and more particularly in relation to the two last-cited acts, the legislation of Congress has appropriated the money of the fund for purposes not originally intended, and for which those of the general treasury ought, with much more propriety, to have been applied. It would seem to be manifestly unjust to apply the money of this fund to the benefit of a class of persons who could not, in the course of their services, be expected to contribute in any manner to it.

Thus, then, it is seen that by the eighth section of the act of April 23d, 1800, and the seventh section of the act of April 16, 1816, two of the three purposes originally intended by the ninth section of the act of 1800 have been carried into full effect, and ample provision thus made for *disabled* officers, seamen, and marines. The third purpose of the ninth section remains to be considered.

In the fulfillment of it, provision was to be made by means of the surplus funds for such officers, seamen, and marines as, "though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country."

Thirty-five years have elapsed since the first passage of this act. In the course of this time the country has passed through a severe and bloody war. During this whole period the records of the Navy Department afford but five instances of pensions granted in the fulfillment of this original intention. No one will pretend to assert that but five cases have existed in a service so distinguished as that of the United States, of the character above specified. The contrary is well known to be the fact. It must be fairly presumed, therefore, that there has existed, not only on the part of Congress a reluctance to create but also on the part of the officers, seamen, and marines themselves, a greater reluctance to be placed on so invidious a list, while they felt they possessed the power and ability, the strength and courage, to fulfill all their duties. No doubt, in the longer lapse of time, such cases must and will arise, when the veteran, after a life of devotion, shall feel his limbs palsied by age, and the vigor of his intellect impaired by the accumulation of those ills to which the toils and hardships of his profession naturally incline him. Your committee, therefore, consider this intention as having been fairly abandoned; and for the simple reason that Congress forebore to exercise the invidious task of discriminating between men, all of whom were so abundantly deserving. The question, then, naturally presents itself, has Congress, in this manifest change of purpose, made no substitution of design?

Your committee is clearly of opinion that Congress has done so, and, in so doing, has presented the strongest possible inducement to the brave man to engage in the service, and secured the most fearless and faithful discharge, on his part, of every duty.

This substitution of design consists in the several acts passed granting pensions to widows and orphans.

Your committee now beg leave, as briefly as possible, to refer to these several acts granting and renewing such pensions to the widows and orphans of officers, seamen, and marines. In them your committee find the fulfillment of the third purpose expressed in the ninth section of the act of April, 1800.

It is evident, from the number of acts granting original pensions to widows and orphans, and renewing the same, how various and contradictory must have been the decisions affecting such pensions, and

the rights of individuals under them. The numerous petitions on your table fully testify what injustice frequently has sprung from the delay occurring in the interval between the expiration of one act and the passage of another intended to renew.

By the bill now reported, it is proposed to establish a general principle, and thus obviate, for the future, all injustice, delay, and unequal bearing.

The act of January 20, 1813, (vol. 4, p. 436,) granted pensions for *five years* to widows and children under sixteen years of age, where the husband was killed or *died of wounds* received in the line of duty.

The act of March 4, 1814, (vol. 4, p. 653,) extended the provisions of the act of 1813, so as to embrace the widows and children of persons *who had died, or might die, of wounds* received subsequently to 18th June, 1812, to continue for five years.

The act of March 3, 1817, (vol. 6, p. 212,) granted pensions to widows and children of those who may have died, or shall die, since 18th June, 1812, of *disease contracted, or of casualties or injuries* received in the line of duty.

The 2d section of the act of January 22, 1824, (vol. 7, p. 213,) repealed the act of 3d March, 1817.

The above are the only acts granting *original* pensions.

The following acts continued or renewed the same.

The act of April 16, 1818, (vol. 6, p. 291,) renewed for an additional five years, making ten years, pensions granted by the 4th March, 1814; this act did not embrace those placed on the list under the act of January 20, 1813.

The act of March 3, 1819, (vol. 6, p. 399,) granted additional five years to widows and children of those who were *killed in battle, or died of wounds received in battle, or who died in the naval service during the late war*, making ten years, and renewing the pensions of those who were placed on the list under the act of January 20, 1813.

The act of January 22, 1824, (vol. 7, p. 213,) granted an additional period of five years, making fifteen years, to all those who were placed on the list under the acts of January 20, 1813, and March 4, 1814.

By this act the act of 3d March, 1817, is repealed; and, consequently, the pensions of those who were placed on the list under that act were not renewed.

The act of May 23, 1828, (Laws of 20th Congress, 1st session, p. 65,) extends the pensions for a further term of five years, making twenty years, in all cases where provision has been made for widows and children of those who were *killed in battle, or who died in the naval service of the United States during the last war*. And, finally,

By the act of June 23, 1832, in all cases where provision has been made for the widows of those *who were killed in battle, or who died in the naval service, or of wounds received in the late war*, and in all cases where provision has been made for extending the pensions for five years, &c., *five years* additional is allowed to *widows only*.

The act of March 3, 1817, was repealed in January, 1824, as above stated. No rights, therefore, can accrue under it, where deaths took place after that period. It is manifest, therefore, that the act of 1832 has an unequal and a partial bearing, inasmuch as it does not embrace the widow of any one, no matter how valuable and meritorious may have been the services performed in the line of duty, who may have died subsequent to the repeal of the act of 1817.

A strong argument here presents itself against the partial legislation hitherto pursued, and in favor of the general principle sought to be established by the present bill.

To the above are to be added the several pensions to the widows Penelope Denny, Elizabeth Mays, Abigail Appleton, and Mary Cheever, the latter granted for life as a *gratuity from Congress*, on account of the distinguished services of her two sons, killed on board the Constitution.

There remains but one more act to notice, and that is the act of April 2, 1816, (vol. 6, p. 27.) This act requires to be placed on the pension list of the fund "*those persons who were wounded at Dartmoor prison, in England, in the month of April, 1815, and also the widows and children of such as were killed, or who died in consequence of wounds received there.*" This act, besides being retrospective in its bearing, contains no limitation as to amount or time, and affords another example of the unequal bearing and injustice of partial legislation.

The present bill is intended to obviate all the difficulties which have heretofore existed; it is believed to be founded on every principle of sound policy and equal justice.

It renews, in fact, the law of 1817, and provides, as is believed, amply for the increased demand upon the revenue of the fund, by a restoration to it of the large amount lost by the insolvency of the Bank of Columbia.

That this increased demand upon the revenue of the fund cannot, by any means, exceed the amount of that revenue, is manifest by a reference to the following exhibit. It shows the number of widows on the navy pension list for a number of preceding years, and the amount requisite to pay them.

By a reference to the document accompanying the annual report of the Secretary of the Navy, marked D, it will be seen that the annual income of the navy pension fund amounts to about \$52,443 23. The amount paid, and required to be paid for the same time, to about..... 33,000 00

Leaving a surplus balance of about..... \$19,443 23 beyond what is at present required to pay the pensions of the whole number of pensioners now on the roll, amounting to two hundred and ninety-eight.

If to this sum be added the increased annual income provided by the bill now reported, estimated to amount to nearly ten thousand dollars, there will be a clear annual surplus of nearly thirty thousand dollars, to meet every demand which may be created by the extension now contemplated in the provisions of the bill.

This is made plain by the following statement above alluded to:

Years.	Number of widows.	Amount required to pay them.
1820.....	105	\$15,178 00
1821.....	120	16,098 00
1822.....	83	12,300 00
1823.....	69	10,130 00

Years.	Number of widows.	Amount required to pay them.
1824.....	131	\$18,946 00
1825.....	128	18,609 00
1826.....	134	19,293 00
1827.....	134	19,293 00
1828, no return is made.		
1829.....	117	16,228 00
1830.....	73	10,840 00

1831. The commissioners report that as many had been dropped as had been added, and that therefore no material alteration was expected in the number of pensioners, or the amount required to pay them.

1832. The commissioners report that the whole number of pensioners on the roll was 296. As nothing whatever is said in this report respecting widows, it is presumed they are included in that number; and, as the number is less than it was in 1830, it is presumed that the number of widows was less in 1832 than it was in 1830 or 1831.

1833. The commissioners report the whole number at 298, an increase on the year previous of only two. The same remarks apply here as to the year 1832, a particular letter having been addressed to the Secretary; his reply, when received, will be appended.

From this statement, entirely official, it is manifest the number on the list is actually diminishing annually, instead of increasing.

Your committee, therefore, think that, in the event of the passage of this bill, under no contingency is it probable a demand will arise beyond what the surplus revenue of the fund will be fully adequate to meet.

To make this matter still more plain, a letter has been addressed to the Secretary of the Navy, asking him to furnish information to the following queries, which, when received, will be appended, and printed with this report, to wit:

1st. The number of widows who received, or were entitled to receive, pensions from the navy pension fund, in the year 1833, and the amount required to pay them.

2d. The number of commissioned and warrant officers of the navy who have died since the 1st of January, 1824, specifying the number of each rank.

3d. The number of applications from widows and children of those who have died in the naval service since January, 1824, for pensions, specifying the number in each year, and of each grade of officers, and the number of privates, as, also, the amount which would have been required to pay the pensions in each year if they had been allowed.

Your committee now proceed, as briefly as possible, to explain the facts and state the principle upon which the second section of the present bill is founded.

By a reference to the annexed letter of the Secretary of the Navy, dated 22d February, 1833, it will be seen that the commissioners of the navy pension fund thought proper to invest in the stock of the Bank of Columbia an amount of said fund equal to \$99,502.60. In the year 1823 this institution failed, and, as was soon ascertained, proved to be utterly insolvent. Its whole assets were turned over to the public Treasury. In the general wreck of its affairs, the large amount above specified was sunk, and, from the period of its insolvency to the present time, so much of the navy pension fund is annually reported to be deficient and altogether unavailable.

Your committee are of opinion that every principle of justice demands that this state of affairs should no longer be permitted to continue. By the act of Congress creating this fund, the government was constituted its trustee, and may be fairly said to have assumed all the responsibilities which the trust involved. In the event of a certain contingency, the *public faith was pledged* to make good a deficiency which it was supposed might arise. In the performance of the trust, serious detriment has arisen to the fund, and lamentable injury to those for whose benefit it was established. If the argument be admitted as sound, which is maintained in this report, and the construction of the third intention of the ninth section of the act of 1800 be allowed, then has that contingency arrived, and *the public faith is fairly pledged* to make good the present deficiency: but, whether this be the case or not, it is presumed no one will deny the injustice, as well as impolicy, of permitting an injury longer to remain unatoned, which affects so deeply the private rights and conveniences of a large and meritorious class of citizens.

Your committee, therefore, feel it to be their duty to urge upon Congress the obligation to repair a loss which it is evident operates so materially against the most unprotected class of society, the widows and orphans of the brave men who have perished in the service of the country. They have, therefore, made provision, in the bill now reported, for restoring to the navy pension fund the amount lost by the defalcation of the Bank of Columbia.

NAVY DEPARTMENT, February 22, 1833.

Sir: Your letter of the 21st instant, requesting, on the part of the Naval Committee of the House of Representatives, information respecting the funds belonging to the navy pension fund, invested in stock of the Bank of Columbia, has been received.

The investments of navy pension funds in this stock were made at several periods, commencing on the 16th August, 1809, and terminating on the 8th May, 1819, and amount to \$99,502.60.

The Bank of Columbia became embarrassed in its operations, and no dividends were made by the directors after the 20th March, 1823. The dividend declared at that time was not paid until the 10th day of April, 1823.

In regard to the prospect of recovering this money, or any part of it, from the inquiries which have been made, none is believed to exist. The whole amount invested is believed to be entirely lost, in consequence of the insolvency of the bank. Among the papers of the former commissioners of the navy pension fund, no records are to be found to afford the information you request in regard to the authority by which those investments were made, but, from verbal information obtained from a former secretary of the

fund, it is understood that the authority to make investments usually proceeded from either the commissioners or from their secretary; and the authority was sometimes given in writing, and sometimes verbally.

I am, sir, very respectfully, your most obedient servant,

LEVI WOODBURY.

Hon. J. G. WATMOUGH, *of the Naval Committee, House of Representatives.*

NAVY DEPARTMENT, *January 15 1834.*

SIR: In reply to your letter of the 11th instant, requesting information in regard to widows on the navy pension roll, I have to submit the following statements, viz:

1. The number of widows on the navy roll who received, or were entitled to receive, pensions in the year 1833, was 56; and the amount required to pay them was 9,764 dollars.

2. The number of commission and warrant officers who have died since the 1st of January, 1824, is: 11 captains, 7 masters commandant, 32 lieutenants, 15 surgeons, 14 pursers, 17 surgeons' mates, 7 passed midshipmen, 15 sailingmasters, 71 midshipmen, 10 gunners, 12 boatswains, 7 sailmakers, 3 carpenters, 1 brevet lieutenant colonel of marines, 7 lieutenants of the same.

In order to answer your third inquiry respecting the number of applications from widows, &c., since January, 1824, the files of the Department from that period must be examined, and, as soon as the information can be obtained, it shall be communicated to you.

I am, sir, very respectfully, your most obedient servant,

LEVI WOODBURY.

Hon. J. G. WATMOUGH, *of the Naval Committee, House of Representatives.*

23D CONGRESS.]

No. 530.

[1ST SESSION.]

ON CLAIM FOR COMPENSATION FOR A VESSEL-OF-WAR, STATED TO HAVE BEEN BUILT BY CONTRACT WITH TWO OFFICERS OF THE NAVY IN 1813, AND CAPTURED AND BURNT BY THE ENEMY.

COMMUNICATED TO THE SENATE JANUARY 29, 1834.

MR. BELL, from the Committee on Claims, to whom was referred the petition of John Watson, reported:

That the petitioner alleges that, in December, A. D. 1812, he entered into a contract with John Bullus and Oliver H. Perry, agents of the Government of the United States, to build a sloop-of-war of sixteen guns, to be completed by the month of December, A. D. 1813, according to a model to be furnished by Christian Bergh, navy builder at New York, which sloop was to be constructed under the superintendence of Nathaniel Howard; that he completed said schooner agreeably to his contract, by December, A. D. 1813; that she immediately cleared from the port of Middletown, and proceeded down the river to Pettipeaug, about eight miles from its mouth, and there waited for a safe and favorable opportunity to proceed to New York, but was prevented by the British blockading force under Commodore Hardy. That on the night of the 7th of April, A. D. 1814, a detachment from the British fleet proceeded up the river and captured the schooner; that whilst the enemy was carrying her out to sea, she grounded, upon which they set her on fire and abandoned her, that the fire was subsequently extinguished, but she was so materially injured that the expense incurred by the petitioner in repairing her was equal to her value when repaired.

The petitioner represents that the capture of said schooner was occasioned by her national character, and by the act of the Government of the United States in removing its military force from the vicinity of the place where the schooner lay. The petitioner exhibits the affidavits of Thomas Y. Spicer and Jacob Case, to prove that he made the contract set forth in his petition. Spicer testifies that, in December, A. D. 1812, or January, A. D. 1813, he was in New York, and heard John Bullus and Oliver H. Perry, agents of the Government of the United States, contract with John Watson to build a vessel of a certain model and dimensions, under the superintendence of a person named.

Case testifies that, in 1824, he heard John Bullus, Navy agent at New York, say that Col. Watson had built a fine vessel for the government, according to his plan and direction, and that he expected she would be at New York in a few days; and that, a short time afterwards, he heard Bullus say that the vessel he had contracted for had been burnt by the enemy in Connecticut river.

The testimony of both these witnesses is of a very loose and vague character. They give no distinct information of the terms of the contract. They do not state the dimensions of the vessel contracted for, the time when, or the place where she was to be delivered; nor do they state the consideration to be paid, nor whether the contract was or was not committed to writing. The apparent indistinctness of the recollection of these witnesses respecting the terms of the supposed contract detracts much from the weight of their testimony, and, with the other evidence in the case, induce the belief that the conversation to which they testify related to a contract then contemplated by the parties on some future contingency, but never carried into effect.

The committee is confirmed in the correctness of this opinion from having ascertained that no communications, orders or contracts relative to this vessel can be found in the Navy Department, and from the improbability that the agents of the government would rest the performance of a contract of this character upon a verbal agreement, or without giving the government information of it. It also appears that, at the time this contract is supposed to have been made, the Executive had no legal authority to enter into contracts for building vessels of this class; and they cannot believe that, without such authority, he would empower his agents to make such contracts, or that they would presume to make them without legal authority.

The evidence furnished by these facts and considerations is strengthened by the circumstance that the petitioner presented no claim founded on this supposed contract until many years after the transaction, nor until after the death of both the agents with whom he alleges the contract was made. The committee are of opinion that the petitioner has failed to establish the justice of his claim, and therefore submit the following resolution:

Resolved, That the petitioner is not entitled to relief.

23D CONGRESS.]

No. 531.

[1ST SESSION.]

ON CLAIMS OF CAPTAINS PERRY AND SHUBRICK, OF THE NAVY, TO BE REIMBURSED FOR EXTRA EXPENSES ON BOARD THE VESSELS UNDER THEIR COMMAND, RESPECTIVELY, IN ENTERTAINING THE PACHA OF EGYPT AND UNITED STATES MINISTERS, AND OTHER OFFICERS, IN OBEDIENCE TO ORDERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1834.

Mr. WATMOUGH, from the Committee on Naval Affairs, to whom was referred the several memorials of Matthew C. Perry and E. R. Shubrick, masters commandant in the navy of the United States, reported:

That Captain Perry sailed from the United States to join the Mediterranean squadron, in June, 1830. He first repaired to St. Petersburg, in compliance with the annexed order, marked A, and landed the minister accredited to that court. From thence, he sailed for his original destination. It is evident by the terms of his memorial and the documents annexed in proof thereof, that, in obedience to written orders, as well from the Department as from his immediate commanding officer, and in the furtherance of the public interests abroad, he has been subjected to the most serious personal expenditures, to the entire sacrifice of his own private means. Your committee pass over the many minor instances enumerated. It is sufficient to state they were all encountered by Captain Perry, in obedience to orders which placed them beyond his control, and could not be disregarded. The principal and most remarkable instance must not be overlooked. In the course of her cruise, the Concord touched at Alexandria, in Egypt. Shortly after his arrival, Captain Perry was honored with a visit from the Pacha of Egypt, Mehemet Ali, accompanied by a numerous suite. Of the nature of this visit, and the effect produced by it on the mind of the Pacha, ample testimony is afforded in the annexed document, marked B. It will readily be supposed that all the means in his power were put in requisition by Captain Perry, to receive this illustrious chieftain in a manner becoming the dignity of his own country, and with all the forms and ceremonies which the rank and character of his guest required. The occasion certainly was one of deep interest. A despotic prince, of haughty, arrogant and capricious temper, for the first time is brought in contact with the representatives of a remote nation; whose fame, beyond all doubt, had reached him, but of whose habits, customs and manners he had hitherto remained ignorant. The consequence of the least neglect on their part towards him, or of any supposed indifference, no matter how imaginary, may readily be appreciated. Upon either might depend, not only the security of an extensive and valuable commerce, but even the lives of such of our fellow-citizens as resided within his dominions. The occasion, too, involved the honor of his country, and of her flag, whose guardian he was. Regardless, therefore, of all personal considerations, Captain Perry only weighed the paramount obligations which every view of the matter imposed upon him, and acted accordingly. A large proportion of the amount now claimed by way of remuneration sprang from this event. In the performance of a high public duty, his private resources were liberally sacrificed, and a heavy debt incurred. He placed his reliance for remuneration on the justice and liberality of his country. To that justice, and to the same liberality which Congress has evinced in similar previous cases, he now appeals; and your committee are of opinion, the appeal should be duly met.

To place this appeal in its strongest possible light, your committee ask the attention of the House to the following statement. It shows the amount of pay received annually by the grade to which both the petitioners, whose cases are now under consideration, belong—that of the masters commandant—believed to be one of the most responsible in the service. It supposes, as is known to be the case in the present instances, and is probably so in almost every other, the fact of a family left at home to be maintained:

House rent annually	\$300 00
One servant, at \$5 per month	60 00
Four rations per day for wife and children, at 25 cents per ration.....	365 00
Tuition.....	60 00
Clothing, at the low calculation of	100 00
Incidental expenses.....	50 00
	<u>\$935 00</u>
Master commandant's pay per month, at \$60, is.....	\$720 00
Five rations per day, at 25 cents each, is	456 25
	<u>\$1,176 25</u>
Deduct 20 cents per month for hospital fund.....	2 40
	<u>\$1,173 85</u>
Deduct home expenses	935 00
Leaving a balance of.....	<u>\$238 85</u>

for his own support at sea for one year. It is difficult to believe that such a state of things could have been allowed so long to exist. It is, nevertheless, true; such, or nearly so, is the condition of the present petitioners; and yet, under such circumstances, have they both been required to make disbursements of their private means—in the one case, to an amount of fifteen hundred dollars; in the other, to an amount of thirteen hundred dollars, in the course of a single cruise. Your committee will not permit themselves to think that the high sense of honor which actuates our naval officers will be allowed to operate so materially to the prejudice of their private resources, and compromise so deeply the welfare of their families. They therefore report the accompanying bill for the relief of Matthew C. Perry.

Your committee next proceed to examine the case of Captain E. R. Shubrick. It appears by his memorial that, in March, 1832, while in command of the United States sloop Vincennes, on the Pensacola station, Captain Shubrick received the annexed order, marked C, from the Secretary of the Navy, to receive on board his ship Robert M. Harrison, a public functionary, together with his family, and convey them to Kingston, in the island of Jamaica. Captain Shubrick accordingly complied, and the said Harrison and family were furnished with suitable maintenance during the voyage, which lasted a month, at the sole expense of said Shubrick. For this extra expense, incurred in the public service, and under an order from the Navy Department, Captain Shubrick now prays to be indemnified. Your committee are of opinion that he is justly entitled to remuneration. The amount claimed is the sum, nothing more nor less, charged by the purser of the ship to Captain Shubrick for the maintenance of the consul and his family. In the settlement of his accounts, this sum was disallowed him, and his monthly pay was docked until it was refunded.

By a reference to the letter marked D, it will be seen that Captain Shubrick used all proper precaution before he committed himself so much in the advances he was called upon to make. It is fairly to be inferred, from the correspondence annexed, that the consul was unable to provide himself and family with the means of sustenance, and it was fairly to be presumed by Captain Shubrick that the government was in some measure aware of this when they issued their order, at his own application, for him to be received on board the Vincennes. A reference to the letter marked E, makes it evident that the order of the 13th February, 1832, was sent to Captain Shubrick at the request of Harrison. It would seem, therefore, to be a gross violation of every principle of justice, to permit the heavy expenditure consequent upon said order, to fall upon a third party who had had nothing whatever to do with the arrangement. Believing therefore, that, on every principle of justice, Captain Shubrick is fairly entitled to the remuneration claimed, and applying to his case every principle laid down in that of Captain Perry, your committee ask leave to report the accompanying bill for his relief.

A.

NAVY DEPARTMENT, *June 14, 1830.**

SIR: When the Concord is in every respect manned and equipped, and the Hon. John Randolph, of Roanoke, minister from the United States to the court of St. Petersburg, and suite, shall have embarked, you will immediately proceed to sea. Should Mr. Randolph desire to touch at any of the English or other ports on the way, you will accede to his wishes, and, after gratifying him in this respect, proceed with and land himself and suite at Cronstadt, or any other suitable port that he may designate.

The Department has entire confidence in your discretion and ability, and feel satisfied that, to the extent of the means in your power, you will, by courtesy and attention, render his time comfortable and agreeable on the passage.

If it be acceptable to Mr. Middleton, and he can be prepared within a reasonable time, you will tender to himself and suite a passage to any convenient port of the Baltic, or of France or England, that he may point out.

After fulfilling the preceding part of your instructions, you will immediately make sail for the Mediterranean, and report to Commodore Biddle for duty in the squadron under his command.

I am, respectfully, sir, your obedient servant, JOHN BRANCH.

Master Com. M. C. PERRY, *Commander of the United States Sloop-of-war Concord, Norfolk, Va.*

I certify that the foregoing is a true copy of the original.

HENRY J. WILLETT, *Chief Clerk to Commandant, Navy Yard, N. Y.*

B.

Extract from a letter of Boghas Joussouff, chief interpreter and minister of foreign affairs to Mehemet Ali, Pacha of Egypt, to John Gliddon, Esq., United States consular agent for Egypt.

HONORED SIR: His highness the Viceroy, my illustrious sovereign, charges me to express to you the peculiar satisfaction which he experienced in his visit to the corvette Concord, belonging to the great nation so worthily represented by your honored self, and for which his highness has always cherished sentiments of sincere esteem and admiration.

The attentions there received from the honored commander, Captain Perry, from the officers, and from the whole ship's company, have been deeply felt by his highness, and, in his name, I pray you, honored sir, to express his thanks for the same.

I take this opportunity, honored sir, to renew the assurance of the marked esteem and consideration with which

I have the honor to be, sir, your most obedient servant, BOGHAS JOUSSOUFF.
To the honored J. GLIDDON, *Consular Agent of the United States of America, in Egypt.*

A true copy. JOHN GLIDDON.

I certify that the foregoing is a true copy of a translation made by Mr. John Gliddon.

HENRY J. WILLETT, *Chief Clerk to Commandant, Navy Yard, N. Y.*

NOTE—By Captain M. C. Perry: The Pacha or Viceroy of Egypt visited the Concord in state, with a numerous retinue, as also did all the pachas at the head of the several departments of government.

C.

NAVY DEPARTMENT, *February 13, 1832.*

SIR: You are hereby authorized to convey R. M. Harrison, Esq., and family, to Jamaica, in the Vincennes, if it does not conflict with other urgent duties already commenced.

I am, respectfully, sir, your obedient servant, LEVI WOODBURY.
Master Commandant EDWARD R. SHUBRICK, *Commanding U. S. Ship Vincennes, Pensacola, Florida.*

D.

UNITED STATES SHIP FAIRFIELD, *Pensacola Bay, May 4, 1832.*

SIR: I have received your letter of this date, requesting me to state whether, from my knowledge of the situation of Mr. Richard M. Harrison, "he had, or had not, the means of providing stores for his family," on their passage from this port to Jamaica, in the United States ship Vincennes, under your command. In answer to which, I have to state that, just before I sailed from this place, in August, 1831, Mr. Harrison informed me that his funds amounted to not more than \$250, which sum, I presume, must have been exhausted in the support of himself and family, during their stay in Pensacola.

I am, therefore, of opinion, that if there be any case in which the Department would feel authorized to compensate an officer for expenses incurred in the transportation of passengers, the one in question presents strong claims for consideration.

I am, very respectfully, your obedient servant, J. D. ELLIOTT.
Master Commandant EDWARD R. SHUBRICK, *United States Ship Vincennes.*

E.

NAVY DEPARTMENT, *February 13, 1832.*

Sir: Your letter of the 29th ultimo has been received.

An order of this date is forwarded to Captain Shubrick, to convey yourself and family to Jamaica, *if it does not conflict with other urgent duties already commenced.*

A copy of the order to Commodore Elliott, upon this subject, of the 3d of November last, was sent to you on the 21st ultimo.

I am, respectfully, sir, your most obedient servant,
ROBERT M. HARRISON, Esq., *Pensacola, Florida.*

LEVI WOODBURY.

23D CONGRESS.]

No. 532.

[1ST SESSION.]

ON THE EXPEDIENCY OF RESTORING TO THE PENSION LIST THE NAME OF A WIDOW
* WHOSE PENSION HAD EXPIRED BY LAW.

COMMUNICATED TO THE SENATE JANUARY 14, 1834.

The Committee on Naval Affairs, to whom was referred the resolution to inquire into the expediency of restoring to the pension list Mrs. Ellen Dix, reported:

That Mrs. Dix has received the full benefit of the Navy pension laws. Her former pension terminated on the 16th April, 1828; and under the act of 28th June, 1832, another pension was granted to her, for five years, which expired on 16th April, 1833.

There is now no law under which a pension to Mrs. Dix can be granted; but the propriety of renewing the law under which her pension has heretofore been paid, is at this time under the consideration of one branch of the Legislature. The committee do not think that any special act, in favor of Mrs. Dix, ought to be passed, and therefore ask leave to be discharged from the further consideration of the resolution.

NAVY DEPARTMENT, *January 31, 1834.*

Sir: Your letter of the 28th instant, in the case of Mrs. Dix, has this day been received.

Mrs. Dix has received the full benefit of the Navy pension laws. Her former pension terminated on the 16th April, 1828; and she was granted, under the act of 28th June, 1832, another pension for five years, which expired on the 16th April, 1833, commencing from the expiration of the former term. There is now no law under which a pension to Mrs. Dix can be granted. She has been paid the whole amount to which she was entitled by law.

I am, very respectfully, sir, your obedient servant,
Hon. S. L. SOUTHWARD, *Chairman of Naval Committee of the Senate.*

LEVI WOODBURY.

No. 533.

[1ST SESSION.]

ON CLAIM OF THE WIDOW OF A SEAMAN OF A PRIVATEER, WHO DIED AT DARTMOOR
PRISON, IN ENGLAND, DURING THE WAR OF 1812-15.

COMMUNICATED TO THE SENATE FEBRUARY 14, 1834.

The Committee on Naval Affairs, to whom was referred the petition of Hannah Stone, reported:

That the said Hannah Stone is the widow of John Stone, a mariner, late of Kennebunk, in the State of Maine. That the said John Stone, while a seaman on board the privateer schooner Harlequin, of Portsmouth, was taken by one of His Britannic Majesty's ships-of-war, sent to Halifax, and thence to England, and confined in Dartmoor prison. Whilst so confined he died, in consequence of the bad treatment and sufferings to which he was subjected.

Under these circumstances, the committee are of opinion that the prayer of the petitioner ought to be granted, and they report a bill directing the Secretary of the Navy to place her name on the list of pensioners to be paid out of the Privateer Pension Fund.

23D CONGRESS.]

No. 534.

[1ST SESSION.]

ON CLAIM FOR RELEASE FROM THE SURETY BOND OF A PURSER WHO WAS LOST ON
BOARD THE UNITED STATES BRIG EPERVIER, IN 1815.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1834.

Mr. LANSING, from the Committee on Naval Affairs, to whom was referred the petition of Samuel Belding, reported:

That the petitioner, together with John Taylor, Chauncey Belding, and Caleb Holmes, some time in 1814, became sureties to the United States for Melancton W. Bostwick, who had been appointed purser of the United States brig Epervier; that said Purser Bostwick, in the autumn of that year, joined his ship at Savannah, entered upon the duties of his appointment, and continued faithfully to discharge the same until, in common with the officers and crew of that vessel, he perished. That, besides the public moneys and property entrusted to him, he took with him a considerable amount of private funds.

That the petitioner is the only survivor; that his co-sureties have been dead several years, and their estates distributed without the knowledge of any demand against them on account of their suretyship; that he has recently been notified by the Treasury Department that there is a balance on the books of the Department, against said Purser Bostwick, of \$6,237.11, and prays that a law may be passed to exonerate the sureties, and that the said balance may be released and discharged.

The committee have called upon the Treasury Department for the facts in the case, and have received a communication from the Fourth Auditor, which is referred to, and made part of this report.

Taking all the circumstances into consideration, the committee are of opinion that the prayer of the petitioner should be granted, and report a bill for that purpose.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 29, 1834.*

SIR: In compliance with the request contained in your letter of the 20th instant, I have the honor to communicate such information in reference to the petition of Samuel Belding as is furnished by the files of this office.

Mr. Belding was one of the sureties of Purser Melancton W. Bostwick, who was lost in the United States brig *Epervier*, in the summer of the year 1815.

Preparatory to the cruise, Purser Bostwick received from the agents of the Navy Department, in money, \$14,509.24, and in sloop clothing \$7,350, making in all the sum of \$21,859.24.

On the 3d of May, 1815, he transmitted to the Navy Department a muster roll, showing the advances made by him to the officers and men of the *Epervier*, up to the 30th April, and sundry other vouchers.

The *Epervier* went to sea and was last spoken on the 14th July, 1815, and has never since been heard of.

In 1819, a settlement of his account was made in this office, in which he was charged with all the advances of money and slops made to him as already stated, and credited with the payments shown to have been made by him according to the muster roll, to the 30th April, and other vouchers. As all his papers and effects were lost with him, he received no credit for payments made after the 30th April, before the loss of the vessel.

The balance now standing against him is six thousand two hundred and ninety-seven dollars and eleven cents, (\$6,297.11.) There is no reasonable ground to doubt that the payments made by him from the 30th April, 1815, to the 15th July, together with the public money and property in his possession on board the *Epervier*, and lost with the vessel, were more than equal in amount to this balance.

It would not be unjust in Congress, I think; to direct the account to be closed.

The papers are returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

The Hon. GERRIT Y. LANSING, *Naval Committee, House of Representatives.*

23D CONGRESS.]

No. 535.

[1ST SESSION.]

ON CLAIM OF A CAPTAIN'S CLERK IN THE NAVY TO PAY, AFTER BEING DISMISSED BY HIS CAPTAIN, ON THE GROUND OF HIS HAVING RECEIVED HIS APPOINTMENT FROM THE SECRETARY OF THE NAVY, &c.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1834.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of James W. Muse, reported:

That the petitioner was captain's clerk on board the sloop-of-war *Fairfield*, Captain F. A. Parker, and entered upon the duties of that station in August, 1828. The ship sailed for the Mediterranean service in that month, and while at Smyrna in December following, Mr. Muse states that he was dismissed from the office of clerk by Captain Parker, and directed to go on board the *Porpoise* then in that port as purser's steward, or to return home. That he determined to return to the United States, where he arrived in June, 1829. The petitioner produces a written order from the Secretary of the Navy, dated 11th July, 1828, directing him to proceed to New York and report himself to Master Commandant F. A. Parker for duty as captain's clerk. He claims pay from the time he entered on board the ship in that capacity until the end of the cruise, upon the ground that he received his appointment from an authority paramount (to wit, the Navy Department,) and was unlawfully dismissed by Captain Parker. The grounds of his dismissal are not stated by him, and are not known from any other source.

It appears that captains' clerks are generally selected by the captains themselves, at whose will they receive their employment. It is stated that the order of the Secretary of the Navy is not an appointment but an order, probably given with a view to entitle Mr. Muse to traveling expenses. That on his return Mr. Muse claimed to be entitled to pay as captain's clerk until he should be discharged by the Secretary of the Navy. His official tenure, however, was not considered different from that of other captains' clerks; but on account of the apparent hardship of his case he was allowed two months' pay to cover the time occupied in his return, although captains' clerks are not usually paid beyond the time at which they are discharged by the captains who employ them. The fact that captains' clerks hold their appointments from the captains of the navy under whom they act, and are liable to be dismissed by them at will, is satisfactory to the committee that nothing is due from the government to the petitioner, whose contract, as to his term of service, being dependent only upon Captain Parker, Mr. Muse must look to him for redress for any damage he may have sustained, if such be due.

The committee therefore report that the prayer of the petitioner ought not to be granted.

23d CONGRESS.]

No. 536.

[1st SESSION.]

ON CLAIM OF A QUARTERMASTER SERGEANT OF THE MARINE CORPS TO EXTRA PAY,
AS CLERK TO THE QUARTERMASTER OF SAID CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 28, 1834.

Mr. MILLIGAN, from the Committee on Naval Affairs, to whom was referred the petition of John S. Devlin, reported:

That it appears, by the papers submitted to them, that the petitioner has been quartermaster sergeant of the marine corps since April, 1825; that during that period he acted as clerk to the quartermaster of the said corps, and has received as a compensation for his services, with the approbation of the commandant, twenty dollars per month out of the contingent appropriation; that in 1829 the present Fourth Auditor of the Treasury rejected many of the allowances previously made to officers of the marine corps, and among others that of the petitioner to the amount of one hundred and ninety dollars, which had been paid him for services as aforesaid.

The grounds upon which the Fourth Auditor rejected this allowance are twofold: first, because he does not believe that the quartermaster of the corps had any right to sanction this allowance; and, secondly, because he can find no *written* authority in the archives of the Department prior to the 1st of July, 1828, which authorizes the same.

It appears, however, to your committee, from a letter of the Fourth Auditor himself, addressed to the Hon. John Branch, then Secretary of the Navy, that both the paymaster and quartermaster of the marine corps were in the habit of taking clerks from the line of their corps and allowing them extra compensation; that the services spoken of were unquestionably rendered; that they were onerous in their character, and, finally, that they had been passed by the accounting officer at the Treasury. The committee believe that although there may not have been any *written* authority from the Department, under which this allowance can be justified, yet that it was the established usage at the time, in illustration of which fact they would particularly cite the case of Sergeant Abbott, a clerk to the paymaster of the said marine corps, where a similar account was passed and permitted to stand.

In conclusion, your committee would remark that this same application was submitted to them at the last session, when, after a careful review of all the facts, they were so thoroughly impressed with its equity and justice that they unanimously reported a bill directing it to be settled in accordance with those principles. A bill for that purpose accordingly passed both Houses of Congress and became a law. As, however, the accounting officer still considers it his duty to disallow the amount claimed by the petitioner, and the committee, upon a second review, continue to entertain the same favorable opinion of its merits, they beg leave to report a bill allowing the specific amount.

23d CONGRESS.]

No. 537.

[1st SESSION.]

ON THE EXPEDIENCY OF EQUALIZING THE PAY OF THE OFFICERS OF THE ARMY AND
NAVY ACCORDING TO THEIR RELATIVE RANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 28, 1834.

Mr. WATMOUGH, from the select committee appointed to inquire into the expediency of equalizing the compensation of the officers of the army and navy, and fixing the amount of compensation by law, instead of allowances now made by the Department, reported:

That they have maturely and deliberately investigated the subject-matter submitted to their charge, and are constrained to say that the plan proposed by the honorable Secretaries of the War and Navy Departments, purporting to equalize the pay of the officers, &c., &c., of the army and navy of the United States, has failed to effect its object; its assumptions have appeared to them unsound, and its principles unequal in their bearing. At the same time, your committee feel bound to state their convictions, that whatever injustice or inconsistency is apparent, must be imputed rather to the difficulties which embarrass the whole subject, than to any intention or design on the part of the distinguished gentlemen with whom the plan has originated. With the view to lessen or remove these difficulties, your committee have anxiously sought the most accurate and extensive information; they now proceed to submit the result of their labors.

Your committee have assumed the following principle as both just and expedient: That the organization of the army and navy having long been assimilated on the score of *rank*, as is evident by a reference to the annexed resolution, marked A, of November 15, 1776, and the subsequent regulation of 1818 appended thereto, should likewise be made to correspond on the score of *compensation* allowed the relative grades. A fair spirit of distributive justice demands that the salaries of officers of similar rank, performing similar duties, exposed to similar or greater dangers, and encountering equal if not greater responsibilities, should be made to approximate. The duties, the dangers, and the responsibilities of the naval service considered, your committee reflect, with pain, upon the disproportion between the salaries allowed those engaged in it, and the compensation enjoyed by other public officers employed in the civil departments of the government. A reference to the documents annexed, marked B, C, and D, will prove at once, no doubt to the surprise of many, how widely the principle of equal justice has been departed from in the past legislation of Congress, so far as concerns the interests of the navy of the United States.

Your committee fully appreciate the delicacy of the task they have assumed; they are well aware of the high standing and general intelligence of the army of the United States, of the services which it has rendered the country, of the exalted patriotism of its officers, and of its present efficient organization. They state, with pleasure, their conviction that it was no more than an act of justice, becoming a free and enlightened nation, to increase the compensation of the officers and soldiers of the army, at a time when the increased resources of the country fully justified such increased expenditure. But they confess themselves entirely at a loss to conceive why a similar act of justice has not been extended towards that branch of the service, whose existence is most consonant with the spirit of our institutions, and most congenial to the habits, feelings, and character of the great mass of our population. They confidently hope that the period has at length arrived when Congress will feel itself called upon, by an act of justice, to do away, in the minds of our gallant seamen, with all those jealousies and discontents which the unequal legislation hitherto pursued was so well calculated to engender, and establish that harmony between the two great arms of our national defence, which ought ever to prevail.

By the act of _____, the army was placed upon a footing of comfort and convenience, believed to be inferior to no service in the world. Its officers are exposed to no extraordinary duties; they are called upon to make few if any sacrifices; they are never transported to foreign countries, nor to climates prejudicial to their health; they are seldom if ever separated from their families, and with but few exceptions, and those but for short periods, they are enabled to spend their time in the best quarters which our luxurious cities or comfortable garrisons can afford. They are, for the most part, educated in the best possible manner, at the public expense, and immediately on leaving their school are provided with the means of subsistence, much greater than has been allowed to the exposed and weather-beaten sailor, who bears upon his brow the laurels of many victories. Notwithstanding all these advantages incident to a state of peace, their pay and emoluments have been on a gradual increase since the termination of the last war, while the means by which they could hope, and it is believed earnestly desire, to return a fair equivalent, have decreased in a proportionate ratio. Our foreign relations are at this period, and are long likely to continue to be, of a purely pacific character. There can arise no inclination on the part of our government to assume a belligerent or even a mediatorial attitude abroad, and there is less apprehension that the services of our army can be required at home. Our Indian relations have terminated in the utter expulsion, far beyond our borders, of all those powerful tribes which it was so essential at all times to overawe, while the great means of employment, once so mainly relied upon as the principal source of occupation for the skill, intelligence and science of the army, in the consummation of a system of internal improvement, have been almost entirely relinquished.

With the navy of the United States the case is widely different. At its first institution it was equipped but for a specific and temporary purpose. The confined and crippled resources of the country at that period admitted of no more enlarged or expanded view; many of our most patriotic and enlightened statesmen resisted the policy; they deemed it inconsistent with the nature of our institutions, and at variance with that principle of rigid economy upon which they considered their permanency to depend. They thought likewise that the day was far distant when the limited; and at that period crippled resources of the country would be so enlarged as to admit the establishment of a navy capable of contending successfully with the well organized fleets of Europe. These fears have long since vanished. The invincibility of British seamanship is proved to have been entirely imaginary.

The resources of our country have increased beyond all former example. The necessity which first induced the building of a few ships-of-war to protect a growing commerce, and avenge the insults offered to our flag, has extended itself to a commerce which has now reached every quarter of the globe, and produced a corresponding necessity of increased means of defence. The heroic valor of our seamen has proved itself equal to every emergency, and firmly established them in the affections of their countrymen. In fine, every reason which at first prompted an aversion to a permanently established navy, has been removed, and the absolute utility and general policy of such means of defence universally admitted.

The course, therefore, of every administration, sanctioned by the unanimous voice of the people, has been to render our naval force as efficient as possible. An annual appropriation provides for its gradual increase. Immense sums are expended in creating navy yards, and providing vast stores of timber, and of all the *matériel* necessary for a state of war. The places of such ships as decay or become useless from age are immediately supplied, and no act of legislation, which tends to engraft this great system upon the general policy of the country, is ever refused or rejected. Yet, notwithstanding the steady purpose thus manifested throughout; notwithstanding the ample provision made for the officers of the army; by a strange and remarkable incongruity, the interests of those of the navy have been entirely overlooked. A reference to the document B above alluded to, cannot fail to excite serious attention. The disclosure of the fact that no increase of compensation to the officers of the navy has taken place since the formation of the government, must operate powerfully upon the minds of the representatives of the people to obtain from them that justice to the gallant seaman which has been so long delayed. A hundred acts of legislation are to be found, making the most ample provision for the *matériel* of the service, scarce one which tends even remotely to foster its *morale*; and the nation will learn with surprise that the appeals of those who have so gloriously sustained the honor and triumph of her flag, and dispelled the chimerical apprehensions of naval invincibility abroad, have been invariably treated by Congress with the most mortifying indifference and neglect.

Your committee cannot perceive anything in the nature of the two services to justify so glaring a disparity of treatment.

The navy is our right arm of defence. It retrieved the fading glory of our country in the late war, and bore our flag in triumph over every sea. Its annals are adorned with deeds of the most chivalric spirit. It restored our violated rights, and shielded our commerce when attacked; and to it, and it alone, must the country ultimately look for the protection of her liberties, and the defence of her institutions against all foreign aggressions. The navy must no longer be considered as a temporary expedient; upon it is devolved a trust of the greatest national importance—the protection of a vast commerce, and the maintenance, with becoming dignity and intelligence, of all the foreign relations of the country.

The question naturally arises, can this be effectively performed under its present organization? How can that service prosper whose officers experience a sense of inferiority in being denied emoluments equivalent to those in the corresponding service of their own country?

Degradation and poverty cannot excite to emulation nor ensure success.

It is apparent that every means have been adopted by Congress to make the army efficient, and to create, during a state of peace, the nucleus of a large and well organized establishment for the exigencies of war.

The policy of this no one means to question. Under a view of all concurrent circumstances, the necessity of such course does not appear quite so clear.

In case of any future war, it cannot be expected that the land forces of the republic will be called, to any very great extent, into action. Hereafter, all our wars must be essentially, and in the very nature of things, maritime. But admitting that the army is to be the main means of defence to be relied upon, will it be denied that its organization could not be completed in an incredibly short period of time? The elements of an efficient land force exist everywhere throughout our territory. They are to be found in the military enthusiasm of our people, and in their hardy, active, and enduring habits. The well-disciplined regiments of volunteers with which all parts of our country abound, are another source mainly to be relied upon, to afford a fine body of recruits for the army in all its gradations of rank. Upon the whole, it cannot be doubted that a land force could be effectually organized for any exigency, from the means which exist in the nature of circumstances, and with little or no regard to the fostering hand of government, in much less time, and at infinitely less expense, than would be unavoidably required to place our naval force upon a footing of anything like equality with any of the navies of Europe, much less with that of Great Britain, our great commercial rival. It is all-important, therefore, that the timely and liberal provisions which have been extended to the army of these United States should be made to reach the more important interests of the navy, and that its officers might be relieved from the embarrassments under which they are at present known to labor.

Your committee do not deem it of importance to enlarge more fully on this topic. The whole matter has been ably and eloquently discussed by a former committee of Congress, and will be found in report No 85 of the 2d session of 21st Congress, to which your committee respectfully ask a reference. They now proceed to the subject matter more immediately referred to them—the relative rank and pay of the officers of the army and navy.

The following is the relative rank between officers of the army and navy, as shown in the regulations for the government of the army, recommended by the Secretary of War, and adopted by Congress, viz:

A captain of the navy under 5 years ranks with a lieutenant colonel.

A captain of the navy over 5 years ranks with a colonel.

A captain of the navy over 10 years ranks with a brigadier general.

A captain of the navy over 15 years ranks with a major general.

A master commandant ranks with a major.

A lieutenant ranks with a captain.

Neither the pay nor the rations of a navy officer of any grade are affected by duration of service. A captain, if commanding a squadron, is by law entitled to \$1,200 as pay and \$1,460 for rations, making \$2,660 per annum; if not commanding a squadron, then his pay and rations amount to \$1,930. A master commandant is allowed \$1,176.25 per annum.

The following shows the amount of the pay, &c., of certain officers of the army, considering each as commanding a separate post:

Major general	\$6,512 64
Brigadier general.....	4,422 48
Colonel.....	2,941 32
Lieutenant colonel.....	2,372 32
Major	2,106 32
Captain	1,569 00
First lieutenant.....	1,443 00
Second lieutenant.....	1,383 00
Brevet second lieutenant.....	1,383 00
Cadets	338 00

These amounts of annual pay comprise the regular salary of each officer, with his double rations and other allowances. These, it is true, are only allowed at the discretion of the Executive, and it is fairly to be presumed are benefits not extended equally to all.

A view of the above statement at once makes manifest the glaring injustice under which the officers of the navy have for years labored. The only pretence for this has been the right to which they are entitled of prize money—a pretence so evidently unfounded, during a state of peace of so long continuance as the present, that it is not deemed important to say more in reference to it than simply to state the fact.

It is not pretended that the plan of the honorable Secretaries obviates this injustice. On the contrary, a reference to the annexed letter of the Secretary of the Navy, to be found among the documents accompanying this report, distinctly admits that the disproportion is not corrected by it. Your committee concur with the honorable Secretary, and having, as they believe, fully established the injustice of the existing inequality, unanimously concur in the opinion that, on the principle stated in the outset of this report, "*a perfect equality ought to be established in all cases between the two services.*"

This being admitted, the question arises, whether such perfect equality should be effected by further reduction of the pay of the army, or by increasing that of the navy, or by such moderate reduction of the highest rate of compensation in the army, and such addition to the present pay of officers in the navy of equal rank, as will produce that equality in the compensation of the officers of both branches of the service which seems to be contemplated by the resolution.

Your committee have come to the conclusion, for various reasons, that the latter course should be pursued. By its adoption, they are enabled to correct one of the evils arising from partial legislation. It will be apparent to every one who may examine the present rate of compensation in the army, that there exists a great relative disproportion of pay to the service performed; this disproportion is the natural consequence of legislating too much in detail, of increasing the compensation of one particular grade, without reference to other grades in the service. Your committee have not been able to discover on what principle, or by what rule, the Secretaries have proposed a higher rate of compensation to the "senior officer of the navy," where the rank established by law applies equally to all captains over fifteen years' standing, unless it was in contemplation to create the appointment of admiral. This, your committee neither feel themselves authorized to propose, nor do they consider it either necessary or expedient at the

present period. They confine themselves, therefore, to the law as it now exists, establishing the relative rank.

The highest rank acknowledged under that law is that of a captain over fifteen years' standing, corresponding with that of a major general, the highest rank known in our army. Your committee, therefore, forbear to disturb or affect the relative rank, so long established and so well defined, by allowing a greater compensation to the senior officer than to others of the same standing.

They now proceed to give some explanations of the bill submitted by them.

They have conformed the bill to the relative rank, and proposed fixed salaries to the officers of equal grade in the two branches of the service. The principle assumed recommends itself in a threefold light. It presents at a single glance the compensation allowed each grade. It graduates the pay to each, according to the service required and the expenses incident to each particular service; and, finally, in the simplest possible manner, it does equal justice to all.

So much positive good, however, is not to be obtained without some partial evil. The compensation to some classes of officers has necessarily been much reduced, and large additions made to that of others. To some, again, the proposed pay varies but little from that at present allowed; all this has been the natural result of the great and manifest disparity which has heretofore existed. Your committee have considered that a just regard to the equal rights of this large and most estimable class of public officers demands the correction now proposed. They are deeply sensible of the delicacy of the task which has fallen to their charge, and rely with confidence on that high sense of honor which has always characterized our officers, justly to appreciate the motives which govern them.

A manifest disregard of responsibility and duty has occurred in the case of the masters commandant. It must be remarked here, that hitherto the compensation to this class of officers has been *degradingly low*; nor is it thought that the one proposed bears more than an equitable proportion to their station, or to the service required of them. The same remark applies to the lieutenants and sailingmasters.

The annexed bill proposes to increase the pay of captains in the army and lieutenants in the navy, after ten years' service; for it is to be observed, that what might be considered a fair compensation for a young man just entering life, would be entirely inadequate to meet the increasing demands upon one who is burdened with the maintenance of a family. If these officers had any certainty of being raised to a higher grade within a reasonable period, they could, in some measure, afford to be badly paid for a time. This, however, is not the case; many have already served from sixteen to nineteen years, with very little hope of advancement. For this, your committee seek to establish some equivalent, certainly a very inadequate one; they therefore give them something to look forward to in lieu of promotion. It is believed that, by the scale established, no more than an act of justice is performed. The compensation of these grades will then barely compare with that of others in the *civil* department of government.

Your committee do not think it expedient to allow first lieutenants higher pay than other lieutenants. It is feared that such a principle would prove detrimental to the discipline and harmony of the service. Influence would then be necessary to get these situations. Injustice would ensue. The most deserving could not always command the most influence. The honor of the situation ought of itself to be sufficient to induce the lieutenant to seek it; if it were otherwise, his fitness for it might well be questioned: of all situations, those of the navy should be the last to depend upon extraneous influence.

A proper estimate seems not to have been made of the office and duties of the medical officers of the navy. This grade certainly requires the highest order of intellectual and moral habit. It is believed great injustice is done them by the plan of equalization proposed by the Secretary. According to it, a surgeon of the highest grade, who may have been twenty years in the service, has allotted to him \$1,600 when at sea, \$1,400 at a yard, and \$1,000 if he has just returned from a long cruise, although, in the course of it, his health may have been very much decayed, or his constitution entirely broken down; while a surgeon of a regiment receives \$2,000 in every instance, with an extra allowance when in actual service. So likewise a passed surgeon of nine years, who may have been an assistant for ten years, would receive only half the pay of an army surgeon who has but just passed through his mateship.

Your committee have endeavored to correct this injustice in the graduations they propose.

It has appeared reasonable that a compensation, increased and graduated according to the duty required and responsibility assumed, should be allowed the passed midshipmen, as some inducement to a fine class of young men to continue in and devote themselves to the service.

Considering that the situations of *boatswain* and *gunner* require officers of peculiar skill, experience and tact, and that they have no hope of promotion in the service, your committee deem it just and proper that an ample compensation should be allowed these grades, to induce competent and confidential native-born American citizens to continue in them for life. So likewise with the carpenters and sailmakers.

The clerks in the navy yards are not noticed in the plan proposed by the Secretaries. Your committee are induced to believe that they are laborious and faithful officers, and have therefore included them in the bill proposed, at an increased compensation, believed to be barely equal to the duties and responsibilities required of them.

The schoolmasters being already provided for in a bill now before the House, your committee do not deem it necessary to do more at present than notice the fact.

In conformity with the general principles and details thus laid down, your committee now respectfully submit the accompanying bill.

A BILL to equalize and regulate the pay of the officers of the army and navy of the United States on a peace establishment.

Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That the following sums be paid to the officers of the army and navy of the United States, in full compensation for their annual services, in lieu of present pay and all allowances, viz:

To major generals of the army in actual command, and to captains in the navy of over fifteen years' standing, when commanding squadrons, five thousand dollars; when on other duty, four thousand dollars; on leave, or waiting orders, three thousand dollars. To brigadier generals in command, and to captains in the navy over ten years, commanding squadrons, four thousand dollars; on other duty, three thousand dollars; on leave, or waiting orders, two thousand five hundred dollars. To colonels in command at military stations, the adjutant general, inspector general, commissary general, and the chiefs of the

Ordnance and Engineer departments, in service, and to captains in the navy over five years, at sea, three thousand dollars; on other duty, two thousand five hundred dollars; on leave, or waiting orders, two thousand dollars. To lieutenant colonels in command at military posts or stations, and to captains in the navy of not over five years' standing, at sea, two thousand five hundred dollars; on other duty, two thousand two hundred dollars; on leave, or waiting orders, one thousand nine hundred dollars. To majors commanding at military posts or stations, and masters commandant in sea service, two thousand dollars; on other duty, one thousand six hundred dollars; on leave, or waiting orders, one thousand two hundred dollars. To captains in the army of over ten years' standing, commanding companies, and to lieutenants in the navy over ten years, in sea service, one thousand four hundred dollars; on other duty, one thousand two hundred dollars; on leave of absence, or waiting orders, one thousand dollars. To captains in the army under ten years, in command, and lieutenants in the navy not over ten years, in sea service, one thousand two hundred dollars; on other duty, one thousand one hundred dollars; on leave, or waiting orders, nine hundred dollars. To surgeons in the navy over fifteen years, at sea, one thousand eight hundred dollars. To surgeons in the army and navy over fifteen years, on other duty, one thousand six hundred dollars. To surgeons in the navy over ten years, at sea, one thousand six hundred dollars; on other duty, one thousand four hundred dollars. To surgeons in the army over ten years, in actual service, one thousand four hundred dollars; and to surgeons in the navy under ten years, at sea, one thousand four hundred dollars. To surgeons in the navy under ten years, on other duty, and to surgeons in the army under ten years, in service, one thousand two hundred dollars. To all surgeons over five and under ten years, on leave, or waiting orders, one thousand dollars. To surgeons in the navy under five years, at sea, one thousand one hundred dollars; and to surgeons in the army and navy, in other service, one thousand dollars. To assistant navy surgeons, at sea, one thousand dollars; on other duty, and to assistant army surgeons on duty, each, nine hundred dollars; on leave, or waiting orders, seven hundred dollars. To chaplains to be employed by the Secretary of the Navy, in all ships or vessels-of-war over sixteen guns, when at sea, and who shall also perform the duty of schoolmasters at sea, or on shore at the naval schools, at the discretion of the Department, one thousand dollars. To first lieutenants in the army, on duty, one thousand one hundred dollars. To second lieutenants in the army, on duty, nine hundred dollars. To brevet second lieutenants in the army, on duty, seven hundred dollars. To cadets in the army, on duty, three hundred dollars. To aid to major general, in addition to pay in line, one hundred and fifty dollars. To assistant quartermaster and commissaries, and aid to brigadier general, in addition to pay in line, one hundred and twenty dollars. To passed midshipmen, employed as sailing-masters, at sea, nine hundred dollars. To sailingmasters at navy yards, seven hundred dollars. To passed midshipmen, employed as second masters in ships of the line and frigates, at sea, seven hundred dollars. To passed midshipmen over five years, at sea, six hundred dollars; on other duty, and those under five years, at sea, five hundred dollars; on other duty, and under five years, four hundred and fifty dollars; on leave, or waiting orders, four hundred dollars. To secretaries to commanders of squadrons, to clerks in navy yards, and to commandants on shore stations, nine hundred dollars. To clerks to commanders, at sea, five hundred dollars. To midshipmen, at sea, four hundred dollars; shore stations, and other duty, three hundred and fifty dollars; on leave, or waiting orders, three hundred dollars. To boat-swains, gunners, sailmakers, and carpenters, when at sea, seven hundred dollars; on other duty, five hundred dollars.

SECTION 2. *And be it further enacted*, That, from and after the passage of this act, it shall be the duty of every medical officer of the United States navy to provide himself with all such instruments as are necessary in his profession, and that the sum of — dollars be, and the same is hereby, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be applied, on an estimate to be furnished by the board of naval surgeons, to the object specified in this act: *Provided*, That, in the event of the death or resignation of any such surgeon or assistant surgeon, the same shall be turned over to his successor in office.

SECTION 3. *And be it further enacted*, That the pay of all officers not enumerated in this act shall be graduated and equalized, by allowing to such officers the same stated salary as is provided for those named in this act, of the same or assimilated rank, and who have heretofore received like or equal compensation, except such officers as have now by law a fixed salary. Officers temporarily performing duties belonging to those of a higher grade, to receive the compensation allowed to such higher grade, while actually so employed. Officers on furlough, at their own request, shall receive only one-half their pay at shore stations; one ration per day, and no more, shall be allowed to all officers in vessels for sea service, The above compensation to be in full for pay and subsistence, and for all allowances whatever, except for travel under orders from the Department, for which officers shall be allowed sixteen cents per mile; and for employment on special service, and chamber money or house rent on shore stations, (where quarters have not been provided,) not exceeding, in any one case, two hundred dollars per annum, at the discretion of the Secretaries of the Department of War or of the Navy; and all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

A.

Resolution of November 15, 1776.

FRIDAY, November 15, 1776.

Congress took into consideration the report of the committee relative to the navy; whereupon,

Resolved, That a bounty of twenty dollars be paid to the commanders, officers, and men of such continental ships or vessels-of-war as shall make prize of any British ships or vessels-of-war, for every cannon mounted on board of each prize at the time of such capture; and eight dollars per head for every man then on board and belonging to such prize.

That the rank of naval officers be to the rank of officers in the land service, as follows:

Admiral, as a general; vice admiral, as a lieutenant general; rear admiral, as a major general; commodore, as a brigadier general; captain of a ship of 40 guns and upwards, as a colonel; captain of a ship of 20 to 40 guns, as a lieutenant colonel; captain of a ship of 10 to 20 guns, as a major; lieutenant in the navy, as a captain.

Relative rank of army and navy officers, extracted from navy regulations of 1818.

3. The Secretaries of the War and of the Navy Departments have, with the approbation of the President of the United States, established the relative rank between the officers of the army and navy; the Navy Commissioners have taken their regulations on the subject as a guide, which are as follows: Commodores shall rank with brigadiers general; captains in the navy shall rank with colonels; masters Commandant shall rank with majors; lieutenants in the navy shall rank with captains in the army.

4. The rank and precedence of sea and land officers, as above stated, will take place according to the seniority of their respective commissions.

5. This arrangement shall not give any pretence to land officers to command any part of the naval force of the United States; nor shall it give to sea officers any right to command any part of the army of the United States; nor shall either have a right to demand the compliments due to their respective ranks, unless on actual service.

B.

Pay and emoluments of the following grades of officers of the army, at the periods stated, as fixed by law.

Grade.	Pay per annum.	Subsistence.	Forage.	Servants' pay.	Servants' subsistence.	Servants' clothing.	Amount per annum.	Remarks.	Total pay, &c.
Major general—in 1794.....	\$1,992	\$1,095	\$240	None.	\$3,327	Act 5th March, 1792.
Major general—in 1799.....	1,992	1,095	240	3,327	Act 3d March, 1799.
Major general—in 1830.....	2,400	1,095	672	240	292	120	4,819	\$6,512 64
Brigadier general—in 1794.....	1,248	876	192	None.	2,316	Act 5th March, 1792.
Brigadier general—in 1799.....	1,248	876	192	2,316	Act 3d March, 1799.
Brigadier general—in 1830.....	1,248	876	480	180	219	90	3,093	4,422 48
Colonel—in 1794.....	None in service.
Colonel—in 1799.....	do
Colonel—in 1830.....	900	438	384	120	146	60	2,048	2,941 32
Lieutenant colonel—in 1794.....	900	438	144	None.	1,482	Act 5th March, 1792.
Lieutenant colonel—in 1790.....	900	438	144	1,482	Act 3d March, 1799.
Lieutenant colonel—in 1830.....	900	438	288	120	146	60	1,699	2,372 52
Major—in 1794.....	600	292	120	None.	1,012	Act 5th March, 1792.
Major—in 1799.....	600	292	120	1,012	Act 3d March, 1799.
Major—in 1830.....	600	292	288	120	146	60	1,506	2,106 32

NOTE.—Subsistence was calculated at the contract price previous to the year 1808; for want of information on that point, twenty cents, the present commutation, is assumed for each period.

Officers are required to keep their servants and horses, to entitle them to the allowance.

Double rations are allowed to officers when commanding separate posts, and are to be added to the above in such cases.

Fuel and quarters are allowed by regulations, and are paid through the Quartermaster's department, and are not included in the above.

C.

Statement showing the pay and rations allowed at various periods to captains, masters commandant, and lieutenants of the navy.

	1794.			1799.			1831.		
	Dollars per month.	Rations per day.	Sum total.	Dollars per month.	Rations per day.	Sum total.	Dollars per month.	Rations per day.	Sum total.
Captains of 32 guns and upwards	\$75 00	6	\$1,338 00	\$100 00	8	\$1,734 00	\$100 00	8	\$1,930 00
Captains of 20 and under 32 guns	75 00	6	1,338 00	75 00	6	1,447 50
Masters commandant.....	60 00	5	1,085 00	60 00	5	1,176 25
Lieutenants commanding	50 00	4	892 00	60 00	5	1,176 25
Lieutenants	40 00	3	699 00	40 00	3	699 00	50 00	4	965 00
Commanders of squadrons.....	100 00	16	2,368 00	100 00	16	2,660 00

NOTE.—In 1814 the President was authorized, at his discretion, to increase the navy pay twenty-five per cent. This increase was extended only to those serving on the lakes. The law was repealed in 1817.

The present value of the navy ration is twenty-five cents; from 1799 to 1812 it was only twenty cents; hence the difference in the aggregate pay of 1799 and that of 1831.

Captains in command of squadrons are by law allowed double rations.

D.

Salaries of various civil officers of the government at different periods and at present.

Difference of compensation between officers of the army and navy, calculated on the maximum in each grade in the army and navy.

Major general, first rank, receives annual compensation more than captain over 15 years' standing, first rank in navy, of.....	\$3,542 00
Brigadier general, second rank, receives annual compensation more than captain over 10 years' standing, second rank in navy, of.....	2,231 00
Colonel, third rank, receives annual compensation more than captain over 5 years' standing, third rank in navy, of.....	799 00
Lieutenant colonel, fourth rank, receives annual compensation more than captain under 5 years' standing, fourth rank in navy, of.....	305 00
Major, fifth rank, receives annual compensation more than master commandant, fifth rank in navy, of.....	850 75
Captain, sixth rank, receives annual compensation more than lieutenants, sixth rank in navy, of.....	636 25

Brevet second lieutenants in the army, under existing regulations, immediately after leaving West Point academy, educated at public expense..... \$1,383 00

The pay of a master commandant, who has been in service 25 years, and in most cases is charged with the maintenance of a wife and children, commanding a ship of 30 guns and upwards, on a foreign station, receives an annual compensation of only..... \$1,176 25
Deduct hospital dues..... 2 40

1,173 85

Balance in favor of brevet second lieutenants..... \$209 15
If from this balance be deducted the only allowance of cabin furniture made to a master commandant..... 180 00

There still remains a balance against the naval, of..... \$29 15

Lieutenants in the navy of *eighteen years'* service receive..... \$965 00
Brevet second lieutenant in army, as above..... 1,383 00

Leaves a balance against the navy lieutenant, of..... \$418 00

* Made commissioner of the revenue.

A BILL to equalize and regulate the pay of the officers of the army and navy of the United States on a peace establishment.

Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That the following sums be paid to the officers of the army and navy of the United States, in full compensation for their annual services, in lieu of present pay and all allowances, viz:

To major generals of the army in actual command, and to captains in the navy over fifteen years' standing, when commanding squadrons, five thousand dollars; when on other duty, four thousand dollars; on leave, or waiting orders, three thousand dollars.

To brigadier generals in command, and to captains in the navy over ten years, commanding squadrons, four thousand dollars; on other duty, three thousand dollars; on leave, or waiting orders, two thousand five hundred dollars.

To colonels in command at military stations, the adjutant general, inspector general, commissary general, and the chiefs of the Ordnance and Engineer department, in service, and to captains in the navy over five years, at sea, three thousand dollars; on other duty, two thousand five hundred dollars; on leave, or waiting orders, two thousand dollars.

To lieutenant colonels in command at military posts or stations, and to captains in the navy, not over five years' standing, at sea, two thousand five hundred dollars; on other duty, two thousand two hundred dollars; on leave, or waiting orders, one thousand nine hundred dollars.

To majors commanding at military posts or stations, and masters commandant in sea service, two thousand dollars; on other duty, one thousand six hundred dollars; on leave, or waiting orders, one thousand two hundred dollars.

To captains in the army over ten years' standing, commanding companies, and to lieutenants in the navy over ten years, in sea service, one thousand four hundred dollars; on other duty, one thousand two hundred dollars; on leave of absence, or waiting orders, one thousand dollars.

To captains in the army under ten years, in command, and lieutenants in the navy not over ten years, in sea service, one thousand two hundred dollars; on other duty, one thousand one hundred dollars; on leave, or waiting orders, nine hundred dollars.

To surgeons in the navy over fifteen years, at sea, one thousand eight hundred dollars.

To surgeons in the army or navy over fifteen years, on other duty, one thousand six hundred dollars.

To surgeons in the navy over ten years, at sea, one thousand six hundred dollars; on other duty, one thousand four hundred dollars.

To surgeons in the army over ten years, in actual service, one thousand four hundred dollars; and to surgeons in the navy under ten years, at sea, one thousand four hundred dollars.

To surgeons in the navy under ten years, on other duty, and to surgeons in the army under ten years, in service, one thousand two hundred dollars.

To all surgeons over five and under ten years, on leave, or waiting orders, one thousand dollars.

To surgeons in the navy under five years, at sea, one thousand one hundred dollars; and to surgeons in the army and navy, in other service, one thousand dollars.

To assistant navy surgeons, at sea, one thousand dollars; on other duty, and to assistant army surgeons on duty, each, nine hundred dollars; on leave, or waiting orders, seven hundred dollars.

To chaplains, to be employed by the Secretary of the Navy in all ships or vessels-of-war over sixteen guns, when at sea, and who shall also perform the duty of schoolmasters, at sea, or on shore at the naval schools, at the discretion of the Department, one thousand dollars.

To first lieutenants in the army, on duty, one thousand one hundred dollars.

To second lieutenants in the army, on duty, nine hundred dollars.

To brevet second lieutenants in the army, on duty, seven hundred dollars.

To cadets in the army, on duty, three hundred dollars.

To aid to major general, in addition to pay in line, one hundred and fifty dollars.

To assistant quartermaster and commissaries, and aid to brigadier general, in addition to pay in line, one hundred and twenty dollars.

To passed midshipmen, employed as sailingmasters, at sea, nine hundred dollars.

To sailingmasters at navy yards, seven hundred dollars.

To passed midshipmen, employed as second masters in ships of the line and frigates, at sea, seven hundred dollars.

To passed midshipmen over five years, at sea, six hundred dollars; on other duty, and those under five years, at sea, five hundred dollars; on other duty, and under five years, four hundred and fifty dollars; on leave, or waiting orders, four hundred dollars.

To secretaries to commanders of squadrons, to clerks in navy yards, and to commandants on shore stations, nine hundred dollars.

To clerks to commanders, at sea, five hundred dollars.

To midshipmen, at sea, four hundred dollars; shore stations, and other duty, three hundred and fifty dollars; on leave, or waiting orders, three hundred dollars.

To boatswains, gunners, sailmakers, and carpenters, when at sea, seven hundred dollars; on other duty, five hundred dollars.

SECTION 2. *And be it further enacted,* That, from and after the passage of this act, it shall be the duty of every medical officer of the United States navy to provide himself with all such instruments as are necessary in his profession, and that the sum of _____ dollars be, and the same is hereby, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be applied, on an estimate to be furnished by the board of naval surgeons, to the object specified in this act: *Provided,* that, in the event of the death or resignation of any such surgeon or assistant surgeon, the same shall be turned over to his successor in office.

SECTION 3. *And be it further enacted,* That the pay of all officers not enumerated in this act shall be graduated and equalized, by allowing to such officers the same stated salary as is provided for those named in this act, of the same or assimilated rank, and who have heretofore received like or equal compensation, except such officers as have now by law a fixed salary. Officers temporarily performing duties belonging to those of a higher grade, to receive the compensation allowed to such higher grade, while actually so employed. Officers on furlough, at their own request, shall receive only one-half their pay at shore stations; one ration per day, and no more, shall be allowed to all officers in vessels for sea service. The above compensation to be in full for pay and subsistence, and for all allowances whatever, except for

travel under orders from the Department, for which officers shall be allowed sixteen cents per mile; and for employment on special service, and chamber money or house rent on shore stations, (where quarters have not been provided,) not exceeding, in any one case, two hundred dollars per annum, at the discretion of the Secretaries of the Department of War or of the Navy; and all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

NAVY DEPARTMENT, *January 15, 1834.*

SIR: Your letter of the 10th instant has been received; but the document, mentioned as enclosed, has not come to hand.

In reply to your inquiries, I have the honor to submit a copy of a communication from the Navy Commissioners, marked A, 1 and 2, which contains their views fully on the subject of pay.

On account of their references, I enclose a copy of a report by the President to the Senate, this session, marked B, though it probably is already in your possession.

The differences between that document and the project submitted to the Senate by the President, as coming from this Department, are slight, if any, in principle, and are not numerous in detail. Most of the variations could probably be adopted to advantage.

I submit a schedule of pay and some of the allowances in the French naval service, (C,) and a statement of the pay, and some of the allowances in the British naval service, (D.)

These, for convenience, are reduced to our own currency, the pound sterling, in the latter, being computed at \$4.44, and the months in a year at thirteen, being deemed lunar by their usage. But the pound, valued at more, would of course make the pay higher, and the pounds and pence are therefore retained, in order that any person may compute them on a different basis.

In answer to another of your inquiries, I understand the board of revision have prepared new bills on subjects connected with the navy, and which will, in a short time, be laid before Congress. But none of them are now in my possession.

In relation to the general features of the pay contemplated in the tables from this Department, it may be remarked, in explanation, that the navy pay, as proposed, when its amount is to be compared with the present pay, or with the pay of the army, must be computed really higher than its nominal amount, by the addition of a ration when on duty, by one project, and by rent in certain cases, and a ration when at sea, by the other project. In all cases, except those of lieutenants, surgeons, and assistant surgeons which have within a few years been provided for, there is also a large increase of pay while on duty; and, taking the pay on an average, as our records show officers to be on and off duty, there is believed to be a considerable increase in most classes, and in none any diminution. The increase would, in some cases, have been larger, had the pay in the army to those of corresponding rank been larger. These results were deemed proper to be sought, in proportioning anew the pay among all the different ranks in the navy, and in assimilating it, as the resolution of the Senate was supposed to require, more nearly than at present, to the pay allowed to similar ranks in the army. In the case of pursers, although the nominal increase is very great, yet, as the system of pay is changed from pay and allowances to a salary in full, it is supposed that the actual compensation received will in some cases be larger and in some less, but, on an average, not much, if any, larger than it now is. In those classes of officers under warrants, and not midshipmen, the difference in pay, when on and off duty, is larger than in most other classes, because such officers, like seamen, are seldom off duty beyond a short time, and cannot conveniently be long spared from duty. But their average compensation, as they are generally employed, will, by the proposed amounts, be greatly augmented, because it is believed that such augmentation will command a higher order of talent in that grade of the service.

The different characters of the two services on land and water, in various particulars, and especially in respect to the right of prize money, have caused heretofore a greater inequality against the navy than is believed to be proper; and the proposed changes will, if adopted, correct in a great measure, though not entirely, the disproportion now existing. Whether a more perfect equality ought to be established in all cases, and, if so, whether it should be effected by reducing the pay of the army or increasing that of the navy in certain cases, Congress must decide. The discrimination between pay in the navy, when off and on duty, has been introduced in all cases in the proposed table, and is deemed very material to the efficiency of the service. It has existed, by law, to the extent of one-half of the whole pay, ever since 1806, though not much in practice since 1819, except when on furlough. It prevails largely in the navies of both France and England. In the latter, a large proportion of the officers are usually kept on reduced or half-pay when not on duty (see D;) and, in the former, it is specially provided for in the manner detailed in the notes to the table C.

I have nothing further, which appears material, to add on this subject, except that the allowance of travel, in both the navy and army services, as heretofore practiced, is believed to be always confined to travel on duty, and such is the view at the close of the table B, in reference to travel hereafter.

If it be the wish of the committee and of Congress to extend this allowance to travel performed under leaves of absence, and to attend school, and not for duty, (as I infer to be your own views, by a clause in the bill reported as to schools), it will be necessary to make a special provision to that effect, and to increase the appropriation out of which such travel is to be paid. The present appropriations are founded on different estimates, and are barely sufficient to pay the other charges on them, and the travel performed under orders for duty.

I have forbore any comments on pay in our army, or on foreign pay in the land service, from motives of delicacy, supposing that such comments would be more acceptable from persons connected with that branch of the public service.

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

The Hon. G. WATROUGH, *Chairman of Select Committee for equalizing
Army and navy pay, House of Representatives.*

A, No. 1.

WASHINGTON, December 27, 1833.

The board for the revision of the regulations of the navy, &c., have the honor to acknowledge the receipt of your letter of the 19th instant, covering a copy of the message from the President of the United States to the Senate, respecting the pay of the officers of the army and navy.

They have attentively considered the table B, which relates to the proposed pay for the officers of the navy, and beg leave respectfully to refer to the enclosed table (A, 2) for the modifications which they believe may be made with advantage to the interests of the service.

It was deemed advisable to mention the "captain of the fleet," because duties are assigned to a captain acting in that capacity by the revised regulations, and to prevent any doubt as to his proper compensation whenever he might be employed.

The board would respectfully observe that the command of vessels for sea service, and of navy yards, appears to be more important than any other of the ordinary duties of captain, and they have, therefore, suggested a slight increase to the proposed compensation to captains under five years, when thus employed, and a reduction in both classes when on other duty.

The board respectfully recommend the adoption of the slight increase proposed for masters commandant on sea service, under a belief that the *average* compensation to that class of officers, as they will be employed, will still be below the pay of their corresponding rank in the army.

The great responsibility of first lieutenants of large vessels induces the board to recommend the adoption of the proposed modification of the compensation to first lieutenants. They are also of opinion that their pay in ships of the line should be the same as when commanding small vessels, and that the pay of "flag lieutenants" should be equal to that of first lieutenants of frigates, as it will still be less than the proposed pay for aids-de-camp to brigadiers general in the army.

It is also proposed that the pay of the purser of a receiving vessel shall be the same as though in a navy yard.

The board would also recommend the variation of pay, according to the rate of vessel in which sailing-masters are employed, for the same reasons assigned for the change respecting the pay of first lieutenants of vessels; and the same reasons will apply to the boatswain, gunner, carpenter, and sailmaker.

They have also proposed to limit the allowance of the ration to persons employed in vessels for sea service, as in all other situations the officers can procure subsistence for themselves.

It has been thought better to define the employment of officers by their employment "in vessels for sea service," to using the term "at sea," as the latter seemed more liable to misconception.

For the same reason they have proposed a different phraseology in the clause respecting the allowances to be discontinued.

They have also proposed to specify some period within which the officers will not be put on furlough pay, and have named a year, because that seemed not to be a longer period than would be necessary to enable an officer to make use of his time to any immediate advantage to himself.

I have the honor to be, with great respect, sir, your most obedient servant,

JN. RODGERS.

To the Hon. L. WOODBURY, *Secretary of the Navy.*

A, No. 2.

Table showing the modification proposed to be made in the pay of the officers of the navy, as sent by the President of the United States to the Senate, December 5, 1833.

Officers, &c.	Pay as sent to the Senate.	Modifications proposed.
Senior captain in the navy:		
When commanding a squadron.....	\$5,500	\$5,500
When on other duty.....	4,500	4,500
When on leave, or waiting orders.....	3,000	3,000
All other captains:		
When commanding squadrons, or acting as Navy Commissioners.....	4,200	4,200
When of five years' standing, and commanding vessels for sea service, or navy yards, or acting as captain of a fleet.....	3,500	3,500
When on other duty.....	3,500	3,200
When on leave, or waiting orders.....	2,300	2,300
When under five years, and commanding vessels for sea service, or navy yards, or acting as captain of the fleet.....	2,800	3,000
When on other duty.....	2,800	2,700
When on leave, or waiting orders.....	2,000	2,000
Masters commandant or commanders:		
When attached to vessels for sea service.....	2,000	2,100
When attached to a navy yard, or on other duty.....	1,600	1,600
When on leave, or waiting orders.....	1,400	1,400
Lieutenants:		
When commanding a vessel in commission, or when first lieutenants of a ship of the line for sea service.....	1,500	} 1,500
When first lieutenants of navy yards, or of frigates for sea service, or flag lieutenants.....	1,200	
When first lieutenants of a sloop-of-war, or smaller vessel, for sea service....	1,000	} 1,200
	1,200	
	1,200	1,100

Officers, &c.	Pay as sent to the Senate.	Modifications proposed.
All other lieutenants attached to vessels for sea service.....	\$1,000	\$1,000
All lieutenants when otherwise employed.....	1,000	950
When on leave, or waiting orders.....	800	800
Surgeon of a fleet.....	2,000	2,000
Surgeons over ten years, attached to vessels for sea service.....	1,600	1,600
When at a hospital, navy yard, or on other duty.....	1,400	1,400
When on leave, or waiting orders.....	1,000	1,000
Surgeons under ten years:		
When attached to vessels for sea service.....	1,300	1,300
When at a hospital, navy yard, or on other duty.....	1,100	1,100
When on leave, or waiting orders.....	800	800
Purser:		
In a ship of three decks for sea service.....	3,500	3,500
In a ship of two decks for sea service.....	3,000	3,000
In a frigate for sea service.....	2,500	2,500
In a sloop-of-war for sea service.....	2,000	2,000
In a smaller vessel for sea service.....	1,500	1,500
In a navy yard or receiving vessel.....	1,200	1,200
On leave, or waiting orders.....	750	750
Chaplains:		
When attached to vessels for sea service.....	1,000	1,000
When employed in navy yards.....	800	800
When on leave, or waiting orders.....	500	500
Secretaries:		
To commanders of squadrons commanding in chief.....	Omitted.	1,200
To commanders of squadrons not commanding in chief.....	Omitted.	1,000
Sailingmasters:		
Attached to ships of the line for sea service.....	900	950
Attached to frigates for sea service.....	900	800
Attached to smaller vessels for sea service.....	900	700
First master of a navy yard.....	750	800
When otherwise employed.....	750	700
When on leave, or waiting orders.....	500	500
Assistant surgeons of ten years, or when passed for surgeons:		
When attached to vessels for sea service.....	1,000	1,000
When at hospitals, navy yards, or on other duty.....	800	800
When on leave, or waiting orders.....	500	500
Assistant surgeons under ten years:		
When attached to vessels for sea service.....	900	900
When at hospitals, navy yards, or on other duty.....	800	800
When on leave, or waiting orders.....	500	500
Second masters:		
When attached to vessels for sea service.....	600	600
When at navy yards, or on other duty.....	500	500
When on leave, or waiting orders.....	300	300
Passed midshipmen:		
When attached to vessels for sea service.....	500	500
When at navy yards, or otherwise employed.....	400	400
When on leave, or waiting orders.....	300	300
Warranted masters' mates:		
When attached to a vessel for sea service.....	480	480
When at navy yards, or otherwise employed.....	480	400
When on leave, or waiting orders.....	300	300
Schoolmasters:		
When attached to vessels in commission, or to navy yards. (But they are only to be paid when thus employed).....	600	600
Midshipmen:		
When attached to vessels for sea service.....	350	350
When at navy yards, or employed on other duty.....	275	275
When on leave, or waiting orders.....	200	200
Clerks:		
To commanders of squadrons, captains of the fleet, and to commanders of vessels (But the pay of secretaries and clerks, and the increased pay to captains of fleets, and flag lieutenants, shall be paid only during the time the officer to whom they are allowed shall be actually employed.)	480	480

Officers, &c.	Pay as sent to the Senate.	Modifications proposed.
Boatswain, gunner, and carpenter, each:		
When attached to a ship of the line for sea service.....	\$480	\$500
When attached to a frigate for sea service, or to a navy yard.....	480	400
When on any other duty.....	480	320
When on leave, or waiting orders.....	100	200
Sailmaker:		
When attached to a ship of the line for sea service.....	420	450
When attached to a frigate for sea service, or to a navy yard.....	420	360
When on any other duty.....	420	300
When on leave, or waiting orders.....	100	160

When commission or warrant officers shall be furloughed for one year, or a longer period, they shall, while so furloughed, receive only one-half the pay to which they would be entitled if employed at a navy yard.

The above, with one ration a day when attached to the vessels for sea service, is to be in full for pay and subsistence, and for all allowances in lieu of cabin furniture to commanders of vessels, and for all allowances to officers attached to navy yards, or employed on any other shore duty; except for travel, detention, and employment on special service, and for house rent, when no public accommodations are provided.

B.

Message from the President of the United States, relating to a plan for equalizing the pay of the officers of the army and navy, and made in compliance with a resolution of the Senate, dated Washington, December 5, 1833.*

23^d CONGRESS.]

No. 538.

[1ST SESSION.]ON A CLAIM OF THE BROTHER OF A SEAMAN, LOST IN THE FRIGATE INSURGENTE IN 1800,
FOR A BALANCE DUE TO THE SAID SEAMAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 7, 1834.

Mr. E. WHITLESEY, from the Committee on Claims, to whom was referred the petition of William Caton, reported:

That the papers were sent to the Secretary of the Navy for information in this case. The Secretary of the Navy referred the papers to the Fourth Auditor, whose report is received, and referred to and made a part of this report. It appears, from the statement made by the Fourth Auditor, that nothing could have been due to the seaman at the time of his death. The following resolution is submitted:

Resolved, That the prayer of the petitioner ought not to be granted.

TREASURY DEPARTMENT, *Fourth Auditor's Office*, March 4, 1834.

SIR: I have the honor to return to you, herewith, the letter of the chairman of the Committee on Claims in the House of Representatives, enclosing the memorial of William Caton, who claims a balance due to his deceased brother Charles W. Caton, which you referred to me on the 27th ultimo.

It appears by a pay roll of the frigate *Insurgente*, transmitted to this office on the 7th August, 1800, by her commander, Captain Patrick Fletcher, that Charles W. Caton was attached to her as an ordinary seaman, at eight dollars a month; that he was recruited on the 14th July, 1800, and received from the recruiting officer, as shown by his receipt on the file, sixteen dollars, two months' advance pay; in addition to which, it is to be presumed that he was supplied by the purser with a mattress and blanket, amounting to four or five dollars more; and, perhaps, with small stores, such as tea and sugar, as customary in the naval service: but nothing of the kind appears on the pay roll, which only gives the names of the officers, seamen, &c., their ranks, dates of entry, rates of pay per month, and amount advanced by the recruiting officer.

It is understood that the *Insurgente* sailed from Hampton roads in August or September, 1800, bound to the West Indies, and that she was lost soon after she got to sea. It is not likely, therefore, that there could have been anything due to Charles W. Caton for wages at the time the *Insurgente* was lost.

The act of Congress, passed 29th of April, 1802, entitled "An act for the relief of the widows and orphans of certain persons who have died in the naval service of the United States," grants to the widow, if no widow, then to the child or children of the officers, seamen, and marines, lost in the ship *Insurgente*, a sum equal to four months' pay of their respective husbands or fathers, but the provision does not extend to any others than the widows and children.

I have the honor to be, very respectfully, sir, your obedient servant,

AMOS KENDALL.

HON. LEVI WOODBURY, *Secretary of the Navy*.

* For this message and the documents therewith, see antecedent No. 520.

23D CONGRESS.]

No. 539.

[1ST SESSION.]

ON CLAIM OF THE REPRESENTATIVES OF HENRY ECKFORD, FOR RENT OF LAND AT SACKETT'S HARBOR AND STORRS' HARBOR, ON LAKE ONTARIO, OCCUPIED FOR THE BUILDING OF TWO LARGE VESSELS FOR THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 19, 1834.

NAVY DEPARTMENT, *March 17, 1834.*

To the Speaker of the House of Representatives:

SIR: I would hereby respectfully submit a report to the House of Representatives on the claim in behalf of the estate of Henry Eckford, referred to me by the House on the 7th instant.

Among the papers in the case I do not find any *petition*, but an account for certain rents, with an explanatory letter. These, with all the accompanying papers, were referred by me to the Fourth Auditor, whose reply is annexed. (A.)

From this reply it appears that the account for rent cannot be passed and paid under any existing contract or regulations, without some special sanction by this Department, or some direction by Congress. It is doubted whether the former sanction alone would be sufficient; and it is manifest to me, that it ought not now to be given, since, for reasons satisfactory to myself, as well as to them, two of my predecessors, as well as the Fourth Auditor, have heretofore thought the direction of Congress and a special appropriation either expedient or necessary; and since two committees of the House of Representatives have reported unfavorably to the payment of the whole account as now claimed, a brief explanation of the history of the case may be all the other remarks sufficient to show the propriety of legislation on this subject.

The title of the lands, for the occupation of which rent is now claimed at Sackett's Harbor, it is believed has been nominally in Captain Isaac Chauncey and Mr. Henry Eckford since 1814. They were bought at first by Captain Chauncey, and afterwards conveyed to Mr. Eckford under the circumstances detailed in the reports from the Naval Committee to the House of Representatives, February 17, 1829, and January 20th, 1831, and which circumstances, in the opinion of that committee, created a right in the United States to have a conveyance of the land on payment of the consideration advanced, with interest and actual expenses.

The same committee think the quantity of land, occupied at Storrs' Harbor by the United States, small, and the claim for its rent quite too large in amount, though in right well founded.

They reported a bill for the arrangement of both claims, in what they deemed an equitable manner; but which, it is understood, was not satisfactory to Mr. Eckford, and its passage was not, therefore, urged at that time.

Without stating further particulars, which may be seen in those reports and in the papers herewith returned (B, No. 1 to 23), it is apparent that this Department, in the opinion of that committee, expressed on two occasions, would not be justified in paying any rent, *as such*, for the occupation of one of the tracts, nor in paying beyond a small portion of the rent which is claimed for the use of the other tract.

The views of this Department, independent of those reports, do not seem to have been presented with distinctness on the merits of these claims, except in a communication made to Congress December 8, 1828. In that it was stated that both the claims were considered to be just, but, from their large amount, a special appropriation to pay them was thought to be necessary.

It, however, deserves grave consideration, that if the Department had previously entertained the same opinion, no contract in writing should ever have been made to pay rent, to any amount, for the use of either of the tracts, and that none should, in fact, ever have been paid on either of them up to this date, except a single payment, in 1823, for the time past for rent of the tract most in dispute; whether rent for the other tract was ever claimed till 1827, or why it was not claimed on either, between 1815 and 1823, or between 1823 and 1827, does not appear.

Under these circumstances, independent of the above reports by the Naval Committee, and the principles involved in them, I agree entirely with my predecessors in the propriety of some special appropriation, and direction by Congress as to the payment of these claims; but deem it a duty on my part, to Congress as well as to the estate of Mr. Eckford, to add, that I do not see adequate reason to agree to the merits of either claim for rent to the amount now claimed. But a reasonable amount, in both cases, independent of those reports and their principles, appears to me to be clearly due; and it should, in my opinion, be fixed at a quantum meruit, not by the sum paid in a single instance for one tract, and never repeated, nor limited by any contract, but be fixed by a careful examination of the value of such property as has been actually occupied by the United States, both at Sackett's and Storrs' Harbors, and of the injury occasioned to the owners by that occupation.

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

P. S.—A schedule of the paper is also enclosed.

23D CONGRESS.]

No. 540.

[1ST SESSION.]

ON THE CLAIM OF A SAILINGMASTER FOR THE PAY OF A MASTER COMMANDANT,
WHILE HOLDING A COMMAND PROPER TO THAT RANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1834.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the memorial of Jonathan D. Ferris, late a sailingmaster in the navy of the United States, reported:

The petitioner states that, in the year 1813, he was ordered to take command of the brig Etna, on the coast of Louisiana and Florida, a vessel of twelve carriage guns and eighty-three men, and continued to command her thirteen months; that, in October, 1814, he was ordered to take the command of a squadron of five gunboats, protecting the intercourse on the lakes between Mobile and New Orleans, in which service he continued one month and a half.

The petitioner claims the difference of pay and allowance while performing these services, as being those of a master commandant or lieutenant commandant, to wit, \$10 additional pay per month, and two rations per day, amounting to the sum of \$366.50.

The petitioner further states that, in December, 1815, he was ordered to command the Navy yard at Tchifoncti or Chinquapin river, which he held nearly nine years; that, for this service, he is entitled to the same extra pay and rations as before stated, and also for difference for house rent and fuel during the period, amounting to the sum of \$3,559.32.

During the time of the services above detailed, the memorialist continued to receive his usual pay and rations as a sailingmaster, and it does not appear that any claim for the extra pay and allowance was made until the year 1830 or 1831.

At the session of Congress commencing in December, 1830, the claim of Lieutenant Ferris was presented, and referred to the Committee on Naval Affairs, and by that committee to the Secretary of the Navy, for information. By a report of the Auditor, forwarded to the committee in answer, dated 8th January, 1831, it is stated that "the records of that Department do not show, nor is it recollected by any person attached to the office, that any claim of the nature set forth in the petition was ever made by Mr. Ferris before that time."

It is further stated that there were many officers of the same grade performing similar services at other stations, "none of whom received anything more than sailingmaster's pay," and that, "if the claim of Mr. Ferris is allowed, it will open the door perhaps for more than one hundred others to present similar claims."

No report appears to have been made on the application. The performance of the services was without any understanding of extra pay or allowance, for none was claimed by the petitioner during the period, or for a long time after its termination. The extra pay is not warranted by any express law or usage of the Navy Department, and a large number of officers of similar grade with the applicant have performed similar services without the remuneration demanded by him, and without any claim therefor.

The committee therefore report that the prayer of the petitioner ought not to be granted.

23D CONGRESS.]

No. 541.

[1ST SESSION.]

ON CLAIM OF A LIEUTENANT COLONEL OF MARINES, FOR COMPENSATION FOR EXTRA
SERVICES IN ISSUING CLOTHING AND ACCOUTREMENTS TO THE MARINES UNDER
HIS COMMAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 28, 1834.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the memorial of Anthony Gale, reported:

That the petitioner claims a compensation for the issue of clothing and accoutrements to the men under his command while acting as commandant of marines at the Navy yard in Philadelphia, from the 1st August, 1806, to the 1st May, 1817, at the rate of \$10 per month; and also for issuing clothing and accoutrements to various posts where marines were posted during the same period, at \$20 per month, forming an aggregate amount of \$3,870.

It appears that Colonel Gale first set up the claim of \$10 per month, for issues to the men under his immediate command, in 1819, and that it was rejected by the Fourth Auditor, 30th December, 1819, upon the ground that no precedent existed for the claim. The additional claim of \$20 per month is of much later origin, having been first presented in the year 1831.

In December, 1821, Colonel Gale presented a petition to Congress for compensation for the services first mentioned, which was referred to the Secretary of the Navy, who stated in reply, December 28, 1821, that the claim of the petitioner had been uniformly rejected by the Department, "because no direct provision is to be found in any of the acts of Congress, relating to the marine corps, that would authorize such an allowance." The claim was disallowed in consequence.

On a petition again presented in January, 1825, the Committee on Naval Affairs reported that the duties for which Colonel Gale claimed remuneration "had been performed by almost every officer of the marine corps who has had command at the Navy yards of Boston, New York, or Philadelphia, and no allowance has ever been made to any one of them." And the claim was again rejected.

An unfavorable report was again made on the memorial of Colonel Gale, referred to the Committee on Claims in February, 1828.

The memorial now under consideration avers that precedents exist for allowances similar to those claimed by Colonel Gale: for proof of which he refers to the records of the Navy Department, and particularly to cases where compensation had been allowed for extra services in 1812.

By a careful investigation, made by direction of the committee, it has been ascertained that the allowances said to have been made in 1812 are for expenditures and services totally different from those claimed by the memorialist, and upon that ground his claim has no support.

It appears that no such allowance was claimed by Colonel Gale at the time the services are said to have been performed; that the claim was first brought forward after a long lapse of time from the performance of the duty for which compensation is claimed; that it is not supported (as the memorialist had supposed) by any precedent, and has been uniformly rejected by the Navy Department and by Congress whenever presented.

The committee therefore report that the prayer of the petitioner ought not to be granted.

23D CONGRESS.]

No. 542.

[1ST SESSION.]

ON CLAIM OF THE REPRESENTATIVES OF HENRY ECKFORD, FOR RENT OF LAND AT SACKETT'S HARBOR AND STORRS' HARBOR, ON LAKE ONTARIO, OCCUPIED BY TWO LARGE VESSELS OF THE NAVY; AND RECOMMENDING THAT SAID VESSELS BE SOLD.

COMMUNICATED TO THE SENATE MARCH 28, 1834.

Mr. SOUTHWARD, from the Committee on Naval Affairs, to whom was referred the memorial of the heirs and legal representatives of Henry Eckford, reported:

That they have examined the claim of the memorialists, and present the following facts for the consideration of the Senate:

1. In the year 1814, Com. Chauncey, then commanding the naval forces of the United States on Lake Ontario, received orders to build, without delay, two large ships for service on that lake; that it became necessary, in the execution of those orders, to purchase a point of land at Sackett's Harbor, called Navy Point, for which he gave the sum of \$3,000; that a large wharf was erected in that year upon said point by Henry Eckford, to enable him to build one of said vessels, which wharf cost said Eckford the sum of \$4,050, and a large ship, named New Orleans, was built thereon in the spring of 1815, and remains there until this time, in the possession of the government.

2. That, in the purchase made by Com. Chauncey, it was his intention that the said land should be for the use of the government, and the price given for the same was charged in his accounts, but disallowed by the government on the ground that no authority had been given by law to purchase the land. In consequence of this disallowance, Com. Chauncey paid the purchase money out of his own funds, and became, to all intents and purposes, the owner of the land, and authorized to dispose thereof for his own benefit.

3. Com. Chauncey subsequently sold this land to Henry Eckford, and received from him the exact amount which he paid, with legal interest up to the time of the payment by Eckford. Since that time, Mr. Eckford and his heirs and representatives have been the owners of said land, and are entitled to receive from the United States a reasonable rent for its use and occupation.

4. In the early part of the year 1823, the claim for the rent of Navy Point was presented by Mr. E. to the Secretary of the Navy, and allowed by him at the rate of \$290 per year, and payment made for the rent due from 1st Jan., 1815, to 1st Jan., 1823, amounting to \$2,320. The rent from that date is still due and unpaid, and the committee think that the same ought to be allowed and paid at the rate then fixed by the Secretary of the Navy, viz., \$290 per year.

5. In order to build the other vessel, which was called the Chippewa, it became necessary to purchase a tract of land at Storrs' Harbor, which is a short distance from Navy Point, and was the only other position in that neighborhood on which a vessel of the proposed size could be built and launched. Mr. Eckford having contracted to build the vessel, thought proper to purchase the site, with an additional quantity of land adjoining, from which the owner would not agree to separate it. He paid for it the sum of \$3,935.33. The vessel was in part built before the peace of 1815, and still remains there, the land having been, from that time to the present, in the possession of the government. For the use and occupation of this land, Mr. Eckford presented his account to the Navy Department in 1827, and its justice, as well as his claim for the rent of Navy Point, was admitted, but it was not paid because the appropriations were not sufficient to enable the Secretary to discharge it, it not having been contemplated and estimated for at the time the appropriations were made. Mr. E. at that time, and his representatives now, claim the annual rent of \$250 for this property, which is less by about \$25 than the legal interest at that time on the purchase money paid by him, and the committee think the claim is just. The circumstances under which both purchases were made fully justify the conduct both of Com. Chauncey and Mr. Eckford, and probably saved a large sum of money to the government.

The committee report a bill in conformity with these views.

They also express their opinion, that it is not the interest of the government any longer to preserve the vessels before mentioned, or to keep possession of the said lands, and therefore have added a section to the bill, authorizing the Secretary of the Navy to cause the vessels to be sold, and the possession of the land to be delivered up to the heirs of Mr. Eckford.

[23^d CONGRESS.]

No. 543.

[1st SESSION.]

ON THE CLAIM OF A NAVY AGENT AT LIMA FOR AN ALLOWANCE OF FIVE PER CENT. COMMISSION ON HIS DISBURSEMENTS, AND FOR COSTS AND EXPENSES CAUSED BY A REFUSAL OF THE NAVY DEPARTMENT TO PAY HIS DRAFTS, ETC.

COMMUNICATED TO THE SENATE APRIL 11, 1834.

Mr. BIBB, from the Committee on Naval Affairs, to whom was referred the petition of Andrew Armstrong, reported:

That the petitioner was, on the 24th of April, 1828, commissioned, by and with the advice and consent of the Senate, navy agent for the port of Lima, in Peru, South America, for the term of four years. In the face of the commission he was required to observe and follow the orders and directions which he should from time to time receive from the President of the United States and the Secretary of the Navy. His general instructions were, to furnish supplies of stores and money to the commanders of our vessels-of-war when called for, for which he was authorized to draw bills on the Navy Department. Very properly, his instructions reminded him that the distance of his station from the United States, and the nature of the service, rendered it necessary that he should rely much upon his own resources, discretion, and judgment.

He departed from the United States in the beginning of the year 1829, arrived at Lima on the 26th of June, was then and there accredited as the agent of the United States, and entered upon the duties of his office.

By a letter dated at Washington on the 5th of April, 1830, his commission was revoked. Ninety days were assumed as the time when notice of such revocation would be communicated at Lima; but the notice was not in fact there received until the 20th of October, 1830. Acting upon the hypothesis that notice would have been received at Lima on the 4th of July, bills drawn between that day and the actual notice of revocation, for supplies to our vessels-of-war at that station, were protested at the Navy Department for non-acceptance and non-payment, because drawn after the supposed notice of revocation, although drawn in pursuance of the general instructions and authority to Mr. Armstrong, and before notice of the revocation of his commission.

Of this class, two bills—the one for \$2,000, of the 13th July, 1830, in favor of Matthew Kelly; the other for \$4,000, of the 16th August, 1830—were protested for non-acceptance and non-payment at the Navy Department in November, 1830, and returned upon the drawer at Lima for payment of principal, interest, damages, and costs.

Subsequently, the Secretary of the Navy being informed that notice of the revocation of Mr. Armstrong's agency was not received at Lima on the 4th of July, 1830, as conjectured, but was made known there on the 20th of October, determined to pay all bills drawn between those days. This decision was communicated to Mr. Armstrong by a letter of the 12th September, 1831, which was delivered to him by his successor in agency on the 16th February, 1832.

In consequence of the protest of bills so drawn by Mr. Armstrong before notice of the revocation of his agency, he was detained in Lima until relieved by the notice of the determination of the Secretary of the Navy to pay the bills which had been so protested. He returned in a merchant vessel by the earliest conveyance after such advice, and applied for a settlement of his accounts.

By the statement of Mr. Armstrong, a balance was due him of \$4,681.74; by the settlement and adjustment made by the Fourth Auditor, a balance was made against the navy agent of \$12,875.44, as of the 11th of August, 1832; and for that sum a warrant of distress was issued from the Treasury Department.

The difference between the statement of the account by the petitioner, and that made by the Auditor, will appear by the document (A, 3) called "reconciliation of the account of Andrew Armstrong, late navy agent," furnished at the request of the committee, by the Secretary of the Navy, from the office of the Fourth Auditor.

The whole amount of credits allowed to him by that settlement of his account was \$4,246.70, whereof the sum \$2,500 was allowed for clerk hire, office rent, and stationery, during his agency, from 1st July, 1829, to 30th September, 1830, fifteen months, although he produced vouchers showing his expenditures for those objects for the same time to amount to \$2,768.75, and for keeping of a horse, necessary to the business of the agency, \$360. These two sums, deducted from the whole credit, left for compensation to the agent the sum of \$1,386.70, being one per cent. on \$138,669.83, raised and disbursed by the navy agent, as will at large appear by document A 1, furnished by the Secretary of the Navy to the committee. Thus it will appear that after deducting from the sum of \$1,386.70, allowed for compensation, the sum of \$268.75 for clerk hire, office rent, and stationery, not allowed, the actual compensation allowed to the navy agent was reduced to \$1,117.95 for fifteen months. All other claims of the navy agent were rejected. A settlement so glaringly erroneous was corrected in many items by the district judges of Pennsylvania, upon an injunction against the warrant of distress, as will be seen by the certificate of the judge of the allowances made by him, annexed to his decree. Since the decision of the court, the claims of the petitioner are confined principally to the questions of the commissions to be allowed him on his disbursements of moneys and stores, and the allowances for his detention in Lima by reason of the protest of the bills. These, with some few other items, were supposed not properly to belong to the powers of the court upon the hearing of the injunction.

The petitioner claimed a commission of five per cent. on all stores, moneys, and supplies by him issued to our vessels-of-war. The Auditor has allowed but one per cent., and even that percentage is denied as to parts of the transactions of the navy agent. The Auditor supposed that the act of Congress of the 3d of March, 1809, applied and limited the allowance of one per cent. to all navy agents at home and in foreign countries.

Your committee is of opinion that the allowance of one per cent. declared by the act of Congress does not apply to any navy agents except such as are stationed within the United States. The fourth and fifth sections of the act cannot apply with any propriety to the conduct and duties of navy agents in foreign countries. To navy agents at home, the commission of one per cent. on purchases and disburse-

ments, in connection with the other facilities, allowances, assistants, and diminished responsibility and labor, may be a reasonable and adequate compensation. But such a commission to navy agents abroad, who are to raise money, and purchase supplies upon their own judgment, responsibility, and risk of inspection, quality, and quantity in the purchase and issue of commodities, would fall far short of compensation adequate to the employment of skillful and trustworthy agents. The allowances made to the predecessor of Mr. Armstrong; the inducements held out to him by the *acting Secretary*, before he sailed from the United States; the allowances to the person who succeeded him in the agency; the allowances made to navy agents at other foreign stations; the rules for regulating the civil administration of the naval service, published in March, 1832, by the Secretary of the Navy, (pp. 16, 17, 18, &c.,) all conduce to show that the commission of one per cent. is not applied as a limitation of the compensations to navy agents at foreign stations.

It appears by the evidence furnished, that a commission of one per cent. at Lima would fall far short of a reasonable compensation for the duties performed by the petitioner, under his instructions; and it appears that a commission of five per cent. accords with the mercantile usage there for similar services performed by agents for other nations and for individuals.

Your committee, therefore, is of the opinion that the allowance of a commission of five per cent. is reasonable, and that this commission be extended to all moneys, supplies, and stores, purchased and distributed by Mr. Armstrong; and also to supplies sent out by the government, and by the navy agent received, stored, and delivered over as the exigencies of the naval service required.

The damages upon the protest of the bill paid by Mr. Armstrong to Alsop & Co. ought to have been allowed him, the reason of the Secretary of the Navy for suffering the protest being wholly insufficient.

A reasonable compensation is justly due to the petitioner for expenses and detention at Lima from the revocation of his appointment until he was released by the notice given at Lima of the determination of the Secretary of the Navy to pay the bills drawn before notice of the revocation of Mr. Armstrong's agency; and, from the evidence, the compensation claimed by him, in his account rendered, appears but reasonable for detention, expenses, harrassment, and loss of employment for sixteen months, in the port of Lima.

Without entering into a tedious detail of the evidence before the court upon the bill of injunction against the warrant of distress, and the other evidence furnished to the committee, we are of opinion that the account and statement showing a balance in favor of the petitioner of \$4,681.74 on the 11th August, 1832, as per document received from the Secretary of the Navy, (marked A 3,) ought to be allowed.

It is proper to remark that some of the items disallowed by the Auditor were allowed by the district judge, and a perpetual injunction decreed pro tanto; and it appears that no new adjustment or further credit has been allowed to Mr. Armstrong at the Department since the settlement of the 11th August, 1832. If, however, any part of the balance so erroneously stated and prosecuted against him has been received or coerced by the warrant of distress, the amount so made ought to be returned to Mr. Armstrong.

The committee report herewith a bill for his relief.

A, 3.

RECONCILEMENT OF THE ACCOUNT OF ANDREW ARMSTRONG, LATE NAVY AGENT.

Statement showing the difference between account as settled at the Navy Department, and the account of A. Armstrong, as claimed.

Balance due United States per office statement.....	\$12,875 44
Balance dus agent per his account current	4,681 74
	\$17,557 18

Difference between office statement and account current, which consists of the following items:

5 per cent. commissions for disbursements disallowed:	
Abstract B, 1. Vincennes	\$1,202 96
Abstract B, 1. Guerriere	1,119 36
Abstract B, 1. Dolphin	210 91
Abstract B, 1. St. Louis.....	123 21
Abstract B, 2. Guerriere	764 89

Abstract B, 5. St. Louis.....	607 01
Abstract H, 1. Navy tobacco.....	260 60
Abstract G, 1. Contingent expenses.....	70 24
Abstract G, 25. Contingent expenses.....	113 35
Abstract G, 29. Contingent expenses.....	76 12
Abstract E, 49. Contingent expenses.....	4 00
Abstract B, 5. Dolphin	66 92
	\$7,047 37

Less 1 per cent. commission on \$128,750.66, the amount of expenditures allowed per statement No. 2,643

\$1,287 50

Less also this sum paid for hire of a scale, suspended in previous settlement, but allowed per statement No. 2,739	\$4 00	
Less also this sum, being the amount of commission at 1 per cent., allowed in this statement	99 19	
		<u>\$1,390 70</u>
		\$5,656 67
†Add 5 per cent. commission on distribution of stores; bills 17 and 18 not allowed		616 23
Add 5 per cent. commission on \$80 paid Mid. Henderson, not allowed.....		4 00
*Paid H. McCulloch for tobacco.....	\$5,212 16	
Less credited by D. Walker, purser	932 48	
		<u>4,279 68</u>
*Add clerk hire, &c., not allowed		268 75
Add damages and interest paid Alsop & Co., for bill protested for non-acceptance		863 33
*Add 5 per cent. commission on distribution of stores.....		427 76
Add expenses for board at Lima from October 1, 1830, to January 20, 1832, not allowed.....		1,609 87
Add compensation for the above time at the rate allowed successor, \$2,500 per annum, not allowed		3,229 15
Add amount of passage home, not allowed.....		350 00
Add traveling expenses from Philadelphia and back, not allowed.....		15 00
Add detention while settling accounts, not allowed.....		28 50
Add commissions on stores delivered Philo White, not allowed.....		183 24
Add to this sum, being the amount of disbursements on shipping 15 kegs of tobacco sold to Dudley Walker, purser of the St. Louis, per voucher No. 43, a copy of which is filed herewith.....		25 00
		<u>\$17,557 18</u>

Items marked thus * allowed by judge. On those marked thus † judge allowed one per cent. for commission, viz: *Allowed \$4,279.68 for tobacco; *clerk hire \$268.75; †commission \$208.80, one per cent. on distributions rejected by Auditor.

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, August 11, 1832.*

23D CONGRESS.]

No. 544.

[1st Session.

ON A CLAIM FOR THE USE OF A PATENT FOR THE MANUFACTURE OF ANCHORS FOR THE NAVY, UPON AN IMPROVED PLAN, SECURING INCREASED STRENGTH AND SYMMETRY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 30, 1834.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of James Tucker and John Judge, reported:

That the petitioners claim to be the inventors of an improvement in the manufacture of anchors, for which they obtained a patent from the United States on the 14th September, 1829.

The petitioners were, previous to and at the time of taking out their patent, employed in the Navy yard at Washington, as anchor-smiths, and the anchors made there since the year 1828 have been constructed upon the plan specified in the patent.

The petitioners claim a remuneration from the government for the advantages derived from the use of their patent in the construction of anchors for the navy up to this time, and for its future use, until the expiration of their patent. This claim was, at the last session of Congress, referred to the Secretary of the Navy, and by him to the Commissioners of the Navy, whose report, dated 12th December, 1832, marked B, is herewith submitted and referred to as part of this report.

It appears, from the report of the Commissioners of the Navy, that part of the improvement claimed by Tucker & Judge is "not new, having been previously patented and used in England, and also in this country;" and that part of the saving in iron by their method is owing to "the form in which the iron is previously reduced by the contractor for iron, and for which an advanced price is paid beyond the price which would have been paid for iron not so reduced to form."

It is, however, admitted that the petitioners have greatly improved upon the mode hitherto in use for making anchors, and so far their patent is good. The advantages already derived in the manufacture of anchors for the navy, and to be hereafter derived from the use of their improvement, are not denied, but expressly admitted; and anchors are now made for the navy on this plan alone, all former modes being discarded.

Certificates from officers of the navy of high reputation, and others, attest the superiority of the anchors made upon the plan of the petitioners.

Upon this statement of facts the committee are of opinion that compensation ought to be afforded to the petitioners, and the only remaining consideration is to ascertain the amount justly due.

By a certificate of the naval storekeeper at Washington, herewith submitted, marked C, it is stated that there have been made in the navy yard, since the adoption of the plan of Tucker & Judge, and

upon their plan exclusively, anchors weighing in all nearly 127,000 pounds. Taking the year 1828 as the commencement of the term, the weight of anchors manufactured in the period passed is about 25,000 pounds per annum, which, estimated as the rate for 14 years, would make an aggregate for the duration of the patent of 350,000 pounds.

The advantages of the adaptation of the iron as received from the contractor, in the saving of material, and the benefit of machinery in use at the navy yard, for the construction of anchors, being all considered, it is still conceived that a mode, in essential points new, invented by the petitioners, and so far superior to all others previously in practice as entirely to exclude them, and to become the method exclusively in use, enabling the government to make so important an article as an anchor cheaper and better than ever before made, entitles the petitioners to a fair remuneration.

The contract price paid by the government for large anchors, before the construction by the present mode was adopted, appears to have been 18 cents per pound. The cost of anchors (confessedly superior in all respects) made at the navy yard, upon the plan of Tucker & Judge, including the advanced price paid for the iron, is about 15 cents per pound, as per statement of 9 anchors, herewith, marked D. The petitioners have been employed at the navy yard, as stated by the Commissioners of the Navy, and one of them is still employed there, but it does not appear that their wages were higher than those of others employed in similar stations, or that any increase of wages was given them, or either of them, in consideration of the invention.

Under all circumstances, the committee think the petitioners entitled to a compensation for the use of the patent for 14 years, in making anchors for the government, of fifteen hundred dollars, and for that purpose report a bill.

WASHINGTON, November 21, 1829.

Having strictly examined and compared Messrs. Tucker & Judge's plan or method of faggoting anchors, with other methods heretofore practiced, by such comparison and my own experience I find it far superior to any other plan heretofore adopted, both for strength and economy in manufacturing.

A sense of duty to my country induces me earnestly to recommend the general adoption of the plan.
AMOS HUNT, *one of the firm of Russell, Hunt & Brothers.*

I certify that I have examined carefully the model of Judge & Tucker's anchors, and am fully satisfied that their method of putting together anchors is the best I have ever known to be adopted. Judge & Tucker's method of forming the anchor of flat bars made to mould is a vast improvement.

DAVID PORTER.

WASHINGTON NAVY YARD, December 20, 1830.

Having this day visited the navy yard of the above place, and examined the mode of making ship anchors, do certify that the method made use of by Tucker & Judge, in putting together anchors, is the best I have ever seen.

My own experience convinces me that no plan heretofore practiced possesses greater advantages or strength.

JOEL BAILEY,
Formerly of Kensington, Brown's Anchor Smith Shop.

WASHINGTON NAVY YARD, March 20, 1831.

I have, while on duty at this yard as second in command, seen all the anchors made upon the improved plan of Judge & Tucker, and put several of them through the severe test required by the Board of Navy Commissioners, and am clearly of opinion that their improvement is one of great utility, and their anchors the handsomest and strongest I have ever seen.

W. B. SHUBRICK.

MAY 7, 1832.

I have just seen Messrs. Tucker & Judge's method for making anchors. The explanation is perfectly satisfactory to me, and from that, and the apparently irresistible evidence and approbatory testimonials which they exhibit from men of great naval science, character, and rank, I have no hesitation in saying that my opinion is decidedly in its favor.

JOHN P. VAN NESS.

WASHINGTON CITY, May 7, 1832.

The anchors made at the navy yard in this city have been often examined by me the year past, and appear to be distinguished by their beauty and strength.

LEVI WOODBURY.

While on duty as first lieutenant of this yard, I carefully examined and proved all the anchors made upon the improved plan of Judge & Tucker, and unhesitatingly say that, for strength, beauty, and facility, their mode of faggoting and welding is unequalled by any other one adopted.

A. G. GORDON.

NAVY YARD, Washington, June 10, 1831.

While in command of this yard, I have seen all the anchors made upon the improved plan of Judge & Tucker, and put several of them through the severe test required by the Board of Navy Commissioners, and am clearly of opinion that their improvement is one of great utility, and their anchors the handsomest and strongest I have ever seen.

ISAAC HULL.

NAVY YARD, *Washington, February 14, 1832.*

Having, while on duty at this yard, observed attentively the making of several large anchors on the improved plan of Messrs. Judge & Tucker, I fully concur in the opinion of Commodore Hull, above expressed, as to the superiority of their improvement over any other plan of which I have any knowledge.

J. H. AULICK,
Master Commandant, Navy Yard.

WASHINGTON, *March 9, 1832.*

When I first examined the plan of Judge & Tucker for making anchors, I was convinced that it would prove to be very superior to that which had been heretofore adopted. The time which has elapsed has sufficed to prove the correctness of this opinion, and I am fully satisfied that anchors equally good cannot be made in any other known way.

THOS. P. JONES.

B.

NAVY COMMISSIONERS' OFFICE, *December 12, 1833.*

SIR: The Commissioners of the Navy have the honor to return, herewith, the petition of James Tucker and John Judge, which you transmitted to them the 2d March last, and, in compliance with your instructions, beg leave to report:

That, from the best evidence which they can obtain, the Navy Commissioners are of opinion that the anchors made on the plan patented by Messrs. Tucker & Judge are superior to those made in the manner previously in use. They are also of opinion that this superiority is to be attributed, principally, to the mode of forming the anchor, and of welding the arms to the shank. The arrangement of flat bars of iron to form the different parts of the anchor, so that the strain might fall upon the edge of the bars, is not new, having been patented and used in England, and also used in this country before the present patent; but, in the opinion of the Commissioners, this principle has been judiciously extended, and the combinations improved. The Commissioners are also of opinion that the loss of iron in the manufacture of the anchor from shapes, according to the present patent, is less than by the former modes; but they are also of opinion that the diminution of loss is owing, in a considerable degree, to the form in which the iron is previously reduced by the contractor for iron, and for which an additional price is paid beyond the price which would have to be paid for iron not so reduced to form.

The saving in the labor of manufacturing the anchor is partly owing to the forms before mentioned, and partly to the diminished number of the *welds* which iron thus formed and arranged requires, compared with former methods.

It does not appear that any agreement or arrangement was ever made between the Department and Messrs. Tucker & Judge for the use of their patent right, but that it was introduced by the former, as the master anchorsmith, employed at the navy yard at this place, with the assent and approbation of the Navy Commissioners.

The Navy Commissioners are of opinion that the use of this improvement, since the issuing of the patent, and the privilege of using it in future for the navy, entitle the patentees to some compensation; but that, in determining its amount, reference should be had to the past employment of both the patentees until a recent period, and of the continued employment of one of them at a liberal compensation from the public.

I have the honor to be, with great respect, sir, your obedient servant,

JNO. RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

C.

NAVY YARD, *Washington, January 2, 1834.*

I hereby certify that there have been (according to the entries upon my books) made in the navy yard at this place, since the adoption of the plan of Judge & Tucker for making them, and upon their plan *exclusively*, anchors weighing in all nearly 127,000 pounds—one hundred and twenty-seven thousand pounds.

CARY SELDEN, *Naval Storekeeper.*

D.

Cost of anchors manufactured at the Navy yard, Washington, D. C., per Tucker & Judge's patent.

Weight of iron issued.		Number of days' work.		Quantity of coal consumed.		Amount of contingent expenses.	Total cost.	Weight of anchor when finished.	Cost per pound, finished.
Pounds.	Cost.	Days.	Amount.	Bushels.	Cost.				
4,917	\$205 49	164	\$197 21	222	\$53 23	\$50 00	\$505 98	3,738	13½
4,781	145 24	180	197 93	230	55 20	50 00	448 37	3,648	12½

13,500	687 08	643	621 87	500	112 50	120 00	1,541 45	9,800	15½

Average cost per pound of the above nine anchors, fifteen cents.

COMMANDANT'S OFFICE, Navy Yard, Washington, November 14, 1833.

[23D CONGRESS.]

No. 545.

[1ST SESSION.]

PROPOSED AMENDMENTS TO THE LAWS FOR THE BETTER REGULATION AND GOVERNMENT OF THE NAVY AND THE PENSION FUNDS CONNECTED WITH THE NAVAL SERVICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 2, 1834.

WASHINGTON, May 1, 1834.

To the Speaker of the House of Representatives:

SIR: I submit for the sanction of Congress certain proposals for amending the present laws in relation to the naval service, prepared and reported by the board constituted under the act of May 19, 1832.

The papers on this subject are Nos. 1 to 5, inclusive.

These proposals are approved by me, and, if adopted in the form of laws, appear well suited "to the present and future exigencies of that important arm of national defence."

ANDREW JACKSON.

No. 1.

WASHINGTON, May 30, 1834.

SIR: The board of revision, having adopted the amendments suggested by you in the 109th and 111th articles of the proposed "act to revise and enlarge the act for the better government of the navy of the United States," and in the proposed "act for the navy widows' and orphans' fund," submitted the same to the Attorney General of the United States for such remarks and suggestions as he might deem it proper to make; and the Attorney General having expressed his concurrence in the amendments, and in the "draught as it now stands" of the proposed laws, they are herewith respectfully submitted, with a copy of his letter referred to.

I have the honor to be, with great respect, sir, your most obedient servant,

JNO. RODGERS, *President of the Board of Revision.*

To the Hon. L. WOODBURY, *Secretary of the Navy.*

No. 2.

ATTORNEY GENERAL'S OFFICE, April 30, 1834.

SIR: I have re-examined those parts of the proposed "act to revise and enlarge the act for the better government of the navy of the United States" which are particularly referred to in your letter of this day, and, with the amendments now introduced, concur in the draught as it now stands.

I have the honor to be, with great respect, your obedient servant,

B. F. BUTLER.

To Commodore JOHN RODGERS,

President of the Board of Naval Officers, constituted under the act of May 19, 1832.

No. 3.

Extract of a letter from the president of the board of revision to the Secretary of the Navy, dated—

WASHINGTON, April 7, 1834.

SIR: In the letter which accompanied the proposed regulations for the navy, the board appointed under the act of May, 1832, had the honor to state the causes which prevented their forwarding at that time the alterations, amendments, and additions to the laws, which they had prepared to submit to you, for the consideration of the President of the United States and of Congress.

Having examined the different statutes with which the proposed alterations are believed to conflict, the board adopted, and annexed for recommendation, such repealing clauses as in their opinion the different alterations will render necessary.

For the purpose of facilitating a comparison of the propositions of the board with the laws for which they are submitted as amendments or substitutes, the board enclose statement C, showing the sections or articles of existing statutes to which each article or section of the proposed laws has the most direct reference, or which treats of the same subject. These references are occasionally accompanied by very concise statements of the reasons which induced a recommendation of the particular changes proposed.

The board are aware that their earnest desire to promote the usefulness of the navy, even when aided by all the knowledge which they may have gained of the practical operation of the existing laws, in the course of their professional service, may not have enabled them to detect all their defects, or to designate their best remedies. They hope, however, that what they have done may lead to beneficial results by the action of those who are more competent, and without whose action no proposition of the board can effect.

No. 4.

PROPOSED.

An act to revise and enlarge the act for the better government of the navy of the United States.

Article 1. The commanders of all fleets, squadrons, navy yards, or vessels, belonging to the navy, are strictly enjoined and required to show in themselves a good example of virtue, honor, patriotism, and subordination; to be vigilant in inspecting the conduct of all such as may be placed under their command; to guard against and suppress all dissolute and immoral practices, and to correct all such as may be guilty of them, according to the laws for the government of the navy, upon pain of such punishment as a general court-martial may think proper to inflict, and as the nature and circumstances of the neglect may deserve.

Article 2. The commanders of vessels and navy yards, to which chaplains may be attached, shall have divine service performed on Sundays, whenever the weather and other circumstances will allow it to be done with propriety; and they shall cause as many of the officers and men to attend as can be spared from other duty.

Article 3. If any officer in the navy shall be guilty of cruelty or oppression, or of gambling, drunkenness, profane swearing, or any other scandalous or dishonorable conduct, unbecoming an officer, not otherwise provided for in this act, he shall, on conviction thereof, be cashiered, or suffer such less punishment as a general court-martial shall direct; and if any petty officer or inferior person belonging to the navy shall be guilty of profane swearing, gambling, drunkenness, or other immoral or disgraceful conduct, not specially provided for in this act, he may, at the discretion of the commander, be reduced to an inferior rating, or confined not exceeding ten days, or flogged not exceeding twelve lashes, or be brought to trial before a court-martial, in which latter case he shall, if convicted, suffer such punishment as the said court shall adjudge.

Article 4. Any officer or other person belonging to the navy, who shall, when engaged in battle, pusillanimously cry for quarter, or treacherously yield, or shall strike, or attempt to strike the flag without proper authority, shall suffer death on conviction thereof by a general court-martial.

Article 5. If any officer commanding a fleet, squadron, or vessel shall, upon the probability of an engagement, or upon signal for battle, neglect to prepare his fleet, squadron, or vessel for action, or shall not, when so directed, use his utmost exertions to join in battle, or shall fail to encourage in his own person his inferior officers and men to fight courageously, he shall, on conviction thereof, suffer death, or such other punishment as a court-martial shall adjudge.

Article 6. Every officer or other person belonging to the navy, who shall not do his utmost to take or destroy any vessel which it is his duty to encounter, or to afford relief to vessels belonging to the United States when engaged in battle, or who shall, through cowardice, negligence, or disaffection, withdraw from or keep out of battle, or desert his duty or station, or shall induce others to do so, or shall not properly observe the orders of his commanding officer, or use his utmost exertions to carry them into execution, when ordered to prepare for, join in, or when actually engaged in battle, or while in sight of an enemy, shall, on conviction thereof by a general court-martial, suffer death, or such other punishment as the said court shall adjudge.

Article 7. If any officer or other person in or belonging to the navy shall disobey the lawful orders of his superior officer, or strike him, or draw or offer to draw or raise any weapon against him, while he is on duty, or in the line of his duty, or for having performed any act of duty, he shall, on conviction thereof before a general court-martial, suffer death, cashiering, or such other punishment as the said court shall adjudge; and if any person in the navy shall treat his superior officer with contempt or disrespect, or use provoking or reproachful words, menaces, or gestures to him, he shall be punished at the discretion of a general court-martial.

Article 8. If any person in the navy shall make, or attempt to make, any mutinous assembly, or shall utter any seditious or mutinous words, or shall conceal or connive at any seditious or mutinous practices; or, knowing of the same, shall not forthwith communicate it to his superior or commanding officer; or, being witness to any mutiny or sedition, shall not do his utmost to suppress it, he shall, on conviction thereof, suffer death, or such other punishment as a general court-martial shall adjudge.

Article 9. No person in the navy shall give, hold, or entertain any intercourse or intelligence to or with any enemy or rebel, without leave from the President of the United States, the Secretary of the Navy, the commander-in-chief of the fleet, the commander of a squadron, or the senior officer in command, who may be present; or if any letter or message from any enemy or rebel be conveyed to any officer or other person in the navy, and he shall not within twelve hours make the same known, having opportunity to do so, to his superior or commanding officer, or other proper officer, whose duty it may be to take cognizance thereof, every such offender shall suffer death, or such other punishment as a general court-martial shall adjudge.

Article 10. Spies, and all persons who shall come, or be found, in the capacity of spies, or who shall bring or deliver any seducing letter or message from an enemy or rebel, or endeavor to corrupt any person in the navy to betray his trust, shall suffer death, or such other punishment as a general court-martial shall adjudge.

Article 11. If any person in the navy shall desert to an enemy or rebel, he shall, on conviction thereof by a general court-martial, suffer death.

Article 12. If any person in the navy shall, in time of war, desert, or shall entice or aid others to desert, he shall suffer death, or such other punishment as a court-martial may adjudge.

Article 13. If any person in the navy shall, in time of peace, desert, or shall persuade, aid, or entice any others to desert, or shall at any time know of any desertion, and not communicate it to his superior or commanding officer; or shall receive or entertain any deserter, knowing him to be such, and shall not, with all convenient speed, give notice thereof to the commander of the vessel, navy yard, or station to which he belongs, or to the commander-in-chief of the fleet, or commander of the squadron, he shall, on conviction thereof, suffer such punishment as a general court-martial shall adjudge.

Article 14. If any person belonging to the navy shall absent himself without leave, or remain absent after his leave shall have expired, and shall voluntarily return within three days after such absence, or termination of leave of absence, he may, at the discretion of his commander, be punished as limited in the thirteenth article of this act.

Article 15. If any person in the navy shall, through intention, negligence, or any other fault, suffer any vessel of the navy to be stranded or run upon rocks or shoals, or improperly hazarded; or if any person shall willfully or maliciously injure any vessel of the navy, or any part of her tackle, armament, or equipment, whereby the safety of the vessel shall be hazarded, or the lives of the crew exposed to danger, he shall, on conviction thereof by a general court-martial, suffer death, or such other punishment as the said court shall adjudge.

Article 16. If any officer of the navy shall order any public property, not then in the possession of, or in imminent danger of falling into the possession of an enemy, pirate, or rebel, to be set on fire, or otherwise unlawfully destroyed; or if any person in the navy shall set fire to, or otherwise unlawfully destroy any such property, he shall, on conviction thereof by a general court-martial, suffer death, or such other punishment as the said court shall adjudge.

Article 17. If any person in the navy shall fraudulently make and sign, or shall aid, abet, direct, or procure the making or signing of any false muster; or shall knowingly execute, or attempt, or countenance any fraud against the United States, he shall, on conviction thereof by a general court-martial, be cashiered, and rendered forever incapable of any further employment in the service of the United States, and shall forfeit to the navy pension fund all the pay and subsistence then due him, and suffer such other punishment as the said court shall adjudge.

Article 18. If any person in the navy shall waste or embezzle, or fraudulently buy, sell or receive any ammunition, provisions, or other public stores; or if any officer or other person shall knowingly permit, through design, negligence, or inattention, any such waste, embezzlement, sale, or receipt, every such person, upon conviction thereof by a general court-martial, shall forfeit all the pay and subsistence then due him to the navy pension fund, and shall suffer such further punishment as the said court shall direct.

Article 19. If any person in the navy shall sleep upon his watch, or negligently perform the duty assigned him, or shall leave his station before regularly relieved, he may be punished at the discretion of a court-martial, or be otherwise punished at the discretion of the commander, as limited by the thirtieth article of this act.

Article 20. The officers and other persons belonging to any ship or vessel, appointed as convoy to merchant or other vessels, shall diligently and faithfully discharge the duties of their appointment; nor shall they demand or exact any compensation for their services, nor maltreat the officers or crews of such merchant or other vessels, on pain of suffering such punishment as a court-martial shall adjudge.

Article 21. If any commander or other officer shall receive, or permit to be received, on board his vessel, any goods or merchandise for freight, sale, or traffic, except gold, silver, or jewels, for freight; or shall demand or receive any compensation for the receipt or transportation of any other article than gold, silver, or jewels, without authority from the President of the United States or Secretary of the Navy, he shall, on conviction thereof by a general court-martial, be cashiered, and be thenceforward incapacitated from holding any office or place in the navy of the United States.

Article 22. If any person in the navy shall unlawfully kill any other person when without the territorial jurisdiction of the United States, he may be punished with death, or such other punishment as a general court-martial shall adjudge.

Article 23. If any officer of the navy shall challenge any other officer in the navy, or accept a challenge from any officer of the navy to fight a duel, while either of them are in actual service, or under orders for service, or for any act of duty performed by either party, such officer shall, on conviction thereof by a general court-martial, be dismissed from the navy, or suffer such other punishment as the said court shall adjudge.

Article 24. If any person in the navy shall quarrel with any other person in the navy, or use provoking or threatening language or gesture, he may, at the discretion of the captain, be punished as limited in 30th article of this act, or be brought before a court-martial, and suffer such punishment as the said court may adjudge.

Article 25. Any theft committed by a petty officer, or person of inferior rating, may be punished at the discretion of the captain, as limited in the 30th article of this act, or as a court-martial shall direct.

Article 26. If any person in the navy shall, when on shore, plunder, abuse, or maltreat any inhabitant, or injure his or her property in any way, he shall suffer such punishment as a court-martial shall adjudge.

Article 27. Any master-at-arms, or other person of whom the duty of master-at-arms is required, or provost marshal, who shall refuse to receive such prisoners as shall be committed to his charge, or, having received them, shall suffer them to escape, or dismiss them without orders from proper authority, shall suffer in such prisoners' stead, or be punished otherwise, at the discretion of a court-martial.

Article 28. All persons belonging to the navy, who shall commit offences while on shore, or in port or harbor, not provided for in articles 22 and 26 of this act, shall be subject to the same punishment as if such offences had been committed at sea.

Article 29. Every person in the navy shall use his utmost exertions to detect, apprehend, and bring to punishment, all offenders, and shall at all times aid and assist all persons appointed for this purpose, on pain of such punishment as a court-martial shall adjudge.

Article 30. No commander of a vessel shall, of his own authority, discharge a commission or warrant officer, nor strike him, nor inflict any higher punishment upon him than reprimand, suspension from duty, arrest, or confinement not exceeding ten days, unless longer confinement should be necessary to bring him to a court-martial; nor shall he, of his own authority, cause or permit to be inflicted upon any petty officer, or person of inferior rating, any severer corporal punishment for any offence, or at any one time, than twelve lashes with a plain cat-of-nine-tails, and confinement not exceeding ten days, unless longer confinement should be necessary for the purpose of bringing the offender to trial by court-martial; nor shall he suffer any other than a plain cat-of-nine-tails to be used; nor shall any commanding officer, during the absence of the commander of the vessel, unless such commander shall be absent for a time by leave, inflict, or allow to be inflicted, any other punishment than suspension or confinement, for which he shall account to the commander of the vessel on his return, on pain of dismissal from the navy, or of such other punishment as a court-martial shall adjudge.

Article 31. Every commander of a vessel, whenever a petty officer, or person of inferior rating, may join his vessel, shall cause the purser to make an accurate entry on the muster book of his name, date of entry into the service, date of his appearance on board, time when his service expires, and his rating; and whenever officers or other persons shall be so sent in prizes, or to sick quarters, or transferred to other vessels, the commander of the vessel from which they shall be sent or transferred shall take care that they are furnished with, or accompanied by, a complete statement of their respective accounts, and with a correct copy of the entries in the muster book which relate to their rating, commencement and termination of service, duly signed by the purser and approved by himself, upon penalty of such punishment as a court-martial shall direct.

Article 32. Every commander of a vessel shall cause the purser to note upon the muster book the time when any death, desertion, or discharge may occur, and shall see that the purser secures all the effects of deceased persons, for the benefit of their legal representatives. He shall cause to be transmitted to the Secretary of the Navy, as opportunities may occur, complete muster and pay books, made up to the last day of March, June, September, and December, signed by the purser and approved by himself, or be punished at the discretion of a court-martial.

Article 33. Every commanding officer of a vessel shall cause the laws for the government of the navy to be publicly read to the ship's company as often as once a month, and to be hung up in some public part of the vessel, on pain of such punishment as a court-martial may direct.

Article 34. No secretaries, schoolmasters, or clerks shall be borne on the books of any vessel or navy yard, nor be entitled to pay, until they shall have by letter accepted their appointments; after which they shall be subject to the laws, rules, and regulations for the government of the navy; and no petty officer, or person of inferior rating, shall be entered on the books of any vessel or navy yard as a part of their complement, nor be entitled to any pay, until they shall have duly signed the shipping articles of the naval service.

Article 35. Publications relative to differences between officers, of a private or personal nature, are prohibited. Any newspaper publication, or pamphlet, or any handbill of such character, either written or printed, shall be cause for the arrest of an officer and for charges against him, and shall be punished as a court-martial may direct.

Article 36. In all cases when the crew of any ship or vessel of the United States shall be separated from such vessel, by wreck, loss, or destruction of the same, all the command, power, and authority given to the officers of such ship or vessel shall remain and be in full force, as effectually as if such wreck, loss, or destruction aforesaid had not occurred, until such ship's company be regularly discharged from, or ordered again into, the service, or until a general court-martial or court of inquiry shall be held to inquire into the wreck, loss, or destruction as aforesaid; and if, by the judgment of the said court or other satisfactory evidence, it shall appear that all or any of the officers and men of such ship's company did their utmost to preserve her, and, after such wreck, loss, or destruction, conducted themselves agreeably to the discipline of the navy, then the pay and emoluments of such officers and men shall be paid as if they had continued on board such vessel; and if it shall appear, as aforesaid, that all, or any of the officers and crew, as aforesaid, omitted or neglected such their duty, then the pay and emoluments of such offenders may be forfeited to the navy pension fund by sentence of a court-martial; and any officer or other person who shall, after the loss of such vessel, conduct contrary to the provisions of this act, shall be liable to the same trial before a court-martial, and, on conviction, shall suffer the same punishment as if such loss had not occurred.

Article 37. Whenever, by any article of this act, no specific punishment is named, and a court-martial is authorized to inflict a punishment at their discretion, they shall not, in the case of a commission or warrant officer, inflict any higher punishment than dismissal from the service; and in the case of a petty officer, or person of inferior rating, they shall not inflict a severer corporal punishment than one hundred lashes, nor imprisonment beyond one year.

Article 38. It shall be the duty of the commanding officer of any fleet, squadron, or vessel acting singly, when on foreign service, to send to the United States, in some public or other vessel, all petty officers and inferior persons, at the expiration of their terms of service, or as soon thereafter as may be, unless in his opinion the detention of such persons for a longer period should be very essential to the public interests; in which case he may detain such as shall hereafter enlist until the vessel to which they belong shall return to the United States; and in case of such detention, the persons so sent home, or so detained, shall be subject in all respects to the laws and regulations for the government of the navy, until their return to the United States, and their regular discharge from the navy; and all persons who shall be so detained beyond their terms of service, or who shall, after the termination of their ser-

vice, voluntarily re-enter to serve until the return to the United States of the vessel to which they may belong, and their regular discharge therefrom, shall, while they are so detained, or shall so serve beyond their original terms of service, receive an addition of one-fourth to their former pay.

Article 39. All officers not holding commissions or warrants, or who are not entitled to them, except such as are temporarily appointed to perform the duties of a commission or warrant officer, or secretaries, schoolmasters, and clerks, are to be deemed petty officers.

Article 40. The pay and emoluments of such officers and crews of any of the ships or vessels of the United States as may be taken by an enemy, pirate, or rebel, who shall appear by the judgment of a competent court, or otherwise, to have performed their duty in endeavoring to preserve and defend such vessel, and after the taking thereof to have conducted themselves agreeably to the discipline of the navy, shall continue and be paid to them until their death, exchange, or discharge.

Article 41. The officers, non-commissioned officers, privates, and musicians of the marine corps shall be, in all respects, subject to the laws and regulations which are, or may be, established hereafter for the government of the navy of the United States, except when they shall be expressly placed under the direction of the Secretary of War, or the command of an officer of the army, by direction of the President of the United States; in which case they shall be subject to the laws and regulations which are, or may be, established for the government of the army.

Article 42. Whenever any part of the army or of the militia of the United States shall be serving on board any vessel of the navy, they shall, while so serving, be subject to the laws and regulations for the government of the navy, and to the orders of the sea officers, in the same manner as marines.

Article 43. Whenever any part of the army or militia of the United States shall be embarked on board any vessel of the navy, for transportation only, they shall not be subject to the laws and regulations for the government of the navy, but to the laws for the government of the army; but they shall, nevertheless, be subject and conform to the internal regulations of the vessel in which they may be embarked, upon pain of confinement by the commander of such vessel while on board, and of such punishment as an army court-martial may direct after they shall have been landed.

Article 44. Any person entitled to wages or prize money may have the same paid to his assignee, provided the assignment be attested by the captain and purser; and in case of the assignment of wages, the power shall specify the precise time they commence. But the commander of every vessel is required to discourage his crew from selling any part of their wages or prize money, and never to attest any power of attorney until he is satisfied that the same is not granted in consideration of money given for the purchase of wages or prize money.

Article 45. All crimes and offences committed by persons belonging to the navy, which are not specially provided for in this act, shall be punished at the discretion of a court-martial.

SECTION II.—COURTS OF INQUIRY.

Article 46. Courts of inquiry may be ordered by the President of the United States, the Secretary of the Navy; or the commander of a fleet or squadron, when without the territorial jurisdiction of the United States, or by any commanding officer within the United States, who may be authorized by the Secretary of the Navy; which courts shall not consist of more than three members, and a judge advocate, or person to officiate as such: and the witnesses shall be summoned in the same manner, and under the same penalties, and the testimony taken in the same manner, as is prescribed in this act, in the case of courts-martial; and such courts shall have the same power to summon witnesses, to administer oaths or affirmations, and to punish contempts as courts-martial.

Article 47. It shall be the duty of such courts to report, to the authority by which they are convened, the evidence which may be taken; but they shall not express any opinion, unless specially required in the warrant for convening the court, and then only when such court is directed to inquire into the circumstances under which any ship or vessel of the navy has been wrecked or lost, or improperly hazarded; in which case it shall be the duty of said court to investigate and report upon the conduct of the officers and crew thereof; and in all proceedings before a court of inquiry, the party whose conduct shall be the subject of investigation shall be allowed an opportunity to be present, and to cross-examine the witnesses who may be adduced, and to offer such legal testimony as he may think proper to said court.

Article 48. The proceedings of courts of inquiry shall be authenticated by the signature of the president of the court, and the judge advocate, or person officiating as such, and shall be forthwith transmitted by the judge advocate to the authority by whose warrant the court was convened; and, after being approved, or disapproved, by the competent authority, shall be deposited and filed in the office of the Secretary of the Navy; and the proceedings of courts of inquiry, or a certified copy of the same, under the hand of the Secretary of the Navy and seal of the Navy Department, shall, in all cases not capital, or extending to the dismissal of a commission or warrant officer, be evidence before a court-martial, and of equal authenticity as if the witness, whose testimony was then taken, had been examined before such court-martial, provided that the court shall be satisfied that the presence of such witness could not have been had before such court-martial.

Article 49. Before proceeding to make the investigation directed, the president, and each of the members of the court of inquiry, shall take the following oath or affirmation; to be administered by the judge advocate, or person officiating as such:

"I, A. B., do swear (or affirm) that I will well and truly examine and inquire, according to the evidence, into (and if required report upon) the matters to be investigated before this court, without partiality or prejudice."

After which, the president, or senior member present, shall administer to the judge advocate, or person officiating as such, the following oath or affirmation:

"I, A. B., do swear (or affirm) truly to record the proceedings of this court, and the evidence to be given to the same; and that I will, on all legal questions, upon which my opinion may be required by the court, give the same without prejudice or partiality, and according to my judgment and conscience."

SECTION III.—COURTS-MARTIAL.

Article 50. General courts-martial may be convened as often as the President of the United States, the Secretary of the Navy, or the commander-in-chief of a fleet or squadron, without the territorial juris-

diction of the United States, may deem proper; or by any commanding officer within the United States, who may be duly authorized by warrant from the Secretary of the Navy. No general court-martial shall consist of more than thirteen, or less than nine members, for the trial of capital offences, if nine members can be ordered without injury to the public service. And, for all other offences, a general court-martial shall consist of not more than nine members, and in no case less than five members; and when the highest number required shall not be ordered, the reasons therefor shall be stated in the precept for convening the court. The senior officer of the court, who may be present at any time, shall preside, and the other members shall take rank according to their grade; or, if of the same grade, according to the date or number of their commissions, respectively.

Article 51. General courts-martial for the trial of flag officers, shall consist of flag officers and captains only; for the trial of captains, shall consist of flag officers or captains—or, in cases where it may be absolutely necessary, one-third of the members may be commanders; for the trial of commanders, one-third of the members may, when absolutely necessary, consist of commission lieutenants; for the trial of other commission or warrant officers, or others in the navy, the court may, in case of necessity, consist of lieutenants. But, in all cases, general courts-martial shall not consist of officers below the rank of captains, if they can be convened without injury to the public service.

Article 52. All complaints, on which an application for a general court-martial is founded, shall be exhibited in writing to the proper authority, signed by the party or parties preferring the same; and shall be accompanied by a list of witnesses, and with a statement of the facts which it is expected each of such witnesses may be able to prove; and the accused shall be furnished with a copy of the complaint as soon as practicable, and shall be called upon to state what he may have to offer in explanation, and to name such persons as he may wish to have summoned as witnesses.

Article 53. The officer authorized to convene a court-martial, having received the complaint, statements and lists named in the preceding article, shall take care that the charges and specifications are put in proper and legal form, and that the accused be forthwith furnished with a copy of the same; and that all witnesses belonging to the naval or military service are duly summoned, and shall furnish the names of all witnesses, not belonging to the naval or military service, to the marshal of the district in which they may respectively reside, annexing to such list the name of the accused, and the time and place of trial; and the said marshal shall be, and he is hereby, authorized and directed to summon such witnesses to be and appear at the time and place specified, and to make return to the said court of his proceedings; and, in case of the refusal or omission of any witness so summoned to appear before said court at the time specified, who shall reside within one hundred miles of the place where the court is held, and no sufficient reason or excuse being given, the said court may forthwith issue, to the said marshal or his deputy, a process in the nature of an attachment, requiring him to take such delinquent or delinquents and bring him or them before the said court.

Article 54. Before proceeding to the trial of any case, the accused shall be at liberty to challenge any member named in the precept to sit on said court, for good cause shown; the truth and sufficiency of which cause of challenge shall, in each case, as it shall occur, be decided in a summary manner by the other members of the court; and if it be adjudged true and sufficient, the member so objected to shall not sit in trial of the accused by whom he has been challenged, but may resume his seat on any subsequent trial before the same court.

Article 55. In case no challenge shall be made, or, if made, after the same shall be disposed of, the president and each member of the court shall, if a sufficient number remain to form a court, before proceeding to trial, take the following oath or affirmation, which the judge advocate is hereby authorized to administer:

"I, A. B., do swear (or affirm) that I will truly try, without prejudice or partiality, the case now depending, according to the evidence which shall be adduced, the laws for the government of the navy, and my own conscience; and that I will not by any means divulge or disclose the vote or opinion of any member of the court, except to the President of the United States, the Secretary of the Navy, or other officer authorized to approve the proceedings of this court, unless required so to do before a court of justice in due course of law."

And the judge advocate shall then take the following oath or affirmation, to be administered to him by the president or senior member present:

"I, A. B., do swear (or affirm) that I will keep a true record of the proceedings of this court, and of the evidence given before the same, and a separate record of the votes given by each of the members; and that I will not divulge or disclose the judgment of the court, until it shall have been approved by the competent authority; nor will I divulge or disclose the vote or opinion of any member of the court, except to the President of the United States, the Secretary of the Navy, or other officer authorized to approve the proceedings of this court, unless required so to do before a court of justice in due course of law; and that I will, on all questions touching the case in which my opinion may be required by this court, give the same without prejudice or partiality, according to my judgment and conscience."

Article 56. In all cases, prior to ordering a court-martial or court of inquiry, by consent of the person ordering the court and the accused, before the trial, or of the judge advocate and the accused after the court has convened, the deposition of any witness may be taken under the direction of the court, on interrogatories and cross-interrogatories; and such deposition may be taken before any judge, justice, or notary public in the United States, or the mayor or chief magistrate of any incorporated city or borough of the United States, or before any captain in the navy, or consul, or vice consul of the United States in any foreign country; and such deposition as aforesaid shall be admissible in evidence, in the same manner as if the witness was himself produced and examined before the court; and in any case where the witness does not belong to the navy, and is about to leave the United States, or may reside more than one hundred miles from the place of trial; and if the judge advocate and the accused do not agree and consent to such deposition, or in case either of them shall omit or neglect in a reasonable time to prepare and transmit his interrogatories and cross-interrogatories, the deposition of such witness may be taken *ex parte*, and shall be equally available as if both parties had consented thereto; provided that, in all cases in which the punishment prescribed for the offence with which the accused is charged may be capital, the personal attendance of the witness against the accused shall be in no case dispensed with, except by the consent of the accused; but his evidence shall be given orally.

Article 57. In all cases, not specially excepted and provided for, the testimony given before a court of inquiry or a general court-martial shall be oral, on oath or affirmation, to be administered by the

senior member of the court who may be present; and if any person shall refuse to appear as a witness when legally summoned, or shall refuse to give his evidence, having no lawful excuse therefor, or shall prevaricate; or if any person, in the presence of said court, shall behave in a contemptuous or disorderly manner, it shall and may be lawful for said court, by the written order of the senior member of the same, to commit the party so offending to the custody of the provost marshal of the court, to be by him imprisoned, confined, or detained in close custody until released by order of the said court, or until such time as may be prescribed in such order, provided the same shall in no case exceed the period of two months; and the said provost marshal shall forthwith, on the receipt of such order, take the offender and commit him to close custody, agreeably to the terms of said order; and in all cases in which any suit or indictment shall be brought for any act done in obedience to such order, the defendant may plead the general issue, and give the special matter in evidence; and upon the production of the original or a certified copy of said order, under the hand of the Secretary of the Navy and seal of the Navy Department, judgment shall be given for said defendant in any court of the United States.

Article 58. The copy of any document, record, or paper on file in the Departments of State, Treasury, War, or Navy, when certified under seal to be a true copy by the Secretary thereof, shall be as valid and admissible in evidence, in any general court-martial or court of inquiry, as if the original were produced.

Article 59. Any person not belonging to the navy, or not subject to naval law, who shall, on his examination as a witness before a court of inquiry or a court-martial, commit willful perjury, and any such person who shall corrupt, procure, suborn, or persuade any such witness to commit willful perjury, shall, and may be, prosecuted by indictment in any court of justice in the United States, having jurisdiction of the same; and shall, on conviction, suffer such penalties as are prescribed, or are or may be authorized, by laws of the United States in cases of perjury or subornation of perjury. And in every indictment for perjury or subornation of perjury under this act, it shall be sufficient to set forth the offence charged, without setting forth the authority by which the court was held, or the particular matters brought, or intended to be brought, before the said court. And any person belonging to the navy who shall be guilty of the before-mentioned offences, or any one of them, may be tried by a general court-martial, and, upon conviction, shall be cashiered, or suffer such punishment as such court may adjudge.

Article 60. When the proceedings of any general court-martial shall have commenced, they shall not be delayed or suspended on account of the absence of any of the members, provided five or more be assembled; but the court is enjoined to sit from day to day (Sundays excepted) until judgment be pronounced and signed, unless the court shall be adjourned or dissolved by the officer ordering the same, or by his superior in command; nor shall the president, or any other member of said court, after the proceedings are begun, absent himself therefrom, unless in case of sickness, or ordered to go on duty by a superior officer, or other sufficient excuse, to be judged of by the court, on pain of being cashiered, or of suffering such punishment as a court-martial shall adjudge. If so many as five members shall not assemble, any three members may adjourn the court from day to day for not exceeding ten days, when, if five members shall not attend, the court shall, by such non-attendance, be dissolved, and all its previous proceedings be rendered null and void.

Article 61. The judgment of every court-martial shall be authenticated by the signature of the president, and all the members of the same who may be present when the said judgment shall be pronounced, and also of the judge advocate; and it shall be the duty of the judge advocate to transmit, with all convenient dispatch, the record of the proceedings, the private record of the votes given by the court, and the judgment given by the court, to the Secretary of the Navy, or person ordering the court; and when such proceedings shall have been approved or disapproved by the competent authority, and the same finally acted upon, they, with all the documents relating to the case, shall be remitted to the Secretary of the Navy, to be filed upon record; the private record of the votes being first sealed and endorsed by the officer approving or disapproving the proceedings, who shall not disclose the vote of any particular member unless required so to do before a court of justice.

Article 62. All sentences of courts-martial which shall extend to the loss of life, or to the cashiering or dismissal of a commission or warrant officer, shall require the concurrence of three-fourths of the members present; and no such sentence shall be carried into execution, until confirmed by the President of the United States, or, if the trial takes place out of the United States, until it shall be confirmed by the commander-in-chief of the fleet or squadron; except such as go to the cashiering of a commission or warrant officer, which are in all cases first to be approved by the President of the United States. All other sentences may be determined by a majority of votes, and carried into execution on the approval of the officer ordering the court.

Article 63. The punishment which may be adjudged by a general court-martial upon commission or warrant officers may be as follows:

- 1st. Death, in those cases only specially named in this act.
- 2d. Cashiering, but in those cases only where death or this punishment is specially named in this act.
- 3d. Dismission from the navy.
- 4th. Loss of rank, by placing him lower on the list of his grade, or, if at or near the bottom of the list, to be suspended from rank for a certain time; and all promotions from the next grade below him, within that time, to take rank of him.
- 5th. Suspension from duty, without pay or emoluments.
- 6th. Suspension from duty, with part pay and emoluments.
- 7th. Confinement.
- 8th. Dismission from the squadron or vessel.
- 9th. Public reprimand.
- 10th. Private reprimand.
- 11th. Forfeiture of pay when due. More than one of the above-named punishments may, however, be included in the same sentence by a court-martial.

Article 64. Whenever it shall appear to any court-martial, from the testimony in the case, that the charges which have been preferred against any person, on trial, are malicious, frivolous, or vexatious, they may express such opinion in their proceedings.

Article 65. No person shall be liable to be tried or punished by a general court-martial, for any offences which shall appear to have been committed more than three years before the issuing of the order for such trial, unless the person, by reason of having absented himself, or some other manifest imper-

ment, to be shown to the satisfaction of the court, shall not have been amenable to justice within that period.

Article 66. All sentences of court-martial, which shall go to cashiering, dismissal, suspension from rank, or death, or shall acquit any commission or warrant officer in the navy, shall be published in some one or more newspapers printed at the seat of the general government; and, if required by any officer who has been tried by a court-martial, a certified copy of the proceedings in his case shall be furnished, after the same shall have been approved or disapproved by the authority ordering the court.

Article 67. No officer or other person shall be criminally or civilly amenable for any act done as a member of a court-martial or court of inquiry, or under the authority or direction of said court, on account of any irregularity in the form of the authority by which said court is convened, but may, in all cases, plead the general issue, and give this act in evidence.

Article 68. Every officer who is by this act authorized to convene courts-martial, shall have power to pardon or mitigate the sentence of any such court, which by this act he is authorized to approve and confirm.

Article 69. All naval courts-martial shall be held on board of some vessel of the United States, or in some place in which the United States have special jurisdiction.

Article 70. To every general court-martial and court of inquiry there shall be attached a provost marshal, to preserve order in the court, and to execute its orders, which said provost marshal shall be furnished, on the written requisition to the president of the court, if not before appointed, directed to the proper officer nearest to which the court may be convened.

Article 71. Every officer shall, when arrested, deliver up his sword, when required, and shall confine himself to the limits assigned him, under pain of being dismissed from the service by the sentence of a general court-martial.

Article 72. Whenever general courts-martial and courts of inquiry shall be held out of the territorial jurisdiction of the United States, the proceedings preliminary to the trial, as well as on the trial, shall correspond, as nearly as circumstances will permit, to the provisions of this act; and in such cases, the authority convening said court shall appoint a judge advocate, none having been previously appointed by the proper authority.

SECTION IV.—SUMMARY COURTS-MARTIAL, FOR PETTY OFFICERS AND PERSONS OF INFERIOR RATINGS.

Article 73. Summary courts-martial may be ordered upon petty officers, and persons of inferior rating, at the request of the commander of any vessel in the navy, by the senior officer in command who may be present, for the trial of offences which the commander may deem deserving of greater punishment than he is, by this act, authorized to inflict upon his own authority, but not sufficient to require trial by general court-martial.

Article 74. Summary courts-martial shall consist of three commission officers, and of some competent person to act as recorder. Before proceeding to trial, the members shall take the following oath or affirmation, which the recorder is hereby authorized to administer:

"I, A. B., do solemnly swear (or affirm) that I will well and truly try, without prejudice or partiality, the case now depending, according to the evidence which shall be adduced, the laws for the government of the navy, and my own conscience."

After which the recorder of the court shall take the following oath or affirmation, which the senior member of the court shall administer:

"I, A. B., do solemnly swear (or affirm) that I will keep a true record of the evidence which may be given before this court, and of the proceedings thereof."

Article 75. All testimony given before such court shall be given orally, on oath or affirmation, which the senior member of the court shall administer.

Article 76. Summary courts-martial shall not sentence any person to any severer punishment than thirty-nine lashes, and confinement for one month, and reducing to a lower rating; and the sentence of such summary courts-martial shall not be carried into execution without the approval of the senior officer in command who may be present.

Article 77. The proceedings of all summary courts-martial shall, after approval, be sent to the commander of the fleet or squadron to which the vessel in which such court is held may belong, to be by him transmitted to the Secretary of the Navy; and when held on board any vessel not acting under the orders of a superior officer, they shall be returned to the Secretary of the Navy by the commander of such vessel.

SECTION V.—PRIZES.

Article 78. The commanding officer of every ship or vessel of the United States who shall capture or seize upon any vessel, or any goods, wares, or merchandise, as prize, shall carefully preserve all the papers, books, and other writings found with the same, or which may come into his possession appertaining to the same, (signals or significations of signals excepted,) and transmit the whole, un mutilated, undefaced, or otherwise changed by him, to the judge of the district court in which such captured vessel or other prize property may arrive, on pain of suffering such punishment as a general court-martial may adjudge.

Article 79. The commanding officer of every ship or vessel of the United States, making a capture of any kind whatever, shall transmit, as early as practicable, to the Navy Department, and to the person appointed to receive and pay the prize money, complete lists of the officers and crew, and others on board their vessel at the time, entitled to a share of the capture, setting forth the rank, quality, and rating of each person at the time of the capture, and the class in which they are entitled to receive prize money, certified by himself and the purser of the vessel, on pain of being punished at the discretion of a general court-martial.

Article 80. No person in the navy shall take out of a prize, or vessel seized as prize, any money, plate, goods, or any part of her cargo or rigging, unless it be for the better preservation thereof, or necessary for the use of any of the vessels of the United States, or under instructions from the Navy Department, before the same shall be adjudged lawful prize by a competent court; but the whole, without fraud, concealment, or embezzlement, shall be brought in, and judgment passed thereon, upon pain of

every person offending herein forfeiting his share of the capture, and of suffering such further punishment as a general court-martial shall impose.

Article 81. No person in the navy shall strip of their clothes, or pillage, or in any manner treat with cruelty or unnecessary severity, any person or persons found on board a prize or captured vessel, on pain of being dismissed from the service, or such other punishment as a general court-martial shall adjudge.

Article 82. The net proceeds of all ships and vessels-of-war, privateers, pirates, and the goods, wares, or merchandise found on board of them, shall, when captured by any vessel of the navy, and adjudged good and lawful prize by the competent court, belong wholly to the captors; and the net proceeds of all other vessels, goods, wares and merchandise, which shall be captured or recaptured by vessels of the navy, shall be equally divided between the navy pension fund and those making the capture, when the same shall be adjudged good and lawful prize, or awarded as salvage, or deemed as forfeited, by the competent authority.

Article 83. A bounty shall be paid by the United States for each person on board any ship or vessel-of-war belonging to an enemy at the commencement of an engagement, which shall be sunk or otherwise destroyed in such engagement by any ship or vessel belonging to the United States, or which it may be necessary to destroy in consequence of injuries sustained in action, of seventy-five dollars, if the enemy's vessel was of inferior force, and of one hundred and fifty dollars if of equal or superior force, to be divided among the officers and crew in the same manner as prize money; and when the actual number of men on board any such vessel cannot be satisfactorily ascertained, it shall be estimated according to the complement allowed to vessels of their class in the navy of the United States; and there shall be paid as bounty to the captors of any vessel-of-war captured from an enemy, which they may be instructed to destroy, or which shall be immediately destroyed for the public interest, but not in consequence of injuries received in action, fifty dollars for every person who shall be on board at the time of such capture.

Article 84. The net proceeds of all prizes, to which the officers and crews of vessels belonging to the navy of the United States shall be lawfully entitled, shall be distributed in the following manner:

1. The flag officer of a fleet or squadron, or other officers being commanders of fleets, squadrons, or divisions, by authority from the Secretary of the Navy, or in conformity to the regulations of the navy, shall receive six per cent. of the said net proceeds of all prizes which shall be made by vessels acting under their orders, as hereinafter defined and limited.

2. The commanding officer of any vessel of the navy, being actually on board at the taking of any prize, if acting under the orders of any flag officer or other officer being the commander of a fleet, squadron, or division, as hereinafter defined and limited, shall receive twelve per centum; but if he shall not be acting under the orders of any flag or other officer as aforesaid, he shall receive eighteen per centum; but a master commandant or commander attached to and being on board of the same vessel, with and under the orders of a captain, shall, if such vessel shall capture a prize in which no other vessel shall be entitled to share, receive three per centum of the net proceeds; and whenever the vessel shall be a joint captor with some other vessel of the navy, then the share of such master commandant or commander shall be as is hereinafter provided.

Second class.—The sea lieutenants, masters, and captains, or officers of the higher rank of marines, or of troops doing duty as marines, who may be doing duty on board when the capture is made, shall receive thirteen per centum.

Third class.—The surgeon, purser, chaplain, lieutenants of marines or of troops doing duty as marines, second master, and secretary to a flag officer, or commander of a fleet, squadron, or division, shall receive five per centum.

Fourth class.—The passed midshipmen, midshipmen, assistant surgeons, masters' mates, if warrant officers, boatswains, gunners, carpenters, sailmakers, schoolmasters, and clerks, shall receive fourteen per centum.

The remainder, together with the amount herein allotted to any of the preceding classes, in which there may be no person entitled to share, shall be divided into equal shares, and distributed to the rest of the crew as follows:

Fifth class.—To boatswains' mates, gunners' mates, masters' mates, (not being warrant officers,) yeomen, carpenters' mates, ships' cooks, masters-at-arms, sergeants of marines, or of troops acting as marines, nine shares each.

Sixth class.—To captains of tops, captains of forecastle, armorers, coxswains, coopers, quartermasters, quartergunners, seven shares each.

Seventh class.—To officers' cooks, ships' corporals, captains of the hold, stewards, sailmakers' mates, corporals of marines, or of troops doing duty as marines, masters of the band, and seamen, five shares each.

Eighth class.—To ordinary seamen, musicians, and private marines, or troops doing duty as such, four shares each.

Ninth class.—To landsmen, boys, and other ratings not above enumerated, and together with all passengers, or persons rated as supernumeraries, doing duty and assisting on board, three shares each; excepting officers, who shall, if doing duty by order, share with that rank to which they may belong.

Article 85. Whenever more than one vessel of the navy of the United States shall assist at any capture, or be in sight at the time of such capture, and shall have made itself known by signal or otherwise as a vessel-of-war of the United States, the share of the prize money accruing from such capture, which may belong to the commanding officers of vessels so assisting, shall be divided among them, according to the number of men and guns on board the vessel they may respectively command.

A master commandant, or commander doing duty on board a ship of the line, under a captain, shall share as though he was in command of a sloop-of-war of the first class. If any of the said commanding officers of vessels shall at the same time be commanders of fleets or squadrons, by order of or authority from the Secretary of the Navy, or in conformity with the regulations of the navy, they shall be further entitled to their share as commanders of fleets or squadrons, from such of the vessels assisting in the capture as may belong to their fleet or squadron, as hereinafter defined and limited. All the other officers and persons, belonging to or serving in such vessels, shall share equally in the respective classes to which they may belong.

Article 86. The commanding officer of a vessel shall be deemed to be under the command of a flag

officer, or commander of a fleet or squadron, when he shall have actually been placed or taken under his command, and shall have actually received some order directly from, or be acting in execution of some order issued by such officer; and when he shall be directed to join and report to any such commander of a fleet or squadron, he shall then be deemed to be under the orders of such commander from the time that he arrives within the limits of such officer's station; and shall be considered under the command of the commander of such fleet or squadron, until such commander of a vessel shall have received some order directly from, or be acting in execution of some order directly from some other commander of a fleet or squadron, or from the Secretary of the Navy.

Article 87. A flag officer, or other officer sent to command any station, shall have a right to share, as commander-in-chief, in all prizes taken by ships or vessels employed upon and belonging to the station, from the time that he arrives within the limits of such station; but if a junior officer be sent to relieve a senior as commander-in-chief, he shall not be entitled to share as commander-in-chief in any prize taken by the squadron until the command shall be resigned to him, but shall share only as a junior commander of a squadron until he assumes the command.

Article 88. A flag officer, or other officer appointed to command a squadron upon any station, and passing through or into any other station, shall not be entitled to share, as a commander of a squadron, in any prize taken out of the limits of the station to which he belongs, or is appointed, by any vessel under the command of the commander of a squadron on any other station, or under orders direct from the Secretary of the Navy.

Article 89. When an inferior officer in command of any squadron shall be sent to reinforce a superior officer in command upon any station, the superior shall have no right to any share of prizes taken by the inferior, until such inferior shall arrive within the limits of the station, or shall actually receive some order from him, or be actually in execution of some order issued by him; and such inferior shall be entitled to his proportion of all captures made by the squadron which he is sent to reinforce, from the time that he shall arrive within the limits of the command of such superior.

Article 90. A commander-in-chief of a fleet or squadron quitting his station for any reason except upon some particular urgent service, with the intention of returning to such station as soon as such service is performed, shall have no share of prizes taken by ships or vessels left behind, after he shall have surrendered the command to another officer appointed commander-in-chief of such station, or after he shall have passed the limits of his command without being superseded.

Article 91. An inferior commander of a squadron quitting his station, except when detached, by orders from the commander-in-chief, out of the limits thereof, upon a special service, with orders to return to such station as soon as such service is performed, shall have no share in any prizes taken by the vessels remaining on the station after he shall have passed the limits thereof; and, in like manner, the commander-in-chief, or commander of a squadron remaining on the station, shall have no share of prizes taken by such inferior commander of a squadron, or by the vessels under his command, after he shall have quitted the limits of his station, except when detached as aforesaid.

Article 92. When vessels under the orders of commanders of fleets or squadrons belonging to different stations shall happen to be joint captors, the commanding officer of each vessel shall pay one-third of the share to which he is entitled to the commander of the fleet or squadron to which he belongs; but the commanding officers of vessels acting under orders direct from the Secretary of the Navy, being joint captors with vessels under the command of a commander of a fleet or squadron, shall retain their whole share.

Article 93. If an officer of the navy shall be sent to command at any port or station on the coast of the United States, he shall have no share of the prizes as commander of a fleet or squadron which may be taken by any vessels, excepting such as shall have been expressly directed to act under his orders by the Secretary of the Navy, and then only when captured within the limits of his station.

Article 94. A flag officer, being the commander-in-chief of a fleet or squadron, and having no other flag officer or commander of a squadron under his command, shall have to his own use the six per centum of the net proceeds of prizes taken by vessels under his command, as herein provided for and limited.

Article 95. When there shall be commanders of squadrons or divisions duly appointed by the Secretary of the Navy, or in conformity with the regulations of the navy, acting under a commander-in-chief of a fleet or squadron, the six per centum of the net proceeds of prizes taken by any of the vessels of the fleet or squadron, which is set apart for the commanders of fleets and squadrons, shall be divided as follows: If there be but two officers to share, including the commander-in-chief, the commander-in-chief shall have two third parts, and the junior one third part; but if the number of such officers who may be entitled to share shall be more than two, then the commander-in-chief shall have one-half, and the other half shall be equally divided among the said juniors.

Article 96. The captain of the fleet shall, while actually serving as such, be considered as a junior commander of a squadron in the distribution of all prizes made by the fleet or squadron to which he belongs; but he shall be entitled to only two-thirds of the share of such junior commander of a squadron, to be taken from the share of the flag officers or commanders of squadrons.

Article 97. In case any difficulty should arise in the distribution of prize money, or money to be distributed as such, not sufficiently provided for in this act, the same shall be referred to the President of the United States, for his directions thereupon, which shall be final, and have the same force and effect as if herein inserted.

SECTION VI.—PRIZE AGENTS.

Article 98. The commander-in-chief of a squadron, or the commanding officer of any vessel of the navy not belonging to a squadron, shall appoint, by power of attorney, one or more persons as the agent or agents for the officers and crew of such squadron or vessel, to act in their behalf in all matters relating to the proceedings for the condemnation of vessels seized as prize by such squadron or vessel, and for the receipt and distribution of the proceeds of such vessels, which may be lawfully decreed to belong to the captors.

Article 99. It shall be the duty of all persons who may be duly appointed to act as agents for prizes to give satisfactory bonds to the Secretary of the Navy, in the penal sum of twenty thousand dollars, or such larger sum as, from the amount to be received by him, the Secretary of the Navy may require, for the faithful performance of their duties; a certified copy of which bond, under the seal of the Navy

Department, shall be produced by such agent to the judge of the court by whom the prize may have been condemned, before such judge shall direct payment or delivery to such agent of the amount which may be decreed to any captors.

Article 100. It shall be the further duty of all such persons appointed as agents for prizes to give public notice within ten days after the receipt of any prize money for distribution, in at least one of the newspapers published in Washington, Norfolk, Baltimore, Philadelphia, New York, and Boston, as often as once in a week, for two months, stating the time when any prize money shall have been received for payment, when and where payable, and the name of the vessel from which such prize money was derived, and of the vessel or vessels entitled to share in the same; and he shall make all payments to the persons entitled to the same, or to their legal attorneys, on duplicate prize lists, taking receipts on each.

Article 101. If at the expiration of two years from the publication of such notice, as prescribed in the preceding article, all the persons who may be entitled to a share of any prize shall not have received the same, it shall be the duty of the agent for such prize to pay over all such unclaimed amounts to the Secretary of the Navy, for the benefit of the navy pension fund: provided that the navy pension fund shall, thenceforward for the term of five years, be liable to the legal claimants of all such shares which have been so left unpaid by the prize agent; but no interest shall be paid on such unclaimed shares, and, if not claimed within five years as aforesaid, the amount of such shares shall belong to and be the property of the navy pension fund; and every prize agent shall, at the expiration of two years from the receipt of the proceeds of any prize, forward to the Secretary of the Navy one of the prize lists, upon which payments for such prize may have been made.

Article 102. No agent for prizes shall be entitled to claim, as commission for performing all his duties as such, more than five per centum upon the gross amount of the proceeds which may be adjudged to belong to the officers and others for whom he may be authorized to act.

SECTION VII.—PENSIONS.

Article 103. *Be it enacted, &c.*, That all money accruing, or which has already accrued, to the United States from the sale of prizes, shall be and remain forever, a fund for the payment of pensions to the officers, seamen, and marines, and to the widows and children of such officers, seamen and marines, as may be entitled to receive the same by the provisions of this act; and if the said fund shall be insufficient for the purpose, the public faith is hereby pledged to make up the deficiency; but if it should be more than sufficient, the surplus shall be applied to the making of further provision for the comfort of the disabled officers, seamen, and marines, and for such as, though not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country.

Article 104. The said fund shall be under the management and direction of the Secretary of the Navy for the time being, who is hereby authorized to receive any sums to which the United States may be entitled from the sale of prizes, and employ and vest the same, and the interest arising therefrom, in any manner which he may deem most safe and advantageous: and it shall be the duty of the said Secretary to lay before Congress, annually, in the first week of their session, a minute statement of his proceedings relative to the management and disbursement of said fund.

Article 105. Every officer, seaman, or marine, disabled in the line of his duty while subject to the laws for the government of the navy, shall be entitled to receive for life, or during his disability, a pension from the United States, under such regulations as have been or may be established and approved by the President of the United States, according to the nature and degree of his disability, not exceeding the amount of his pay at the time he was disabled.

Article 106. Any officer, seaman, or marine who shall have been killed, or who hereafter may be killed, or die by reason of a wound received in battle, while subject to the laws for the government of the navy, leaving a widow, such widow shall be entitled to receive half the pay to which the deceased was entitled at the time of his death, which allowance shall continue during her widowhood; and in case of no widow, or of the intermarriage of such widow, the same allowance shall be made to any child or children of such officer, under eighteen years of age, until they shall arrive at the age of eighteen years; provided that the said half pay shall cease on the death of such child or children.

SECTION VIII.

Article 107. *Be it enacted, &c.*, That the navy ration shall consist of the following *daily* allowance of provisions for each person:

Fourteen ounces of salted pork, with half a pint of peas or beans; or, one pound of salted beef, with half a pound of flour, and a quarter of a pound of raisins or dried apples; or with half a pound of rice, two ounces of butter, and two ounces of cheese; fourteen ounces of biscuit; half an ounce of tea, or one ounce of coffee or one ounce of cocoa; two ounces of sugar, and *one gill of spirits*. And of a *weekly* allowance of half a pound of pickles or cranberries; half a pint of molasses, and half a pint of vinegar.

Article 108. Fresh meat may be substituted for salted beef or pork, and vegetables for the other articles usually issued with the salted meats, allowing one and a quarter pound of fresh meat for one pound of salted beef, or for fourteen ounces of salted pork, and regulating the quantity of vegetables so as to equal the value of those articles for which they may be substituted.

Article 109. Should it be necessary to vary the above described daily allowance, it shall be lawful to substitute—

One pound of soft bread, or one pound of flour, or half a pound of rice, for fourteen ounces of biscuit; half a pint of wine, for a gill of spirits; half a pound of rice, for half a pint of beans or peas; half a pint of beans or peas, for half a pound of rice.

When it may be deemed expedient by the President of the United States, Secretary of the Navy, commander of a fleet or squadron, or of a single ship, when not acting under the authority of another officer, on foreign service, the articles of spirits, butter, cheese, raisins, dried apples, pickles, and molasses, may be substituted for each other; provided the article substituted shall not exceed in value the article for which it may be issued, according to the scale of prices which are or may be established for the same.

Article 110. In cases of necessity, the daily allowance of provisions may be diminished or varied by the direction of the senior officer present in command; but payment shall be made to the persons whose

allowance shall be thus diminished, according to the scale of prices which are or may be established by the same; but a commander who shall thus make a diminution or variation must show to his commanding officer, or to the Department, the necessity for the same.

Article 111. No commission officer, or midshipman, or any person under eighteen years of age, shall be allowed to draw the spirit part of the daily ration; and all other persons shall be permitted to relinquish that part of their ration; and to every person who by this article is prohibited from drawing, or who may relinquish the spirit part of his ration, there shall be paid, in lieu thereof, the value of the same in money, according to the prices which are or may be established for the same.

Be it further enacted, That all the provisions of this act shall go into effect on the — day of — next; and that, from and after that day, the following acts and parts of acts, and all other acts or parts of acts which may be contrary to or inconsistent with the provisions of this act, shall be and are hereby repealed, viz:

“An act for the better government of the navy of the United States,” approved 23d April, 1800.

“An act granting navy pensions in certain cases;” approved 20th January, 1813.

“An act granting pensions to the orphans and widows of persons slain in the public or private armed vessels of the United States;” approved 4th March, 1814.

The seventh section of “An act in addition to an act, entitled ‘An act in relation to the navy pension fund;” approved 16th April, 1806.

“An act in addition to an act giving pensions to the orphans and widows of persons slain in the public or private armed vessels of the United States;” approved 16th April, 1818.

“An act extending the term of half pay pensions to the widows and children of certain officers, seamen, and marines, who died in the public service;” approved 3d March, 1819.

The first section of “An act further extending the term of half pay pensions to the widows and children of officers, seamen and marines, who died in the public service;” approved 22d January, 1824.

“An act further to extend the pensions heretofore granted to the widows of persons killed, or who died in the naval service;” approved June 28, 1832.

The third section of “An act providing for a naval peace establishment, and for other purposes;” approved 3d March, 1801.

“An act supplementary to the act, entitled ‘An act to provide for a naval peace establishment, and for other purposes;” approved 27th March, 1804.

The second, third, and fourth sections of “An act to increase the navy of the United States;” approved 2d January, 1813.

Provided, That nothing in this act shall be construed to prevent the payment of any pension already granted until the full expiration of the period thereof; nor to affect or impair the rights of any person or persons which may have accrued during the existence of the acts or parts of acts hereby repealed.

Navy widows' and orphans' fund.

Article —. *Be it enacted, &c.*, That all money accruing, or which has already accrued from the deductions made or to be made, from the pay of the commission or warrant officers of the navy of the United States, for the navy widows' and orphans' fund, together with any which may accrue to it from any source, shall be and forever made a fund for the payment of the pensions to the widows, children, and relatives of the commission and warrant officers of the navy who may be entitled to receive the same.

Article —. The said fund shall be under the management and direction of commissioners, who shall consist of the Secretary of the Navy, and the Navy Commissioners for the time being, who are hereby authorized to receive all moneys to which the said fund may be entitled, and to employ and vest the same, with the interest arising therefrom, in any manner in which they or a majority of them may deem most safe and advantageous; and it shall be their duty to lay before Congress annually, in the first week of their session, a minute statement of their proceedings relative to the management and disbursement of said fund.

Article —. The said commissioners, upon application of the widow, or, in case of no widow, then upon the application of the child or children, or, in case of no widow or child, then upon the application of the widowed mother, or unmarried sister, she being under eighteen years of age, of any commission or warrant officer, who may die after the law authorizing the deduction from the pay of the said officer, for the benefit of this fund, shall have passed, may grant annually to such widow, or, if no widow, to such child or children, being under eighteen years of age, or if no widow or child, then to such widowed mother, or unmarried sister, she being under eighteen years of age, such pension as the state of the fund will allow, and the pecuniary circumstances of the applicant may require, not exceeding such an amount as, in addition to the income of the applicant from other sources, will be equal to the furlough pay of the deceased at the time of his death.

Article —. It shall be the duty of the said commissioners to prepare estimates of the probable claims upon the fund, for a series of years, upon the basis of life annuities, so as to regulate, as far as possible, the annual pensions in such a manner as to prevent the necessity of their discontinuance or reduction.

A proposed act to change the titles of certain officers of the navy.

Be it enacted, &c., That from and after the passage of this act, all masters commandant in the navy shall be taken to be, and shall be called “commanders;” and all sailingmasters shall be taken to be, and shall be called “masters;” but such change of title shall not impair, or in any way affect, the rank or privileges of any masters commandant or sailingmasters now in the service; and, should they receive new commissions or warrants, they shall respectively take rank from the date of their present commissions or warrants.

A proposed act in addition to the act of May 15, 1820.

Be it enacted, &c., That it shall be lawful to enlist boys for the navy, with the consent of their parents or guardians, not being under thirteen, nor over eighteen years of age, to serve until they shall arrive at the age of twenty-one years; and so much of an act entitled “An act to amend the act entitled ‘An act to amend the act authorizing the employment of an additional naval force,’” approved 15th May, 1820, as is inconsistent with the provisions of this act, shall be, and is hereby repealed.

The board of revision, &c., respectfully suggest, so far as relates to the Navy Department, the expediency of amending the act entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments," by omitting the words "or services," in the first part of the section, and the words "and purchasers," occurring in a subsequent part of the section; so that the fifth section, thus amended, would read as follows:

SEC. 5. "All purchases and contracts for supplies, which are or may, according to law, be made by or under direction of the Secretary of the Navy, shall be made either by open purchase, or by previously advertising for proposals respecting the same; and an annual statement of all such contracts, and, also, the expenditure of the moneys appropriated for the contingent expenses of the navy of the United States, and for the discharge of miscellaneous claims not otherwise provided for, and paid at the Treasury, shall be laid before Congress at the beginning of each year, by the Secretary of the Navy."

Proposed amendment to "An act in addition to the several acts for the establishment and regulation of the Treasury, War, and Navy Departments.

Be it enacted, &c., That whenever, in the opinion of the Secretary of the Navy, it shall be conducive to the public interests to transfer any article of provisions or other stores from the appropriation under which they may have been purchased for the naval service, to any objects under other appropriations for the navy, it shall be lawful for him to authorize such transfers; and, upon his representation of the value of the articles thus transferred, it shall be the duty of the proper officers of the Treasury to transfer the amount upon the books of the Treasury from the appropriation to which the articles may have been transferred to the appropriation from which they may have been or may be taken.

No. 5.

Statement of the corresponding articles in the proposed modification of the laws and the sections or articles of existing laws which treat of the same or similar subjects, with occasional reasons for the variations and additions that are proposed.

Proposed act to revise and enlarge the act for the better government of the navy.

Article 1. The 1st article corresponds with the 1st article of the former act. It is made more comprehensive, and a neglect of its provisions is made punishable by court-martial. The former article had no penalty.

Article 2. The 2d of the former act differs in only requiring divine service on Sundays, and extends it to navy yards. That part of the old article which required daily prayers was never observed, and it was deemed best not to continue it, to be further neglected.

Article 3 corresponds to 3d of old act: is made more specific as to the punishments which may be inflicted, and adds gambling to the prohibited acts.

Article 4 comprises a part of 4th of former act: is confined to the offences which, if proved, are to be capitally punished, and adds the attempt to strike the flag, without proper authority, to this class of offences.

Article 5 comprises a part of 4th and 5th of the former law: it is confined to commanders of fleets, squadrons, or vessels, in presence of an enemy.

Article 6 comprises a part of 5th and 6th of former law: relates to all officers, and others generally, in presence of an enemy.

Article 7 corresponds with 14th of old act. It adds to the old provisions that of protection against violence, in consequence of having performed duties.

Article 8 corresponds generally with 13th of old act: differs from it in mitigating the punishment of death for making or attempting to make a mutinous assembly, and leaves it discretionary with a court to inflict that or a less punishment, according to the particular circumstances of each case.

Article 9 comprises the 10th and 11th of old act.

Article 10 same as present 12th.

Article 11 same as present 16th.

Article 12 is a corresponding article to 17th in old act: limits the power of inflicting the punishment of death to a period of war only; while the old law allows it at all times.

Article 13. A part of 17 of old law, but excludes death in the penalty. The discretion of courts-martial can then only inflict one hundred lashes as the *maximum* punishment, while by the old law the court might sentence to death.

Article 14. No provision in the old act: establishes a distinction between absence without leave and desertion.

Article 15 for 19 of old act: provides for the punishment of acts for which vessels, or the lives of persons in vessels, are through malice exposed to danger, in addition to former offences—a clause much wanted, as, under the old law, the most serious offences of that kind could only be punished with one hundred lashes.

Article 16, for 25 of old act: varied, by providing for the destruction of property when in imminent danger of falling into the hands of an enemy; a power which has of necessity been exercised, though prohibited by the old law.

Article 17 for 18 of old act; the same, except designating to what purpose the forfeiture shall be applied.

Article 18 for 24 of old act; the same, except specifying the disposition to be made of the forfeiture.

Article 19 for 20 of old act; omitting the penalty of death.

Article 20 for 22. Omitting the punishments by court of admiralty, and confining them to courts-martial; leaving to aggrieved individuals the ordinary remedies of law for damages, if they choose to pursue them in that way.

Article 21 for 23. Varied, so as to allow goods to be received for safe-keeping, as it has frequently been desirable in the disturbed state of South America and Mexico, but never to be done for the personal

advantage of any officer of the vessel. The precious metals and jewels are permitted, as in the old law, because, from their comparatively small bulk, it is frequently for the interests of the commercial community to place them under the protection of an-armed vessel.

Article 22 for 21. Varied, so as to embrace all cases of homicide, and leaving the court to measure its sentence according to the nature and circumstances of the crime.

Article 23. A new article; making all challenges, while on service or for any official act, a cause for punishment; when not on duty, offenders are left to the civil tribunals.

Article 24 for 15 of old act.

Article 25 for 26. Varies, by confining it to petty officers and inferior persons, and limiting the punishments.

Article 26 for 27, with verbal variation.

Article 27 for 31. The same.

Article 28. A new article: providing for any offences committed when on shore, which might not be embraced in two other articles.

Article 29 for 28. The same.

Article 30 for part of 30. Varies, by defining more closely the limitations upon the power of commanders to inflict punishments.

Article 31, for part of 29 and 30. Commanders to have proper entries made in muster book, and to see that men transferred have their accounts sent with them.

Article 32, part of 29. Commanders to note casualties, &c., in muster book, to secure clothes of deceased persons, and to transmit muster books to the Secretary of the Navy *quarterly*.

Article 33, part of 29. To cause the laws to be read monthly and to be hung up in some public part of the ship.

Article 34. New article, regulating secretaries and clerks.

Article 35. New article, prohibiting newspaper and other publications between officers.

Article 36, for section 3, of old act. Varied, by authorizing the forfeiture of wages to pension fund, in cases of neglect of duty duly proved.

Article 37, for part of 41. Limiting the powers of courts-martial, when they are left to measure the punishment at their discretion, under articles that name no specific punishment; varies from the old one in limiting it for officers, and limiting confinement for others.

Article 38. A new article, authorizing commanding officers to detain men beyond the term of their enlistment, under certain circumstances, and directing an increase to their compensation when so detained, and extending the provisions of the act over them till discharged.

• This article may possibly be considered objectionable in some of its provisions; or, if not objectionable in principle, as being out of place in the body of this act.

The power to detain men in the service beyond the time for which they enlisted, and against their consent, and this power to be exercised at the discretion of the commander of a squadron or vessel acting singly, may seem to be greater than is consistent with a proper regard to the rights of individuals.

It is not intended, however, that it shall operate upon any persons who may have enlisted previous to the time when the proposed act shall take effect; and with those who may enlist after that time, it will constitute a part of the terms of their agreement.

That some provision of the kind is of great importance, the past experience of our naval administration has fully demonstrated. The seamen who are collected for the navy are necessarily enlisted at different periods, as they may present themselves from day to day.

Whatever care may be used in selecting crews formed from persons having nearly the same time to serve, it can rarely happen that the extreme differences will not reach to two or three months, though the numbers at the extreme may bear a small proportion to the whole number of the crew. In such cases it is now necessary, when ships are on foreign service, to discharge those whose time of service first expires, in a foreign port, and risk the loss of their future services to the country, or to procure a conveyance for them to the United States, return with the vessel itself before their term of service expires, or detain them on board without any legal authority for so doing, and when by the terms of their agreement they are no longer amenable to the laws for the government of the navy.

Although it has always been the wish of the Department to limit the cruises of vessels to such periods as would allow their return home in time to discharge men before or at the periods named by their enlistments, no exertions have yet been able to carry this fully into effect. It is believed that it cannot be done, under the circumstances of the remote employment of some of our vessels, without incurring an increase of expense, and producing injuries to the great interests of the country, which the occasional short detention of a few individuals would hardly seem to justify; especially when the individuals shall have entered the service with a knowledge of their liability to such detention.

To obviate objections, so far as seemed compatible with the object in view, the authority has been limited to the detention of the vessel to which the men may belong; and, as a compensation for such extraordinary service and detention, it is proposed to give them, during its continuance, an increase of one-fourth of their pay.

It would seem that these provisions would have been more appropriately introduced in a separate act, as an amendment to the law which now regulates the periods for which men may be enlisted, but it was deemed better that it should have a place in the law for the government of the navy, that it might, by being read monthly to the crews, become familiar to their minds, and at the same time become readily and generally known as one among the ordinary restrictions and liabilities consequent upon enlistment into the naval service.

Article 39 for 33: enumerates some officers as being excluded from the class of petty officers, more than the old act.

Article 40 for section 4 of old act. Same.

Article 41: a new article for marines.

Article 42: a new article for troops when embarked for duty.

Article 43: a new article for troops when embarked as passengers.

Article 44 for 34.

Article 45 for 32: varies, by leaving the punishment to discretion of a court-martial, instead of "according to the usages of the sea service."

SECTION II.—COURTS OF INQUIRY.

Article 46 for 1 of old act: varies, by allowing them to be convened by any commanding officer within the United States, by permission from the Secretary of the Navy. This seemed to be an important provision for remote points, as Pensacola, &c.

Article 47 for 1st part of 1st article: varies from the other by prohibiting the expression of any *opinion*, except upon the causes for the loss of, or improperly hazarding a vessel. This was done because the expression of an opinion upon general subjects seemed *unnecessary*, as the head of the Department will be perfectly competent to form an opinion for himself upon all such cases.

The expression of an opinion, when that opinion should be unfavorable, could not be otherwise than a censure, and, as such, a punishment to a certain extent; and certainly would be calculated to raise a prejudice against the party who might subsequently be brought before a court-martial to answer for the same act.

Article 48 for 2d: prescribes the form of authentication and record of the proceedings, and the circumstances and forms under which the testimony so taken may be used as evidence before a court-martial.

Article 49 for 3d: prescribes the form of the oath, which varies a little from the former one.

SECTION III.—COURTS-MARTIAL.

In this section several changes and additions are proposed; some of them involving powers or principles which may be deemed important. Among these is the mode proposed for compelling the attendance of witnesses, when residing within certain distance of the court. The present act for the government of the navy provides no mode for obtaining this necessary means of securing justice. It now depends upon the will of individuals, who do not belong to the naval or military services, whether they will appear before a naval court-martial, or give evidence in any manner, however important their testimony may be to the public interests, or to the party upon trial. The board of revision proposes to obtain their attendance by the intervention of the same officer whose duty it is to procure the attendance of witnesses in the civil tribunals of the United States; and when the distance shall be such as to render personal attendance inconvenient, they have proposed to allow their evidence to be taken by interrogatories and cross-interrogatories, in all cases with the assent of the accused, and in some without his assent.

The right of challenge, for good and sufficient cause, is expressly granted to the party accused, by the proposed amendment. This has generally been granted in practice, but it has been sometimes doubted whether it could be claimed as a matter of right, or depended upon the court as a matter of favor.

One of the most important variations will be found in the oath to be taken by the members and judge advocate.

In the law as it now exists, the votes and opinions of the individual members cannot be made known, except required in some court of justice in due course of law. The acts of the court, as such, can alone be known to the party on trial, to the public, or to the officer, whose approval or disapproval renders those acts valid or nugatory. Among the reasons for this departure from the usual practice in our civil courts, are to be found the fact that it frequently becomes necessary to constitute courts-martial with some members who may be of inferior rank or junior to the party to be tried, and the ill consequences which might arise, if the particular votes of such junior members should be known to the party accused, under whom they might afterwards be required to serve. These and other reasons seemed of sufficient force to justify the continuance of all the present restrictions, with the exception of the officer who is to approve or disapprove the proceedings and sentence. This exception is proposed, because the offences tried by courts-martial are not unfrequently in a degree technical or professional, involving considerations and opinions upon which professional men are most competent to judge. The capacity of different individuals to form correct opinions in such cases may vary in degree, from their general intelligence or opportunities of acquiring professional experience, which are generally known to and may be duly appreciated by the approving officer. It may happen that decisions will be made in some cases by a bare majority, which to the approving officer may seem to be severe, and which he would be disposed to remit or mitigate if he possessed a knowledge of the state of the votes, but with which he might be unwilling to interfere without that knowledge. It is believed that the alteration may tend to mitigate punishment, without producing any injurious results to the service.

Under the existing law it has been decided, that if, from any cause, the number of members who may assemble on any day after the proceedings are commenced, shall be less than five, the court is by that fact dissolved. It is proposed to allow a smaller number to adjourn from day to day for a certain time, as it might in many cases be highly useful.

The particular punishments which may be inflicted upon officers has been added, because the general discretionary powers granted by the existing and proposed law seemed to require it for the officers as well as for others.

It has also been proposed to establish some time within which offenders shall be brought to trial. A similar provision exists in the army laws, and in those of most other military codes, and seems but a measure of common justice. After a long period, witnesses, or other means of repelling a charge, could only be obtained with great difficulty, if they could be obtained at all.

A more specific enumeration of the rank of officers who may be ordered upon courts-martial has been proposed than exists in the present law. This seems desirable to remove doubts, which have existed in the minds of some, as to the right to order certain officers upon that duty; and because it is deemed of importance to the interests of the navy that courts-martial should, as far as practicable, be composed of the higher ranks.

The other proposed changes or additions relate rather to the forms of procedure, and will be found in connection with the respective articles.

Article 50 for 35. Varies, by giving the Secretary of the Navy authority to permit any commanding officer within the United States to convene a court. The number to form a court is varied, allowing not less than nine instead of five for capital offences, if it can be avoided, and the maximum of nine for all minor offences, retaining five as the minimum in all cases: requires reasons to be stated in the precept when the maximum shall not be ordered.

Article 51 for 35.

Article 52 for 38. Course to be pursued in making a complaint upon which application for a court-martial may be made.

Article 53 for 38. Mode of preparing charges and specifications; of informing the accused; of summoning witnesses, and of compelling their attendance. The present law prescribes no mode for the latter purpose.

Article 54. New; allowing the accused the right of challenge for cause, and the mode of deciding upon challenges.

Article 55 for 36. Form of oath for members and judge advocate; varied, by allowing the vote and opinion of individual members to be known to the approving power.

Article 56 for 37. Directing under what circumstances, and in what manner, depositions or affidavits may be taken.

Article 57 to 37, and variations. Power of court to punish contempt for non-attendance of witnesses; misbehavior in presence of the court, and providing against any prosecution for the same.

Article 58. New; giving to copies of official records, under the seal of any of the Departments, the same effect as the originals.

Article 59 for 37. Punishment for perjury; gives authority to courts-martial to punish persons belonging to the navy.

Article 60 for 39. Modified; authorizing a less number than five to adjourn a court from day to day for ten days.

Article 61. New; mode of authenticating proceedings, and of transmitting them to the person ordering the court.

Article 62 for 41. By whom sentences may be approved or confirmed.

Article 63. New; punishments which may be inflicted upon officers.

Article 64. New; authorizes court to express opinion when charges are vexatious, &c.

Article 65. New; limitation of time within which offences may be prosecuted.

Article 66. New; requires publication of sentences on officers.

Article 67. New; protection against prosecution, if form of authority for convening the court should be irregular.

Article 68; old 42. Who may pardon or mitigate sentences.

Article 69. New; courts to be held where the United States have special jurisdiction.

Article 70. New; provost marshal may be employed.

Article 71 for 38. Officers, when arrested, to deliver their swords and confine themselves, &c.

Article 72. New; forms to be pursued when without the United States.

SUMMARY COURTS-MARTIAL.

This section is altogether new. The present law for the government of the navy renders it necessary that for all the offences committed by petty officers and inferior persons, which in the opinion of a commander of a vessel require a severer punishment than confinement or twelve lashes, he must make application for a general court-martial. This, upon foreign stations, must be made to the commander of the fleet or squadron, and, within the jurisdiction of the United States, to the Secretary of the Navy. The practical effect of these provisions has been frequently productive of inconvenience to the service, and to the officers and others.

Vessels of the navy, though belonging to the same squadron, as well as those employed on our own coasts, are frequently separated, and seldom meet in numbers sufficient to organize general courts-martial. Seamen belonging to vessels thus separated are frequently guilty of offences, which, though not deserving of the greater penalties named in the law, are still of such character as, in the opinion of the commanding officer, deserve a greater punishment than he can lawfully authorize. He has, in such cases, no other alternative but to direct an inadequate punishment, or to keep the offender in confinement until circumstances allow the convening of a general court-martial. To obviate these inconveniences the summary court-martial is proposed. The number of officers designated to form the court can generally be furnished by a single vessel. The extent of punishment which may be awarded is sufficient for all, except offences of magnitude; and those only need be brought to the consideration of general courts-martial hereafter.

The leading objects of each article are as follow:

Article 1. When they may be convened, and by whom.

Article 2. Of how many members they shall consist, and the oath of the members and recorder.

Article 3. How testimony shall be received.

Article 4. Power of the court; sentence to be approved before it can be executed.

Article 5. Disposition to be made of the proceedings, after they shall have been approved.

PRIZES.

Several alterations are proposed in this section. Those of minor consequence will be found noted under the respective articles in which the changes are proposed.

Of those which may be deemed more important, one of the propositions is to give to the captors the whole net proceeds of public vessels-of-war, and of privateers, or pirates, which may be adjudged lawful prize, without reference to the relative force of the captor and prize, while, by the law now in force, the captor receives but half the proceeds of vessels of inferior force.

Another proposed alteration is an increased bounty for vessels which may be destroyed in action, and a provision for the destruction of others, when such a course shall be deemed essential to the public interests. At present the latter class of cases is left to the special action of Congress, who have, in all recent cases, granted about an equal sum to that which is now proposed in the shape of bounty.

In the distribution of the proceeds of prizes several changes are proposed; but, with few exceptions, the object has been to carry more fully into execution the presumed intentions of the existing law.

In proposing a small increase to the proportion now allotted to the commanders of squadrons and of vessels, the board took into consideration the general responsibilities of those officers, and particularly the fact that one of these officers must, in each case, be solely responsible for the detention of

vessels which may be deemed liable to seizure; and that for any mistake which should give a claim for damages, the claim must be met and answered by them, without reference to or aid from those under their command. With reference to these facts, and to the proportions granted in other countries, it is presumed that the alteration will not be considered unreasonable.

The portions of the other officers and crews of vessels are arranged differently from the present law. The commission and warrant officers are now classed with those only with whom they are usually associated in their ordinary intercourse. The proportions assigned to the individuals of each class are such as in the opinion of the board correspond with their relative responsibilities, rank, and duties, and vary little from the present law. That portion which is allotted to the petty officers and persons of inferior ratings, is graduated upon the same principle; but as the numbers of each rating are liable to considerable fluctuation, a new principle of distribution is proposed, so as to secure, in all cases, the same relative proportions for the individuals of the several classes.

The present rule for distribution, when more than one vessel are concerned in the same capture, is retained for the commanding officers, because the rule will, as respects them, in all cases operate in the same manner, there being but one, and always one, in that class in each vessel. For all others the present rule is so modified as to give each individual, of corresponding classes, the same amount, however much the number in each class may have been varied by accidental causes. The want of some rule of this kind might, and in fact has, frequently defeated the evident intention of the present law.

Several additional articles have been introduced, to define more clearly the circumstances under which commanders of squadrons shall be entitled to a share of prizes made by other vessels, and with a view to prevent, as far as possible, all difficulties upon the subject.

Article 78 corresponds to 7th article of 6th section of old act: omits the express penalty of forfeiture of his share of the prize, and leaves the punishment to court-martial.

Article 79 also to 7, being rather more full and particular, with the same modification of the penalty.

Article 80 for 8, omitting the power given to the court of admiralty.

Article 81 for 9, with slight modifications.

Article 82, for section 5, with some modifications, and giving the whole of all public vessels, instead of half of inferior force.

Article 83 for section 7, increasing the bounty and extending its allowance to vessels destroyed for the public advantage.

Article 84 for section 6; distribution of prize money.

1st class increased from 15 to 18 per cent., of which the flag officer's share is increased in the same proportion, being *six* instead of *four* per cent.

Captains and commanders: Their proportions are regulated when serving together in the same vessel, she being the sole captor.

Second class increased from 10 or 11½ to 13 per cent.

Third class varies in the officers belonging to it, and gives 5 per cent.

Fourth class takes a part of the old 3d and 4th, excluding all petty officers, and gives 14 per cent. The petty officers and inferior ratings receive the remainder, which is divided into shares, so that the first class of petty officers receive 9, the next 7, the next and seamen 5, ordinary seamen and marines 4, landsmen and boys 3 shares each.

This arrangement secures to each individual in each class a regular proportion, whatever the number in such class may be.

Article 85, for section 6, article 7, establishes the distribution when vessels are to be entitled to share as joint captors.

Articles 86 to 96 inclusively, relate to the various claims of flag officers or commanding officers of fleets, squadrons, or divisions, and define them as accurately as possible, for the purpose of preventing future disputes.

Article 97 makes the President the umpire to settle all disputed or doubtful points in the act for the distribution of prize money, meaning thereby to prevent all litigation upon the subject.

Prize agents.

This is a new section, and is meant to secure for the captors responsible agents to receive and distribute the prize money that may accrue to them. The nomination of the agent is given to the commander, because he has all the responsibilities of detention, and must answer all liabilities for improper captures.

The navy pension fund is made the agent for the captors after two years, and, upon condition of paying claimants within five years, is to be entitled to the dividends then remaining unclaimed.

The last article fixes a *maximum* for the commissions, which an agent may claim for his services.

Navy pension fund.

The principal objects proposed to be effected by the changes recommended in this section are, to render the present grants to widows of persons slain in battle available for life, or during widowhood, instead of the limited grants for a term of years, as heretofore established; and to collect into one act all the provisions necessary for this purpose, and to provide for other persons who are, or may be, entitled to pensions for personal injuries, when subject to the laws for the government of the navy, under the different acts now in force, and which relate to such persons.

The existing laws, which relate to pensions for other causes than the above named, are left as now established, under the belief that they are properly subjects for special legislation, which may be adapted to special circumstances.

First article is the same as section 9 of act of 23d April, 1800.

Second article is the same as section 16 of ditto, as amended by act of—.

Third article is the same as section 8 of act of April, 1800, modified slightly to conform to act of—.

Fourth article is the act of 20th of January, 1813, and others, making the grant to widows for life or widowhood, instead of five years, but limiting it to death in battle.

Navy ration.

The variations from the present law, which are proposed in this section, are such as, in the opinion of the board, materially contribute to the health and comfort of the seamen. The authority to use either

of several of the articles will increase the power to promote those essential objects according to circumstances; and, in many cases, such changes would be indispensable.

The reasons for continuing, under certain restrictions, a part of the present allowance of spirits will be found in a letter from the board to the Attorney General of the 29th ult.

Navy widows' and orphans' fund.

This proposition is entirely new, and is offered to be dependent upon any revision which may be made of the laws regulating and increasing the pay of the commission and warrant officers of the navy; and to any such law it is proposed to add the following article:

"Provided, nevertheless, That the Secretary of the Treasury shall be, and he is hereby, authorized and directed to deduct from the pay, hereafter to become due, of the commission and warrant officers of the navy of the United States, three per centum of the amount thereof, and to pay the same to the Secretary of the Navy, and the Navy Commissioners for the time being, who are hereby appointed a board of commissioners by the name and style of 'commissioners of the navy widows' and orphans' fund,' which, together with any other moneys to which the fund may become legally entitled, shall constitute a fund for the relief of the widows and orphans of the said commission and warrant officers of the navy of the United States; to be invested by said board, and the proceeds of it divided and disbursed, in such manner as may be hereafter prescribed by Congress."

Repeated attempts have heretofore been made by the officers to effect, to a certain extent, the benevolent objects to which the proposition relates; but the difficulties have always been too great to be overcome by their unaided efforts.

The more important of these difficulties have been found in the wide dispersion of the officers, and their constant change of position; the difficulty of collecting, investing, and managing their funds, without an expense disproportionate to the amount, and in a manner which should, at the same time, be safe and productive. The course here proposed for adoption obviates nearly all of those difficulties, and in a manner which it is hoped may be found liable to no strong objections.

The board were fully aware that a proposition of this kind could not be sanctioned without injustice, if made to operate upon a pay already established, unless it was done with the assent of each individual upon whom it might operate. They, however, did and do still believe that if connected with a new law, revising, and, as they hope may be the case, increasing the compensation of the officers, there would be no injustice in the measure, and no opposition from the officers; but that it would receive their general, if not universal approbation.

It will be perceived that although each officer contributes in proportion to his compensation, yet the widows and orphans of those only are to participate in the distribution whose income from other sources does not reach a certain amount, and then are not to receive more than to supply that deficiency. It is proposed to provide for the necessities of all, but for the luxuries of none. Within these limits it is believed that the deductions proposed for the fund will be sufficient for the cases which will be embraced by the plan, and will impart benefits which cannot be obtained by the unaided action of the officers, nor be expected as a direct donation from the government.

It is proposed for consideration, solely upon the condition that it may be made dependent upon a revision of the law in relation to the pay of the navy.

Changes of the titles of "master commandant" and "sailingmaster."

These changes are proposed as matters of simple convenience. The present denominations are long and inconvenient for use, either verbally or in writing, and do not convey any correct idea of the duties of the respective officers. The terms proposed as substitutes are shorter, more convenient, and rather more correctly significant of the duties performed by those officers to whom they refer.

Act for boys, &c.

The proposed act to authorize the enlistment of boys is considered of great importance to the interests of the navy. In the opinion of the board it would secure all the benefits which could be anticipated from the introduction of apprentices, while it avoids the difficulties and evils connected with such a system. It is expected that such an act would, without any additional expense, place it in the power of the navy to provide for itself many petty and warrant officers who would be much better qualified in every respect, for the performance of their respective duties, than those who, from necessity, are now employed in those situations, which all naval men agree in considering highly important to the full efficiency of a ship-of-war.

The changes proposed in the present act, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War and Navy Departments," are offered in consequence of your having specially called the attention of the board to its provisions, and because the classes of cases proposed to be omitted have not, and, from their nature, cannot be executed in strict conformity to the law, without such expense and inconvenience as would, in the opinion of the board, greatly overbalance any possible advantage that could result from a compliance with its requisitions.

The proposed amendment to "An act in addition to the several acts for the establishment and regulation of the Treasury, War and Navy Departments," is offered from a conviction that the power which is therein proposed to be given to the head of the Department may frequently be exercised with great public advantage, and it is believed without injury in any case. It does not, in fact, vary the amounts to be expended under the different appropriations, but merely authorizes the purchase of articles from an appropriation for which, from any cause, they are not then wanted, by another appropriation for which they may be immediately required, and paying for the same by a transfer of the value on the Treasury books. This arrangement may frequently prevent the loss of, or injury to, perishable articles, and enable the Department in all cases to use such of those which may be on hand as shall be most for the public interests.

No. 546.

[1ST SESSION.]

ON CLAIM OF COMMODORE JOHN RODGERS, AS SENIOR OR COMMANDING OFFICER OF THE NAVY, TO DOUBLE RATIONS WHILE ON THE BOARD OF NAVY COMMISSIONERS.

COMMUNICATED TO THE SENATE MAY 2, 1834.

Mr. CHAMBERS, from the Committee on Naval Affairs, to whom was referred the memorial of Commodore John Rodgers, reported:

That the question presented by the memorial is, whether the senior or commanding officer of the navy shall, or shall not, receive the allowance of double rations during the period of his service as a member of the Board of Navy Commissioners.

The act of Congress of the 25th February, 1799, most manifestly, and, as the committee believe, most wisely, contemplated a marked distinction between the pay and emoluments of the commanding officer of the navy and other post captains.

A captain commanding a squadron on separate service is pro hac vice *the* commanding officer. He is expected to extend civilities to his officers and to strangers, and to incur expenses as the representative head of the navy at the place of his command; and the law, therefore, gives to him the means of defraying these items of expenditure, peculiar to his condition, by allowing him double rations.

The officer who, in point of fact, is the senior officer in the whole service, necessarily, at all times and in all places, presents the character which, as above alleged, is temporarily occupied by the commanding officer of a squadron on separate service. It will usually be practicable and expedient that the senior officer should have a shore station. His age, experience, and character must bring him into constant intercourse with the officers and others connected with the service, and his just claims to be placed in a pecuniary situation to defray the charges of a generous hospitality, are at least as strong as those of the temporary commandant of a squadron on separate service.

There are other and higher considerations, in the opinion of the committee, which should influence the action of Congress on this subject. The noble spirit of a naval officer is usefully excited and encouraged by distinctions which, although involving very trivial advantages in a pecuniary view, or none at all, are yet marked; and to the eye of a soldier, ardent in the love of fame and elevation, and proud of honor, because it is an evidence and a badge of merit, such distinctions are incentives and rewards infinitely more inviting than money.

The policy of the law thus to distinguish the commanding officer of the navy from others bearing a similar though junior commission, was not interrupted or interfered with until the establishment of the Board of Navy Commissioners by the act of the 7th February, 1815. By that law, each Commissioner was allowed a compensation of three thousand five hundred dollars per annum, "in lieu of wages, rations, and other emoluments, as naval officers."

The committee cannot doubt that the salary to the Commissioners allowed by this act was estimated as an exact and proper compensation for the laborious and responsible duties imposed on them as *Commissioners*, and they believe the estimate a fair one. They do not believe that in affixing to the services of the Commissioners a salary supposed to be adequate to their just compensation, it occurred at the time that the principle adopted in 1799, and universally thereafter practiced and approved, would be altered and abandoned, much less do they believe it was designed so to abandon that wise principle of distinction between the senior officer and others. The practical construction of the act of 1815, however, has been to destroy the previously existing distinction. The substitution of a fixed salary, in lieu of *all rations*, was supposed to preclude the allowance of extra or double rations, although by the act of 1799 double rations were "*always*" to be allowed to the commanding officer. The memorialist has been a member of the board since he became the senior officer, with the exception of a few years, and, in direct opposition to the spirit and meaning of the law of 1799, has not received double rations, or any other pay or emolument greater than the other members of the board, which is, in effect, to say, there has been no distinction whatever between the station of the commanding officer and others.

Of the propriety of this construction, the committee are not called upon to express an opinion. Whether correctly or no, it has been adopted, and the long acquiescence of the Department and of individuals may make it proper to regard it as the true interpretation of the act.

The analogies of our own service, as well as the service of all well-regulated military or naval establishments; the necessary "distinctions between commander and commanded, essential to the order, discipline, and efficiency of command," require, in the opinion of the committee, a restoration of the principle of 1799 to its full and practical effect: and as they believe there is every propriety in doing justice to the equitable claims of the memorialist, in putting into his possession that which an accidental omission in 1815 has alone prevented his receiving long ago, they have reported a bill which makes provision for the memorialist, and a permanent provision for all future cases of a similar character.

No. 547.

[1ST SESSION.]

ON THE CLAIM OF AN OFFICER OF THE MARINE CORPS TO BE RELIEVED FROM THE EFFECT OF REOPENING HIS ACCOUNTS BY THE TREASURY, AND CHARGING HIM WITH DEBITS FOUND ON THE BOOKS OF AN INSOLVENT PAYMASTER, AND FROM THE EFFECT OF A CHANGE OF A DECISION OF ONE ACCOUNTING OFFICER BY A SUCCESSOR IN OFFICE.

COMMUNICATED TO THE SENATE MAY 2, 1834.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom was referred the memorial of Henry B. Tyler, executor of Richard Smith, reported:

That they have examined the memorial of the petitioner, and find that it is fully sustained by the documentary evidence which has been submitted to the committee. They beg leave to refer to the said memorial as part of this report.

In reference to the two items of claim presented by the petitioner, the committee are of opinion that he is entitled to the relief prayed. The first of these items is the sum of \$1,375.02, which has been withheld from the estate of Col. Smith on the ground that Col. Smith appeared to be indebted in that amount to Lieut. Desha, a former paymaster of the marine corps, who died insolvent, and largely indebted to the government. The committee cannot sanction the principle that the United States have any legal or equitable right to enforce against officers of the corps the payment of private debts, or the settlement of private accounts between such officers and the paymaster, and to exercise this power by withholding from the parties money acknowledged to be due to them from the government. The accounts between the paymaster and the officers are in themselves altogether private, and they have been so considered in the Department itself. Such has been the official opinion of the Attorney General, and the same point, as the committee has been informed, has been judicially decided by a highly respectable court.

Were the committee disposed to entertain a doubt upon this question, it would in no degree impair the claim now presented. Whatever may be the character of the transactions between the paymaster and the different officers of the corps, it is clear that the books of the paymaster furnish no legal evidence of indebtedness even between the parties themselves. It cannot be perceived upon what principle the government can use these books as evidence of such indebtedness, and, without any judicial inquiry, undertake to deem them conclusive of the fact, and pay to itself a debt due to it from an insolvent paymaster, by withholding payment of an admitted claim from another officer.

But the committee are further satisfied that Col. Smith was allowed a credit, as against Desha, for this specific amount many years since; and if the government had any authority to interfere at all in these accounts, the allowance of this credit by the officers of the government must be conclusive against it. After the lapse of years, and particularly after the death of both parties, it ought not to be permitted to any accounting officer to reopen such transactions, adjusted with all the forms and solemnities with which they are usually attended, and to recharge an individual with a sum which has been passed to his credit. Unless in cases of palpable and glaring mistake or fraud, such proceedings are, in the opinion of the committee, equally at variance with justice and the long-established usage of the government.

In reference to the second item claimed by the petitioner, it appears that the Fourth Auditor of the Treasury instructed the quartermaster of the marine corps to make to Col. Smith the allowances which amount to the specific sum now withheld, and they were accordingly so made by the quartermaster. And in the letter communicating this instruction, the Fourth Auditor stated that the subject had been referred to and decided by the Secretary of the Navy. No question appears ever to have been made as to the authority of the Secretary thus to adjudicate. It was unquestionably within his appropriate sphere of duty. But the present Fourth Auditor considered the letter of his predecessor as insufficient proof that such authority had been exercised. The committee do not concur in this opinion. They consider the Fourth Auditor as the appropriate organ of communication between the Secretary and the officer to whom the letter was addressed. In making the communication, he was acting officially, and in conformity with the general and correct practice of the Department, and the letter which he wrote must be considered as furnishing the highest and most conclusive evidence of the facts which it asserts. Nothing could be more dangerous than to disregard the contemporaneous, the official, the record evidence of the action of any of the departments, and to substitute for it the precarious and imperfect recollections of individuals. The committee is therefore of opinion that the letter from the Fourth Auditor to the quartermaster contained complete evidence of its contents, communicated ample authority to him to make the allowance claimed, and that it is not now competent to any department of the government to question the validity of the act, or charge the officer with the money which he had received under such circumstances.

Upon these grounds, among others perhaps equally satisfactory, the committee are of opinion that the prayer of the petitioner ought to be granted, and they accordingly report a bill for his relief.

23D CONGRESS.]

No. 548.

[1ST SESSION.]

ON CLAIM OF AN AGENT OF THE NAVY DEPARTMENT, AT VALPARAISO, FOR INDEMNITY FOR LOSSES SUSTAINED BY A REFUSAL TO PAY HIS DRAFTS, AND FOR A PERCENTAGE ALLOWANCE UPON HIS DISBURSEMENTS.

COMMUNICATED TO THE SENATE MAY 12, 1834.

Mr. TALLMADGE, from the Committee on Naval Affairs, to whom was referred the petition of William Hogan, administrator of Michael Hogan, deceased, reported:

That, in November, 1820, when Mr. Hogan was preparing to leave this country, to settle as a merchant at Valparaiso, the then Secretary of the Navy, Mr. Thompson, addressed a letter to him, authorizing him to act in behalf of the Department in furnishing supplies for the naval service in that quarter. He discharged the functions of such agency until November, 1830, when he received a letter revoking the authority under which he had so long acted.

This letter of appointment is in the following words:

NAVY DEPARTMENT, *November 24, 1820.*

SIR: In the event of the United States ships-of-war visiting the ports of Chili, you are hereby authorized to act, in behalf of this Department, as agent for furnishing such supplies as the service may require; and for which your drafts upon this Department, in reimbursement, will be duly honored on presentation.

I am, very respectfully, sir, your most obedient servant,

SMITH THOMPSON.

To MICHAEL HOGAN, Esq., *Agent of the United States at Valparaiso.*

All the relations at any time existing between Mr. Hogan and the Navy Department depend upon the foregoing letter. He was, indeed, about the same time appointed agent for commerce and seamen; and, in 1823, was appointed consul: which appointments connected him with the Departments of State and Treasury, but did not so connect him in any, even in the slightest degree, with the Navy Department.

Mr. Hogan contends that he was, by this letter of authority, constituted the mercantile agent and factor of the Department, and was entitled, 1st, to such percentages of commission for services rendered as are established by the commercial usages of the place where they were rendered; 2d, to interest on moneys advanced for the supply of the Constellation, and other vessels, in 1821-2; and, 3d, to indemnity for losses sustained by reason of the dishonor of sundry of his drafts, *in reimbursement*, made upon the Department; which, by *express stipulation*, should have been "*duly honored on presentation.*"

On the other hand, the action of the Navy Department (when Mr. Hogan returned to this country for the purpose of making a settlement of his accounts, and of the bills which had been protested) indicates him to have been then regarded as a *navy agent* of the United States; and the protection to which his drafts were entitled is stated to have been dependent (notwithstanding the express stipulation in relation thereto) on a variety of circumstances, personal to himself, of more or less weight, as he might be more or less esteemed and trusted by the Department, and on the contingency of Congress having made appropriation to pay such bills.

In order to decide properly on the questions presented, it is necessary to determine the character and nature of the agency, and of the relations established by the letter above referred to. Were they strictly official, or merely commercial? Was he constituted, *ex officio*, navy agent of the United States, or commission merchant, agent, and man of business, of the Department, at Valparaiso?

The office of navy agent is created by law; the duties and incidents of the office, and the mode of appointment, are all prescribed by law. The appointment can only be made by the President, with the advice and consent of the Senate. The officer must give bonds and approved security for the faithful performance of his duties. He is not expected to advance his own funds, nor to tax his own resources or credits to procure funds for the disbursements of his office. The government provides the funds that may be needed by anticipation; and, in the form of money or credit, places them in his hands for disbursement. The navy agent is an officer of the government, not the mere agent of a Department. The Secretary of the Navy has no authority whatever to make such appointment, or in any way to constitute such an officer, either by commission or by less formal letter of appointment; he cannot, on his mere authority, establish the official relation of navy agent between the government and an individual. If he could so do, the whole power of the President and the Senate, over such appointments, would be nugatory. But a distinction has been taken between a temporary and a permanent navy agent, and between navy agents abroad and at home. It has been asserted that temporary agents may be appointed by the Secretary. This opinion is obviously erroneous. The question is not as to the time the officer shall continue in his office, but of the essence of the office itself. If the Secretary has not the power to appoint to the office, he cannot exercise the power for a day, any more than for a longer period: a provisional appointment must proceed from the same authority as a permanent appointment. And, moreover, a navy agent is a disbursing officer of the government; that is, an officer receiving for disbursement, public money from the public Treasury. Such officers are designated by the act, approved 3d March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments." And the third section of that act does, in express terms, prohibit any appointment to such office, except by the President and Senate. A provisional appointment could in no case be made by the Secretary; and, if made by the President, would, if not submitted to, and confirmed by the Senate, expire at the end of the next ensuing session.

Nor is it more correct to say, that agencies abroad may not be appointed by the President and Senate under the legislation of Congress. The act above referred to comprehends agents as well abroad as at home, and such has been the construction given to it; the President and Senate having appointed navy agents abroad by virtue thereof. The case of Andrew Armstrong, appointed navy agent to reside at Lima, is of this description.

Now, it is evident that not one of the qualifications, requisite to invest Mr. Hogan with the character of navy agent, is to be found either in the letter of appointment or in any subsequent relation existing between him and the Department. Has the Secretary, then, attempted to violate the law, and to make such appointment in despite of it? Had he done so, such illegal act would not have entitled Mr. Hogan to the benefits and immunities of such office; would not have rendered him liable to the penalties and disabling provisions of any statute referring to such office, nor to any restrictive clauses in relation to its compensation, unless by his own acquiescence and agreement. But no disregard of law, unintentional or otherwise, is to be imputed to the distinguished civilian who requested Mr. Hogan to act as agent for the Department. The Navy Department, in common with the other great departments of the executive, must, of necessity, engage in extensive and diversified transactions with persons holding no office under, and having no official relation with the government. The mere detail of its operation must involve many transactions in the ordinary course of business with bankers, merchants, artisans, &c. It would be an impracticable and useless complication and burden to the government, if it were to have distinct officers for every operation of a department in every quarter of the world. To avoid which, for temporary purposes, to meet accidental wants of the service, and to prevent inconvenience and loss where no regular navy agent could be appointed, citizens, not as officers but as agents and factors, have occasionally, and from necessity, been employed to transact business of a commercial nature, for which they have received the ordinary compensation of agents and factors. So, also, have officers of the navy, and other public officers. These services were wholly apart from the proper duties of their official station; and for which they have received the ordinary compensation that might have been claimed by a private individual, over and above the stated pay and emoluments of their respective offices. And the various ramifications of the affairs of the Department into matters of mere business, regulated by the ordinary rules and course of business between merchants and their correspondents in like cases, have been sanctioned, not only by the necessity and convenience of such arrangements, but by long, unquestioned, and established usage. In some instances express agreements have been made as to the compensation which should be received. In others, the compensation has been left to be adjusted upon the well-known principles applicable to mercantile transactions. From these considerations, it is clear that the letter of the 24th of November, 1820, to Michael Hogan, created merely a contingent agency "in the event of the United States ships of war visiting Chili." It provided for no advance of funds for disbursements, but requested Mr. Hogan to furnish "such supplies as the service may require;" thereby evidently intending that such supplies should be advanced from his own funds, resources and credit. It assured him only that his "drafts upon this Department, in reimbursement, will be duly honored on presentation;" and it made no stipulation whatever in regard to compensation, either in quantum or mode. The Secretary manifestly contemplated, not an appointment to an office over which he had no power, but a mercantile agency merely. The true character of this agency became questionable, partly by lapse of time, and partly, perhaps, by misapprehension of the factor himself, of the naval officers on the station, and of succeeding heads of Department, who may not have been aware of nor examined into the original and true character of the appointment.

The commercial character of the agency being established, it follows that the accounts must be settled upon the ordinary principles of accounts between merchants and their correspondents, and such compensation as has not been regulated by agreement must be measured by usage. The first item of Mr. Hogan's claim is for the allowance of a commission of two and one-half per cent. upon drawing and negotiating, and upon endorsing and negotiating bills of exchange on the Department in reimbursement of supplies furnished by him, amounting to \$16,348.02. This claim is sustained by satisfactory evidence. 1st, that such is the usual rate of commission on such transactions at Valparaiso; that such rate of commission has been allowed and paid by the Navy Department to officers rendering such services during and within the time of Mr. Hogan's agency; and 2d, that the amount so claimed corresponds with the amount which is proven, by sundry reconciling statements received from the office of the Fourth Auditor, and in possession of the committee, to have been disallowed by the accounting officers as a charge of two and a half per cent. commission on bills so drawn, negotiated and endorsed, presented at the Department, and credited in the accounts current rendered by Mr. Hogan.

The second item of claim is for interest of moneys borrowed and advanced for supplies of the Constellation and other vessels, in 1821-2, being five months' interest, at six per cent., on \$20,254, amounting to \$763.10.

It appears that no public money was ever advanced to Mr. Hogan; that the vouchers for supplies furnished in 1821 and early part of 1822, to the Constellation, Franklin, and Dolphin, amounted to \$30,524.62; and that the bills drawn in reimbursement were not negotiated until some months afterwards, making an average delay of five months, or very nearly, as stated by the claimant, who alleges that such delay occurred in consequence of his very laudable determination to raise the value of bills on government. And it appears that such bills were, in fact, sold at a premium of five per cent., thus procuring a considerable gain for the government. It is also proven by the testimony of a disinterested witness, that a large part of the money, at least, was borrowed at interest; and Mr. Hogan's affidavit, corroborated by collateral testimony, proves other large portions of this amount to have been also borrowed. It further appears that the Secretary of the Navy had directed the allowance of interest proven to have been actually paid upon money borrowed, and that, in pursuance of such direction, the Fourth Auditor had passed to the credit of Mr. Hogan the sum of \$340.76, which was subsequently disallowed and stricken out by the Second Comptroller. The committee cannot understand the distinction between interest paid on money borrowed, and interest accruing on advances from the proper funds of the agent, or funds borrowed by him on his credit. The government had no right to the uncompensated use of his money; and they are clearly of opinion that he is entitled to interest on the moneys advanced by him, whether of his own or borrowed; and, consequently, that he should receive the whole sum claimed by him on this account, amounting to \$763.10.

The last item of claim now submitted to the action of Congress is for the allowance of \$3,142.28, being the damages, cost, charges, and interest, incurred by him on certain bills of exchange drawn on the Department in reimbursement, and not "duly honored on presentation." Conclusive evidence has been laid before the committee that such damages, &c., have been paid by the drawer, who is now the claimant; and with interest, at six per cent., till the 16th January last, to which date the account is stated, amount to the sum above set forth. The circumstances attending the dishonor of these bills are so fully detailed in the memorial of Mr. Hogan, that the committee will confine itself to the statement of its con-

clusions. The Department was under a written and express contract that his drafts "will be honored on presentation." This stipulation was positive and unconditional, and the bills in question ought to have been accepted and paid by force of the express contract. They ought, also, although it is a secondary reason, to have been accepted and paid, because they were properly drawn for reimbursement. And, lastly, they ought to have been accepted and paid, because, at the time of the refusal of such bills, the Department, according to its own mode of stating, and, subsequently, in part allowing his accounts, and exclusively of disputed and still unsettled items, was indebted to Mr. Hogan more than the amount of such bills; which is proven by the reconciling statements furnished by the Department.

The committee find the aggregate amount to which Mr. Hogan was justly entitled to be \$20,253.40. From which, however, must be deducted the sum of \$3,425, allowed by the Auditor for office rent, up to the 31st March, 1827, under the misapprehension that Mr. Hogan was a navy agent. And also, the further sum of \$2,799.33, claimed by the reconciliation of Mr. Hogan's accounts at the Fourth Auditor's Office, dated 11th July, 1832, to be a balance due the government. This balance has grown out of sundry bills after protest; of payments of other bills afterwards presented, and of disallowances. These deductions reduce the net amount due to Mr. Hogan, on the claims now before Congress, to the sum of fourteen thousand and twenty-nine dollars and seven cents. To this amount your committee consider him to have been justly and fully entitled; and, accordingly, report a bill for the relief of his legal representatives.

[1ST SESSION.]

STATEMENT OF THE ARMED VESSELS, THE NUMBER OF THEIR GUNS AND NAMES OF THEIR COMMANDERS, IN THE SERVICE OF THE UNITED STATES, AND OF THE SEVERAL STATES, DURING THE REVOLUTIONARY WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 13, 1834.

WAR DEPARTMENT, *May 10, 1834.*

SIR: In obedience to a resolution of the House of Representatives, of the 26th ultimo, I have the honor to transmit a report and statement of the commissioners of pensions, relating to the armed national ships employed during the revolutionary war, and the names of their commanders.

Very respectfully, your most obedient servant,

LEWIS CASS.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

WAR DEPARTMENT, *Pension Office, May 7, 1834.*

SIR: Conformably to your instructions, and in obedience to a resolution of the House of Representatives, of the 26th ultimo, requiring from this Department "a statement of the armed national ships, and the names of their commanders, during the revolutionary war," I have the honor to transmit, herewith, such a statement as I have been able to make from the books and papers in my possession. The principal part of the records and documents of the general government connected with the naval service during the revolution have long since been destroyed. I have, therefore, been obliged to resort to a variety of sources in order to obtain the information sought by the resolution. This statement, it is apprehended, is necessarily incomplete. The remarks in the last column will explain any difficulty which might arise from discovering several vessels of the same name. The description of the vessels is not so particular as is desirable; but the number of guns which each one mounted, and which in many cases is mentioned, sufficiently indicates the size of the vessels. By the words "national armed ships," I understand all the public armed vessels are included, whether they were under the immediate command of the Continental or the State authorities. The maritime forces of the individual States were principally employed in the defence of our coasts, bays, and harbors.

I have the honor to be, very respectfully, your obedient servant,

J. L. EDWARDS, *Commissioner of Pensions.*

HON. LEWIS CASS, *Secretary of War.*

A statement containing the names of the armed national ships, and the names of their commanders, during the revolutionary war.

No. 550.

[1st Session.]

PROPOSED RULES AND REGULATIONS FOR THE GOVERNMENT OF THE NAVAL ASYLUM
AND ASYLUM FOR THE NAVY PENSIONERS, NEAR PHILADELPHIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 15, 1834.

NAVY DEPARTMENT, *May 13, 1834.*

SIR: In addition to the report on the government of Navy hospital, made to Congress by the Department, on the 25th of May, 1812, and in pursuance of the fourth section of an act, passed on the 26th February, 1811, establishing navy hospitals, I have the honor to submit the accompanying rules and regulations, recently prepared, in regard to the Naval asylum near Philadelphia.

I have the honor to be, sir, very respectfully, your obedient servant,

LEVI WOODBURY.

HON. SPEAKER of the *House of Representatives*.*Regulations for the government of the Naval asylum, in addition to those reported to Congress on the 26th May, 1812, concerning navy hospitals.*

First. At least one commissioned officer, and two warrant officers, either sailingmasters or boatswains, gunners, carpenters, or sailmakers, shall reside at the asylum; and officers who may have been wounded in action, or who may have been, by accidental injuries sustained while in the service, rendered incapable of performing active duty, shall have a preference.

Second. The steward, porter, cooks, and other persons who may be employed, shall be selected from persons who have faithfully served in the navy, and a preference given to such as have been injured in the service, or have distinguished themselves by their good conduct.

Third. The females who may be employed as nurses, or for other purposes, in the asylum, shall be selected from meritorious widows of seamen who may have been killed, or died in the service.

Fourth. The surgeon of the asylum shall attend to the inmates of the institution, and to such patients as may be sent to it, by order of the Secretary of the Navy, as hospital patients only.

A part of the asylum to be appropriated as a hospital, for the present, and the same surgeon will officiate for the asylum and hospital connected with the navy yard.

Fifth. The commandant of the Navy yard at Philadelphia will have a general superintendence of the establishment at Philadelphia, and examine and approve all accounts, requisitions, &c., until some captain shall be appointed to the institution.

Sixth. The chaplain at the Philadelphia Navy yard shall officiate alternately, the half day of each sabbath, at the yard and the asylum.

Seventh. Applications for admission to the asylum must be forwarded to the Navy Department, with the opinion on them of the commandant of the yard nearest the residence of the applicant, and no admission will be granted until approved by the head of the Department.

Regulations for the asylum for navy pensioners.

First. Any person legally entitled to a navy pension, who may, at the same time, be so much injured, or so infirm, as to be unable to contribute materially, by his labor, to his own support, may be admitted into the asylum upon his relinquishing his pension for the benefit of the institution.

Second. Persons who shall have served faithfully in the navy not less than twenty years, and who shall be incapable of further service, from old age, or from infirmities which are not the effect of vice, intemperance, or other misconduct, may be admitted into the asylum.

Third. Persons who may have served faithfully for a shorter period than twenty years, and who shall be incapable of further service, as provided in the preceding article, and who shall have claims upon

the country, in consequence of distinguished gallantry in action, or other highly meritorious conduct in the public naval service, may also be admitted.

Fourth. Desertion from the navy, or conviction by a court-martial of any mutinous or disgraceful conduct, shall operate as a disqualification for admission.

Fifth. Every pensioner admitted into the asylum must be subject to the rules established for its government, and liable to be dismissed on committing any offence against its discipline, which, in the opinion of the superintendent, indicates an incorrigible and insubordinate spirit, or permanent habits of vice; and which, being reported to the Navy Department, is believed, by the head of it, to render the pensioner not worthy any longer of enjoying its privileges.

Sixth. The asylum and hospital buildings and their inmates shall be under the general government of the officers placed over them; and all be subject to the laws and rules for the government of the naval service at the different navy yards, and such other rules as may be, from time to time, prepared and published for the asylum and hospital.

Seventh. Suitable clothing will be furnished to the inmates of the asylum yearly, and a ration, similar to that now used in the naval service, omitting spirits, and substituting for it tea, tobacco, and pickles.

Eighth. The inmates of the asylum are to labor as much as they are able, in taking care of the establishment, its grounds, and gardens.

23D CONGRESS.]

No. 551.

[1ST SESSION.]

A PLAN FOR EQUALIZING THE PAY AND EMOLUMENTS OF THE OFFICERS OF THE ARMY AND NAVY, AND PROVIDING FOR AN INCREASE OF THE PAY OF THE LATTER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 17, 1834.

Mr. WATMOUGH, from the select committee appointed on the 27th of December last to inquire into the expediency of equalizing the pay of the officers of the army and navy of the United States, and to which the bill to equalize and regulate the pay of the officers of the army and navy of the United States had been recommitted, reported:

Your committee have been actuated by a sincere desire to place the navy on that footing of comfort and respectability, in point of pay, which the importance of the service, and the high duties and responsibilities it involves, demand at the hands of Congress. A majority of them, however, were impressed with the idea that the amount to be thus annually and necessarily drawn from the Treasury, beyond what is at present required, might be compensated by such reduction in the extra allowances and emoluments of the army as could be made without injustice to that branch of the public service. With this view, and after the most mature and anxious investigation, your committee reported the bill No. 334, to equalize the pay of the officers of the army and navy of the United States.

By a reference to the official document from the Department of War, hereto annexed, it will at once be seen that this effort at economy without injustice, like the former made by the honorable Secretaries of the War and Navy Departments, has failed to effect its object, and that the bill reported, far from reducing, has actually increased the already ample pay of the army by an annual amount of upwards of *seventy thousand dollars*.

By a reference to the comparative statement annexed, marked B, made by the Navy Department, it will be found that the whole increase of navy pay proposed only amounts to the sum of \$116,053.25 annually, a sum comparatively insignificant, when the value and importance of the service to the security and independence of the country, with all its vast relations, are taken into view.

All the circumstances of the case, therefore, considered, the committee unanimously concur in the opinion that the principle of equalization, as heretofore sought to be established between the two services, is *inexpedient and impracticable*, and that the *equality desired* should be effected by a reference solely to the pay of the navy, admitted on all hands to be entirely inadequate, rather than by deranging the organization or affecting the harmony or existing efficiency of the army of the United States. They have been brought to this conclusion by the whole course of the evidence developed in the prosecution of the object proposed.

A majority of them placed implicit reliance in the soundness of the principles assumed in the bill lately reported. Yet, when analyzed, these principles are found to fail, and results, altogether different from those contemplated, are produced.

It might, likewise, have been well supposed that, from their complete knowledge of the whole subject, and means of information within their power, the honorable Secretaries of the War and Navy Departments could most readily have produced a plan of equalization likely to prove entirely satisfactory. It is fairly to be presumed that each set himself to work with a determination to do what was best for the general interests, and, at the same time, guard, as far as could be, the interest each had in charge. And what was the result in their case? A plan that pleased no one—that, while it unsettled all previous legislation, established no just principle for the future. It is true they in part relieved the pressing necessities of the naval, but did they not, at the same time, inflict injustice on the land service? This, it is believed, will not be denied.

It is to be presumed that Congress passed the several acts increasing the pay and emoluments of the army with due care and deliberation, and it must be admitted that the officers of the army were justly entitled to view the proceedings of the legislature in their favor as the settled policy of the country towards them; that policy upon which they might depend, and that to which, so long as they faithfully and honestly and patriotically performed the duties of their several stations, they might look as to the source of their own maintenance, and as to the assured means of comfort and subsistence to their families.

As to the expediency of the measure proposed, your committee cannot do better than refer the House, which they respectfully do, to the annexed communication, marked No. 6, made to the Secretary of War,

in relation to this very subject, by the present paymaster general of the army, known as one of the most experienced and distinguished officers of this or any country.

This communication embraces every topic involved in the consideration of army pay and emoluments, and is believed to be conclusive, in all respects, against the principle of annual compensation in lieu of pay and allowances, as at present established.

The justice, therefore, of any sudden change in relation to them may well be questioned. The injustice and inexpediency of such change being therefore established, the effect cannot be other than seriously detrimental. Indeed, such instability in legislation, of late much too prevalent, is certainly to be deprecated. An act of justice to-day too frequently gives place to an act of caprice on the morrow; local jealousies and local expediency too often usurp the place of general interest; and your statute book becomes encumbered with various conflicting laws, each requiring separate explanatory acts, and all tending to create and fix more firmly in the public mind the fatal passion of all others best calculated to diminish the degree of confidence in our free and happy institutions essential to their preservation, and which it is especially the duty of Congress to foster, and eventually to derange the healthful action of the government, if not entirely subvert it.

Your committee, therefore, on due deliberation, and for the reasons above stated, ask leave respectfully to submit *the accompanying bill, regulating the pay of the navy of the United States, by way of amendment, and in substitution of the one already reported.*

The bill now substituted varies not greatly in amount, although necessarily in many of its principles, from the one lately reported.

The amendment proposes an increased compensation to the senior officer of the navy. It is certainly true, as stated in the former report, that, by the law, all captains over fifteen years' standing rank with the highest grade acknowledged in the army, that of major general. So far, therefore, as this goes, there is a perfect equality among the captains over fifteen years' standing. It is not the less true, however, that by the terms of the act approved 25th February, 1799, it is expressly stated in the third section, "That, whenever any officer, as aforesaid, shall be employed in the command of a squadron, on separate service, the allowance of rations to such commanding officer shall be doubled during the continuance of such command, and no longer, *except in the case of the commanding officer of the navy, whose allowance, while in service, shall always be at the rate of sixteen rations per day.*" The increased compensation, therefore, to the senior officer, is in lieu of the double rations originally allowed him by law, and is believed to be due him on every principle as well of justice as of law. Abrogate the principles contained in the act above quoted, and the pecuniary loss is the smallest injury inflicted. You degrade the point of honor by assailing the pride of rank; you wound the veteran by lowering him in the estimation of his peers; and you commit a flagrant act of injustice by repealing that which the law originally allowed, and which the rules and regulations have since constantly confirmed.

On the general principle laid down in the previous report of the committee, no distinction is drawn between the pay of any of the captains when in command of squadrons. Your committee think it due to the acknowledged merits and long-trying services of the commanders in the navy, and to the high responsibilities their duties involve, deemed but little inferior to those of post captains, to place their compensation, *at present utterly inadequate*, on a footing bearing something like a proportion to *their merits, their services, and their responsibilities.*

The principle of graduating the pay according to the length of service, assumed in the former bill, is carried out somewhat further in the present. It is believed to be just in itself, and is intended to operate as an additional inducement to the honorable and deserving to continue in a service in which promotion is necessarily slow, and, indeed, in many cases, protracted even beyond all hope.

Your committee ask leave again to repeat their deep convictions of the importance of securing to the service the requisite talents and qualifications for its medical department. The pay of the surgeons is believed to be too low. It must be borne in mind that they are put to great expense, not only of money, but of time, and often of health, in qualifying themselves for the duties of their stations; that these duties are frequently of a nature to require the exertion of the highest faculties of the mind, and of the most exalted order of courage, because quietly exercised amidst disease and death, and unsustained by the brilliancy of military exploit, or the not less powerful incentive of military promotion. The rates proposed by the amendment, it is believed, are founded in justice and sound policy: justice towards the veteran who has passed with honor through all the toils and dangers of the service with comparatively inadequate compensation, and sound policy towards the ardent and gifted youth, to whom the certain prospect of emolument, as well as honor, is now opened.

It has not been deemed expedient to change the present system of supplies in the service. The pursers, therefore, are not included in the bill. Your committee take this opportunity to state their convictions that the government does not possess a more estimable, honorable, or deserving set of officers. Your committee have searched in vain for a single case of delinquency. Their duties are infinitely arduous and responsible, combining all that is performed by the four several and important grades of paymaster, quartermaster, commissary, and sutler in the army of the United States. To suppose them fraudulent, is to suppose the fact of collusion between them and their superior officers; an idea altogether inadmissible. Indeed, it has never been pretended that they are either faithless in the performance of their duties, or dilatory in the settlement of their accounts; and if, in some instances, it may be charged to them that they are exorbitant in some of their demands, it must not be forgotten that the risks they incur far transcend anything likely to arise in the ordinary business transactions of life, while the indispensable luxuries they afford the seaman more than compensate him for the price exacted.

On the whole, the system, as it at present exists, is believed to be a good one. Our seamen are well supplied, and the government is not only free from all risks, but it is absolutely secured from loss by bonds given, in all cases, in a penalty of *twenty-five thousand dollars.*

In conclusion, your committee beg leave generally to remark, that the subject of regulating the pay of officers in the navy cannot be adequately treated without taking into consideration their peculiar liability to expenses that are, in some sense, of a public nature, and to which they are compelled to attend by their duty to the nation.

Whether they are attached to a naval station on shore, or are temporarily in a foreign port, the occasions of expense from these causes are constantly recurring. The public ships of other nations, with whom we are in amity and who desire to cultivate it, are frequently in their neighborhood.

Members of the same profession, in foreign services as well as in our own, and individuals of our

own and foreign countries, moving in the concerns of trade and navigation through the world, are often brought in contact with them. In turn, the obligations of at least a decent hospitality fall upon most of them, and extend to every grade.

They cannot escape from the duty, whatever be the state of their personal means, without personal discredit, and without discredit to the service.

An officer of the United States navy, in the port or place where he is stationed, is considered as bound, by the very duty of his commission, to offer some civilities to those of the same profession who may be visiting in the place.

In a foreign port, he is an object of particular resort by his countrymen and others; he must do, at least in an humble way, something to show his consideration for them.

The reputation of the navy and of the country, independently of personal motives, imposes this tax upon him. It is not merely a matter of choice for him to pay it; it concerns the honor of the service. It is paid more or less by all who belong to it. Public opinion, and the established usages of the world, require it from them; and although the duty is generally performed with simplicity and all requisite economy, yet it cannot be performed at all without some expense; and in most instances, from the numbers whom naval and maritime concerns and curiosities bring before them, the expense is altogether beyond the compensation at present allowed them.

A scale of compensation, which does not take these expenses into consideration, but leaves to the officers no alternative but that of impoverishing themselves, or bringing discredit upon the country, is not one that will promote the reputation and efficiency of the navy; nor does it do justice to its past services and achievements.

Your committee, therefore, respectfully submit the present bill, founded on a principle of common justice and equal right, to the most popular branch of the public service. And as they feel confident it will so be viewed by the people at large, they humbly trust it will meet the approbation of the people's representatives.

In this hope, they connect with it a clause for the creation of a fund for the widows and orphans, and relatives of such officers as may die in the service. In reference to this, it is only necessary to say that it meets with the general approbation of the service.

AMENDMENT.

A BILL to regulate the pay of the navy of the United States.

Be it enacted, by the Senate and House of Representatives of the United States of America, in general Congress assembled, That from and after the passage of this act, the annual pay of the officers of the navy of the United States shall be as follows:

The senior captain, when commanding a squadron, five thousand five hundred dollars; when on other duty, five thousand dollars; when on leave of absence, or waiting orders, three thousand five hundred dollars.

All other captains, when commanding squadrons, five thousand five hundred dollars; when acting as Navy Commissioners, four thousand five hundred dollars; when of five years' standing, and commanding vessels for sea service, or navy yards, or acting as captain of a fleet, four thousand dollars; when on other duty, three thousand five hundred dollars; when on leave of absence, or waiting orders, two thousand five hundred dollars; when under five years, and commanding vessels for sea service or navy yards, or acting as captain of a fleet, three thousand six hundred dollars; when on other duty, three thousand dollars; when on leave of absence, or waiting orders, two thousand five hundred dollars.

Commanders, or masters commandant, when attached to vessels for sea service, two thousand five hundred dollars; when attached to navy yards, or on other duty, two thousand one hundred dollars; when on leave of absence, or waiting orders, one thousand eight hundred dollars.

Lieutenants, Under ten years, when on leave of absence, or waiting orders, one thousand dollars; when on duty on board ship, for sea service, one thousand two hundred dollars; when on other duty, one thousand one hundred dollars; over ten years, when on leave of absence, or waiting orders, one thousand two hundred dollars; when on duty on board ship, for sea service, one thousand four hundred dollars; when on other duty, one thousand three hundred dollars; when commanding, and to flag lieutenants, one thousand seven hundred dollars.

Assistant surgeon, for the first five years after the date of his commission, five hundred and fifty dollars; over five years and under ten, seven hundred and fifty dollars; of ten years and upwards, eight hundred and fifty dollars, provided he has been examined and approved by a board of naval surgeons as competent to perform the duties of a surgeon, otherwise his pay shall continue at seven hundred and fifty dollars.

Surgeon, for the first five years after the date of his commission, one thousand dollars; for the second five years, one thousand two hundred dollars; for the third five years, one thousand four hundred dollars; for the fourth five years, one thousand six hundred dollars; after he shall have been commissioned as a surgeon twenty years, and upwards, one thousand eight hundred dollars; all medical officers of the navy under orders for duty, at navy yards, receiving vessels, rendezvous, or naval hospitals, shall have an increase of one-fourth of the foregoing amount of their respective annual pay from the date of their acceptance of such orders; all medical officers of the navy ordered to any of the ships or vessels of the United States, commissioned for sea service, shall have an increase of one-third of the foregoing amount of their respective annual pay, from the date of their acceptance of such orders; all surgeons of the navy, ordered as fleet surgeons, shall have an increase of one-half of their respective annual pay, from the date of their acceptance of such orders; and when appointed to perform the duties of surgeon general, his pay shall be increased three-fourths.

Chaplains, when attached to vessels for sea service, one thousand two hundred dollars; when attached to navy yards, eight hundred dollars; when on leave of absence, or waiting orders, six hundred and fifty dollars.

Professor of mathematics, when attached to vessels for sea service, or when at sea, or in a yard, one thousand two hundred dollars.

Secretaries to commanders of squadrons, when commanding-in-chief, one thousand dollars; to commanders of squadrons, when not commanding-in-chief, nine hundred dollars.

Sailingmasters, of a ship of the line, when attached to vessels for sea service, one thousand one hundred dollars; of all other sailingmasters, attached to vessels for sea service, or at navy yards, one thousand dollars; when on leave of absence, or waiting orders, seven hundred and fifty dollars.

Second masters, when attached to vessels for sea service, seven hundred and fifty dollars; when on other duty, five hundred dollars; when on leave of absence, or waiting orders, four hundred dollars.

Passed midshipmen, when attached to vessels for sea service, six hundred dollars; when on other duty, five hundred dollars; when on leave of absence, or waiting orders, four hundred dollars.

Warranted masters' mates, when attached to vessels for sea service, or at navy yards, four hundred and fifty dollars; when on leave of absence, or waiting orders, three hundred dollars.

Midshipmen, when attached to vessels for sea service, four hundred dollars; when at shore stations, and on other duty, three hundred and fifty dollars; when on leave of absence, or waiting orders, three hundred dollars.

Clerks, of a yard, nine hundred dollars; first clerk to a commandant, nine hundred dollars; second clerk to a commandant, seven hundred and fifty dollars; to commanders of squadrons, captains of fleets, and commanders of vessels, five hundred dollars.

Boatswains, gunners, sailmakers, and carpenters, of a ship of the line, seven hundred and fifty dollars; of a frigate, six hundred dollars; of a sloop, brig, or schooner, or while acting on shore, five hundred dollars; when on leave of absence, or waiting orders, three hundred and sixty dollars; officers temporarily performing duties belonging to those of a higher grade, shall receive the compensation allowed to such higher grade, while actually so employed; no officer shall be put on furlough but at his own request, and all officers so furloughed shall receive two-thirds only of the pay to which they would have been entitled if on leave of absence; one ration per day, only, shall be allowed to all officers when attached to vessels for sea service; the compensation hereinbefore specified shall be in full for pay and subsistence, and for all allowances whatever, including cabin allowance, to commanders of vessels; and for all allowances to officers attached to yards, or employed on any other shore duty, except for travel, under orders, for which sixteen cents per mile shall be allowed, detention, or employment on special service, chamber money, or house rent on shore stations where quarters or public accommodations be not provided. And all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

SEC. 2. *And be it further enacted*, That the Secretary of the Treasury shall be, and he is hereby, authorized and directed to deduct, from the pay hereafter to become due of the commission and warrant officers of the navy of the United States, three per centum of the amount thereof, and to pay the same to the Secretary of the Navy and the Navy Commissioners for the time being; who are hereby appointed a board of commissioners by the name and style of "commissioners of the navy widows and orphans' fund;" which, together with any other moneys to which the fund may become legally entitled, shall constitute a fund for the relief of the widows, children, and relatives of the said commission and warrant officers of the navy of the United States, to be invested by said board, and the proceeds of it divided and disbursed in such manner as may be hereafter prescribed by Congress.

SEC. 3. *And be it further enacted*, That from and after the passage of this act, it shall be the duty of every medical officer of the United States navy to provide himself with all such instruments as are necessary in his profession, and that the sum of _____ dollars be, and the same is hereby, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be applied, on an estimate to be furnished under the direction of the Secretary of the Navy, to the object specified in this act.

WAR DEPARTMENT, March 25, 1834.

SIR: I have the honor to transmit you, herewith, reports from the quartermaster general and paymaster general, which contain the information asked for by your letter of the 5th instant.

Very respectfully, your most obedient servant,

LEW. CASS.

HON. JOHN G. WATMOUGH, *Chairman Select Committee, House of Representatives.*

Comparative statement of pay and emoluments received through the pay department, by officers of the army, with the compensation proposed in the bill reported by a select committee of the House of Representatives, February 28, 1834.

No. of each grade.	Rank.	Present pay and emoluments per annum.	Proposed compensation per annum.	Remarks.
1	Major general.....	\$4,867	\$5,000	
2	Aids-de-camp.....	1,106	300	
2	Brigadier generals.....	6,258	8,000	
2	Aids-de-camp.....	718	240	
1	Adjutant general.....	2,348	3,000	
2	Inspectors general.....	4,696	3,000	
1	Quartermaster general.....	3,129	4,000	
3	Quartermasters.....	5,238	6,000	If assimilated to rank of major commanding post.
1	Quartermaster, in addition to pay as captain over ten years.....	799	600	
20	Assistant Quartermasters, in addition to pay..	7,618	2,400	Six captains, fourteen lieutenants.
2	Military storekeepers, quartermaster's department.....	1,894	2,400	Over 10 years in service; present pay, &c., that of captain of infantry not on duty.
1	Commissary general of purchases.....	3,000	3,000	
2	Military storekeepers, commissary's department	1,894	2,200	Under 10 years' service; present pay, &c., that of captain of infantry.
1	Paymaster general.....	2,500	2,500	
14	Paymasters.....	21,420	28,000	If assimilated to rank of major commanding post.
1	Commissary general of subsistence.....	2,252	3,000	
1	Commissary, per act 2d March, 1829.....	1,746	2,000	If assimilated to rank of major commanding military post.
1	Assistant commissary.....	432	120	
50	Assistant commissaries of subsistence, in addition to pay.....	8,350	6,000	Lieutenants.
1	Surgeon general.....	2,500	2,500	
12	Surgeons, 4 over 15 years, 8 under 10 years..	13,512	6,400	
			9,600	
55	Assistant surgeons.....	54,615	49,500	
1	Colonel, chief engineer.....	2,072	3,000	
1	Lieutenant colonel of engineers.....	1,723	2,500	
2	Majors.....	3,060	4,000	
1	Adjutant, in addition to pay as lieutenant....	239	239	Not provided for by the bill; the present amount assumed as the intended compensation.
1	Paymaster.....	776	1,173	If assimilated to rank of major commanding post.
6	Topographical engineers.....	10,476	12,000	If assimilated to rank of major commanding post.
4	Assistant topographical engineers, captains under 10 years.....	3,788	4,800	If assimilated to rank of captains commanding companies.
6	Captains of engineers, one over 10 years.....	5,682	7,400	If assimilated to rank of captains commanding companies.
6	First lieutenants of engineers.....	4,962	6,600	
6	Second lieutenants of engineers.....	4,602	5,400	
1	Professor of natural and experimental philosophy.....	1,723	2,500	If assimilated to rank of lieutenant colonel commanding post.
1	Assistant professor of natural and experimental philosophy, in addition to pay as lieutenant	180	180	Not provided for by the bill; the present amount assumed as the intended compensation.
1	Professor of mathematics.....	1,530	2,000	If assimilated to rank of major commanding military post.
1	Assistant professor of mathematics, in addition to pay as lieutenant.....	180	180	Not provided for by the bill, &c.
1	Professor of engineering.....	1,530	2,000	If assimilated to rank of major commanding post.
1	Assistant professor of engineering, in addition to pay as lieutenant.....	180	180	Not provided for by the bill, &c.
1	Chaplain and professor of ethics.....	1,530	2,000	If assimilated to rank of major commanding post.
1	Professor of chemistry, in addition to pay as assistant surgeon.....	120	120	Not provided for by the bill, &c.
2	Teachers of French.....	1,894	2,300	One over ten years' service; present pay, &c., that of captain of infantry.
1	Teacher of drawing.....	947	1,100	Under ten years' service; present pay, &c., that of captain of infantry.
1	Master of the sword.....	706	706	Not provided for by the bill, &c.
250	Cadets.....	84,500	75,000	
28	Cadets, acting assistant professors, in addition to pay.....	960	960	Not provided for by the bill, &c.
1	Colonel of ordnance.....	2,072	3,000	
1	Lieutenant colonel of ordnance.....	1,723	2,500	
2	Majors of ordnance.....	3,060	4,000	
10	Captains of ordnance.....	9,470	12,000	

Comparative statement—Continued.

No. of each grade.	Rank.	Present pay and emoluments per annum.	Proposed compensation per annum.	Remarks.
6	Military storekeepers of ordnance	\$5,682	\$6,800	Two over ten years; present pay, &c., that of captain of infantry.
1	Colonel of dragoons.....	2,396	2,000	
1	Lieutenant colonel of dragoons.....	2,047	2,500	
1	Major of dragoons.....	1,794	2,000	
1	Adjutant of dragoons.....	1,130	1,130	Not provided for by the bill, &c.
10	Captains of dragoons, commanding companies.	14,890	12,000	
10	First lieutenants of dragoons.....	10,830	11,000	
10	Second lieutenants of dragoons.....	10,830	9,000	
4	Colonels of artillery.....	8,288	12,000	
4	Lieutenant colonels of artillery.....	6,892	10,000	
4	Majors of artillery.....	6,120	8,000	
4	Adjutants of artillery, in addition as lieutenants	956	956	Not provided for by the bill, &c.
36	Captains of artillery.....	38,412	47,000	Commanding companies; nineteen over ten years' service.
72	First lieutenants of artillery.....	59,544	79,200	
72	Second lieutenants of artillery.....	55,224	64,800	
7	Colonels of infantry.....	14,504	21,000	
7	Lieutenant colonels of infantry.....	12,061	17,500	
7	Majors of infantry.....	10,710	14,000	
7	Adjutants of infantry, in addition as lieutenants	1,673	1,673	Not provided for by the bill, &c.
70	Captains of infantry.....	74,690	89,400	Commanding companies; twenty-seven over ten years.
70	First lieutenants of infantry.....	57,890	77,000	
70	Second lieutenants of infantry.....	53,690	63,000	
106	Brevet second lieutenants.....	81,302	74,200	Attached to the several corps of the army.
	Amount estimated for brevet pay per annum..	17,140	17,140	
	Amount estimated for double rations.....	31,732		
		\$881,104	\$951,897	Increased by compensation bill, \$70,793.

The first column in the above table is a full estimate of the pay and all allowances that officers are now entitled to receive through the pay department. Whenever an officer receives more than the *positive* allowances of his lineal rank, it is on account of his *brevet* rank, or of having a command entitled to additional rations. The items under those heads, at the foot of the first column, show the whole amount of brevet allowances, and double rations of the army in the year 1832, (the accounts of which are complete,) and is the amount estimated for those items for the year 1834.

The second column contains an estimate of the full pay of all officers as proposed by the new bill, if I am correct as to the rates intended for "assimilated rank," and for cases not provided for in the bill; each doubtful case is noted in the column of remarks, and, if not as was intended by the committee, can easily be corrected.

Under the laws now in force, officers receive certain allowances, or not, according to the circumstances, viz: *Pay, &c., for servants*, only when employed; *forage*, only when the horses are kept in service; *double rations*, only when holding certain commands, and performing certain duties; *brevet pay, &c.*, only when commanding according to the rank. By the proposed bill, different amounts are to be received, according to the duty or service performed. It is difficult to say which would cause the greatest deductions from the full compensation as stated above.

PAYMASTER GENERAL'S OFFICE, March 18, 1834.

N. TOWSON, P. M. G.

Statement "of the whole amount of compensation and allowance" received through the pay department "by the chiefs of the Engineer and Ordnance departments, and by the inspectors general of the army, for the year 1833."

Colonel and Brevet Brigadier General C. Gratiot, chief engineer.....	\$2,072 00	
Same. Brevet pay and emoluments, and double rations.....	1,926 88	
		\$3,998 88
Colonel George Bomford, chief of the ordnance.....	\$2,067 92	
Same. Double rations.....	438 00	
		2,505 92
Colonel and Brevet Brigadier General J. E. Wood, inspector general.....	\$2,378 60	
Same. Double rations.....	343 20	
		2,721 80
Colonel George Croghan, inspector general.....	\$2,381 61	
Same. Double rations.....	343 20	
		2,724 81

PAYMASTER GENERAL'S OFFICE, March 18, 1834.

N. TOWSON, P. M. G.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, March 22, 1834.*

SIR: In obedience to your order, I have examined the bill to regulate the pay of the officers of the army and navy; and, comparing the allowances which it authorizes with those now furnished or paid through this department, I find the following to be the result, viz:

Estimated saving.

In fuel for officers, including their servants.....	\$35,000
In rents for officers.....	7,124
In per diem for service on courts-martial.....	4,500
In per diem to officers on topographical duty.....	3,867
In per diem to officers superintending working parties.....	1,190
In per diem to officers on bureau duty.....	6,387
In forage, in kind, issued to officers, about.....	2,000
<hr/>	
Making a total of.....	\$60,068
From which should be deducted the probable increase of the transportation of officers authorized by the bill.....	29,249
<hr/>	
Making the actual probable reduction through this department.....	<u>\$30,819</u>

In estimating the increase of the allowance for transportation, I have taken the actual expenditure of the year terminating with the 30th of September, 1833, as the standard. The amount expended during that year, without including anything for the dragoons, amounted to \$59,184. The organic laws authorize 705 officers to the army, 456 of whom are allowed, when traveling on duty without troops, ten cents per mile, and 249 twelve cents per mile; the bill referred to allows sixteen cents per mile to all. Hence, it will be seen that $456 \times 10 + 249 \times 12 : \$59,184 :: 705 \times 16 : \$88,433$, making the difference stated above.

I have made no deduction for stationery or postage, because I take it for granted that officers of the army will be considered as much entitled to the stationery required in the discharge of their public duties, and to the postage paid on public letters, as members of Congress, or any other civil officers.

Paper marked A, exhibits the sums paid to the chief engineer, the chief of ordnance, and the inspectors general, through this department, in 1833, for fuel and quarters, and for transportation of baggage. A portion of the amount paid to the senior inspector general was for claims which accrued in 1832.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

The Hon. LEWIS CASS, *Secretary of War, Washington.*

A.

Payments for fuel and quarters, and for transportation of baggage, or traveling allowance, in the year 1833, to the chief engineer, the chief of the ordnance, and the inspectors general.

To General Charles Gratiot, chief engineer:

Quarters and fuel, from 1st January to 31st December.....	\$537 75
Transportation of baggage, or traveling allowance.....	368 20
<hr/>	
	<u>\$905 95</u>

To Colonel George Bomford, chief of ordnance:

Quarters and fuel, from 1st January to 31st December.....	\$529 50
<hr/>	

To Brevet Brigadier General J. E. Wood, inspector general:

Quarters and fuel, from 1st June, 1832, to 30th November, 1833.....	\$852 50
Transportation of baggage, or traveling allowance, including his transportation when traveling in Europe in 1832, reimbursed since his return in 1833.....	1,658 00
<hr/>	
	<u>\$2,510 50</u>

To Colonel George Croghan, inspector general:

Quarters and fuel, from 1st January to 31st December.....	\$529 50
Transportation of baggage or traveling allowance.....	546 36
<hr/>	
	<u>\$1,075 86</u>

No. 6.

Extract from a report made by the paymaster general to the Secretary of War, dated—

APRIL, 3, 1826.

To judge of the expediency of changing the present mode of compensating officers of the army, it will be proper to examine the several items of allowance; to inquire the reasons why they were so made; and the probable effect that would be produced by substituting a fixed sum of money in lieu.

1. *Pay and subsistence.*

The allowances under this head may be considered similar to the salary of civil officers, and on a slight view it would seem that no inconvenience would result to the government, or officer, from substituting a fixed sum of money for the subsistence part, which is so definite and unvarying; but a little reflection will show that the reasons for including rations in the allowance are cogent.

It frequently happens that troops serve, both in peace and war, in unsettled or exhausted countries, where provisions cannot be procured, or where the prices would exceed the officer's means of purchase; it is therefore indispensable that the government provide food for the officer as well as for the private, and it is accordingly stipulated to be done. The price of the ration is fixed, in order that the compensation may be equal wherever drawn. The option to draw in kind, or to commute, is granted to the officer, that the compensation for his services may be as entirely within his control as the salaries of civil officers are within theirs. It is evident that it would be embarrassing to the service, as well as to officers, to deprive them of the privilege of drawing rations in kind, in many situations; they must, therefore, be furnished as at present, or sold to the officer by the subsistence department, which amounts to the same thing.

2. *Servants.*

This allowance is contingent, and cannot be granted unless the servants are actually employed. If it were intended solely as an emolument, as is frequently supposed, it would be of no importance to the government, and for the interest of the officer, that it should be granted without the condition of employment; but this is not the case; the good of the service, as well as the convenience of officers, requiring that the expense of employing servants should be incurred. It would not do for officers on a march, near an enemy, or in many other situations, to neglect their proper and important duties to look after their baggage, take care of their horses, or to cook their provisions. The compensation for servants is made under the heads of pay, subsistence, and clothing; the two last are included for the same reason that subsistence forms a part of the compensation for services, namely, that they may be obtained in all situations, and at a reasonable price; they may, therefore, be drawn in kind, or commuted, as officers shall elect. The effect of granting a fixed sum, in lieu of this allowance, would be to hold out an inducement to dispense with the employment of waiters, which, it has been shown, would be injurious to the service. It is true, servants are frequently a convenience to officers, independent of their public duties; but this is incidental; the true reason for allowing them is that the interest of the government is promoted by employing waiters, instead of officers, to perform menial duties.

3. *Forage.*

Forage is only granted to officers whose particular duties require them to be mounted, which involves an expense that it is reasonable should be borne by the government. The number of horses for which forage can be claimed is determined by the rank of the officer. The allowance is contingent, and can only be charged when the horses are actually kept, consequently there can be no inducement to keep a greater or less number than the duties of office require. If not furnished by the government, it would be frequently impossible for officers to obtain it. Another reason why it should be, is the difference in the price of the article at different places. An officer, traveling through the Creek nation, was compelled to pay four dollars per bushel for corn, at a time when it could have been purchased in Ohio or Kentucky for twenty-five cents. It is therefore evident that the same amount allowed for forage at different places would be unequal in its value.

4. *Additional or double rations.*

These are granted to commandants of military departments, posts, and arsenals, engineer officers superintending the construction of fortifications, and to particular heads of the staff at this place, on the ground that the duties and station of such officers unavoidably subject them to a greater intercourse with military men and persons on public business, and, consequently, to greater expense than officers who are not so situated. The reason for making this allowance under the head of rations, is to enable officers to draw a greater quantity of provisions from the subsistence department than they are authorized to do when not subject to the expense of entertaining official visitors. When the difficulty of procuring provisions does not exist, the rations are commuted at twenty cents each, which amounts to the same as allowing a specific sum. The option to commute is with the officer. The allowance is not considered an emolument, but the reimbursement of an expense imposed on the officer by his particular situation and duty. It is contingent, being governed by command and locality.

5. *Fuel.*

This article is always furnished in kind, except at this place. It is supplied by the Government, because it would frequently be difficult for officers to obtain it in any other way, and because the price varies very materially at different posts, which would produce inequality in the compensation of officers of the same rank. The allowance is not intended to be greater than is necessary for current consumption; therefore, if not drawn monthly, it reverts to the government. It is unnecessary to add, that this object would be defeated by substituting a fixed sum in lieu.

6. *Quarters.*

It would often be impossible, and always inconvenient, for officers to procure lodgings when serving either in fortifications, cantonments, or camps, and, if they could, it would be prejudicial to the service to separate them from their commands. Quarters and tents are therefore provided by the government for officers as well as privates. They are always furnished by the Quartermaster's department in kind, except at this place, where it is mutually the interest of the government and officer to commute them. Many restrictions are imposed on this allowance. (See article on the Quartermaster's department, No. 69, "army regulations.")

There is no allowance, perhaps, which would be so unequal in its value, to officers differently located, as a fixed sum in lieu of quarters, unless a charge is raised against those who occupy public buildings. For instance, it would make the entire difference of the sum allowed, between officers of the same rank stationed at Greenleaf's Point and in this city. A fixed sum in money, in lieu of the present allowance, would be much more expensive to the government, unless rent be charged for public quarters.

7. Stationery.

This is furnished by the government in kind, because it cannot, at frontier posts, and in time of war, be procured by officers in any other way. The allowance is very limited, and, so far from being an emolument, is, in most cases, not equal to the actual consumption on public business. The allowance of a fixed sum in lieu would, in all cases where a supply of the article was precarious, produce great embarrassment to officers, and to the service generally.

8. Transportation.

This is so entirely contingent as to make it impossible to fix a given sum as an equivalent. All that can be done is, to regulate the allowance according to the rank of the officer, and to fix the rate per mile, which is now the case. In many instances, the means of transportation must be furnished by government, from necessity; in others, it is its interest to do so. The option, therefore, of furnishing it in kind is reserved to the government. The allowance is very strictly guarded. (See article No. 69, "army regulations.")

The foregoing embrace all regular allowances authorized by law or regulations, and from these it will be seen that pay and subsistence, proper, include everything given in lieu of salary, and in payment for services; all other allowances are contingent, and granted to cover expenditures which the duty of officers and the interest of the government require should be made. Those allowances frequently add to the officers' convenience; but this, as I have before observed, is incidental, and not the object for which they are made. Hence the conditions that officers must keep the servants and horses, command double ration posts, receive fuel as it is used, occupy the quarters, travel the distance stated in their transportation accounts, and draw the stationery in kind, to entitle them to the allowances under the several heads. In many cases they are not even a convenience; and then, if the good of the service does not require it, the expense is not incurred.

The government has a security in the high sense of honor of military men that those contingent allowances will not be abused; and if this were not so, the fact that an officer places himself at the mercy of his enemies, and that his commission would be the price of an improper certificate, is a sufficient guaranty.

Our laws and regulations, which relate to pay and allowances, were formed with a thorough knowledge of the usages in other services; and in whatever particulars they may differ, I am persuaded a sufficient reason will be found, either in local circumstances or in advantage to the service, to justify the change.

There is no service in which the pay proper includes all allowances. In time of war it would be impossible for the operations of an army to be carried on, even in Europe, where all supplies can be more readily provided than in this country, if the government did not furnish its officers with such as are indispensable. In this country, the impossibility of procuring them exists in time of peace as well as war; it follows, therefore, that certain allowances must be made in kind, in numerous cases at all times. The practice, both in the French and British service, is to grant the allowances as permanent emoluments, and to furnish the article in kind, whenever it is necessary for the good of the service. We have preferred to make allowances, not as emoluments but to cover official expenses, to prevent the service suffering from the cupidity of some, and to remunerate the faithful and patriotic discharge of duty in others. The option with the officers to receive in kind, has the advantage also of equalizing the compensation much better in this country, than a difference in moneyed allowances at different stations would; for the prices of the several articles granted in kind fluctuate as much with time as they do with place, and what would be a fair allowance in one year would be unfair in the next.

It is scarcely thought necessary further to urge the importance of equalizing the compensation at different posts. One of the privileges of seniority is the choice of command—a necessary privilege. No senior officer, therefore, would relinquish his claim to an economical command in favor of a junior, however beneficial it might be to the service. It is true, this might and would become the duty of superior authority to decide, and to order accordingly; but if the decision was against the senior, it would produce much dissatisfaction. It is, therefore, better to avoid the cause of contention, unless some positive advantage were to result from the change.

It may be urged that the arguments, founded on the necessity of furnishing allowances in kind, apply to a state of war, and are not forcible objections to a salary in time of peace. If this were admitted to the fullest extent, it is respectfully conceived that it would not be sufficient to justify the change. All changes must be vicious in a body whose operations are so multifarious and complicated as those of the army, unless they produce a positive advantage. The alterations in the supplying departments alone, on recurring to the war allowances, would be of the most embarrassing nature, and would take place at the most inconvenient and perplexing crisis. Another, and I think an important objection, is, that the economy of officers' arrangements would be broken, and must be studied anew on every change; and, in this respect, the officer in peace and the officer in war would be as unlike as the recruit is unlike the soldier. But if my view of the subject be correct, the necessity, in our service, of supplying the articles in kind, at particular posts, exists as well in time of peace as of war. The alteration, then, can only be adopted at particular stations. I am therefore of opinion that it would *not* be expedient to change the present pay and allowances of officers for a fixed compensation; and I most respectfully recommend that, if it should at any time be thought advisable to augment or diminish the compensation, it may be done by changing the amount of the allowances, and not by abolishing them, and granting money in lieu.

If Congress should view the subject differently, and decide on a "fixed compensation," justice to the officers requires that, in determining the amount to be allowed, they should consider the great and unavoidable expense to which the erratic life of an officer subjects him, and the extravagant price of living at many stations. It should also be considered that our service holds out none of those pecuniary

rewards which are so liberally bestowed by other governments. Your officer has no life estate in his commission, which he can sell out at great profit, no nominal command for which he receives pay, as well as for the one he exercises; no emolument from the paying, clothing, &c., of his regiment or company; no booty or prize money; no share of the estimated value of all contraband articles seized by his regiment in aid of the revenue laws. He looks forward to no full or half pay to retire upon, when disease or age may have unfitted him for the duties of his profession. If he is not disbanded, and dies in service, (unless it be his fortune to die in battle, or of wounds received in battle,) he leaves a portionless and unpensioned family. Not so the officer in other services; the greater part of the rewards enumerated are granted by all the European governments, and the whole by that government whose troops yours have been twice called on to meet in battle.*

If it be true that "officers are the soul of the army," and that victory will accompany the army best paid, fed, clothed and lodged, everything else being equal, then it is as politic as it is just, to make a liberal provision for those on whom you most rely in the hour of danger.

Respectfully submitted.

N. TOWSON, *P. M. G.*

NAVY DEPARTMENT, *March 17, 1834.*

SIR: I have to inform you that your letter of the 5th instant was duly received, and the first inquiry contained in it referred to the Fourth Auditor, and the second to the Navy Board.

The papers enclosed (A and B) present an answer to the first inquiry, believed to be sufficiently accurate for the purpose for which it was requested.

An answer to the second could not be prepared accurately without opening a correspondence at Philadelphia; but so soon as the circumstances will permit, it will be furnished.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

To the Hon. JOHN G. WATMOUGH,

Chairman Select Committee on Pay of Officers, Army and Navy, H. R.

NAVY DEPARTMENT, *March 18, 1834.*

SIR: Information has this day been received, which enables me to submit an estimate in answer to the second inquiry in your letter of the 5th inst.

To furnish the whole number of surgeons and assistant surgeons now in the service with new and suitable instruments, it is supposed would require the sum of eleven thousand dollars.

The annual expense of keeping these in repair, and of purchasing new ones for new surgeons and assistant surgeons, would be about three thousand dollars.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

To the Hon. JOHN G. WATMOUGH,

Chairman Select Committee on Pay of Army and Navy, H. R.

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 17, 1834.*

SIR:—Herewith you will receive "an estimate showing the difference between the present pay of the officers of the United States navy, and the pay as proposed by a bill reported by a select committee of the House of Representatives, 28th of February, 1834," which is believed to approximate to entire accuracy.

The bill, and letter of the honorable chairman of the committee, by you referred to me, are herewith returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

* The movable property captured by the army, under the Duke of Wellington, was considered lawful booty, and the amount claimed of the government is thus estimated:

1. Arms and warlike stores.....	£285,908 16s. 2½d.
2. Provisions, forage, baggage, &c., collected on the field of battle.....	150,000 00 0
3. Public property taken in France generally.....	139,868 3 7½
4. Public property of the city of Bordeaux.....	107,026 10 0
5. Vessels-of-war captured at Bordeaux.....	81,095 00 0
6. Merchant ships taken at Bordeaux.....	96,768 00 0
7. American vessels captured there also.....	22,048 00 0
8. Specie taken at different places.....	33,735 12 8

Total value of prize money claimed.....£916,450 2 6½

The officers' baggage of Sir John Moore's army, lost on its retreat to Corunna, was estimated at £40,700 3s. 9d. sterling, and paid for by the government. The same quantity, lost by officers of the United States army, would neither have been estimated nor paid for.

B.

An estimate showing the difference between the present pay of the officers of the United States navy, and the pay as proposed by a bill reported by a select committee of the House of Representatives, February 23, 1834.

Proposed pay.	Pay and subsistence.	Ration and rent.	Whole pay.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March, 14, 1834.*

NAVY DEPARTMENT, *June 7, 1834.*

SIR: your letter of the 31st ultimo was duly received, and referred to the Fourth Auditor for a report on the difference in the amount of pay proposed by the two bills mentioned.

His reply having been received this day, is enclosed, (A and B,) and will, it is believed, communicate all the information desired on that point.

The documents which you requested me to forward to our vessels on foreign stations, it has given me much pleasure to send by the first conveyance.

Concerning the only other point named in your letter, requesting my views or suggestions in respect

to the present bill, I would observe, that all the facts and principles of a material character, which had occurred to me on the subject of pay, were presented in my communication to you of the 15th of January last.

If, on further reflection, any new ones are found which appear worthy of consideration, I shall be gratified in submitting them at an early day.

But, supposing the comparative amount of pay between the two bills might be wanted immediately, I hastened to forward it the moment it was received.

I have the honor to be, &c.,
The Hon. JOHN G. WATMOUGH, *Chairman, &c.*

LEVI WOODBURY.

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, June 6, 1834.*

SIR: In compliance with the request contained in your letter of the 2d instant, accompanied by the letter of the Hon. John G. Watmough, &c., I have the honor to transmit herewith "a statement showing the difference between the pay of the officers of the United States navy, as proposed by bill No. 334, reported by a select committee of the House of Representatives, 28th February, 1834, and the pay as proposed in the amendment to said bill, reported by said committee 17th May, 1834."

This statement may not be precisely accurate in all its detail; but, not doubting that it is sufficiently so to answer the purpose in view, (if not entirely so,) I have thought it inexpedient, at this late period in the session of Congress, to detain it for further examination. The papers are returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. LEVI WOODBURY, *Secretary of Navy.*

B.

A statement showing the difference between the pay of the officers of the United States navy, as proposed by bill No. 334, reported by a select committee of the House of Representatives, 28th February, 1834, and the pay as proposed in the amendment to said bill, reported by said committee 17th May, 1834.

	Pay per amendment to bill No. 334.			Whole pay per bill No. 334.†	Increase.
	Pay and subsistence.	One ration and house rent.	Whole pay per amendment.

No. 552.

[1ST SESSION.]

ON CLAIM OF A PURSER FOR AN ALLOWANCE FOR HOUSE RENT, WHILE STATIONED AT BALTIMORE, IN 1822.

COMMUNICATED TO THE SENATE JUNE 20, 1834.

Mr. CHAMBERS, from the Committee on Naval Affairs, to whom was referred the memorial of Andrew A. Van Bibber, administrator of the estate of Isaac Garrettson, late a purser in the navy, reported:

That Purser Garrettson was stationed at Baltimore in 1822, at a time when no regulation was made allowing for house rent at that station. An allowance of two hundred dollars for house rent was made to pursers on other stations, and the committee do not perceive why the allowance should be withheld from the Baltimore station. It is within the personal knowledge of one member of the committee that, during a portion of the period, Purser Garrettson resided usually in Virginia with his family, and visited Baltimore monthly to perform the appropriate duties of his station. From the year 1829 he was required to leave his family and reside altogether in Baltimore, and did so reside, separated from his family, and actually died in Baltimore.

There never was a murmur of complaint against the conduct of the said purser by those who were interested in the faithful performance of his duty; and his accounts were regularly kept and settled at the Department, leaving intentionally a balance against him, which he always contended should be an offset by the allowance now claimed. Since the death of the said Garrettson, an allowance has been made of two hundred dollars to the purser at the Baltimore station, and it is now continued.

The committee consider that the expenses necessarily incurred in going to, remaining at, and returning from Baltimore once a month, during the period of his residence in Virginia, and subsequently the expense of a permanent residence in Baltimore, presented a full consideration for placing said Garrettson on an equal footing with other pursers; and they therefore report a bill to secure to his estate the benefit of said allowance.

23D CONGRESS.]

No. 553.

[1ST SESSION.]

ON CLAIM OF CAPTAIN GEORGE BUDD FOR A PENSION FOR WOUNDS RECEIVED IN BATTLE, HE BEING IN COMMISSION ON SERVICE.

COMMUNICATED TO THE SENATE JUNE 20, 1834.

Mr. CHAMBERS, from the Committee on Naval Affairs, to whom was referred the memorial of Captain George Budd, reported:

That Captain Budd, while a lieutenant on board the frigate Chesapeake, was wounded, on the 1st day of June, 1813, in the disastrous engagement with the British frigate Shannon, while gallantly performing his duty.

His wound has disabled him from procuring his subsistence by manual labor, and is permanent. Shortly after he received the wound he applied at the Department, and was informed that the law did not authorize the grant of a pension to any officer who remained in the service.

At the present session, on the application of Captain T. A. C. Jones, a bill was reported from this committee granting a pension to Captain Jones, under circumstances not distinguishable in principle from the case of Captain Budd; which bill has become a law.

The committee, therefore, consider the principle to be sanctioned.

Considering the facts set forth in the memorial of Captain Budd to be fully made out in proof, and that his case is entirely within the principle of Captain Jones' case, the committee herewith report a bill similar in its provisions to the bill passed in favor of Captain Jones.

23D CONGRESS.]

No. 554.

[1ST SESSION.]

ON CLAIM OF AN ORDERLY SERGEANT OF MARINES, ACTING AS MESSENGER TO THE COMMANDANT AND STAFF OF THE MARINE CORPS, FOR EXTRA ALLOWANCE AS SUCH.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 27, 1834.

Mr. PATTON, from the Committee on Naval Affairs, to whom was referred the petition of Abel Griggs, reported:

That the petitioner is an orderly sergeant in the marine corps; that while holding this office he has been employed as a messenger to the commandant and staff of that corps, for several years past, viz., since the 14th of September, 1823. He claims to be entitled, under the act of Congress of 2d March, 1819, and the army regulations, to *extra* pay, over and above his pay and rations as sergeant, of fifteen cents per day and a gill of whiskey. He alleges, and it is true, that in the estimates for the expenses of the marine corps of the year 1833, a provision was contained for extra payment to be made him as such messenger, which was incorporated into the appropriation bill of the last year, and he now asks the passage of a law providing for the payment to him of a similar allowance from the 17th September, 1817, to the 31st December, 1832.

The committee referred the petition to the Secretary of the Navy, for the purpose of being informed under what law and upon what principles this extra compensation had been included in the estimates of appropriation of the last year. In answer, a letter has been received from the Secretary of the Navy, dated the 13th instant, to which the committee refer, and make a part of this report.

After carefully considering the act of the 2d March, 1819, and the provision of the act of the 11th July, 1798, by which the marine corps is subjected to the rules and articles of war prescribed for the military establishment of the United States, the committee are of opinion that the provision of the act of March, 1819, directing that whenever it shall be found expedient to employ the army at work "*on fortifications, in surveys, in cutting roads, and other constant labor,*" does not apply to such an employment as the petitioner was detailed for. Other constant labor means constant and laborious service out of the regular course of duty, and of the same kind with the labor specified, viz., on fortifications, &c., where the duty is more severe, and the bodily labor more incessant than in the ordinary service of a soldier. The employment of the petitioner as messenger, imposed on him only the same description of service with that belonging to his regular duty; neither more laborious nor more incessant, and obviously not of that kind contemplated in the act of 1819, above referred to. The appropriation of the last year was probably made inadvertently, and without the attention of the House and the committee being particularly attracted to its true character. The committee are of opinion that the prayer of the petitioner ought to be rejected.

NAVY DEPARTMENT, May 14, 1834.

Hon. John M. Patton, of Naval Committee, House of Representatives:

SIR: I have the honor to acknowledge the receipt of your letter of this date, enclosing the petition and papers of Sergeant Griggs, of the marine corps. To your particular inquiries, I submit the following reply: The officers, non-commissioned officers, &c., of the marine corps, by act of the 11th of July, 1798,

are subjected, when not serving on board the armed vessels of the United States, to be governed by the same rules and articles of war as are prescribed by the military establishment of the United States. On the 2d of November, 1819, an act passed, directing that whenever it shall be found expedient to employ the army at work on fortifications, in surveys, cutting roads, and other constant labor, of not less than ten days, the non-commissioned, &c., so employed, shall be allowed fifteen cents, and an extra gill of whiskey, or other spirits, per day, while so employed.

Under the provisions of the first-named act, the officers and non-commissioned officers of the marine corps, whilst serving on shore, have claimed the application of the army laws to their corps in nearly all cases of allowances, and it is presumed to be on that principle, and under the army act of 1819, that Mr. Griggs founded his petition; the grounds upon which the allowance was made to him for 1833 will be seen by reference to the letter from this Department, of October 30th, 1832, and which is filed among his papers. The principle before named seemed to me reasonable, providing Congress sanctioned it by the appropriation after a specific estimate. The papers are returned.

I am, very respectfully, &c.

LEVI WOODBURY.

[23D CONGRESS.]

No. 555.

[1ST SESSION.]

ON THE CLAIM OF CAPTAIN SILAS DUNCAN FOR ARREARS OF NAVAL PENSION, ON ACCOUNT OF THE EXTRAORDINARY CHARACTER OF HIS WOUND AND LONG SUFFERING UNDER IT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 3, 1834.

Mr. CAMPBELL P. WHITE, from the Committee on Naval Affairs, to whom was referred the memorial of Silas Duncan, late a lieutenant and now a master commandant in the navy of the United States, reported:

That in the month of September, 1814, Sir George Prevost, the Governor General of Canada and the commander-in-chief of the British forces in America, invaded the United States with a well appointed and highly disciplined army of almost fourteen thousand men, and was advancing rapidly to the attack of Plattsburgh, on Lake Champlain, which was at that time the principal military and naval depot of the United States upon the northern frontier. That, for the purpose of impeding the progress, and of changing the course of the advancing column of the enemy, Commodore McDonough detached a portion of the light vessels of his squadron to a point on the lake called Dead creek, around which the enemy was expected to pass. These vessels, after having commenced the attack on the British forces, were supposed by Commodore McDonough to be in danger of capture, when he ordered the memorialist, who was at that time an acting lieutenant of the *Saratoga*, (the flag ship of the commodore,) to proceed forthwith and take command of these vessels, with instructions so to manœuvre as to extricate them from the dangers in which they were involved, and Lieut. Duncan proceeded to the scene of action, and assumed the command of the attacking squadron, and so manœuvred and directed its operation as to extricate the vessels from the danger which impended over them, and to accomplish the object for which the attack had been ordered, by which the principal division of the British army was compelled to change its position, and pursue a different route with considerable loss.

The memorialist states that, while engaged in this perilous and important service, he was, in passing from vessel to vessel, personally exposed to an incessant fire from the enemy; and it was remarked that his person was a principal object of their aim, under an impression (as was subsequently confessed by the enemy) that it was the person of the commander-in-chief of the fleet on Lake Champlain. Lieutenant Duncan was finally struck by a *cannon ball*, which inflicted upon him one of the most desperate and terrible wounds from the effects of which life has ever been preserved. The whole of his right shoulder, including the joint and all the bones and muscles about the shoulder, were carried away, and his shoulder blade and collar bone were also fractured, besides extensive contusions. At first, the wound was supposed mortal, and no hope was entertained of his recovery. The character of this wound is set forth in the certificate of Dr. Henry Huntt, then hospital surgeon of the army of the United States, and now an able practitioner in the city of Washington, and who attended Lieutenant Duncan. It appears, from the certificate of Dr. Huntt, that the wound was lightly dressed, and that Lieut. Duncan was sent to the hospital on Crab Island, when it was proposed by the surgeon to amputate at the shoulder joint, which was prevented by the unyielding opposition of Lieutenant Duncan. He remained on Crab Island until the 11th of September, without receiving any other aid than simple dressing. During the battle of the 11th of September, he was removed, for safety, to Peru, a few miles distant, where he remained several days, and a great part of the time in a state of delirium, without seeing a surgeon, having been either forgotten, or the surgeons being too much engaged to attend him. Dr. Brown, of the navy, at length visited him, and found him in the most deplorable condition. On removing the former dressing, the wound sloughed extensively, and left the head of the shoulder bone bare and detached; it was then dissected out, and the wound again dressed, and Lieutenant Duncan was removed across the lake to Burlington, in Vermont, and placed in the general hospital, which was at that time in charge of Dr. Huntt. Dr. Huntt further states that he again examined the wound, and found fragments of the head of the shoulder blade and collar bone considerably detached, which he dissected out. The superior end of the shoulder bone projected two or three inches, which Dr. Huntt removed, and the arm was ultimately saved, but so shattered and weakened, by the loss of some of its essential parts, as to be of but little use to this unfortunate and gallant officer.

The committee have been thus particular in describing the nature and extent of the wound received by Lieut. Duncan, and which they have extracted from the certificate of the surgeon, because they have learned that, from its extraordinary character, it has been made the subject of observation and remark,

by many eminent surgeons in Europe and America, and that Barron Larrey, the surgeon general of the French armies under Napoleon, never knew an instance of recovery from a wound of similar character.

The recovery of Lieutenant Duncan must therefore reflect high credit on the professional skill of the gentleman who had charge of him.

On the 20th October, 1814, Congress voted the thanks of the nation, and medals and swords, to the officer engaged in the battle of the 11th September, 1814, for gallantry and good conduct in the capture of the British fleet on Lake Champlain. As Lieut. Duncan was *on that day and during that battle* lying in a hospital, and suffering everything that humanity is capable of enduring, from the effects of a wound received five days previously in the gallant discharge of a most perilous duty, he was not of course engaged in battle on that day, and it was adjudged that he was not included among the officers who were to share the honors and benefits of the resolution of Congress.

Lieutenant Duncan, as was his duty, in such a case, appealed to Congress, who unanimously passed a resolution extending to him the provisions of the resolution of the 20th October, 1814, "as a testimony of the sense entertained by both Houses of Congress of the distinguished gallantry and good conduct of said Lieutenant Duncan, in an action with the enemy's forces on the 6th of September, 1814." To this resolution, and to the report of the Committee on Naval Affairs, the committee now respectfully refer, and beg leave to make part of this report.

Lieutenant Duncan was sixteen months before he recovered from this wound. In the year 1817, he applied to the commissioners of the navy pension fund, for the pension to which he conceived himself entitled. The precise date of this application is not known, because of the loss, at the Navy office, of the application and the vouchers which accompanied it; but there is among the papers in the present application a letter from the secretary of the navy pension fund, dated on the 12th September, 1817, acknowledging the receipt of the application.

It may very well be supposed that, from the nature of a naval officer's life, he has not the opportunity at all times of being pertinacious in his applications for his rights, and, with the modesty which is ever the accompaniment of a gallant spirit, Lieutenant Duncan availed himself only of such occasions as fairly presented themselves in bringing his application before the commissioners of the navy pension fund. This application was not granted until the 1st of March, 1833. And it is for the arrears of pension, from the date of his application to the period at which it was granted, that Captain Duncan makes the present appeal to Congress.

The principles involved in the granting of this application are similar, in their essentials, to those involved in the case of Captain Thomas Ap Catesby Jones, which was long pending before Congress, and which underwent much scrutiny and deliberation, and for whose relief an act has been finally passed. The only difference between the two cases is, that the wound of Captain Duncan was much more dangerous and severe, his sufferings greater and of longer continuance, and his disability also more extensive.

It is with pleasure, therefore, that the committee are enabled, without setting a new or dangerous precedent, to decide in favor of the present application on the part of this gallant and suffering officer. They therefore report a bill, and they also take leave to express the hope that the House may find it convenient to act upon it at the present session.

23D CONGRESS.]

No. 556.

[1ST SESSION.]

ON THE CLAIM OF A SEAMAN FOR A NAVAL PENSION ON ACCOUNT OF A DISEASE
CONTRACTED IN THE SERVICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 3, 1834.

Mr. SMITH, from the Committee on Naval Affairs, to whom was referred the memorial of William Kearns, reported:

The memorialist prays to be allowed a pension, upon the statement of his case, which is made up of the following facts:

He served on board the United States sloop Erie from the year 1823 into the year 1826, in the capacity of an able seaman, and was regularly discharged, on the ground of having served the full term of his enlistment. (See documents annexed, marked A and B.)

He afterwards re-entered the service of the government in the same capacity as before. The precise period of his re-enlistment does not appear in his papers. But by the certificate of the surgeon at the United States Naval hospital, near Portsmouth, Virginia, which is hereto annexed, marked C, it appears that he "was received as a patient" at said hospital, from the United States ship Delaware, on the 19th of November, 1827, and discharged therefrom on the 17th of April, 1829, at his own request; and that his disease was *paralysis*. This, and the further fact that when discharged he was "unfit for service," also appears from document annexed, marked D.

The memorialist alleges that his said disease has proceeded from "a violent cold, taken while doing duty."

Document annexed, marked E, is furnished to show the continuance and extent of his disease and disability. Several persons also certify that he is "entirely unable to obtain a livelihood, and that he is a temperate, well-disposed man, and well known to them."

The memorialist's case has been presented to the Navy Department, but the Secretary of the Navy has decided that "his case is not one coming within the laws in relation to the navy pension fund. His having contracted a cold, which produced the disease under which he labors, does not entitle him to a pension."

Such being the memorialist's case, and there being no provision of law within which it can be brought so as to secure to him, in his distress, the benevolent aid of government, the question is now presented

for consideration, whether the system of pensioning by the government ought to be extended to embrace that class of invalids whose disabilities have arisen from disease contracted while in the service of the country; for your committee cannot but conclude that, if it would be politic to extend the system in this special instance, it would but be *just*, as well as politic, to adopt the same extension for general application.

The humane feelings of an enlightened and prosperous people, acting upon them in their relationship of private citizens, will not admit any discrimination to be made between unfortunate invalids, in the bestowment of charity, on account of any difference in the causes of their necessities or distress, provided crime be not a known ingredient thereof. Destitution, and inability to recover from it, and to ward against its continuance, induce at once the generous bounties of such a people.

But the stern responsibilities of men acting in the capacity of public agents, and as guardians of moneys which they are permitted to distribute only upon certain established principles of even-handed justice, or upon broad views of national policy, compel them to rise above the sympathies which ordinarily induce their charitable bestowments, and to examine with the same critical eye the claims of those who cast themselves upon the benevolence of the government, as of those who prefer their demands as matters of demonstrable right.

With these principles of duty in view, your committee are constrained to adopt the opinion that it is neither just nor politic to award pensions from the public treasury to *any* class of persons on account of injuries, or bodily infirmities arising from disease, contracted while in the ordinary employ of government.

The great uncertainty which must exist in all cases relative to the true causes of disease thus acquired, their many mysterious operations upon the human system, and the utter impracticability of determining the just extent to which their rise, progress, severity, duration, and result may or may not, ought or ought not, be imputed to the carelessness, obstinacy, blamable inclinations, habits, and conduct of the sufferers, are considerations which clearly distinguish the claims of this class of unfortunate invalids from the claims of such as have been wounded in battle, or disabled by accident, in the performance of duty. Perhaps an extraordinary exposure to disease by service in an unhealthy climate, or amid contagion, might furnish just exceptions to such a rule.

Your committee are aware that there is a precedent which not only approaches somewhat in principle to the case of the memorialist, but ought to be regarded as broad enough to cover his claim, if sufficiently sound in itself to be again adopted by Congress. The act of March 3d, 1817, provided pensions for the *widows and children* of officers and marines who *died* in the naval service, *from disease contracted in the line of duty*. If the family of one who has thus *died* from disease deserved to be pensioned by Congress, your committee can discern no good reason why the individual *himself*, if *disabled from disease in a similar manner*, is not equally deserving of a pension, although his disease may not have deprived him of life. Most certainly his family are deprived of the support of his industry equally as in case of his death, and are even rendered still less able to support themselves, inasmuch as he is, while living in a disabled condition, a burden and a tax upon their support.

But, for reasons before mentioned, your committee are of opinion that the principle and policy of such a precedent are both bad. It is not recognized by the original act to which the one just cited is an amendment; nor has it been subsequently confirmed at any time in direct terms by Congress, and only constructively if at all.

In view of these considerations, the committee report the following resolution, remarking, however, in justice to the memorialist, that his case clearly presents a claim to the most favorable consideration of Congress, provided a different policy than that embodied in and adopted by this report shall be deemed judicious by Congress.

Resolved, That William Kearns have leave to withdraw his petition.

23D CONGRESS.]

No. 557.

[1ST SESSION.]

ON THE PROPRIETY OF THE APPLICATION OF THE CONTINGENT FUND OF THE NAVY DEPARTMENT TO THE EXPENSES OF PRECEDING YEARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 5, 1834.

Mr. HALL, from the Committee on Expenditure in the Navy Department, reported:

During the year ending on the 30th of September, 1833, there was reported, and allowed by the proper accounting officers, the sum of \$303,678.17, as contingent expenses of the Navy Department. Of this sum, \$245,765.71, and the further sum of \$96.64 for contingent expenses not enumerated, making an aggregate of \$245,862.35, were for contingent expenses incurred during said period. The balance was paid for the contingent expenses of preceding years remaining unsettled. The distribution of this balance, amounting to \$57,815.82, among preceding years, is as follows:

Contingent prior to 1824	\$87 70
Contingent during 1825	14 70
Contingent during 1826	520 35
Contingent during 1827	233 85
Contingent during 1828	350 23
Contingent during 1829	2,124 85
Contingent during 1830	10,886 29
Contingent during 1831	42,175 11
Contingent not enumerated	1,422 74
	\$57,815 82

Your committee are satisfied that the expenditures have been justified by, and made in conformity with law; and that they are supported by the requisite vouchers.

Every voucher has not been inspected separately, as it has not been practicable for the committee to be so minute in their investigation. The examination, however, has been such as to warrant the belief that this class of the disbursements of the Navy Department is characterized by great accuracy and fidelity on the part of the proper officers.

23D CONGRESS.]

No. 558.

[1ST SESSION.]

ON THE CLAIM OF A WARRANTED SAILMAKER IN THE NAVY FOR ADDITIONAL PAY AS SAILMAKER AT THE NAVY YARD AT PENSACOLA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 10, 1834.

Mr. ELISHA WHITELEY, from the Committee on Claims, to whom was referred the petition of William Ryan, reported:

That he states, having been many years a warranted sailmaker, in the service of the United States, and having seen much sea service, he applied to Mr. Branch, when Secretary of the Navy, for the situation of sailmaker in one of the navy yards, and was stationed at Pensacola. He says he expected to receive the same pay that was allowed to others of the same grade, and performing the same services, viz: sixty-two dollars per month; instead of which, he only received \$35.50 per month, commencing on the 31st of December, 1830, and ending on the 17th day of January, 1832. The disbursing officer, he says, informed him he was not authorized to pay him any additional amount above his regular sea service pay. He refers to testimonials of good character, on file in the Navy Department, and prays relief.

The committee sent the petition to the Secretary of the Navy for information as to the practice of making extra allowances in such cases, and to know, if such practice existed, why the petitioner might not receive the additional compensation without applying to Congress.

Mr. Woodbury's answer, and a report from the Fourth Auditor, are received, and referred to as a part of this report. It appears, from the report of the Fourth Auditor, that the petitioner was paid all to which he was entitled by law; and that there was no estimate made for any extra allowance to a sailmaker at Pensacola prior to 1833. It appears from Mr. Woodbury's answer, that extra allowances of this character are regulated by the Department, and they are granted when the services and the responsibilities render them necessary or expedient, and then they are included in the estimates, and of course receive the sanction of Congress.

The committee are not disposed to interfere with this regulation, and to grant an allowance, where the head of the Department did not, at the time the services were being rendered, think the petitioner was entitled to an additional compensation. The committee submit the following resolution:

Resolved, That the petitioner is not entitled to relief.

23D CONGRESS.]

No. 559.

[1ST SESSION.]

RECOMMENDATION OF THE SECRETARY OF THE NAVY FOR DISPENSING WITH THE USE OF ARDENT SPIRITS IN THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 10, 1834.

NAVY DEPARTMENT, *May 2*, 1834.

SIR: Your letter of the 30th ultimo, enclosing resolutions as to the use of ardent spirits in the navy, and establishing a naval depot at Charleston, South Carolina, has been received.

In respect to the resolution concerning ardent spirits, a report containing, among other things, a revision of the laws on the naval ration, has been made by the board appointed for that purpose.

That report contains views on the subject of abolishing the spirit part of the naval ration, which meet with my approbation.

The President probably will transmit it to Congress this day, and for details on this point I ask permission to refer to its contents, merely adding that, soon after taking charge of this Department, I issued an order authorizing seamen to commute the spirit part of their ration for money, and valued it so high as to furnish a strong inducement to them to make the exchange.

Finding the component parts of the navy ration, unlike those of the army, fixed by law, it was not in my power to diminish or abolish it; but I invited the attention of Congress to a revision on the subject, and have hoped that some salutary changes would, at an early day, be provided for.

Under the order before mentioned, very great improvements in temperance, health, and morals, appear to have occurred; and should the alterations be made, and the discretion conferred, recommended in the above report, I feel convinced their effects on the naval establishment will prove beneficial.

The character and habits of seamen are so peculiar, that a gradual, rather than a sudden change is supposed to be the most acceptable, and that, under the authority proposed in the report, a total abolition of the use of spirits can, ere long, be introduced, if not with the entire consent and approbation of all concerned, yet without any danger of creating dissatisfaction or injury to the public service.

I shall submit a separate reply to the other resolution.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. CAMPBELL P. WHITE, *Chairman of Naval Committee, House of Representatives.*

[23D CONGRESS.]

No 560.

[1ST SESSION.]

ON THE CLAIMS OF A DISBURSING OFFICER OF THE NAVY FOR LOSSES SUSTAINED ON THE SALE OF TREASURY NOTES, TO MEET THE EXIGENCIES OF THE SERVICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 14, 1834.

Mr. E. WHITTLESEY, from the Committee on Claims, to whom was referred a bill from the Senate for the relief of Wolcott Chauncey, reported:

That the committee, considering that the evidence did not sustain the claim, according to the rules and principles that have governed Congress heretofore in deciding on this class of cases, applied to the Fourth Auditor for further information in relation to the disbursement of the money by the petitioner, and the loss sustained by him on the sale of Treasury notes, and his answers are referred to.

In his letter of the 6th of June, he says: "The funds remitted were all in those notes; they were, at that time, at a considerable discount; and unless he was able to use the notes themselves in making payment to the men recruited, in relation to which there is no evidence, he must have incurred loss in converting them into money."

Copies of the receipts he gave for the Treasury notes are before the committee, and they establish the fact that he received the funds in Treasury notes. A copy of his account is also before the committee, in which he claimed a credit of \$766.21, for loss on Treasury notes.

In an affidavit, bearing date the 12th instant (June), he states he expended the sum of five thousand one hundred and seven dollars and ten cents in the recruiting service for the navy, and in disbursements to the crew of the schooner Torch, except so much of said amount of the said Treasury notes as he was compelled to allow as discount to the brokers, for exchanging said Treasury notes into current money, so as to meet the exigencies of the public service. His accounts were kept, in part, by Mr. Hoyt, captain's clerk, and by Mr. Hoffman, purser of the Torch, both of whom are dead. He also states, in his affidavit, that, according to the best of his knowledge and belief, his loss on said Treasury notes was greater than the amount now claimed.

In corroboration of the loss, and that the Department supposed at the time, and since, that Captain Chauncey was entitled to relief, is the fact that his pay has been regularly made to him, notwithstanding this balance stood against him on the books of the Department.

The committee are satisfied of the loss, and recommend the passage of the bill for the relief of Wolcott Chauncey.

[23D CONGRESS.]

No. 561.

[1ST SESSION.]

INFORMATION FROM THE PRESIDENT OF THE ACCIDENTAL DISCHARGE OF A SHOTTED GUN, IN FIRING A SALUTE BY THE FRIGATE UNITED STATES, AT TOULON, IN HONOR OF THE BIRTHDAY OF THE KING OF FRANCE, BY WHICH TWO MEN WERE KILLED AND FOUR WOUNDED, ON BOARD OF A FRENCH SHIP-OF-WAR, AND RECOMMENDING THAT PROVISION BE MADE FOR THE SUFFERERS AND THEIR FAMILIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 19, 1834.

To the House of Representatives of the United States:

I transmit to Congress an extract of a dispatch from Mr. Livingston, the minister of the United States at Paris, dated the 7th ultimo, and the copy of a communication made to him by Captain Ballard, commander of the frigate United States, by which it appears that, on firing a national salute from that ship, at Toulon, in honor of the birth-day of the King of the French, two men were killed and four others wounded on board of the French ship-of-war Suffren. Suitable explanations were immediately made to the French admiral; and the officers and crew of the American frigate, with that generosity which distinguishes their profession, promptly contributed, by a liberal subscription, towards providing for the families of the unfortunate sufferers. I am sure, however, that I should not do justice to the feelings of the American people, on this occasion, if I did not invite Congress to assume, on their part, this melancholy duty. I propose, therefore, that the same provision be made, by law, for these French seamen and families as would be made for American seamen killed or wounded in battle. This proceeding will show the deep sensibility with which this disastrous accident is viewed by the United States, and their readiness to alleviate those consequences which cannot be remedied.

ANDREW JACKSON.

WASHINGTON, June 18, 1834.

Extract of a dispatch from Mr. E. Livingston, envoy extraordinary and minister plenipotentiary in France, to Mr. McLane, Secretary of State of the United States, dated—

PARIS, May 7, 1834.

A most unfortunate occurrence happened at Toulon, as you will see by the copies of letters I have this day received from Captain Ballard, and which I enclose. M. de Rigny apprised me of it on the 2d instant, but the telegraphic dispatch which he had received then contained no particulars. I purpose showing Captain Ballard's letter to the King.

*Letter of Captain Ballard to Admiral the Baron Freycinet,*U. S. FRIGATE UNITED STATES, *Toulon, May 1, 1834.*

SIR: It was with profound sorrow that I learned, on my arrival from Marseilles, a few moments since, the melancholy accident which attended the firing of the salute by the "United States," this morning, in honor of the day.

It is impossible to express what I feel on the occasion: to realize it, my dear sir, you must place yourself for a moment in my situation, and, in so doing, I pray you to accept the strong assurance I confidently give of the deep regret which penetrates the heart of every officer and seaman of the two American ships at Toulon, on this subject.

The gunner, whose negligence gave origin to this sad disaster, enjoys the reputation of being a good officer and an amiable man, but he has been for a short time only in his present situation. I have placed him under arrest, and shall bring him before a court-martial the moment I meet the commander-in-chief of the squadron of the United States in this sea.

In evidence of the kind feeling and sympathy in this event of those under my command, five thousand francs have been put in my hands by them, with the request that I should place the same immediately at your disposal, for the benefit of the families of those who have suffered from the accident.

Allow me, dear sir, to beg of you the favor to discharge this kindness, and believe me to be, with sentiments of the most friendly consideration and perfect respect,

Yours, &c., &c.

To Admiral the Baron FREYCINET, *Prefect of Marine at Toulon, &c., &c.*

23D CONGRESS.]

No. 562.

[1ST SESSION.]

ON CLAIM OF A NAVY AGENT, AT LIMA, FOR AN ALLOWANCE OF FIVE PER CENT. COMMISSION ON HIS DISBURSEMENTS, AND FOR COSTS AND EXPENSES CAUSED BY A REFUSAL OF THE NAVY DEPARTMENT TO PAY HIS DRAFTS; AND ALSO FOR CLERK HIRE, ETC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 21, 1834.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the bill from the Senate for the relief of Andrew Armstrong, reported:

That they concur with the Committee on Naval Affairs of the Senate, in regard to the facts stated in a report made to that honorable body on the 11th April last, to which reference is made; and in the opinion therein expressed, that the allowance to navy agents, by the act of 3d of March, 1809, "does not apply to any navy agents except such as are stationed within the United States."

With respect to the commissions and other items of credit claimed by the memorialist, the committee beg leave to state that they concur in opinion with the committee of the Senate, that Mr. Armstrong ought to be allowed a commission of five per cent. on the amount of money disbursed at Lima, and in stores distributed, being the same compensation which was allowed to the agent previously employed for performance of the like services at that place; but in making this allowance of commission, the charge of expenses for clerk hire, stationery and office rent ought to be disallowed, and not credited to Mr. Armstrong. That he ought to be credited for damages paid by him on his bills in the Navy Department, protested for non-payment, \$863.33, and for tobacco purchased of H. McCulloch, \$4,279.68, both which amounts were allowed by the judge of the eastern district of Pennsylvania, upon bill filed before him to stay proceedings upon a distress warrant issued by the Treasury against the memorialist:

As Mr. Armstrong was detained at Lima at great expense, for a period of more than fifteen months after the receipt of notice of his removal, in consequence of the protest of his bills on the Navy Department, the committee are of opinion that he ought to be allowed for his time thus spent at the rate charged by him, (without allowance for expenses,) and for his passage to the United States.

The committee report the bill from the Senate, with an amendment providing for the readjustment and settlement of the account of Mr. Armstrong, upon the principles herein stated.

23D CONGRESS.]

No. 563.

[1ST SESSION.]

ON THE EXPEDIENCY OF ESTABLISHING A NAVY YARD AND DEPOT AT CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 24, 1834.

Mr. GRAYSON, from the Committee on Naval Affairs, to whom was referred a number of documents respecting the establishment of a navy yard and naval depot in the port of Charleston, reported:

That the papers so referred consist of statements from a large number of respectable persons in the city and vicinity of Charleston, relating to the capacity of the harbor, and its security, the depth of water on the bar, the health of the city, the abundance and cheapness of the best timber for ship building, the

price of labor, the number of mechanics, and the various advantages which would result to the country from establishing in that city a navy yard for the building of smaller vessels-of-war.

The harbor of Charleston, in the opinion of the best judges, particularly of Captain Kearney and other officers, who have been for some months stationed at that place, is of ample extent, perfect security, and always easy of access. The depth of water on the bar is sufficient for sloops-of-war, and, in the judgment of the senior officer above referred to, the port is accessible to frigates, with the aid of those means which are used in other countries in similar cases, and which were used in our own during the last war. The application of these means is now rendered more easy by the assistance of steam. It is hardly necessary to recur to the fact that, during the revolution, two fifty-gun ships passed the bar at Charleston harbor with safety.

A number of the most respectable and intelligent physicians, eminent for professional talent and science, bear ample testimony to the health of their city, and their statement of its comparative health is sustained by the experience of Captain Kearney and other naval officers, and by the bills of mortality from other cities in the Union.

The supply of timber of the first quality is inexhaustible. The live oak, which is sought after in all parts of the Union as incomparably the best timber for ship frames, is produced abundantly, and of the very best quality, in the vicinity of Charleston. The transportation of so heavy an article is expensive and dangerous, and it would evidently conduce to the good of the service to have a depot for it near the place where it is grown, from whence it may be carried when required. Such a depot near the place of its growth, would have a strong tendency to encourage the growth and preservation of the live oak—an object of the very highest importance, and one which has engaged already the attention of the government. White oak, of the best quality, is in great abundance throughout the low country of Carolina. The pine of the southern States is of well-known excellence. It attains a size sufficiently large for the masts of frigates, and in quantity it is inexhaustible. These and other kinds of timber, such as cedar and cypress, are, it is believed, in greater quantity and at lower prices in Charleston than in any other port of the Union.

Mechanics in sufficient numbers, and of competent skill, in every department of labor connected with the building and repairing of ships, and master builders not inferior to any in the United States, are already found in the city of Charleston, and the price of labor is certainly not greater than elsewhere.

The commerce of the United States with the West Indies is, and will be, of very great importance. It is exposed to peculiar perils, and the vessels required for its protection are of the class which it is proposed to have built in Charleston. It is important to have a place to refit and repair at a convenient distance from that station. Charleston is nearer and more easy of access than any other place that can be compared with it in its other advantages. Vessels from that port may easily reach any station in the West Indies, when the prevailing winds and currents of that region render it almost impossible, in any reasonable time, for a vessel from any port of the gulf.

These, and other advantages of the port of Charleston, have been so apparent to several naval officers as to induce Commodore Elliott, when in that place, to institute investigations on the subject. The results of his inquiries are such as to convince him of the propriety of establishing a navy yard there. The same impression, from the same sources, seems to have been made on the head of the Navy Department. For these reasons, your committee conclude that the establishment of a navy yard at Charleston, for the construction of smaller vessels-of-war, would be expedient and desirable, as it would conduce to the public good.

There are other considerations, which, although they may not alone be sufficient to authorize the construction of vessels-of-war at Charleston, are yet of very great importance and weight, as strengthening the inducements which have been already enumerated. It is clearly the sound policy, and, indeed, the bounden duty, of every government to equalize the distribution of its benefits as far as it is consistent with the public good. It is peculiarly the policy and duty of a government like ours, which has grown out of mutual concession and compromise among the members which maintain it. The advantages resulting from a navy yard, to the vicinity where it exists, are not small. There is not one establishment of the kind from the Chesapeake to Florida: and the claims of this extensive coast, abounding in the finest ship timber in the world, and furnishing all the requisite skill and labor, have hitherto been disregarded. No portion of our country should feel that they are neglected by the national government; that its favors and benefits are partially distributed; that one part of the Union is enriched by the constant expenditure of public money, and another impoverished by the expenditure elsewhere of the taxes collected in it. Let it not be said that a section of the Union knows the government by its burdens only. These considerations must have great and decisive influence on the mind of every member of the general legislature.

The committee, therefore, recommend that the petition of the people of Charleston for a navy yard in that place be granted.

NAVY DEPARTMENT, *May 2, 1834.*

SIR: I have the honor to acknowledge the receipt of the resolution as to the establishment of a naval depot at Charleston, South Carolina, and of your letter of April 30, requesting "any information in possession of the Department on the subject."

The attention of this Department and of Congress has often been turned to this question, and the information obtained in respect to it will be found chiefly in the documents referred to, either on the files of Congress, or annexed.

The first important communications on this subject will be found among the printed papers of the Senate, May 8, 1824. (No. 76.)

They consist of letters from this Department and from the Navy Board, bearing on this point, and connected with a "bill authorizing an examination and survey of the port of Charleston and the coast of Florida."

These were followed, on the 28th January, 1826, by other communications on this subject, sent from this Department to the Senate, January 19, 1826, and printed January 23, 1826. (No. 27.)

Those contain the report of the officer appointed to make the survey, and many important facts from persons of experience, relating to the expediency of establishing a navy yard at Charleston.

On the 28th December, 1827, another report was made by this Department to the Senate, which was printed December 31, (No. 12,) containing further valuable information on this, among other subjects.

Again, on the 26th December, 1828, a full report on the establishment of a navy yard, between Cape Hatteras and Florida, was forwarded to the Senate by this Department, printed January 6, 1829. (No. 28.)

Several letters and documents on the same subject were received last spring from the Hon. J. R. Poinsett, Commodore J. D. Elliott, and others, which are submitted with my reply. (No. 1 to No. 12.)

Since that time a memorial has been sent to this Department in relation to this, among other subjects, from certain citizens of Charleston, accompanied by sundry letters and documents, all of which, so far as deemed material, are annexed. (No. 13, and A. to C.)

A reply was made on March 7, 1834, a copy of which is enclosed. (No. 14.)

The attention of Congress was briefly invited to considerations connected with this question, in the last annual report from this Department, and some general views presented, which need not be here repeated. A copy of a letter from myself to Commodore Elliott, March 30, 1833, inviting his attention to this subject, and which probably led to most of the above communications, is subjoined. (No. 15.)

These references and documents are believed to contain all the material "information in this Department in relation to the subject" of "the expediency of establishing a naval depot at Charleston, South Carolina."

A schedule of all the papers is subjoined, such as are already on the files of Congress and printed.

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

The Hon. CAMPBELL P. WHITE, *Chairman Naval Committee, H. R.*

Schedule of papers relative to proposed depot at Charleston, S. C., sent with letter to the Hon. C. P. White, of the 2d May, 1834.

- No. 1. Letter from Commodore J. D. Elliott to the Secretary of the Navy, no date.
- No. 2. Same to same, 29th April, 1833.
- No. 3. No. 1 to 7, copies of circulars from Commodore Elliott to sundry persons, dated April 11, 1833.

ANSWERS TO THE ABOVE CIRCULARS.

Health of Charleston.

- No. 4. Letter from Doctors J. Johnson and Samuel H. Dickson.

As to mechanics.

- No. 5. Letter from J. R. Poinsett, Daniel E. Huger, and H. Middleton, dated April 22, 1833.
- No. 6. Letter from James Marsh and James Poyas, dated 13th May, 1833.

Materials (stone, &c.,) in the vicinity of Charleston.

- No. 7. Letter from E. Horry, dated May 7, 1833.

Timber in the vicinity of Charleston.

- No. 8. Letter from J. Townsend to J. R. Poinsett, dated May 6, 1833.
- No. 9. Letter from Thomas Bennett to the Secretary of the Navy, dated July 12, 1833.
- No. 10. Roads and canals, dated 1833.
- No. 11. Plan of Charleston harbor.
- No. 12. Reply of the Navy Department to Mr. Poinsett.
- No. 13. A. to C. Memorial from Charleston, with letters from Mr. Poinsett and Mr. Strobecer.
- No. 14. Reply by the Department, dated March 7, 1834.
- No. 15. Letter originally sent on the subject by the Navy Department, dated March 30, 1833.

No. 1.

SIR: I have the honor herewith to remark that, immediately after the receipt of your communication of the 30th March, I lost no time in giving its contents such consideration and direction as seemed most proper in accomplishing all its requisites.

That speculation might not be had, but a proper degree of truth elicited, I addressed communications to such practical and professional men, (copies, with their answers, are herewith enclosed, numbered from 1 to 7,) at and in the vicinity of Charleston, as I believed best calculated to draw forth such information, in relation to the requisites for the location of a naval establishment of a secondary class at the city of Charleston, as the subject required, possessing both health and security from an attack by the enemy.

The approaches to and over the bar of Charleston are accessible to all sloop-of-war and smaller vessels; and may be considered so for all vessels drawing 16 feet of water, and even a greater number, by having recourse to camels or lighters, as used by both the Russians and Dutch, and ourselves, during the last war, on Lake Erie, in floating vessels-of-war from shoal into deep water; and by other means, in that of the revolution, in June, 1776, by the British, in passing over the bar four frigate-built sloop-of-war, and two 50-gun ships, (the Bristol and Experiment,) under the command of Sir Peter Parker, for an united attack on the works then erected on Sullivan's Island, and which still remain a proud trophy of their failure, and of subsequent events; and this may be done with greater ease and facility by the present agency of steam.

The highest tides are 19½ and the ordinary 16½ feet; the anchorage is good at all points within the

bar, and with positions well suited to the location of a depot of construction for sloops-of-war and smaller vessels, and for the collection and inspection of such timber as is not to be obtained at the northern depots, procured in this vicinity and wanted there.

Two strong and important points, in reference to this subject, I would call your attention toward, viz: the difference in price of the important articles of live oak, white oak, and yellow pine timber, delivered here, of various sizes, and at the northern depots, as now obtained; and the facility with which the West India squadron might be succored from this station, both in peace and in war.

Prejudices have heretofore existed against the propriety of this measure, probably growing out of a want of a proper knowledge and representation of the subject; but when you will look closely to each point as presented to your observation, and shown to emanate from gentlemen of the highest integrity, I trust the subject will meet with due consideration and attention.

Aware of its importance both to the United States, the navy, and to the State of South Carolina, to facilitate the views of the government, my own services are at command, in perfecting the location of an establishment (heretofore existing, but now discontinued,) when Congress shall have so far deliberated as to direct the subject to be carried into effect.

The chart exhibiting the approaches over the bar off Charleston, the harbor, and the two rivers on each side of the city, running parallel thereto, is herewith enclosed.

Respectfully, sir, your obedient servant,

J. D. ELLIOTT.

HON. LEVI WOODBURY, *Secretary of the Navy, Washington, D. C.*

No. 2.

WASHINGTON CITY, *April 29, 1833.*

DEAR SIR: Understanding from the President that you will probably be at Charleston at or about the time this letter will reach, I take occasion to say a few words on the subject of the proposed naval establishment. I have not yet obtained all the information I wanted prior to making a detailed report; this will doubtless reach me in a few days, and enable me to do so; it is proper, however, that I should at this time call your attention, whilst on the spot, to the point appearing most eligible for the location. The high land at Hampstead, just where the extreme end of the line of defence terminates, will most certainly be found to possess all the requisites, yet it will be proper to hold out the idea of locating at Folly Island. Mr. Poinsett has a knowledge of all my views, and being on the spot you can safely confer with him.

By the tenth of the ensuing month I shall depart with my family for Boston, and a few days after will calculate on being there hard at work.

In haste,

J. D. ELLIOTT.

HON. LEVI WOODBURY, *Secretary of the Navy, Charleston, S. C.*

No. 3.—(No. 1.)

UNITED STATES NAVAL STATION, *Charleston, S. C., April 11, 1833.*

GENTLEMEN: At my suggestion, the honorable the Secretary of the Navy has taken into consideration the subject of the location of a naval establishment at the port of Charleston, S. C., and has called on me for such remarks as may throw light upon the subject.

The residence I have had amongst you does not sufficiently enable me to judge correctly on all the points which would seem to be embraced in the instructions of the government; and I would ask leave to throw myself on your kindness in obtaining information on the following points, viz:

Does the country contiguous to Charleston, and within striking distance, afford a supply of live oak, white oak, yellow pine, and masting timber, in sufficient quality and quantity to meet the probable wants of a naval establishment for the construction, masting, and repairs of sloops-of-war and smaller vessels? The prices at which the same could be delivered; the knees and beams sided, and cut to mould; the planks sawed, and masting in the rough?

I should necessarily be compelled to be absent from Charleston during the summer in search of health. Be pleased to direct your communication to me, under cover to the honorable the Secretary of the Navy, at Washington, D. C.

Respectfully, sirs, your obedient servant,

J. D. ELLIOTT, *commanding Charleston Station.*

MESSRS. THOMAS BENNETT, EDWARD CAREW. *Present.*

No. 3.—(No. 2.)

UNITED STATES NAVAL STATION, *Charleston, S. C., April 11, 1833.*

GENTLEMEN: At my suggestion the honorable the Secretary of the Navy has taken into consideration the subject of the location of a naval establishment at the port of Charleston, South Carolina, and has called on me for such remarks as may throw light on the subject.

The residence I have had among you does not sufficiently enable me to judge correctly on all the points which would seem to be embraced in the instructions of the government, and I would ask leave to throw myself on your kindness in obtaining information on the following points, viz:

The probable number of mechanics which could be obtained at, and in the vicinity of, Charleston, to

work in a dock yard, when established, such as ship carpenters, ship joiners, shipsmiths, boat builders, blockmakers, and common laborers, for daily work, and amount of wages for each.

I shall necessarily be compelled to be absent from Charleston during the summer in search of health. Be pleased to direct your communication to me, under cover to the honorable the Secretary of the Navy, at Washington, District of Columbia.

Respectfully, sirs, your obedient servant,

J. D. ELLIOTT, *commanding Charleston Station.*

Messrs. JAMES MARSH and JAMES POYAS. *Present.*

JOHN M. RIGHTON, Esq., *Bull's Island.*

No. 4.

CHARLESTON, *April 25, 1833.*

DEAR SIR: I take great pleasure in acknowledging the receipt of your favor of the 11th inst, and in furnishing, at your request, all the information in my power. From a careful consideration of all the documents within my reach; a perusal of the annual bills of mortality issued from the several large cities of the Union; of the papers published in our various medical journals; of the weekly reports given out in many of our towns, and the remarks casually made from time to time in our newspapers, I have arrived at the deliberate conclusion that there is scarcely a city in this new world in which the proportionate mortality is less, in any considerable number of years, than in Charleston. I am persuaded further, both as the result of my own observation during residences of greater or less duration in many of our commercial towns, and as an inference fairly deducible from statements made to me by medical friends engaged in practice all over our country, that there are fewer persons sick at any given period, in proportion to the population, here than almost anywhere else.

I will take this occasion to remark, in direct contradiction to an impression almost universally prevailing, that there is probably no spot on earth in which so few cases of *fever* originate in reference to the number of inhabitants. In Charleston proper, indeed, it may be safely affirmed that *fever*, in its ordinary forms, is scarcely met with; almost every instance of the occurrence of any such being definitely attributable to exposure in surrounding low country, well known to be under the dominion of malaria. We suffer from time to time, it is true, epidemic invasions of yellow fever; but this terrible disease assails, in our climate, strangers only, natives and residents of long standing being safe from its attack. The infected district in which it spreads is very narrow in its limits, our healthy suburbs being exempt from the influence of the cause which produces it. Its prevalence here does not, as in our northern cities, where all are subject to its invasion, give rise to any general confusion or suspension of business, which is carried on as usual by our native citizens and old residents, including climatized strangers from Europe and the north.

I must not omit to remind you of the peculiar salubrity of our winter, and the special favorableness of that season for all labor which is carried on under the open sky. Our operatives are here comparatively exempt from the pleurisies, rheumatisms, catarrhal affections, and other maladies, which so regularly prevail in northern regions in midwinter and early spring, and incapacitate so large a portion of the working class from following any exposed avocations. It is but a short time since I entered into an inquiry as to the probable duration or "expectation" of life in this southern country, the results of which were published in the *Southern Review*; I then satisfied myself that we are not in this respect notably behind the average of the rest of the world.

In answer to your first and second questions, I enclose you a tabular statement, collected from authentic documents by my friend Dr. Bellenger, for many years clerk of our board of health. You desire that I should indicate "the means by which a population may be rendered healthy, operating on the margin of the rivers passing the city of Charleston, and contiguous to it." These means are readily sug-

gested by the remarks offered above. It will not be difficult to select a position upon one of our rivers, either just within or just above the boundary line of our city, which, in the course of seasons, and in a series of years, shall be found as salubrious as any other occupied in the United States as a naval station. If natives or acclimated residents be exclusively employed in autumn to perform the necessary labor, this would be found to be absolutely true, without reference to any special regulations whatever. If, however, strangers are introduced as workmen, certain precautions would be necessary with regard to them. These need only to be observed for a brief period, while they were unaccustomed to our climate, and for a small portion of the year, less than one-fourth. The dangerous months are August and September, with, perhaps, the first fortnight in October; such persons would be carefully restricted from all excesses, and prevented from exposing themselves to the night air or dews or rain. If yellow fever shows itself in the town, they must not be permitted to visit it low during the day, and for a few of their first summers must not be permitted to change their sleeping apartments.

With these few precautions, I think any number of men would be found to retain their health and capacity for useful labor as well here as elsewhere.

I will make these pretensions to uncommon impartiality or sagacity in the formation of the opinions thus announced to you, sir; I can only assure you that they are offered with the most conscientious sincerity.

I remain, sir, with great esteem and respect,

SAMUEL HENRY DICKSON.

Commodore J. D. ELLIOTT, *U. S. Navy.*

Annual ratio of mortality, computed from authentic documents.

Charleston, calculation for eleven years.....	1 in 32 $\frac{6}{11}$
Baltimore, calculation for ten years.....	1 in 37 $\frac{9}{10}$
Philadelphia, calculation for nine years.....	1 in 29 $\frac{3}{8}$
New York, calculation for six years.....	1 in 32 $\frac{1}{2}$

Charleston is thus seen to present an annual ratio of mortality rather less than that of New York and Philadelphia, and but little greater than that of Baltimore.

CHARLESTON, *April 24, 1833.*

DEAR SIR: Yours of the 11th, addressed to Dr. S. H. Dickson and myself, was received a few days thereafter. It evinces your devotion to the best interests of our navy, in providing for the health and welfare of those engaged in the service of that important branch of the national defence. With much pleasure I will afford such information as I possess, with the result of my observations since the year 1797.

The yellow fever first appeared in Charleston in the summer of 1794, and continued to be frequently prevalent, from August until a frost, about 23 years ago. Energetic measures were then adopted to pave the principal streets, widen the narrow streets and alleys, and purify and ventilate all the others. The surface of the streets was previously a mass of fermenting vegetable and animal matter; being now either paved or macadamized, this mass of putrefaction has become a surface of stone, incorruptible, and incapable of retaining such corrupting matters. The regular inhabitants, acclimated and native, were always exempt from the danger of yellow fever, excepting their young children, but the effect on strangers and foreigners was certainly very distressing, and justly excited the fears of those subject to its attacks. The annexed table will show that now we very rarely are visited by this malady, and, even when so visited, that it is comparatively limited in its extent and duration. The unacclimated children of the inhabitants have only moderate attacks of bilious remitting fever. Our board of health, composed of our most intelligent and responsible citizens, invariably publish every case of yellow fever that occurs, and every death from that or any other disease, designating the disease in every case. This gives great alarm in every other country north of Charleston, where all inhabitants are alike subject to yellow fever when prevalent among them. But with us it is well known to be extremely limited in its prevalence; although epidemic, it is equally well known to be neither contagious nor infectious. Even this prevalence of the epidemic is almost entirely confined to the boundaries of the city. The well ventilated suburbs on the borders of the two rivers, likewise Castle Pinckney, Fort Johnson, and Sullivan's Island, are exempt from this disease. The officers of the army speak of this station as the Tempe of the United States; and Colonel Bankhead informs us that the returns made for many years to the War Department, from every station in the United States, having been carefully compared and calculated, prove that the port of Charleston is the most healthy of all.

I speak of the well ventilated situations in the suburbs of Charleston as peculiarly free from disease. This does not extend more than a mile or two from the city northwardly. Beyond that, the trees, bushes, and weeds, retaining much moisture, and decaying, the atmosphere becomes charged with malaria in the summer and fall, and violent bilious remitting and intermitting fevers become prevalent. About twenty miles further north, the pine barrens commence, and health is again enjoyed in as great a degree as in any part of the United States. So that in a ride of one hour on the railroad, or in a sail of half an hour, a stranger most susceptible of disease may be in a place of perfect security as to health. The old ship yard on which the John Adams was built is about four miles from town, and sickly, except with precautions which can scarcely be enforced among workmen. I apprehend more difficulty on shore in an extensive ship yard, in enforcing discipline for the preservation of health, than on board of a ship, where every deviation may be promptly discovered and corrected. Having already published some directions for the preservation of health in our neighbouring country places, I can with ease, and will with pleasure, co-operate in digesting, with Dr. Dickson and others, a system of regulations which would contribute very essentially to the preservation of health in a navy yard.

Some years ago, while in the practice of physic, being impressed with the relative health of Charleston among children, I compared the obituary with those of our chief seaports, and found the proportion of deaths under five years to be less, by one-seventh, than all the others, except Boston. The result may

be of some importance to those officers and workmen, who, having families, may be apprehensive of danger from the climate.

I remain, with much esteem and respect, your obedient servant,

JOS. JOHNSON.

Com. J. D. ELLIOTT.

CHARLESTON, *May 2, 1833.*

DEAR SIR: I herewith send you a weekly obituary from the first of January last, to show the diseases prevalent at this season of variable weather, the most trying to all constitutions. The ratio of deaths, for a population of 35,000, will bear a comparison with that of any other city, especially as many from the north, with incurable diseases, spend their winter here to return no more. I likewise enclose an extract from the general obituary, showing the number of years, since 1817, in which yellow fever appeared, and the deaths from yellow fever, contrasted with the whole number of deaths from this and all other causes.

Yours, &c.,

JOS. JOHNSON.

Com. J. D. ELLIOTT, *United States Navy.*

No. 5.

CHARLESTON, *April 22, 1833.*

SIR: We have received your letter of the 11th instant, informing us that the honorable Secretary of the Navy had, at your suggestion, taken into consideration the subject of the location of a naval station at the port of Charleston, and requesting that we would give our general views on the propriety of forming such an establishment at this place.

It gives us great pleasure to learn that the attention of the national government has at length been turned to this subject. It is surely due to South Carolina that some portion of the amount of revenue raised in the State should be expended within its borders, especially when such an expenditure will contribute to promote the welfare of the whole Union.

It will be found, upon inquiry, from persons capable of affording correct information on the subject, that this part of the country abounds in the kinds of timber adapted to the purposes of ship building, (to wit: live oak, white oak, cypress, cedar, and yellow pine,) and that the government, by establishing a navy yard at Charleston, and having the materials worked up on the spot, will save a large sum of money now annually expended in the transportation of live oak timber from this vicinity to the national ship yards at the northern ports, as well as prevent the waste and destruction of this description of trees, occasioned by cutting them down to obtain such pieces as are suited to the construction of large vessels only, and leaving the rest of the trees to rot on the ground.

You will be informed by the respectable men to whom you have addressed your inquiries on this subject, that labor in this city is abundant and cheap, and that there is no deficiency of skillful mechanics among us. Ample testimony will be furnished you of the general health of this harbor, and no doubt can exist that a situation for a naval establishment may be selected in this vicinity, affording a healthful residence for such strangers to a southern climate as it may be expedient to employ.

Your own observation, sir, must have convinced you that, in the intercourse between the United States and the West India Islands the position of this port is much more advantageous for protecting our commerce in those seas than that of Pensacola. You are aware that vessels are sometimes delayed by winds and contrary currents, so as to take a longer time on their passage from Pensacola even to Cuba, than from Charleston to that island; and, owing to the trade winds which prevail for many months in the year in those latitudes, the passage from this port to the Windward Islands is much shorter than from Pensacola.

The establishment of a naval station as far to windward as this port, would furnish the means of protecting our commerce in the West India seas, and of more effectually preventing the traffic in slaves, which is still carried on to a great extent. It appears from the latest and most authentic accounts, that many thousand slaves are still annually brought from Africa to the West Indies, and are landed and sold on the windward side of the French and Spanish islands. It is impossible to exercise due vigilance in preventing this trade from a station so far to leeward as that of Pensacola. It is on record, that vessels have sailed from that port with orders to take a station and cruise off some of the Windward Islands, and being compelled to put back without reaching their destination, either from want of provisions, or from the term during which they were ordered to continue in this service having expired before they could beat up to their station. With a view to the effectual suppression of the slave trade, and the protection of our commerce in the West India seas, it is expedient to employ a number of small vessels-of-war rather than an equivalent force of large ships. However politic it may be to exhibit our national strength, by sending from time to time our line-of-battle ships and frigates into the harbors of Cuba and other West India Islands, still the protection of our trade can best be effected by smaller vessels, which, from their numbers, will cover a greater space, and be present at the same time on a greater number of stations in the West India seas. There can be no doubt that such a force would be more effective if it were divided, and a portion of it stationed in Charleston, than if the whole squadron were concentrated on one point to leeward. The peculiar nature of the southern coast, from Hatteras to the Capes of Florida, requires for its defence, and for the annoyance of the enemy's commerce, a description of vessels-of-war which can run into shoal water, and in that manner protect and preserve their prizes, while their entrance into these harbors may be covered by floating steam batteries, which have been recommended by the commission composed of yourself, General Bernard and Colonel Totten, as best adapted to the defence of this line of coast. We cannot but believe that vessels of both these descriptions may be constructed on more advantageous terms to government in Charleston than elsewhere; and we have no doubt that this port affords the best station on this coast for these vessels, in time of peace, for the protection of our commerce, and the suppression of the slave trade in the West Indies; and, in war, for harassing the commerce of an enemy and defending this line of coast.

There is another important consideration which induces us to think that the government ought to establish a naval station in Charleston. It is the best means in its power to adopt, to shield the south from the evil consequences of measures said to be contemplated in Great Britain in relation to the slaves in the British colonies—measures which, if carried into effect, must terminate in converting the West India Islands into an archipelago of free blacks. A proper regard for the interests of the southern and western States, and, indeed, of the whole Union, requires that the government should exercise the utmost vigilance in preventing the evils of servile war from desolating the Island of Cuba. The vast importance of that island to the commerce of the United States, its proximity to the mouth of the Mississippi, and its peculiar situation in relation to all that rich and valuable portion of our country watered by the rivers which flow into the Gulf of Mexico, render it imperative upon the government to watch over its safety with jealous care, and to use every precaution to preserve it from the fate which awaits the other West India Islands. The interests of the slaveholding states in the south demand, too, no less imperatively, that they should be protected from the dangers which threaten them from the same quarter.

The loss of an amount of property not far short of six hundred millions of dollars, even if its destruction should be effected without violence, would irretrievably ruin the whole south; and we will not dwell upon the manner in which it must be brought about. We believe that our fellow-citizens throughout the Union deprecate a catastrophe so fatal to the interests of the whole country, and will concur with us in the propriety of taking all necessary measures to avert it. It must be evident, from the reasons that have been alleged, that no naval force, stationed to the leeward of Charleston, can be employed to advantage in suppressing the slave trade, protecting our commerce among the Windward Islands, or preserving

the southern States from a whirlwind of destruction likely soon to desolate the West Indies. It is obvious that those islands must be watched and this coast be guarded from a windward station.

From all the foregoing considerations, we are fully of opinion that a due regard for the welfare of the whole nation, as well as a proper attention to the interests of the southern States, renders it expedient, and, in some measure, makes it incumbent upon the government, to establish a navy yard and naval station in the port of Charleston.

We have the honor to be, sir, very respectfully, your obedient servants,

J. R. POINSETT.
D. E. HUGER.
HENRY MIDDLETON.

Com. J. D. ELLIOTT, *U. S. Navy, Washington.*

No. 6.

CHARLESTON, *May 13, 1833.*

SIR: In answer to your document of April 11, 1833, directed to us, under cover, containing interrogatories on the probable number of mechanics which could be obtained at and in the vicinity of Charleston, to work in a dock yard, when established, it might, sir, be considered an act of presumption in us to say how many, or who would or would not work in a dock yard, were one established; but, sir, in answer to your interrogatories, we will respectfully give you an aggregate statement of our mechanics, as in order put:

First. There are eight master shipwrights or firms that carry on business in Charleston, owning from seven to nineteen negro ship carpenters, and twenty white apprentices in various progress of their time. These eight master carpenters own, in the aggregate, one hundred slave carpenters, whose usual wages are one dollar and a half per day.

There are twenty-seven resident white journeymen ship carpenters, whose wages here are generally stationary, at two dollars per day. (Many of our young mechanics have left Charleston to seek employment elsewhere, and many of our best clerks in mercantile houses are among those that have been brought up to some mechanical trade.)

There are about seventy-five transient negroes that work out by the day in ship carpenters' yards, when business will admit of their being employed: their usual wages are one dollar per day. In addition to the last-mentioned colored journeymen, there are many slave mechanics, such as house carpenters, joiners, &c., that may be hired by the month from their owners, at from sixteen to eighteen dollars per month, according to their abilities.

Second. Blacksmiths' shops, in all twenty-eight, work fifty-five fires and employ one hundred and eleven hands: wages for white men seven to ten dollars per week, and wages for black men from twelve to fourteen dollars per month, (among which may be included shipsmith shops, working eighteen fires, and employing thirty-four hands.)

Third. Boat builders, three shops, employing seven journeymen and a few apprentices. Journeymen's wages one dollar and a half per day.

Fourth. Ship joiners. Four master ship joiners, wages two dollars per day; nine white journeymen, wages one dollar and a half per day, and eighteen colored journeymen at one dollar per day.

Fifth. Blockmakers, four shops, very few journeymen. Wages for white journeymen one and a half, and black one dollar per day.

Sixth. Common laborers, for daily work, any number. Wages for transient labor one dollar per day, or 12½ cents per hour; and they can be hired from their owners at from ten to sixteen dollars per month, and found in provisions.

Hoping, sir, you may obtain the object of your necessary absence, (health,) we are,

Very respectfully, your obedient servants,

JAMES MARSH.
JAMES POYAS.

JESSE D. ELLIOTT, Esq., *United States Navy.*

No. 7.

CHARLESTON, *S. C., May 7, 1833.*

DEAR SIR: When I last had the pleasure of seeing you we had much conversation on the subject of granite, stone, bricks, &c., all preparatory to the establishment of a naval station at this place, than which none can be more suitable for all our sloops-of-war and other vessels, and even for frigates, employed by our government in the West Indian seas and Gulf of Mexico, or south of Norfolk.

With regard to granite, as much of this stone can be procured near Columbia, in this State, as would be sufficient to build a city, and on good terms. There are also at that place experienced workmen, stone masons, who would be glad to be employed on reasonable terms, and who can furnish and cut the granite agreeably to pattern. I will recommend you to apply direct to Mr. Nathaniel Ramsey, at Columbia, who will give you every information on the subject, both as to contracts and the transportation of the stone to Charleston. He is informed of my intention to write to you. This gentleman is a son of our historian, Dr. David Ramsey.

As to bricks, none will answer for outside work but the best grey brick, the price of which varies in the market. For this article your agent can make reasonable contracts with the burners and their factors, who are also the factors for the lime burners, and for those who procure gravel. An inferior brick may answer for grouting.

There are here excellent mechanics in every department. None can exceed them for roofs. I will mention one, Mr. John M. Schnierle. But workmen here are, as at other places; you must contract with them; they will make their bargains, and you must make yours; but you must employ our workmen.

I hope all will be accomplished to the mutual benefit of our government, our beloved city, and State of South Carolina.

I have been informed that you had done me the honor of writing to me on these subjects, but I have not received your letter.

I am, very respectfully, your obedient servant,

ELIAS HORRY.

Com. ELLIOTT, *U. S. Navy, Washington.*

No. 8.

BLEAK HALL, *St. John's, Colleton, May 6, 1833.*

DEAR SIR: Numerous engagements, arising chiefly out of the duties incident to this very busy season of the year among planters, have prevented me from replying earlier to your letter of the 18th ultimo. In answering your inquiries, it is but candid that I should premise that, having turned my attention but little to such subject, and having enjoyed but few opportunities of personal inspection and observation, I have scarcely any practical knowledge of the kinds of timber "suitable for ship building."

Your inquiries extend to the "supply of live oak, white oak, and yellow pine which can be obtained in this neighborhood and the southern islands," and have a view to the establishment of a navy yard in Charleston.

I have an acquaintance, more or less intimate, with all the most important sea islands between Charleston and the Savannah river. On all of them, as well as on the adjacent main land, *within the reach and influence of the salt water*, the live oak appears to have been originally one of the staple growths of their forests; and although the axe of the agriculturist has made fearful ravages, it is still found in great abundance in almost every wood, and in some situations constitutes the chief growth. Its "suitableness to ship building," I would infer from the fact that it is constantly used in Charleston and other places for that purpose; and the *abundance* and *cheapness* of the supply, I would infer from another fact, that the squarers of timber are in the habit of coming on here annually, from the north, for the purpose of executing contracts, either for the supply of the government navy yards, or the private ship yards in other parts of the United States. Of the quantity which this immediate neighborhood might contribute, I have not practical knowledge sufficient to answer with much accuracy. Judging, however, of the capabilities of this parish, by the quantity which was procured a few years ago, by certain government contractors, within two or three miles of my present residence, and which, it was said, was nearly sufficient for the frames of two *sloops-of-war*, I would say that eight or ten vessels of that class might be got out within the limits of this parish alone, to say nothing of the other sea islands and the adjacent main land. These contractors were not allowed to range the woods without restraint, and consequently they found some difficulty in procuring *all* of the larger pieces, such as the "stems," the "aprons," and the "stern posts," although they procured some of them. The difficulty of finding trees of suitable bend and size for these large pieces, must be encountered everywhere. Fortunately, there is but one of each required, as I have been informed, for each vessel, and if not to be found here, it could be procured somewhere in the neighborhood, not remote. The *remaining* timbers for *sloops-of-war*, with but very few if any exceptions, and *all* timbers for vessels of smaller size, such as fire ships, cutters, bomb vessels, &c., can be procured in great abundance, both for the building of such entire, and the *repairing* of larger vessels of any size. That the government could be supplied with live oak timber at a much cheaper rate at a navy yard in Charleston than at their other stations on the Atlantic, must be admitted, when the following fact is considered, (which I lately derived from an intelligent individual extensively engaged in that business,) that it costs twenty-five cents per cubic foot for *freight alone*, (to say nothing of insurance and other expenses,) to carry live oak timber from this State to any port north of Cape Hatteras. It forms an unwieldy, heavy, and dangerous cargo, and is illy suited to the accidents of a stormy *ocean* voyage. Hence, I suppose, the reason of the freight being so high. The navigation between the live oak region of South Carolina and Georgia, and the city of Charleston, can, on the contrary, be made with ease and safety, *altogether inland*; and flat-bottomed vessels (constructed for the purpose) being shut in from storms, and enabled to choose their weather, might accomplish their voyage from any part of that region without being exposed to a mile of rough water, or incurring the smallest risk. Live oak timber might be carried from the place of its growth to the city of Charleston, in many instances, in common flats, and in all cases at an expense but a trifle enhanced above the price of the wood and the labor of squaring it. The supply of live oak timber for the *building* of the smaller vessels-of-war, and the *repairing* of the larger classes, would be without limit, were proper encouragement held out by the government for its preservation and extension. But, under existing circumstances, the proprietors of the soil have no inducement to preserve the trees which they have, or of encouraging and extending their growth. The spectacle is, therefore, everywhere exhibited, of these mighty giants of our forests falling daily before the axe; and the finest timber in the world, which has been the growth of centuries, and which centuries to come can scarcely replace, is seen gradually disappearing under the consuming fire of the husbandman. In consequence of the remote and inconvenient location of most of our navy yards, in relation to our live oak timber, it becomes indispensable that the timber contractor should stand between the government and the planters; and whilst with one hand he receives from the government from \$1.25 to \$1.50 per cubic foot for all timber which he delivers at the navy yard, he pays over to the planters with the other only from twelve to twenty cents per cubic foot, as a compensation for what is obtained from them, and that, too, is decided by their own measurement, as to the quantity; a pittance too trifling to form any inducement to *preserve* the timber, and only worth accepting when it becomes necessary to *remove* the timber from the soil for agricultural purposes. This unfair and unequal distribution may, perhaps, be necessary to enable the contractor to cover the expenses and risks of a tempestuous voyage on the open ocean, with a bulky and dangerous cargo. If so, it forms a strong argument against that system which places our navy yards at so inconvenient a distance from the native home of those materials which form the most important item in ship building. I regard the present system, therefore, which is pursued by government, as not only impolitic in a national point of view, but as unjust to this section of the Union. If persevered in, our live oak timber (which, I believe, is admitted to be the best

in the world) must rapidly diminish and finally disappear. Some inducement, worthy of the object, must be held out to the proprietors of the soil to *preserve* what remains of it and *encourage* its cultivation. This can be best and most cheaply effected, I think, by the establishment of some navy yard in the vicinity, which, whilst it will be highly advantageous to the government, on pecuniary considerations, will be just, liberal and patronizing to this section of the Union; and (what is of vastly more importance in the present distempered condition of the public mind in this quarter as to "the *value* of the Union") it will have a happy tendency in removing our sectional jealousies and healing our angry political dissensions. By exhibiting our federal government before the people in the parental attitude of dispensing, with an impartial hand, its benefits as well as its burdens, and by placing it before the minds of our citizens, in the daily exercise of duties which are not only advantageous in themselves, but indicate a friendly regard to their just claims and a proper respect for their feelings and reasonable wishes, that adder's tooth, which has been so long rankling in their hearts, will be plucked out, by which they are persuaded that the government has no sympathies in common with this section of the Union, and that we are the objects of its care only as furnishing victims for its exactions. These dangerous impressions cannot, I fear, be removed by pointing to the remote and indirect (though real) benefits which that government confers upon them, in common with all the citizens of the Union. The mass of our people cannot understand nor appreciate these distant advantages; they require something near at hand; something visible and tangible; evidences of respect to their feelings, which are plain, and they can see; and proofs of parental regard to their interests, which they can touch and handle. They desire that government should place them on an equality with the rest of their fellow-citizens, and that, in regulating its disbursements, the natural advantages of their country and situation should not be overlooked. A reasonable claim this, and one which appeals strongly to the justice and patriotism of our common country. It is a source, then, of peculiar gratification to me, to reflect that the establishment of a navy yard in Charleston is about to be undertaken under such favorable auspices; under an administration which has shown itself worthy of our confidence, and under a President in whose inflexible integrity and sense of justice every reliance can be placed, and whose parental and friendly feelings towards us, I, at least, for one, have never doubted. It is by acting with even-handed justice towards all sections of the Union, and by presenting the government to the habitual contemplation of every citizen, as far as practicable, in acts of parental beneficence, that our sectional jealousies are to be healed, and the "Union preserved." This, it appears to me, ought to be the leading consideration with our federal government in regulating its policy among the States; and although there is sufficient inducement for the establishment of a navy yard in Charleston, arising out of the abundance and cheapness of live oak (and *other* timber, as I shall presently show) suitable for the building of sloops-of-war and the smaller vessels of our navy, and for the *repairing* of those of any size, yet this appears to me to be but a secondary consideration, in comparison with those to which I have just adverted, of its tendency to restore the lost affection of our citizens towards their government, and strengthening the bonds of our Union. Personally, I have no other motives than these in wishing success to the measure; I possess no timber of any kind which I could in any manner dispose of, directly or indirectly; nor is there any prospect that I shall ever possess any. But considerations which spring from my fears for the stability of the Union are sufficiently strong, I am willing to admit, to excite my warmest wishes and approbation of the undertaking. They will also prove, I hope, my apology for indulging in reflections apparently so wide of a direct and concise answer to your inquiries.

With respect to the *white oak* timber to be found on these islands, I would remark that the quantity is not so great, nor could a supply be afforded in proportion to that of the live oak, although very fine trees are to be found in almost every wood, and in some it is very abundant. For the purposes to which we apply it, such as in making wheels, carts, wagons agricultural implements, &c., it is of the best quality, both for strength and durability. Of its suitability for ship building, (in which I suppose it would be used chiefly for outer planking,) I am not competent to judge. The older and larger trees acquire, after being saved for some time, and exposed to the sun and atmosphere, an almost flinty hardness. This, without it be submitted to some process with which I am not acquainted, would be an objection to it, I suppose, as it might indicate a deficiency in the quality of "toughness," so called.

But it is not from the sea islands that the government must expect to derive its supply of *white oak* timber. Although these islands can furnish a reasonable share of that kind of timber, and of excellent quality for all purposes, except, perhaps, where it is necessary to *bend it suddenly*, yet the supply would, in a few years, be exhausted, were it not for the great abundance of it to be found on all the strong lands and alluvial river banks in the interior of this State. In such situations, and particularly in the latter, I have seen the white oak flourish in great abundance and perfection; standing up a shaft, tall, straight, large in girth, and towering for forty, fifty, or sixty feet, without a knot or branch. Without having had any opportunity of observing how the wood from such trees works up in carpentry, I would nevertheless hazard an opinion that they possess all the good qualities of the best timber of the kind, in any part of the world. I consider all timber of this kind as embraced in your inquiry, which can with convenience, safety, and at a reasonable expense of money and time, be delivered at the navy yard, whether it be brought from a distance of five or one hundred and fifty miles. Bearing in mind that the white oak timber is to be procured chiefly on the banks of the rivers, or within a few miles of some water-course, the means of transporting it cheaply at once suggests itself; in suitable boats, if the timber be previously sawed, or in rafts if it be not sawed. It is true that white oak, in a green state, will not float; but coupled in a raft with one or two stocks of *pine* timber intervening, (which would be all wanted at the ship yard,) there would be no greater difficulty, I imagine, in bringing down any quantity of it, than is now experienced in any of those rafts which we daily see floating on to the saw-mills in Charleston.

Of yellow pine timber, of which you next inquire, we have not a great abundance on the sea islands, and that which we have cannot be spared. Of this timber, however, there could be no deficiency at any time in any navy yard established in Charleston. South Carolina is covered with the pine; our inland navigation is, at certain seasons, almost blocked up by rafts of that timber on its way to Charleston, and our saw-mills in that city alone might furnish it of the best quality and in sufficient quantity to supply half the navy yards in the United States. Of its cheapness, a judgment may be formed from the fact that it is exported from Charleston in great quantities, not only to the West Indies, but to the north.

In communicating to you the above information, in reply to your inquiries, I would have you to bear in mind that it contains only my own opinions on those subjects, which may be erroneous in many

respects, but which I have not had any opportunity to correct by interchanging opinions with my neighbors. Although certainly desirous of seeing the object accomplished which forms the motive to your inquiries, I should, nevertheless, be most unwilling to promote it, in any manner, by putting forth erroneous opinions which might lead others astray. It would be altogether more agreeable to me, as a citizen of South Carolina, that the government should appoint competent individuals (who are at the same time candid and impartial) to examine into the resources of this State, with a view to the establishment of a navy yard in Charleston. A report from such men would be free not only from the bias, but the *suspicion* of self interest; and I should then not doubt the result. It gives me pleasure to see, by the newspapers, that the Secretary of the Navy is likely to visit Charleston in the course of this spring. I hope you will induce him to make a visit to these islands, and let him have an opportunity, as far as his time will permit, to examine into these matters for himself. I flatter myself that you will not allow yourself for a moment to entertain a doubt of the gratification it will afford me to extend to yourself and him, and any others who may be disposed to accompany you, all the facilities in my power in making that inspection; and I hope you will do me the favor to make our poor house the home of your party whilst in this neighborhood. Should such a visit appear to you likely to be agreeable to him, I must ask of you the kindness to assure Mr. Woodbury of the pleasure which his company would afford me, and to make such representation of my views as you may deem necessary, to remove any scruples which he may entertain on that point.

I am, dear sir, with great respect, your obedient servant,

J. TOWNSEND.

J. R. POINSETT, Esq.

No. 9.

CHARLESTON, July 12, 1833.

DEAR SIR: I comply with the request of Commodore Elliott in transmitting the enclosed to your Department. He will, no doubt, (if explanation be necessary,) assign reasons for this disposition of it.

Very respectfully, sir, your obedient servant,

THO. BENNETT.

To Hon. L. WOODBURY, *Secretary of the Navy.*

CHARLESTON, July 11, 1833.

DEAR SIR: The suspension of this reply to your favor of the 11th of April has been the result of circumstances of an imperative character. The time which has elapsed has, however, been made profitable in supplying the deficiencies of my own knowledge in reference to the several points of inquiry submitted, and consoles me in the reflection that you will not regard me negligent of the great interests you seek to promote, if to that delay you are debtor for information of more value than a mere expression of opinion.

Your several inquiries, "does the country contiguous to Charleston, and within striking distance, afford a supply of live oak, white oak, yellow pine, and masting timber, of sufficient quantity and quality to meet the wants of an establishment for the constructing, masting, and repairs of sloops-of-war and smaller vessels," I will endeavor to answer in the order you have assigned them.

I understand by "striking distance," that distance at which the transportation of the material can be effected without an extraordinary expenditure, and at which the current market prices invite individual competition.

The live oak tree, as you know, delights in a salt atmosphere, and flourishes throughout the whole extent of our coast, within twelve or fourteen miles of the ocean, acquiring the greatest dimensions and best qualities on our sea islands. The trees are less numerous to the north than to the south of Charleston; and have in the latter section, consequent on the adaptation of the soil in which they abound to the culture of cotton, suffered more from the hand of the cultivator than of the artist; yet considering the vast extent of country genial to their growth, and the many thousands of acres not yet subjected to cultivation, a doubt cannot exist that a supply for many years can be furnished to such an establishment. My personal inspection of several places within twelve or fifteen miles of the city confirms this opinion, and, if permitted to indulge the reasonable suggestion that they are equally numerous throughout the southern section of the State, I should be disposed to venture the assertion that the supply would be most abundant.

Another evidence of the correctness of this representation may be traced in the numerous contracts executed in this state by the agents of northern ship builders, whose interests would be likely to direct them to those places only (uninfluenced by other considerations) which yield the cheapest and most abundant supplies.

And here, incidentally, permit me to say that the oak of this State is preferred to the Florida oak, by those who have tested with the greatest care their respective qualities; this opinion is expressed with perfect confidence by one of our most experienced ship builders, who asserts that the grain of the wood is more intricate and compact, less apt to open in fissures under the influence of heat, of a more crooked growth usually, and better adapted to the frames of ships: its durability is so generally acknowledged that I need scarcely advert to it. If it be, indeed, a fact that this climate and soil are thus genial to the production of the *very best trees*, may we not expect that the future favors of the government would immediately produce that care and attention, on the part of landholders to their young trees, which would ensure an exhaustless supply of this valuable wood?

The resources of our State for ship building are better known in every particular than in its capacity to furnish supplies of white oak. From authority entitled to great respect, I have been induced to believe that large tracts of low ground, abounding with that wood, remain neglected, from the limited demand and inadequate prices offered for it. The difficulty of getting it to market grows out of the obstructions interposed in transporting it over wet and soft lands to a landing, and (as it is specifically heavier than water) sending it in lighters to the city. The price usually paid for it here will not compensate the time and labor expended in procuring it.

The section of country which furnishes yellow pine for plank, stocks, masts, &c., commences about thirty-six miles from the coast, and extends generally to one hundred. The Edisto river and its tributary streams alone have supplied this market, both for domestic consumption and-commerce, for more than

forty years; at present, complaint is made of the distance they have to transport the timber from the stump to the landing, as the most onerous and expensive, though but little exceeding the average of three miles, through the whole extent of the river. It is difficult to estimate precisely what increase of price will compensate the gradually increasing distance of land carriage, as a series of more than thirty years furnishes no data, the timber delivered in this market in 1803 being actually higher in price than in 1833. It is little more than conjecture to say that two cents per cubic foot per mile will be an adequate compensation; this will increase the present prices to twelve cents per cubic foot until they shall have reached the distance of four miles, and fourteen cents to five miles, &c.; yet, in referring to the time past, we must infer that an increase of price will depend mainly on other contingencies.

A supply for forty years more may with reason be asserted from this river alone, yet our attention is now directed to another, the *Salt Catcher*. When this stream shall have been made navigable by the removal of the long accumulated raft wood that now obstructs its course, a new and hitherto untouched section of country will be open to us, abounding with the finest growth and quality of trees.

The shafts of the pine trees of this section of country usually rise to the height of fifty feet, and are frequently found eighty feet, and sometimes, though rarely, one hundred feet. It is very common to find them sufficiently bowed for ship's beams, and, by careful selection, large enough for the masts of frigates. The durability of the pine, cut down during the winter, and well seasoned before it is used, has been known to extend to thirty-five or forty years *in ships built at this port*, and is affected by dry rot only when used directly from the forest. The salt water seasoning of pine is an effectual preventive of this untimely decay.

I annex the prices of the several kinds of wood adverted to in this letter, with a view to furnish you a criterion for judging whether, in comparison with other southern markets, (considering this an exporting city,) the supply is not so great as to furnish a conclusive argument to show a capacity to compete with either, and hence infer its adequacy to meet the call of the establishment contemplated.

Live oak in the standing tree	10 cents per cubic foot.
Live oak, rough hewed, at market	40 to 50 cents per cubic foot.
White oak in timber.....	12 to 15 cents per cubic foot.
Pineplank stocks (very prime).....	\$10, to \$12
Masts 50 to 60	10 to 15 } each.
Masts 60 to 80	20 to 40 }

Should you require further information, or any explanation of the foregoing, I shall be happy in being the means of supplying it.

With the highest respect and esteem, dear sir, very truly yours,

THO. BENNETT.

Com. J. D. ELLIOTT, *Washington*.

No. 10.

Statement of the comparative advantages of Charleston over the cities south of New York, which are constructing railroads and canals to facilitate their communication with the country west of the Alleghany mountains.

CANONSBURGH, January 7, 1833.

GENTLEMEN: Our mutual friend, Mr. James Nicholson, has suggested to me the utility of bringing to the view of the people of the western States the advantages of the port of Charleston over those of the United States generally, and especially over all the ports south of the Chesapeake. At this moment efforts are making in all the Atlantic States to facilitate the communication from the west to their own ports and cities, and the people of the west are cordially uniting to aid those efforts. We deem it, therefore, due to ourselves to point out the superior advantages of this port and city over all those which are now contending for the trade of the west. We believe that it in some respects surpasses New York, the southern coast being more accessible in the winter season, and this bay being always free from ice. It certainly possesses advantages over Philadelphia, Baltimore, and Washington cities, where millions of dollars are being expended to open a communication with the Ohio river and the great valley of the Mississippi. Its proximity to the ocean, facility of access at all seasons of the year, and its spacious and secure harbor, give it a decided superiority over either of the ports above mentioned. We believe the existing accommodations, afforded by the extensive and well conducted wharves and numerous storehouses, to be sufficient for a more extended commerce than Charleston now enjoys; and that these could be increased very extensively if the trade should ever be so augmented as to require greater and more ample accommodations. Ships can now be discharged with ease and dispatch, and merchants are enabled at once to transport their goods, to the places of deposit. We believe that Charleston possesses advantages over any southern port of the United States. Vessels can make three voyages to and from Charleston and Europe in the same period of time consumed in making two voyages to and from the Gulf of Mexico and Europe. In the latter, vessels pass on their passage out near Charleston, a part of the distance requiring ten or fifteen days; and the passage home is longer, and more intricate and dangerous. It is believed that Charleston is more healthy for the crews of northern or foreign vessels than any southern harbor where they have to remain in fresh water rivers; besides the loss of men while in such ports, vessels are frequently exposed to great inconvenience on leaving them, being compelled to put into other ports for assistance, or to continue their voyage with sickly or diminished crews. We believe that Charleston is better situated, and enjoys greater advantages, than any of the above-named ports for trade with the West India Islands, and especially with that of Cuba, whereby this market is supplied abundantly and cheaply with all the products of the West Indies, which it receives in return for the lumber, rice, and other products of Carolina.

In order to corroborate these statements, if they are correct, or to point out the errors which may have been inadvertently committed, I beg leave to propose to you the following queries, earnestly requesting you will add such further information on the subject as your long experience and intimate knowledge of the trade of this port will enable you to give.

First. Do you consider the harbor of Charleston secure, sufficiently spacious for a very extensive

commerce, and easy of access at all seasons of the year, and also well supplied with diligent, active, and experienced pilots? and what are its advantages compared with other ports south of this latitude?

Second. Are the existing wharves and stores sufficient for the commerce of Charleston in its most prosperous state? and might they not be considerably increased if it were necessary to do so?

Third. What is your opinion with regard to the health of this port, as compared with that of other ports in the United States, and especially of those south of the Chesapeake?

Fourth. Do you believe the communication between Charleston and any port in Europe to be safer and more expeditious than between those ports and the Gulf of Mexico?

Fifth. Is not Charleston very advantageously situated for the trade with the West Indies? Is there not at this time an active commerce carrying on between this city and Cuba; and is not this market at all times well supplied with West India produce?

Sixth. What do you suppose to be the capital vested in wharves and stores and other fixtures? What the floating capital, which may be employed in trade? And what are the means which the banks in this city possess of giving facilities to mercantile transactions?

Seventh. Is there not an abundance of the best materials for building and repairing vessels, and good, faithful, and skillful mechanics and ship builders?

Eighth. What are the comparative expenses of this port with those situated south of it?

I am, gentlemen, very respectfully, your obedient servant,

J. R. POINSETT.

MESSRS. CHARLES EDMONDSON, JOHN STONEY, JAMES ADGER, JOHN ROBINSON, and T. TUPPER.

CHARLESTON, January 21, 1833.

DEAR SIR: The undersigned, to whom your communication of the 7th instant was addressed, have been prevented by their various occupations from taking the subject into consideration until Friday last. In replying to your inquiries in the order in which they are put, they beg leave to refer you to the accompanying document,* signed by a number of respectable shipmasters, other than those belonging to the port of Charleston; and if you think it can be strengthened by more names, they can be obtained. To the second interrogatory we reply, that the existing wharves and stores are sufficiently extensive and commodious for successfully, and with the greatest facility, conducting and carrying on business to double the extent of that now enjoyed by Charleston; and if it should be found necessary, from an increase of trade, these accommodations can be extended to meet it. With regard to the health of this city, if the bills of mortality be the proper criterion to estimate it, it will not lose by a comparison with any city on the continent, in proportion to its population. From these returns,† it appears that only one in every 48 $\frac{1}{10}$ dies annually; and it must be observed that the amount of deaths is swelled by the great number of pulmonary cases not having their origin among us, but of persons who come here from the north to avoid the severity of a northern winter. Another evidence of the healthiness of the city, particularly among our seafaring brethren, is to be found in the returns of the Marine hospital,‡ and the harbor master's return of arrivals in the course of one year, which are herewith submitted.§ By the latter, it appears that during the last year upwards of 10,000 seamen (exclusive of those employed in State coasters,) visited our port, of which number 227 were received into the Marine hospital, and only 10 died; and it is worthy of remark, that many of these cases are from accidents and diseases contracted elsewhere and brought to this port, and have, therefore, nothing to do with the general health of the city. By reference to the returns made by the physicians of the Marine hospital, it will be seen that in five years 1,354 patients have been admitted, and only 88 have died. These returns, in our opinion, exhibit a state of health unknown anywhere on this continent south of New York; and it may be expected still further to improve, particularly among seamen, as the houses for their accommodation are daily improving, which produces among them increased habits of temperance and regularity. We consider, also, that the natural advantages of our situation, being surrounded by salt water, and in summer enjoying daily a sea breeze, contribute very much to our health, and give us thereby a decided advantage over fresh water harbors to the south of us. Our proximity to the Atlantic ocean, being within one hour and a half's sail from the city to its wide-spread bosom, presents a facility of ingress and egress not enjoyed by any other port to the south, from New York to New Orleans, both inclusive; from which circumstance, among other advantages, vessels make their passage from Charleston to and from Europe much more expeditiously than from any other ports south of us. The port of Charleston possesses peculiar advantages for carrying on successfully the trade of the West Indies, and especially to the Island of Cuba, whence, it is believed, the southern and southwestern States draw their chief supplies of coffee, which is exchanged principally for rice and lumber. And when our communications with the west shall be rendered more easy and expeditious, by the railroads now in successful progress to the west, from whence a large accession of the products of that country will be added to our exports to the West India Islands, the trade to those islands may be increased to an illimitable extent, and their produce, sugar and coffee, received in return on the most favorable terms; and from there generally being a large supply of these articles at all times in this market, purchases can be made on very advantageous terms to the buyer. It would be difficult to estimate, with accuracy, the capital invested in wharves, stores, and fixtures, or what is the amount of floating capital now employed in trade in this city. Suffice to say, that there is as much capital now afloat as would be sufficient to carry on advantageously three times as much trade as we possess. And our *six banks* can furnish, if necessary, any amount that an increased trade may require.

Charleston is also advantageously situated for building and repairing vessels; we possess the best materials, and are well provided with faithful and experienced mechanics in every department; and taking into account the extraordinary durability of our timber, and our slave labor, vessels can be built here as cheaply as in any State in the Union. The disbursements of a ship, and her expenses generally, in the port of Charleston, are much more economical than in any port to the south of us.

We have briefly recapitulated some few of the advantages enjoyed by the port of Charleston over any other between New York and New Orleans, the latter inclusive; which leads us to regard it as the most favorable, as well as the natural, outlet of the produce of the west. We believe that, if these

* See appendix A.

† See appendix B.

‡ See appendix C.

§ See appendix D.

advantages were more generally known and fully appreciated in that interesting section of our country, measures would be immediately adopted to co-operate with us in forming a chain of internal communication, that would indissolubly unite us in commercial intercourse—an event which every friend to his country must earnestly desire. We regret that we are prevented, by our avocations, from pursuing this subject more fully.

We are, dear sir, yours, respectfully,

CHAS. EDMONSTON.
JOHN STONEY.
JAMES ADGER.
JOHN ROBINSON.
T. TUPPER.

J. R. POINSETT, Esq.

The above interrogatories having been submitted to Mr. James Marsh, a respectable ship builder of this city, he has favored us with the following information:

The harbor of Charleston may be considered as secure as any other of the ports of the United States on the coast of the Atlantic or the Gulf of Mexico. Fewer accidents occur from vessels breaking adrift from their anchors or fastenings on shore than are known in other harbors, and it is difficult to find greater security in any port from winter gales. The harbor is very spacious—more than sufficient for three times the number of shipping ever in it. Indeed, only a small part of the harbor is ever occupied; and the most extensive and best portion of it, that from the centre of the city to Lamprie's Point, a distance of three miles, with a depth of water of from five to seven fathoms, is seldom used, in consequence of the business having been transferred to the lower part of the town.

The pilots of this harbor are men of respectability and good moral habits, and accidents very rarely occur to vessels under their charge. Vessels drawing from 16 to 18 feet can pass the bar at common tides.

With regard to its advantages over other ports south of it, the report made by Captain Kearney, of the United States navy, states: "Commensurate with the depth of the channel over the bar, the importance of its location in regard to its proximity to the West Indies, and the greater facilities it affords cruisers in that quarter as a rendezvous in the winter season, being considered, it presents many advantages claiming attention.

"Charleston lies nearer the range of our West Indian trade than any other port south of the Chesapeake, capable of affording equal protection in war, and repairs and supplies. In case of distress, the gulf stream facilitates your progress, and carries you within a few hours' sail of the port.

"Sailing again from Charleston, you can avail yourself of the variable winds which prevail as far south as the Bahamas. By keeping to the eastward as far as is necessary to gain the longitude of the passages to the West Indies, a short passage can be made; and it is practically known that a vessel can reach her cruising ground about the east end of Cuba, or islands further to windward, in less time from this port than from any part of the Floridas or ports in the Bay of Mexico, which lie west, directly to the leeward. Sailing up the south side of Cuba is found very tedious and almost impracticable, and a vessel must make a very circuitous route to gain the Windward Islands from these places, whereas from Charleston the course is direct."

With respect to the existing wharves and storehouses, and the practicability to extend them if necessary, it may be remarked that they are now sufficient for a great deal more trade than Charleston enjoys, and that scarcely more than one-fourth of the fronts upon Ashley and Cooper rivers are occupied.

With regard to the health of the city, the same experienced officer, who resided here some time, says: "Vessels coming into Charleston during the summer season, free from epidemic, will, with ordinary care, and keeping the seamen from dissipation, (a precaution necessary in every port, and not more so in Charleston than in any other port of the United States,) enjoy as good health as in any city in the Union. And in the winter, Charleston is more healthy than any northern city. The yellow fever is of rare occurrence. From 1815 to 1825, a period of ten years, there were only three years in which that disease prevailed; and in a population of nearly 40,000 souls, and an annual influx of about 10,000 strangers, the deaths by yellow fever in these three years amounted to only 696, of all classes and ages."

The advantages of Charleston over the ports south of it, for the commerce of Europe, are many and manifest. The facilities of getting to sea, already mentioned, the proximity to the gulf stream, and being so much further east and north of those ports, by which it is placed nearer Europe, and the difficult and dangerous navigation of the Bahama banks and the Gulf of Mexico and Florida are avoided, give to this port a decided preference over all others south of it.

Charleston is not only advantageously situated for the trade of the West Indies, as before stated, but is abundantly supplied with the produce of these islands, and its markets are well stocked with provisions, vegetables, fruits, and refreshments of every kind, that can be required by the crews and passengers in ships arriving at its port after long passages.

There is an abundance of the best materials for building and repairing ships and smaller vessels. Our builders are skillful, and our mechanics good. Estimates have been offered to build at as low a rate per ton as in the city of New York. The expenses of ships in this harbor are considered to be more economical than in any port south of it. All which is respectfully submitted.

JAMES MARSH.

APPENDIX.

A.

To captains commanding ships trading to the port of Charleston, S. C., and other ports in the United States:

Do you consider the harbor of Charleston secure and sufficiently capacious for a very extensive commerce, and easy of access at all seasons of the year, and also well supplied with diligent, active, and experienced pilots? And is it not the most commodious and economical port in the United States, to the southward of New York, in point of facilities in loading and storing cargoes, and the expenses attendant thereon?

CHARLESTON, S. C., January 10, 1833.

We, the undersigned, do reply to the above inquiries fully and unqualifiedly in the affirmative.

S. Rich, jr., ship *St. Cloud*, of Castine, Maine; Edward Candler, ship *Tacitus*, of Boston; Joshua Bailey, ship *Superior*, Portsmouth, N. H.; Richard E. Orne, ship *Saxon*, Salem, Mass.; Daniel Libbey, ship *Caroline Augusta*, Boston; Charles F. Long, ship *Meridian*, Newburyport; Francis Hunter, commander of the British ship *Andromache*; John Wm. Beeton, commander of the British ship *Raikes*; Henry Dott, commander of the British brig *Norna*; Adam McMinn, commander of the British brig *Ivanhoe*; Hampton Stuart, of ship *New London*, of New York; Victor Constant, master of bark *Roman*, of Boston; Caleb Heath, master of ship *Walter Scott*, Bath; William B. Drew, ship *Rambler* of Duxbury; Reuben Hopkins, brig *Cynosure*, Boston; Job E. Brewster, ship *Joshua Bates*, of Duxbury; Ebenezer A. Shaw, of brig *Congress*, of Boston; Matthew Luce, of bark *Norfolk*, of Boston; Nathaniel Thomas, ship *Grafton*, Boston; James Gray, bark *Leda*, Boston.

B.

The bills of mortality of the city of Charleston, for the last five years, exhibit 3,611 deaths in a population of 35,000; which, on an average, is 722 per annum, being *one* in every $48\frac{47}{100}$, or a little over two per cent. For the year 1832, the deaths were only 560, which is *one* in every $62\frac{40}{100}$.

C.

The Marine hospital record book furnishes the following statement of the number of admissions and deaths, for each successive year, from October, 1827, to October, 1832.

	Admissions.	Deaths.
From October, 1827, to 1828	319	26
From October, 1828, to 1829	248	11
From October, 1829, to 1830	295	22
From October, 1830, to 1831	265	19
From October, 1831, to 1832	227	10
Total	<u>1,354</u>	<u>88</u>

ALEX. L. BARON, P. M. H.

CHARLESTON, January 17, 1833.

D.

Total of arrivals in the port of Charleston during the years 1830, 1831, and 1832, not including vessels coasting within the limits of the State of South Carolina.

Arrivals in 1830.

Ships and barks.. 188	Average of crew to each, 14 officers and men	2,633
Brigs	Average of crew to each, 9 officers and men	1,926
Schooners	Average of crew to each, 6 officers and men	3,726
Sloops	Average of crew to each, 6 officers and men	876
Steamboats	Average of crew to each, 10 officers and men	670
Total	<u>1,239</u>	<u>9,831</u>

Arrivals in 1831.

Ships and barks.. 179	Average of crew to each, 14 officers and men	2,506

Plan of Charleston harbor.

No. 12.

NAVY DEPARTMENT, *May 28, 1833.*

Sir: I have to acknowledge the receipt of your various letters, and the accompanying documents addressed to the President and to this Department by yourself and Commodore Elliott, on the subject of a naval station at Charleston, South Carolina.

Permit me to assure you that it has given me great pleasure to examine the subject fully, in addition to the personal inspection recently had of the harbor. Should the President, or this Department, after mature reflection, conclude to adopt any of the suggestions made, as to an increased use of Charleston as a naval station, or as to the establishment of a navy yard near that city, the result will in due time be laid before Congress.

I have the honor to be, very respectfully, your obedient servant,

LEVI WOODBURY.

JOEL R. POINSETT, Esq., *Charleston, South Carolina.*

No. 13, A.

To General Andrew Jackson, President of the United States:

The memorial of the mechanics, handicraftsmen, and other citizens of Charleston, respectfully represents: that they have for many years experienced, with the deepest concern and regret, the absence of those attentions which characterize the immediate favor of the general government. Cherishing an ardent attachment to their country, proud of the noble fabric which animates and sustains it, your memorialists have ever yielded a cordial and spontaneous assent and support to every measure calculated to perpetuate her political institutions, to advance her interests, or to promote her glory; they can, therefore, discover no satisfactory cause to influence an alienation of that patronage to which, in common with the citizens of other States, they respectfully conceive themselves entitled; nor do they intend, or are disposed, to insinuate that the entire neglect of which they complain arises from partiality in the heads of departments. It is alone their purpose to state that it exists; to show that a remedy has been sedulously, but unsuccessfully, sought, and most respectfully to solicit your consideration of a subject so vitally important to them, and, as they are of opinion, to the benefit of the nation.

Your memorialists will not refer to similar applications made previous to your administration; those subsequent are sufficient to establish the willingness with which they have acquiesced in every reasonable ground for withholding from them every part of the public contracts, and the total insufficiency of these grounds, when tested by experience. To one of the applications of your memorialists, distinctly soliciting employment in the construction and equipment of small vessels, the building of which was authorized by an act of Congress, they were answered, that the materials of inadequate size at the different navy yards, and such as were unsuited to the construction of larger vessels, could be thus economically used for sloops-of-war. This answer produced the effect intended; your memorialists not only acquiesced, but admired the wisdom and prudence of those to whom the expenditure of this appropriation had been confided. The unsubstantial character of this reason was, however, soon made apparent. A committee of the honorable House of Representatives of the United States, in the investigation of a subject connected with this branch of national polity, were answered by the Commissioners, that the materials procured for the larger class of vessels could not be judiciously used for these; their value, and the labor requisite to reduce them to suitable dimensions, forbade it. To another application it has been replied, "We cannot doubt but that the hull of a vessel can be as cheaply constructed in Charleston, and as well executed, as elsewhere, but that the rigging, sails, et cetera, create exorbitant bills." This objection is so easily removed, that your memorialists are only surprised that it should have been interposed. Those articles may be supplied from the cheapest sources in the United States, until they could be procured on like terms in this place. Your memorialists will presume to suggest that this evil, for which they have ventured to propose a remedy, has its origin in the quarter of which they complain. It cannot be expected that the merchants and others engaged in the sale of those articles, and the mechanics by whom they are wrought and fitted, can, while the patronage of the general government is wholly withheld, in their pursuits, thus rendered limited and precarious, afford supplies and services on the moderate terms which a more extensive business, inviting competition, would afford. Such reasons your memorialists conceive are inconclusive and illusory.

Your memorialists would further respectfully remark, that proposals for contracts for any other than army supplies, and with very few exceptions from the Navy Department, are never published in any of the gazettes of this place; and usually when, from northern papers, or accidentally from other sources, your memorialists have heard or understood the wants of the general government, the time has become

so limited that the necessary communications to the several departments cannot be made, and your memorialists are thus not permitted to compete for employment or the supply of materials. From this cause, in part, it has arisen that the State of South Carolina, although capable of furnishing the very best materials for public uses, is wholly excluded from any participation in the profits resulting from such contracts with the general government. While on this subject, your memorialists cannot refrain from calling the attention of the general government to the peculiar situation of South Carolina as regards the sister States in her immediate vicinity. Although on the first glance it may appear that she is the only State interested, yet upon consideration it will appear manifest that the States of North Carolina, Tennessee, Kentucky, Georgia, and parts of Alabama and Virginia, are all deeply interested, as large quantities of their produce, by the facilities afforded to internal commerce, are continually pouring into the chief city of South Carolina, and, by the increased and increasing facilities now effecting in their internal communications, larger quantities may be naturally expected to arrive at their commercial depot, ready for the use of the general government.

Your memorialists would further represent, that the policy heretofore pursued oftentimes produces distressing effects to the whole community of which they are members. The immense amount necessarily withdrawn from circulation in this State, and expended in others, produces not only a uniform depression in its exchanges, but in real estate, while it paralyzes every pursuit and tends to impoverish every citizen. The drafts of the Treasury are not unusually announced by a pressure upon the money market, and often by a consequent derangement of the concerns of those who are dependent for commercial accommodations in the transaction of business. From such embarrassment and evils your memorialists conceive they might and ought to be protected by the general government; nor are they willing to believe that, advised of the pernicious effects of these measures, the possible contingency of realizing a trifling profit will be deemed a sufficient reason for their continuance.

Your memorialists, a few years ago, demonstrated to the general government that it would be more economical, and also attended with the loss of a less number of lives, for the government to cause the squadron doing duty on the West India station to rendezvous in the harbor of Charleston. That time has fully solved this problem, by proving its perfect accuracy, let past experience tell; and whilst other stations have been visited and ravaged by disease, Charleston has retained its usual healthiness, surpassing any other port in the Union. Your memorialists would further respectfully represent that foreign vessels-of-war are oftener seen in our harbor than our own national vessels; the effect of this upon a commercial community, continually receiving accessions from the amalgamation of foreigners, can be better conceived than described. Your memorialists cannot conjecture the cause of this neglect on the part of the general government.

In support of the claims and pretensions of your memorialists, they would respectfully illustrate, by a reference to facts, the hardships and privations growing out of an exclusion from a participation in the public contracts. During the ten years preceding, millions of dollars have been collected at this port, independent of the immense amount for which this State is tributary to the commerce of our sister cities of the northern States. During the same period the whole amount disbursed by the navy agent at this station has been a few thousand dollars; a very considerable portion of which has been applied to the completion of contracts entered into out of this State, and nearly the whole of the ordinary expenses of the navy on the southern coast. The sum paid to our fellow-citizens, whether for building, repairs, supplies of materials, or outfits, is within the limit of fifty thousand dollars. So large a balance, therefore, as remains subject to the disposal of government, and which, under the existing policy, is withdrawn from the circulating currency of this State, and oftentimes in specie, necessarily causes that exhaustion to which your memorialists refer.

The relative rights and duties of these States furnish a subject on which your memorialists will not presume to offer you their views; convinced that your own commentary would mark in stronger character and with more luminous exposition those which pertain to each. This conviction is irresistible. A life sedulously devoted to the best interests of the nation in the exercise of various offices which have elicited extraordinary intelligence, and which, from the unreserved character of our government, is made familiar to every citizen, commands our highest confidence, respect, and admiration. Under these opinions they very respectfully submit their case, most earnestly soliciting your consideration and favor.

CHARLESTON, December 20, 1833.

MY DEAR SIR: At the request of several respectable citizens of Charleston, I have this day signed a memorial addressed to you, soliciting the establishment of a naval depot in this harbor. As I have before

given my views very fully on this subject to the Secretary of the Navy, I need only assure you that such a measure, while it would be only an act of justice to this section of the southern country, would contribute essentially to allay the hostile feelings entertained by the mechanics of this city towards the federal government, and promote the good understanding which ought to prevail between the general and State authorities.

I am, dear sir, very respectfully, your obedient servant,
Gen. ANDREW JACKSON, *President of the United States.*

J. R. POINSETT.

C.

CHARLESTON, *February 28, 1834.*

HONORED SIR: In accordance with the views of a large number of my fellow-citizens, I take the liberty of presenting to your excellency the accompanying petition, and of adding some other observations which have suggested themselves to my mind, and may, perhaps, tend to present the subject in a more favorable point of view.

The harbor of Charleston is navigable for vessels of the class prayed for in the petition, at all seasons of the year, and no obstruction of any kind whatsoever is offered by the climatè to their ingress or egress; besides, it is sufficiently capacious for the navy of the United States to anchor in, having within the bar, in all its parts, four or five fathoms of water. The vessels are sheltered from the most violent winds, and, in case of necessity, in two hours they can be at sea.

From the peculiar position, too, of the harbor, the commerce of the West Indies can (in the opinion of our most experienced commanders of vessels) be more easily protected by a force which will rendezvous at Charleston, than at any other port south of the Delaware, attended also with a less expense of life; and this is apparant from a few facts. The majority of the disasters which attend upon our commerce among these islands, generally occur among what are called the Windward Islands. Now, by taking advantage of the variable winds which prevail more or less at all seasons of the year, as far south as the Bahama banks, a vessel starting from Charleston harbor can keep to the eastward until she arrives in the longitude of the passage to the islands, and will make her passage to the cruising grounds in less time than from any other port south of Charleston, either in the Floridas or Gulf of Mexico; it being well known that the passage to the south of Cuba is not only tedious and circuitous, but almost impracticable. In case of distress, the current of the gulf stream wafts the unfortunate vessel within a few hours' sail of her port of repairs. Besides these advantages of position, Charleston has many advantages over other ports, from her climate being always healthy in summer and winter, except in some years the yellow fever makes its ravages among us, and this does not occur more than once or twice in a period of ten years. Its general healthiness may be inferred from the well known fact that, while surrounded, a few years back, by the distressing scenes of cholera and other malignant diseases, she has not had a case of disease which might be termed either contagious or infectious.

There are other considerations, which no doubt will suggest themselves to your excellency's mind, such as the means of building, repairing, refitting, provisioning, watering, cheapness of materials, recruiting, &c., which it might be deemed intrusive and presumptuous in me to notice further than merely to mention as easily and cheaply procured, with abundance of mechanics ready and willing to work.

From your excellency's desire, as expressed in a whole life of public service, doing the greatest good to your whole country, for which you have, again and again, periled all that man holds dear, we trust that your opinions may coincide with ours, and that granting the request of the petitioners will be one more benefit conferred on the Union in addition to the many already bestowed.

I subscribe myself your most ardent admirer and servant,

JOHN STROBECKER, *per* CHARLES C. STROBECKER.

General ANDREW JACKSON, *President of the United States.*

No. 14.

NAVY DEPARTMENT, *March 7, 1834.*

GENTLEMEN: The President of the United States has referred to this Department a letter from Mr. Poinsett, and another from Mr. Strobecer, with a memorial from numerous citizens of Charleston, chiefly on the subject of establishing a naval depot near that city.

It is a source of regret that neither the President nor this Department possess the power to establish any new naval depot in any part of the United States.

But I am happy to add, that the attention of Congress, where alone this power exists, was, in the last annual report from this Department, specially invited to this subject, and any representations you may deem it expedient to lay before that body will doubtless receive due consideration.

In respect to some other points mentioned in the memorial, it gives me pleasure to observe that one newspaper at Charleston, one at Savannah, one at Raleigh, and two at Norfolk, are included in the list given to the Navy Board, in which to publish proposals for contracts; and that the board are in the habit of advertising in such papers included in the list as are supposed to be best calculated to furnish information in those quarters of the country where the particular articles wanted, at any time, can generally be obtained on the best terms to the public. Besides this, they advertise in two or three of the papers printed at this capital, and which are supposed to circulate some in all the large cities.

In this way it is intended to invite competition from all quarters where the means and the inclination probably exist for competition.

In regard to the disbursements of this Department in fulfilling contracts, it must be apparent that the payments should be made where the contractors reside or wish to receive the money; and as their

success in getting contracts depends on their activity, enterprise, and low bids, there can and should be no favoritism shown by this Department, nor any preference given to particular places.

It will afford high satisfaction to learn, hereafter, that the citizens of Charleston find it for their interest to compete with others, and to take up more of the navy contracts offered for such articles, as their resources and wealth may justify them in furnishing at lower prices than are asked elsewhere.

I am, very respectfully, gentlemen, your obedient servant,

LEVI WOODBURY.

JOEL R. POINSETT, JOHN STROBECKER, Esqrs., and others, *Charleston, South Carolina.*

No. 15.

NAVY DEPARTMENT, *March 30, 1833.*

Sir: I should be gratified in having a report from you, at your leisure, concerning the eligibility of Charleston as a naval station or depot in future.

Very respectfully, your obedient servant,

LEVI WOODBURY.

Com. JESSE D. ELLIOTT, *commanding Naval Station, Charleston, S. C.*

B.

NEW YORK, *December 16, 1825.*

Sir: I have the honor herewith to enclose my report in relation to the survey and examination of Charleston and St. Mary's bar, being in compliance with orders from you, appointing me superintendent of that service.

I am, respectfully, your obedient servant,

LAWRENCE KEARNEY, *Master Commandant U. S. Navy.*

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

Report to accompany a chart of Charleston bar, in South Carolina, surveyed by order of the Hon. Samuel L. Southard, Secretary of the Navy.

The following are the points upon which information is required, and to which replies are herewith furnished, viz:

First. Depth of water upon the bar at the lowest and highest spring tides, and at common tides.

Second. Whether the depth of water upon the bar is affected by any, and what, winds, to what extent, and in what manner.

Third. The strength of the current on the bar, and to a safe anchorage within it.

Fourth. Width of the channel upon the bar, width of the bar, and nature of the bottom; with what winds large vessels can cross the bar, bound inwards and outwards.

Fifth. The prevailing winds at different seasons of the year.

Sixth. The extent of safe anchorage for vessels of the largest size which can cross the bar.

Seventh. The convenience of such anchorage for receiving supplies from the shore.

Eighth. Facilities for obtaining good fresh water.

Ninth. What supplies of stores and provisions can be obtained for a fleet, from the surrounding country, and to what extent on short notice.

Tenth. Whether the harbor has good positions for a dock or navy yard.

Eleventh. How near the present shore of such position does a channel run of the same depth as the water on the bar, at high spring tides.

Twelfth. Has it good fresh water in its vicinity, and in what quantities.

Thirteenth. General health of the position and quality of the soil.

Fourteenth. Facilities of wharfing to the channel.

Fifteenth. Whether the worm is destructive in the harbor.

Answer to question first. The depth of water on Charleston bar, at the lowest spring tides, is eleven feet at low water, and at the highest spring tides, 19½ to 20 feet, high water. At common tides, at low water, there is a depth of 12 feet, and at high water, 16½ to 17 feet: a medium tide may be fairly considered to afford a depth, at low water, of 12 feet, and at high water, 17 feet.

Paper marked No. 1, attached hereto, will afford information on this subject from experienced pilots of this harbor.

Answer to question second. The depth of water on Charleston bar is much affected by winds. Those from northeast and southeast cause it to flow from one to two feet over its ordinary depth, and those from the northwest and southwest decrease it in extent, according to the force and duration of them.

Paper marked No. 1, also affords information on this subject.

Answer to question third. The strength of current on the bar is irregular, being governed, in a great degree, by the winds; uninfluenced by wind, its velocity at half tide is two miles per hour, and to a safe anchorage within the bar about 2½, when in the channel way.

Answer to question fourth. The width of the channel on the bar is 300 yards. The width of the bar is three-quarters of a mile. The bottom is hard, gray sand.

The best winds to cross the bar, bound inwards, are from N. E. to S. E.

The best winds, bound outwards, are those from N. W. to S. W.

Answer to question fifth. The prevailing winds in winter are from the N. W. to N. E., and in summer from S. E. to S. W.

Answer to question sixth. The first anchorage is in the Drop, or Four-fathom Hole, the lighthouse bearing from W. to W. by N. about one mile and three-quarters distance, and is about half a mile square in extent.

This anchorage is open to the winds from the N. E. and S. E., but owing to the shoal of the bar, the sea is not very heavy; the holding ground is good.

Rebellion Roads, off Sullivan's Island, is a commodious and safe anchorage, half a mile in extent one way, and one and a half the other, and good holding ground, susceptible of being well protected by batteries.

Answer to question seventh. From the upper part of Rebellion Roads to the city is three miles, and the facilities of obtaining supplies from the shore easy.

Answer to question eighth. Good fresh water can be obtained from a number of tanks, which are employed in the harbor. They will either supply good spring or cistern water, as may be wished, delivered on board anywhere within the bar.

Answer to question ninth. The surrounding country affords but few articles for the supply of a fleet, in the way of provisions; rice may be considered the only article for an immediate extensive demand; other articles, in small quantities, can be obtained in the city to supply the wants of single ships; naval stores, of various kinds, can be obtained conveniently.

Paper marked No. 2 affords information on this subject.

Answer to questions tenth, eleventh, twelfth, thirteenth, fourteenth. Several positions present themselves for a dock or navy yard, viz: Shute's Folly, a small island of marsh in front of the city; 2d, Lamprie's Point, mouth of Wando river; 3d, Strobel's mill seat, on Cumming's Point, on the Ashley river; 4th, the old navy yard, about four miles from town, now Cochran's farm; 5th, Hampsted, mouth of Town creek; 6th, Marsh's Island, mouth of Town creek; 7th, a lot of land above Gadsden's wharf, on Cooper river; 8th, Mey's wharf, within the limits of the city; 9th, Marsh's wharf, also within the limits of the city.

A description of the above places is given in papers No. 3 and 4, and No. 5 describes the health of each, except the two last-mentioned places, Mey's and Marsh's wharves, and the lot of land above Gadsden's wharf, all of which are perfectly healthy as any part of the city.

Some of the above positions being subject to country fever, although advantageously situated for the establishment of a navy yard, are, consequently, not recommended.

Shute's Folly: The island of marsh in front of the city, at the mouth of Cooper river, is conveniently situated; great expense, however, must be laid out, in raising, on this low, alluvial foundation, a sufficient height to build on, free from the effect of tides, the highest of which flows entirely over the island. It will, therefore, be necessary to raise it four feet higher than its present greatest elevation.

The channel of Cooper's river washes the western side of this site, and in some places an equal depth with that on the bar, at high spring tides, is found within thirty feet of low water mark.

A basin could be easily formed in this island for the security and preservation of timber, and the mud removed in making the basin will contribute to filling in and raising the foundation for the establishment.

Fresh water must be collected in cisterns, or supplied from tanks which supply the shipping generally. It is said to be healthy.

Wharfing to the channel is easy.

Second. Lamprie's Point, at the mouth of Wando river, is reported unhealthy, as specified in paper No. 5, but otherwise possesses great advantages; distance to the edge of the channel, or eighteen feet water, is one hundred and seventy-three yards.

Third. Strobel's mill seat, on Ashley river, possesses advantages, in point of situation as a harbor, beyond others mentioned; but wharfing out of the channel is a great objection to it, the distance being four hundred and sixty yards to reach the depth of water required, and the mud flat is soft, making it doubtful whether a foundation could be made sufficiently permanent for building upon it a necessary distance from the shore. The health of this place, as, by the annexed report, seems doubtful.

Fourth. The old navy yard is, undoubtedly, subject to ague and fever, and is not, therefore, recommended.

Fifth. Extremity of the lines at Hampstead, mouth of Town creek.

This place has health and good water, but is difficult in wharfing out of the channel, the distance being greater than at Strobel's mill. It likewise lies open to the S. E. gales.

Sixth. Island of Marsh, at the mouth of Town creek.

This island is conveniently situated, being contiguous to the upper part of the city, out of the way of shipping in the river. It is healthy, with bold water on the side next to Town creek.

What may be said of the advantages of Shute's Folly, applies to this place, being equally low. It is easily defended, being near the northeast end of the lines of the city. This place is open to the sea breeze, and is believed to be healthy. Town creek is bold along this island, and affording a good anchorage, in six and seven fathoms of water, for a squadron; good fresh water is procured in the vicinity.

Seventh. A lot of land above Gadsden's wharf.

This is an extensive mud-flat and requires wharfing out in the same manner as at Strobel's mills, before mentioned. It is healthy, and in the vicinity of good water.

Eighth. Mey's wharf, at the foot of Pinckney street.

This wharf was used during the late war for the navy; it is healthy and convenient, and for building a sloop-of-war, or one or two small vessels, is sufficiently capacious. A description of it is given in paper No. 4; for immediate purposes, this wharf has much to recommend it, possessing good brick stores and giving sufficient room for fitting out any number of vessels which it is probable may put into that harbor at any one time.

Ninth. Marsh's wharf. This wharf is also very convenient, and it is believed to have the best foundation of any in the city, having formerly been the property of General Gadsden. Much expense and labor had been bestowed upon it to make the foundation firm and good before it became the property of Mr. Marsh. It is well situated as regards health and convenience.

Paper marked No. 4, refers to it.

These are all the sites which have either presented themselves in my examination, or have been

recommended by others. In reply to the 15th question, whether the worm is destructive in the harbor, &c., &c., it may be said they are, but no more so than in other harbors on the coast.

To preserve health, to afford convenience for either fitting or building vessels, and to lessen the expense of a naval establishment in the harbor of Charleston, the two sites marked No. 8 and 9 are recommended, viz: Mey's and Marsh's wharves.

An establishment at either of the sites in the city will afford both convenience for furnishing supplies, and also some security, which, under the peculiar situation of the country at certain seasons of the year, is a paramount advantage.

In respect to the sites for a naval establishment and other matters in relation to the harbor of Charleston, I have annexed hereto letters from gentlemen who have very politely afforded me information, the result of their long acquaintance with the country; and I beg leave, respectfully, to submit to your inspection, as embracing, perhaps, fuller information than the time of my examination permitted me to acquire, the annexed letters and reports from Thomas Bennett, Esq., chairman of a committee of citizens convened for the purpose of forwarding the views of establishing a navy yard. Also, a joint letter from Doctor Joseph Johnson, president United States Branch Bank, and Mr. John Stoney and Mr. John Robertson, merchants, the latter navy agent for a number of years. As to the health of the places named, I beg leave to refer you to Dr. Logan's report, paper No. 5, who is an old practitioner, and now naval hospital surgeon, which report is corroborated by other respectable physicians of that place with whom I have conversed.

In submitting these documents in relation to the survey of Charleston bar, I beg leave to offer the following general observations as to the fitness of the port for a rendezvous for our light cruisers in the West Indies and seas contiguous.

The result of my examination of that place, from January to July, 1825, herewith furnished, exhibits difficulties which preclude a recommendation of the place for a naval establishment of much extent; but for a limited one, commensurate with the depth of the channel over the bar, the importance of its location in regard to its proximity to the West Indies, and the great facilities it affords to cruisers in that quarter as a rendezvous in the winter season, being considered, it presents many advantages claiming attention.

Charleston lies nearer the range of our West India trade than any other port south of the Chesapeake, capable of affording equal protection in war, and repairs or supplies in case of distress. The gulf stream facilitates your passage and carries you within a few hours' sail of the port.

Cruisers returning for supplies will afford protection to convoys, as far as danger from pirates is apprehended.

Sailing again from Charleston, you can avail yourself of the variable winds which prevail, as far south as the Bahamas; by keeping to the eastward as much as is necessary to gain the longitude of the passages into the West Indies, a short passage can be made; and it is practically known that a vessel can reach her cruising ground about the east end of Cuba, or islands further to windward, in less time from that port than any part of the Floridas or ports in the Bay of Mexico, which lie west directly to leeward. Sailing up the south side of Cuba is found very tedious, and almost impracticable for small vessels, during the season the trade winds blow hard. The gulf passage is preferred, and it will therefore be evident that a vessel must make a very circuitous route to gain the Windward Islands from these places; *from Charleston her course is direct.* This is a matter of great consequence to our small class of vessels, which have not the capacity to take on board large supplies of stores; and it is therefore desirable that they should lose as little time as possible in going and returning to their stations.

Charleston bar admits vessels at the rate of eighteen guns, and the depth of water, on an average, may be fairly estimated at twelve feet at low water, and sixteen and a half feet, at high water, to seventeen feet; common tides and at ordinary spring tides, eighteen feet; high spring tides, twenty feet. A mean of the tides will, therefore, give seventeen feet at high water. Sloops-of-war can, by means in their power of altering their trim, frequently get into Charleston with safety.

The greatest difficulty occurs in getting again to sea, as a free wind is necessary, which lowers the tide on the bar, as may be seen by referring to the report of the pilots, herewith furnished.

This difficulty is, however, somewhat obviated by the use of steamboats, which frequently tow vessels out of that harbor with great ease and safety, in calms or head winds.

Charleston bar, being composed of sand, and acted upon by gales and strong currents, is ascertained to change, in the course of time, the position of the channels; therefore, they may be found to disagree with the chart in a few years. In consideration of this change it is suggested that, instead of the present beacon, a movable beacon be placed in front of the lighthouse, to be so shifted, from time to time, as to obviate the difficulty which arises in having the two objects out of range, as they now are, much to the inconvenience and danger of strangers to the coast, who may attempt, without a pilot, to go in.

Suitable fortifications on Sullivan's Island and Fort Johnson reef, near Pelican bank, aided by one steam frigate, would render Charleston as secure as any point on our coast.

Directions for entering the port of Charleston.

Bring the lighthouse to bear N. W. by W. and stand for it until you see the *buoys* on the bar, three in number; the outside, or southernmost buoy, on the south breakers, leave to the left hand, or southward of you, about a cable's length distant; the other two buoys, on the north breakers, leave on your right hand, or to the northward of you, about half a cable's length.

After crossing the bar, bound up, steer N. $\frac{3}{4}$ W. along the north breakers, which will carry you up to Sullivan's Island.

These directions will answer for vessels drawing twelve feet and under, but over that draft the bar should not be attempted without a pilot.

The latitude of the S. E. angle of Fort Moultrie, on Sullivan's Island, is 32 deg. 46 min. and 27 sec. north; longitude not ascertained.

LAWRENCE KEARNEY, *Master Commandant U. S. Navy.*

In obedience to your order of the 18th of April last, requiring an examination of St. Mary's bar, I have the honor to report: That, upon a strict and careful set of soundings, taken in July and August, the general depth of water on St. Mary's bar, at low tide, was twelve feet six inches; that the depth is somewhat greater than at the time it was surveyed by Lieutenant Ramage, a copy of whose report is herewith transmitted.

The difference, I conceive, arises from the effect of the prevailing winds at the periods at which the soundings were taken; the one being in the middle of winter, when the prevailing winds are blowing from the land, and the other in the summer, when they generally blow on shore.

The average depth of St. Mary's bar may be estimated at twelve feet, the same as at Charleston, taking the season through.

The following distances were actually measured at low water, viz: from 13 feet within the bar to 13 feet without, measured 150 yards.

The distance from the north to the south shoal is about 300 yards.

The sands on the bar are much the same as on Charleston bar, subject to shift by the effect of heavy gales; but how far they have been affected since the survey of Lieut. Ramage is not clearly ascertained, as the chart at that period was not fully completed at that point, in consequence of the inclemency of the weather not permitting the taking of a sufficient number of lines of soundings to delineate every part and feature of the bar.

Additional lines of soundings have been added, but, as before mentioned, the difference of the season of the year may produce some variance in the depth, with those before taken.

The rise and fall of tide at this bar, as well as at Charleston bar, may, upon an average, be estimated at six feet.

The directions for entering this bar, and for anchoring in the harbor, &c., in the report of Lieutenant Ramage, are found to be strictly correct.

A considerable enlargement of the sandy shoals, forming the N. E. side of the harbor, has taken place since the survey of Lieutenant Ramage, which may eventually have a tendency to confine the water in such a narrow passage as to wash away and make a deeper channel over the main bar.

The harbors within the bar, called Cumberland and Amelia, are safe and commodious.

The convenience of this port as a naval rendezvous for West India cruisers, is about the same as Charleston, in regard to the facilities of reaching it in the winter season.

The difficulty which arises in proceeding to a farther distance north, to arrive at Charleston, is equaled by the difficulty of proceeding to a greater distance west, to arrive at St. Mary's, during the continuance of the westwardly gales, which frequently blow in the winter season very heavy from the coast.

LAWRENCE KEARNEY, *Master Commandant U. S. Navy.*

23d CONGRESS.]

No. 564.

[2D SESSION.]

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN 1835.

COMMUNICATED TO CONGRESS, WITH THE PRESIDENT'S MESSAGE, DECEMBER 2, 1834.

NAVY DEPARTMENT, *November 29, 1834.*

To the President of the United States:

SIR: In laying before you, at this time, a succinct view of the condition of our navy, and its operations during the past year, it affords me great pleasure to state that its gradual increase and improvement are such as might have been anticipated from the ample means for that purpose which have been afforded by the liberal policy of Congress.

All the services required of our naval force have been promptly performed; our commerce has been protected in the remote as well as the neighboring seas; our national character has been sustained at home and abroad, while a large portion of naval officers, seamen, and marines have been kept in active service, under a strict discipline, calculated to fit them for all the duties which may be required of them, whether in defending our property on the ocean from pirates or open enemies, our shores from hostile aggression, or our flag from insult.

An inspection of our navy yards at Portsmouth, Boston, New York, Philadelphia, Washington, and Norfolk, made in August and September last, in company with the Commissioners of the Navy Board, has afforded me the most satisfactory evidence of our means, in a short time, of increasing our navy to any extent the exigencies of our country may require.

The officers in charge of those stations perform their duties with great ability and zeal; the building and repairing of our ships are conducted with dispatch and economy; and the ample materials on hand for naval purposes are preserved with the greatest care, and by all the means which science and experience can suggest to prevent decay.

Our naval force consists of six ships of the line, and seven frigates now building, for the completion of which, additional appropriations to the amount of \$1,527,640 will be required; of five ships of the line, two frigates, and six sloops-of-war in ordinary, requiring repairs which will cost \$1,362,000, in addition to the materials on hand for that purpose; and of one ship of the line, four frigates, eight sloops-of-war, and six schooners in commission; in all, twelve ships of the line, thirteen frigates, fourteen sloops-of-war, and six schooners. Besides which, the frames of ships procured, or under contract, for the gradual increase of the navy, and other materials on hand or under contract for that purpose, will afford the means of bringing into the service, as soon as it can probably be required, an additional force of five ships of the line, eleven frigates, seven sloops-of-war, and two schooners, the building of which may be immediately commenced on launching our vessels now upon the stocks.

Our vessels in commission during the past year have been employed, as heretofore, in protecting our commerce in the Mediterranean, in the West Indies, on the coast of Brazil, and in the Pacific ocean.

The ship of the line Delaware, the frigates United States and Constellation, the sloop-of-war John Adams, and the schooner Shark, have been thus employed in the Mediterranean; and the frigate Potomac, after her return from the Pacific and Indian oceans, was repaired, and sailed on the 20th of last month to join the Mediterranean squadron, from which the frigate Constellation had been ordered to return. This frigate arrived at Norfolk on the 20th instant. The sloop-of-war John Adams returned to the United States in February from the Mediterranean, and sailed again for that station in August last, after receiving necessary repairs.

On the West India station, the sloops-of-war Vandalia, St. Louis, Fa'mouth, and the schooners Grampus and Experiment, have been employed. The St. Louis returned to Norfolk in July last, where she has been repaired, and from whence she sailed on the 14th instant to resume her station in the West Indies. The Vandalia returned in August last to Norfolk, where she is undergoing considerable repairs, which, it is believed, will be completed early next month, when she will return to the West India squadron.

The sloops-of-war Natchez, Ontario, Erie, Lexington, and Peacock, and the schooners Enterprise and Boxer, composed our squadron on the coast of Brazil. The Erie did not sail for this station until August last. The Lexington returned to the United States in April, and the Peacock in May last. The Enterprise returned in April, and sailed again for the Brazilian station in July last, in which month the Boxer returned to the United States, and, after being repaired, sailed for the Pacific. The Peacock is now undergoing considerable repairs, and is expected to be ready for sea early in February next.

For our station in the Pacific, the frigate Brandywine sailed on the 2d of June last, to co-operate with the sloops-of-war Fairfield and Vincennes, and the schooner Dolphin, and, with the Boxer, now on her way to that station, from which the Fa'mouth returned on the 1st of February, and, after having been repaired, sailed for the West India station in March last.

Our naval force, consisting of commission and warrant officers, petty officers, seamen, ordinary seamen, landsmen, and boys, amounts to 6,072; and our marine corps, under its new organization, will consist of commissioned officers, non-commissioned officers, musicians, and privates, to the number of 1,283; making a total of 7,355.

The dry docks at Boston and Norfolk have fully answered the most sanguine expectations that were formed of their usefulness. They are now deemed indispensable to a speedy and economical repair of our larger vessels. But the two already finished are not sufficient for the purposes of our navy. An additional dry dock, at some intermediate point between Boston and Norfolk, would greatly promote the purposes for which our navy is established and maintained. As a site for such additional dry dock, the harbor of New York presents greater advantages than are to be found in any other situation; among which may be enumerated the great commerce of the place, the facilities which the city of New York affords for recruiting seamen and for procuring all materials, as well as for employing skillful mechanics and laborers necessary for repairing vessels.

The experience acquired in making the two dry docks already finished cannot fail to be of great advantage in the construction of a third.

I would respectfully repeat a recommendation of my predecessor, that authority be given to construct two or three steam batteries, as the means of testing the application of steam to the purposes of national defence.

It can hardly be doubted that the power of steam is soon to produce as great a revolution in the defence of rivers, bays, coasts, and harbors, as it has already done in the commerce, intercourse, and business of all classes of men in Europe as well as in America. This subject has already attracted the attention of the maritime powers of Europe; and our honor as well as safety requires that no nation, whose fleets may come in conflict with ours, should be in advance of us in the science and application of this power, upon which the success of our future wars with them may depend.

Should the power of steam, as a means of defence, produce all the effects that may be justly anticipated, it will diminish, in some instances, the necessity of permanent fortifications on our coasts, by substituting those which may be moved from place to place as they may be wanted, and in our own waters become the formidable engines of attack as well as defence. The heavy and cumbrous steam vessels and batteries, with their necessary apparatus and supplies, which may be brought into action with the most powerful effect by a nation near its own shores and harbors, cannot be transported over distant seas and oceans for the purpose of attacking its enemies. Should, therefore, the application of steam become a part of the system of maritime war, it is a consolation to reflect that it will greatly diminish the frequency as well as horrors of such war, inasmuch as it will hold out much greater advantages to the defending than to the attacking party, and take from the aggressor in a great degree his hope of success, and, of course, his motive for action.

I can add nothing to what has been frequently urged in favor of a peace establishment for our navy; but must be permitted to state, what has often been before stated, that the compensation of the commanders of our ships on foreign stations is altogether inadequate to an honorable discharge of their duties. They are compelled to incur expenses beyond the amount of their pay and rations, or decline to receive and return civilities uniformly offered to them on such stations, and upon which our friendly relations with foreign nations may, in some degree, depend.

The course pursued by our officers, under such circumstances, has been such as national as well as professional pride has dictated; and, of course, they frequently return from their tours of service deeply in debt; one evil consequence of which is, that it adds to the inducements of our officers to prefer service on our home stations to service at sea; whereas the pecuniary consideration should always be in favor of the sea service.

Much inconvenience frequently arises from a want of power to make transfers of materials purchased for the navy under certain appropriations, to the purposes of other appropriations, under which they are more immediately wanted. A power to make such transfers, guarded by limitations similar to those imposed upon the power of making transfers of money from certain appropriations to others, would save much time and expense in the building and repairing of our ships.

Under the act of the 30th of June last, for the better organization of the United States marine corps, the appointments of officers authorized by the same have been made; and the additional number of privates required will be recruited with all convenient dispatch.

So much of the military regulations, for the discipline of the marine corps, as were in force at the passing of the act, and not inconsistent with the same, will continue in force until superseded by regulations which shall be prescribed in conformity with the provisions of the eighth section of that act.

It is believed that the discipline and harmony of the officers and men of the navy proper, and of the marine corps, will be promoted by placing the marine barracks without the bounds of the different navy yards with which they may be connected. This arrangement would create but little additional expense to the government. The marine barracks at Portsmouth, should it be thought proper to retain them as such, are at a sufficient distance, and might be easily separated from that part of the navy yard in which ships are built and repaired, and in which are placed the workshops and stores of that station.

The marine barracks at Boston are within the bounds of the navy yard, but so decayed and dilapidated as not to be worth repairing, and they occupy a space designated for another purpose in the yard. A situation for barracks, sufficiently near the yard, it is said, can be procured upon reasonable terms.

The marine barracks at the navy yard at New York were condemned in 1826 as unworthy of repair. The officers attached to this station have been allowed house rent in lieu of quarters. An appropriation of \$30,000 has been made for the erection of marine barracks at that station, and \$6,000 for the purchase of a site for the same; but, as yet, the site has not been purchased, nor selected.

At Philadelphia, the barracks are within the navy yard, but unfit for use as such. It will be necessary to construct new barracks at that station.

At Washington, the barracks are not within the bounds of the navy yard.

At Norfolk, the barracks are within the bounds of the navy yard, but inadequate to the accommodation of the force required there. Besides, they are much out of repair; and the commanding officer has been necessarily allowed house rent in lieu of quarters.

At Pensacola, no permanent marine barracks have been prepared. The officers have been allowed house rent, and the men have occupied temporary buildings. It is proper here to observe that the plans of the navy yards, prepared and approved under the act for the gradual improvement of the navy, make no provision for barracks within the navy yards, except at Portsmouth.

Under the first section of the act concerning naval pensions and the navy pension fund, passed the 30th of June last, fourteen pensions to widows have been renewed, and thirty-seven original pensions have been granted, in pursuance of the provisions of that act. These constitute a heavy charge upon that fund, and require for their payment, annually, the sum of \$16,062.

Under the second section of that act, the sum of \$141,303.80 has been reimbursed to the fund for the cost of the stock of the Bank of Columbia, heretofore purchased by the commissioners of the fund, with interest thereon from the period at which said bank ceased to pay interest to the time of reimbursement. \$141,300 of the amount has been vested in the stock of the Bank of the United States, as authorized by the act of Congress of the 10th of July, 1832. The state of this fund will appear by documents annexed, marked M, M 1 and M 2.

The number of invalid pensioners is now two hundred and eighty-seven. Should all of them claim, which is improbable, the amount required for their annual payment will be \$23,321.

The number of widow pensioners, including those under the act of the 30th of June last, is one hundred and nine; and the amount required for their annual payment is \$24,023—making the annual charge, according to the present pension roll, \$47,254.

From the account of stocks, hereunto annexed, marked M, it will appear that the income of the fund arising from those stocks, and others to be purchased by excess of money on hand, will be about \$70,000 per annum. It is believed, therefore, that the fund will be sufficient for all the ascertained claims upon it, under existing laws; and the surplus of next year, which may be estimated at from \$15,000 to \$20,000, will, it is presumed, be enough to meet the ordinary increase of pensions for several years.

Of the privateer pension fund, the act of Congress of the 19th of June last revived five years' pensions to widows of officers, seamen and marines, slain or lost on board of private armed vessels.

In twenty-eight cases brought to the notice of this Department under this act, more than five years had elapsed from the date when their former pensions expired. They being sustained by satisfactory proof, were settled in the office of the Fourth Auditor, and the accounts certified by the Second Comptroller of the Treasury. The amount to pay these accounts was \$15,480. Under the act, twenty-six pensions were renewed; of which, one expired on the 10th day of October last and one on the 28th instant. One will expire on the 4th of March, four on the 1st of February, and nineteen on the 1st of January, in the year 1835. The payments on these, to the 1st of July last, amounted to \$11,995.20; and the sum required, to complete five years' pension to each, will be \$1,320.80.

In addition to the above, there are thirty-four invalid pensioners on the roll, and the sum necessary to pay them will be \$3,016 per annum.

It will be seen in the annexed statement, marked N 1, that the amount in the Treasury on

the 1st instant, to the credit of the fund, was.....	\$1,261 46
Stock owned by the fund (N).....	15,567 05
Total.....	<u>\$16,828 51</u>

After paying the claims that have as yet been preferred under the act of the 19th of June last, and it is believed that but few additional claims under the act can now be brought forward, it is estimated that the fund will be sufficient to pay, for four or five years, all the invalid pensions now chargeable to it.

From the statement annexed, marked O, it will appear that the amount to the credit of the navy hospital fund, on the 1st inst., was \$35,559.04. The increase of the fund, arising from deductions in the settlement of accounts in the Fourth Auditor's office, will be nearly \$16,000 per annum. The expenditures for several years will probably not exceed \$13,000 per annum. This will leave balances not wanted for current expenses. The propriety of authorizing, by law, the investment of such balances in some well-secured, productive stock, is respectfully suggested.

By the statement hereunto annexed, marked P, it appears that, of the appropriations heretofore made for the suppression of the slave trade, there remains in the Treasury a balance of \$14,213.91. It is not believed that any further appropriation for this purpose is necessary at this time.

It will be perceived, by the estimates, that nothing is asked on account of the contingent expenses of the Secretary's office of this Department. A proper degree of economy has rendered any appropriation

for those expenses for the ensuing year unnecessary. This circumstance affords me an apology for stating that some of the officers connected with this Department do not receive an adequate compensation for their services.

The chief clerk of the Commissioners of the Navy Board, and the warrant clerk, and the clerk keeping the register of correspondence of this Department, perform arduous duties, which require talent and experience. Their salaries, respectively, are less than are paid in other departments for services of no greater difficulty and responsibility than theirs, and are inadequate to the decent support of themselves and families.

An estimate for an increase of \$100 to the salary of the first, so as to make it \$1,700 per annum, and of \$400 to the latter, so as to make it \$1,400, is respectfully submitted.

The salaries of the chief clerks of the commandants of the navy yards at Boston, New York, Washington, and Norfolk, are evidently below what may be considered a fair compensation for their services. I therefore solicit a small increase of \$150 to their salaries respectively, so as to make them \$900 each, as stated in the estimates.

The superintendent of the southwest Executive building receives at present but \$250, and the two watchmen for the same but \$300 each per annum. It is respectfully recommended that an increase of \$250 be made to the salary of the superintendent, and of \$200 to the salaries of each of the watchmen.

In the report of my predecessor, of the 30th of November last, an estimate of the expense of purchasing and maintaining a lithographic press was submitted, as a means of procuring charts and blank forms for this Department, as well as for the several navy yards and vessels in commission, as also for the purpose of multiplying copies of drawings connected with the survey of the coast. As, in my opinion, the employment of such a press would be a saving of time and money, in the duties now performed by clerks and draftsmen in this Department, and the branches of service connected with it, I respectfully renew the application for the necessary appropriation for this press; and annex hereto copies of the letters of the Commissioners of the Navy Board, and of Lieutenant Charles Wilkes, jr., heretofore laid before Congress, in favor of this application.

The charge of the coast survey, now under the superintendence of Mr. Hassler, was, on the 11th day of March last, transferred from the Treasury to the Navy Department, to which it was thought more properly to belong. I have found this arrangement very onerous, as it imposed upon me new duties, which could not be performed without a careful examination of the accounts of what had heretofore been done on the survey, contained in a voluminous correspondence between the Treasury Department and the superintendent. This arrangement also caused a short interruption in the progress of the work, but which has, nevertheless, been prosecuted with diligence and zeal by those employed in it.

The report of Mr. Hassler, of the 17th of May last, and his supplementary report of the 11th of last month, with the maps, drafts, and sketches accompanying the same, herewith transmitted, show the progress already made in this work under the law of 1832, and its connection with the progress made in the same in the year 1817.

The situation of the base line on the south side of Long Island has been most fortunately selected. As any error in this line would be attended with corresponding errors in the whole work depending upon the same, the utmost care has been taken to have it measured with the greatest possible accuracy.

From what has been done in this survey, we may reasonably hope that this important work will advance with all the aid which science, skill, and industry can give it, and in a manner as honorable to the government, under whose auspices it was begun and has been continued, as it will be useful to the present and to future ages.

The information wanted for accurate and detailed estimates of the necessary appropriations for the continuance of the coast survey cannot easily be obtained until further experience shall enable the officers engaged in it to introduce more system in the detail of duties and expenditures in their work than they have heretofore been able to do.

The sum of thirty thousand dollars was appropriated for this purpose the past year, and it is believed that an equal sum will be wanted for the ensuing year, as stated in the estimates.

Under the act of the 30th of June last, "authorizing the Secretary of the Navy to make experiments for the safety of the steam engine," preparations have been made for testing certain proposed improvements in steam boilers; but no such experiments have been exhibited or communicated to this Department, that could properly form the subject of a report.

Since the last annual report from this Department, the legislature of Pennsylvania have, by their act of the 10th day of April last, ceded to the United States the jurisdiction over the territory now in their possession in the county of Philadelphia, and occupied for the purpose of a naval asylum for sick and disabled seamen, so long as the same shall be used by the Government of the United States for that purpose, with a reservation of the right to lay out a certain street, called Sutherland avenue, through the western part of said ceded territory; and with a proviso that all process, civil and criminal, of the Commonwealth of Pennsylvania shall extend into, and be effected within, such territory.

The necessary references to papers and documents, connected with this report, will be found in a schedule hereunto annexed.

I have the honor to be, with great respect, your obedient, humble servant,
 MAHLON DICKERSON.

Schedule of papers accompanying the report of the Secretary of the Navy, to the President of the United States, of November 29, 1834.

1. The letter of the Commissioners of the Navy to the Secretary, transmitting the general and special estimates of the navy, for the year 1835.
 - A. Estimate for the office of the Secretary of the Navy.
 - B. Estimate for the office of the Commissioners of the Navy.
 - C. Estimate for the expenses of the southwest Executive building.
 - D. The general estimate for the navy.

Detailed estimate:

- D, 1. For vessels in commission.
- D, 2. For receiving vessels.
- D, 3. For recruiting stations.
- D, 4. For officers and others attached to navy yards and shore stations, and the abstract or recapitulation.
- D, 5. For officers waiting orders and on furlough.
- D, 6. For provisions.
- D, 7. For improvements and repairs of navy yards, and recapitulation.
- E. Special estimate for magazines, hospitals, tanks, lithographic press, and survey of the coast.
- E, 1. Lithographic press.
- F. Estimates for the marine corps.
 - Detailed estimates, F 1 to 6.
- G. List of vessels in commission, of each squadron; their commanders and stations.
- H. List of vessels in ordinary.
- I. List of vessels building.
- K. Report of the proceedings under the law for the gradual increase of the navy.
- L. Report of the proceedings under the law for the gradual improvement of the navy.
- M. Statement of the condition of the navy pension fund.
 - Detailed statements, M 1 and 2.
- N. Statement of the condition of the privateer pension fund.
 - Detailed statements, N 1 and 2.
- O. Statement of the condition of the navy hospital fund.
- P. Statement of the proceedings under the law for the suppression of the slave trade.
- Q. and Q 1. Statement of proceedings under law for surveying the coast.
- R. List of deaths.
- S. List of resignations.
- T. List of dismissions.

No. 1.

NAVY COMMISSIONERS' OFFICE, *November 14, 1834.*

Sir: The Board of Navy Commissioners have the honor to transmit, herewith, the estimates (in triplicate) for the expenses upon the following objects, under the direction of the Navy Department, viz:

An estimate of the expense of the Navy Commissioners' office, marked B.

The general estimate for the navy, marked D, with detailed estimates for some of the items of the general estimate, marked from D 1 to D 7, inclusively.

A special estimate is also submitted, for the completion of objects which have been heretofore authorized by special appropriation, marked E.

The estimate for the expenses of the marine corps, as exhibited by the colonel commandant of that corps, marked F, with a statement of the probable distribution of the corps, marked F 1, and detailed estimates for some of the items, marked from F 2 to F 6, inclusively.

They also submit reports upon the number, rate, distribution and condition of the vessels in ordinary, marked H; a similar report of the vessels building, marked I; of the proceedings under the laws for the gradual increase of the navy, marked K, and of those under the laws for the gradual improvement of the navy, marked L.

As the amount of the general estimate is greater than the appropriations for the present year, the board respectfully state some of the causes which have produced the increase. The increase in the first item is occasioned by a small increase in the number to be employed, and by a small additional compensation proposed for others.

The increase in the fourth item, which is the largest, has become necessary, principally from the greater deterioration of the vessels which it will be necessary to repair, to furnish the required reliefs for vessels which must return to the United States to discharge their crews.

The board do not propose to depart from a course which has been for some time pursued by them, which has been to limit their estimates under this head to the probable wants for the current year; as they believe it to be good policy in time of peace, and when no sudden increase in force is contemplated, not to repair vessels which might afterwards remain long unemployed.

A small increase is proposed in the seventh item, to meet the current expenses for ammunition, and to gradually replace old, imperfect small arms, by others of approved quality, and of uniform patterns.

The special estimate, E, comprises the amounts which are considered necessary for giving due security and convenient access to the magazines, and for making arrangements to secure the comforts of the sick, and to give proper protection to the public property.

The advantages anticipated from the possession and use of a lithographic press were fully stated in the last annual estimates.

In the estimate for the expenses of the Navy Commissioners' office, marked B, they have proposed an increase of \$100 to the salary of their chief clerk, to place him on an equality with other clerks in similar situations; and they feel assured that the nature and extent of his duties, and the manner in which he performs them, justly entitle him to this consideration.

The increased amount required for the support of the marine corps is a necessary consequence of the increase of the corps which was made at the last session of Congress.

I have the honor to be, sir, very respectfully, your obedient servant,

JOHN RODGERS.

HON. MAHLON DICKERSON, *Secretary of the Navy.*

A.

Estimate of the sums required for the support of the office of the Secretary of the Navy, for the year 1835.

Secretary of the Navy.....		\$6,000
Six clerks, per act of 20th April, 1818.....	\$8,200	
One clerk, per act of 26th May, 1824.....	1,000	
One clerk, per act of 2d March, 1827.....	1,000	
		<u>10,200</u>
One clerk of navy and privateer pension funds and navy hospital fund, per act of 10th July, 1832.....		1,600
Messenger and assistant messenger.....		1,050
<i>Contingent expenses.</i> The balance remaining unexpended of appropriations for former years, under this head, will be sufficient for the year 1835.		
		<u>\$18,850</u>
Submitted:		
For two clerks, \$400 additional each, now in receipt of \$1,000 each per annum.....	800	
		<u>\$19,650</u>

B.

Estimate of the sums required for the support of the Navy Commissioners' office, for the year 1835.

For the salaries of the Commissioners of the Navy Board.....	\$10,500	
For the salary of their secretary.....	2,000	
For the salaries of their clerks, draughtsman, and messenger, per acts of 20th April, 1818, 20th of May, 1824, and 2d of March, 1827.....	\$8,450	
Additional to the chief clerk, making his salary equal to that allowed to all other chief clerks of his grade.....	100	
		<u>8,550</u>
For contingent expenses.....		1,800
		<u>\$22,850</u>

C.

Estimate of the sums required for the expenses of the southwest Executive building, for the year 1835.

Superintendent.....	\$250	
Two watchmen, at \$300 each.....	600	
<i>Contingent expenses.</i> The balance remaining unexpended of appropriations of former years, under this head, will be sufficient for the year 1835.		
		<u>\$850</u>
Submitted:		
Additional for superintendent.....	\$250	
Additional for two watchmen, at \$200 each.....	400	
		<u>650</u>
		<u>\$1,500</u>

D.

There will be required for the navy during the year 1835, in addition to the unexpended balances that may remain on hand on the 1st day of January, 1835, the sum of three million six hundred and eighty-nine thousand eight hundred and fifty-one dollars and sixty-seven cents.

1st. For pay and subsistence of the officers of the navy, and pay of seamen.....	\$1,505,126 67
2d. For pay of superintendents, naval constructors, and all the civil establishment at the several yards.....	63,110 00
3d. For provisions.....	450,000 00
4th. For the repairs of vessels in ordinary, and the repairs and wear and tear of vessels in commission.....	974,000 00
5th. For medicines and surgical instruments, hospital stores, and other expenses on account of the sick.....	40,000 00

6th. For improvements and necessary repairs of navy yards, viz:		
At Portsmouth, N. H.....	\$39,925 00	
At Charlestown, Mass.....	99,500 00	
At Brooklyn, N. Y.....	46,120 00	
At Philadelphia.....	3,520 00	
At Washington.....	10,000 00	
At Gosport, Va.....	100,450 00	
At Pensacola.....	44,600 00	
For Sackett's Harbor.....	500 00	
		\$344,615 00
7th. For ordnance and ordnance stores.....		15,000,00
8th. For defraying the expenses that may accrue for the following purposes, viz: For the freight and transportation of materials and stores of every description; for wharfage and dockage, storage and rent; traveling expenses of officers and transportation of seamen; house rent, chamber money, and fuel and candles to officers, other than those attached to navy yards and stations, and for officers in sick quarters, where there are no hospitals, and for funeral expenses; for commissions, clerk hire and office rent; stationery and fuel to navy agents; for premiums and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates, for per diem allowance to persons attending courts-martial and courts of inquiry, and for officers engaged in extra service beyond the limits of their stations; for printing and stationery of every description, and for books, maps, charts, and mathematical instruments, chronometers, models and drawings; for purchase and repair of fire and steam engines, and for machinery; for purchase and maintenance of oxen and horses, and for carts, timber, wheels and workmen's tools of every description; for postage of letters on public service; for pilotage and towing of ships-of-war; for cabin furniture of vessels in commission, and for furniture of officers' houses in navy yards; for taxes on navy yards and public property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel for forges, foundries and steam engines; for candles, oil and fuel, for vesse's in commission and ordinary; for repairs of magazines and powder houses; for preparing moulds for ships to be built; and for no other object or purpose whatever.....		295,000 00
9th. For contingent expenses for objects not hereinbefore enumerated.....		3,000 00
		<u>\$3,689,851 67</u>

On furlough.....	2	6	2	8	1	6	3	7,322 62½
												\$219,086 52½

D, 6.

Provisions explanatory of the third item of the general estimate for 1835.

4,779 persons in vessels in commission, besides marines embarked.

511 marines embarked in vessels in commission.

139 persons in receiving vessels.

5,439 persons in total, at one ration a day, makes 2,003,485 rations, which, at 25 cents each, is equal to..... \$500,871 25

From which deduct this sum (which, from the balance that may remain in the Treasury on the 1st of January next, it is presumed will not be required)..... 50,871 25

Which leaves..... \$450,000 00

The sum asked for in the general estimate.

D, 7.

An estimate for the proposed improvements and repairs of navy yards, for the year 1835.

NAVY YARD NEAR PORTSMOUTH, N. H.

For completing ship house on site No. 4.....	\$31,000 00
For raising the barracks for the ordinary another story.....	4,000 00
For enlarging and repairing the blacksmith's shop.....	825 00
For repairing and furnishing a building for a hospital.....	350 00
For leveling the yard.....	2,000 00
For repairing docks, wharves, buildings, and all other purposes.....	1,750 00
	<u>\$39,925 00</u>

NAVY YARD AT CHARLESTOWN, MASS.

Towards completing rope walk.....	\$50,000 00
Towards building a storehouse, site No. 15	26,000 00
Docks, wharves, and buildings in the yard.....	8,500 00
Extending quay wall east of the mast house.....	9,000 00
For making arrangements preparatory to changing the fronts of the officers' houses near the east end of the yard.....	6,000 00
	<u>\$99,500 00</u>

NAVY YARD AT BROOKLYN, N. Y.

For yard wall on Navy street, 500 feet in length.....	\$6,000 00
For a quay wall on the north side of timber dock.....	9,620 00
For preparing a landing place for timber.....	2,400 00
For filling in low parts of the yard.....	2,500 00
For making new gate to timber dock and repairing bridge.....	750 00
For new sills and repairs of foundation to ship house No. 1.....	4,500 00
For constructing drains and reservoirs for draining the yard.....	1,500 00
For making mooring buoys and laying down moorings.....	2,600 00
For repairs to gun block, and securing guns from injury.....	1,750 00
For mud machine, with steam engine and saws.....	11,500 00
For repairs of all other docks and buildings, and for all other purposes.....	3,000 00
	<u>\$46,120 00</u>

NAVY YARD AT PHILADELPHIA.

For filling in low places in the yard and smith's shop, paving gutters, graveling road, and completing pavement on Front street.....	\$1,450 00
For fitting spouts and drains to No. 5, completing steam boxes, rebuilding chimneys, and repairs in smith's shop, and for fitting hydrants to the smith's and joiner's shops.....	810 00
For making new skids to guns, and replacing the guns.....	760 00
For repairs of all buildings, and for all other purposes.....	500 00
	<u>\$3,520 00</u>

NAVY YARD AT WASHINGTON.

Towards completion of wharf.....	\$5,000 00
For the repairs of all buildings, and for all other purposes.....	5,000 00
	<u>\$10,000 00</u>

NAVY YARD AT GOSPORT, VA.

For laying the launching slip, and building the quay walls connected with the same.....	\$18,200 00
Towards the construction of the timber dock.....	18,000 00
For building timber shed No. 12.....	23,600 00
For completing mast house No. 28.....	17,100 00
For completing houses Nos. 2 and 3.....	7,450 00
For completing the wall at the south end of the yard.....	4,850 00
For repairs of docks, wharves, buildings, and all other purposes.....	11,250 00
	<u>\$100,450 00</u>

NAVY YARD AT PENSACOLA.

To complete the wharf.....	\$35,000 00
For repairs of all buildings in the yard.....	2,500 00
For completing stable.....	3,000 00
Completing navy store.....	1,600 00
For cisterns.....	1,500 00
Receiving vessel.....	1,000 00
	<u>\$44,600 00</u>

AT SACKET'S HARBOR.

For repairs of ship house.....	\$500 00

[SUBMITTED.]

A special estimate for objects not embraced in the usual annual estimates for the navy, respectfully submitted for consideration.

FOR MAGAZINES.

To complete the magazines to be built near Boston and New York, to enclose them, and to provide convenient access to them, for the receipt and delivery of powder. \$7,500 00

HOSPITALS.

To complete the hospitals near Boston, New York, and Pensacola, to build the necessary out-houses and appendages, and to enclose them \$20,700 00
 For repair of the hospital near Norfolk, and its enclosures and dependencies 1,000 00
 For repairing enclosures, and graduating the ground about the Naval asylum near Philadelphia. 3,500 00
 Total hospitals \$25,200 00

TANKS.

To complete the payments which will be due on contracts made under the act of July 10, 1833. \$9,000 00

LITHOGRAPHIC PRESS.

For the purchase and use for one year of a lithographic press \$1,000 00

SURVEY OF THE COAST.

For the survey of the coast of the United States \$30,000 00

E, 1.

Estimate submitted for a lithographic press.

For the purchase and use for one year of a lithographic press \$1,000,00

NAVY COMMISSIONERS' OFFICE, *September 12, 1833.*

SIR: The Commissioners have to acknowledge the receipt of your letter of yesterday, enclosing a communication from Lieutenant Wilkes upon the subject of a lithographic press for the use of the Navy Department, and requiring an opinion upon the propriety of purchasing one.

The Commissioners are fully of opinion that the possession and employment of such a press would be both useful and economical; as, besides the various uses enumerated by Lieutenant Wilkes, it may, in their opinion, be applied to the printing of all the various forms required by the disbursing officers, and officers of the navy yards, which would at once combine uniformity, which is highly desirable, with a great saving of expense.

The communication of Lieutenant Wilkes is herewith returned.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

WASHINGTON CITY, *August 23, 1833.*

SIR: In reply to your letter of the 27th July, I have the honor to report that I have made very many inquiries relative to a lithographic press, the result of which is, that they can be had for from thirty-five to one hundred and fifty dollars, according to the size, goodness and strength of material of which they

are constructed. This is exclusive of rollers, ink, and stones. The rollers and ink will cost about thirty dollars, and the stones are to be had at ten cents the pound. Presuming your object to be usefulness and economy combined, I submit the following as my estimate of the cost of a suitable one for the printing of charts, viz:

Cost of press	\$130
Rollers and ink	30
Five hundred pounds of stone, at ten cents	50
	\$200

For the maintenance of the press there will be required a printer, and a laborer to assist in working the press when the impressions are striking off. The pay of a printer is from ten to fourteen dollars a week in New York, and no one who understands the art can be had under that price. The laborer's services would only be required occasionally, and it would be, therefore, preferable to hire him when wanted, until the press was in full operation and constantly employed. Therefore, I should estimate the maintenance of the press as follows, for a year:

Lithographic printer, at \$50 per month	\$600
Contingencies, including labor, paper, &c.	100
	\$700

So that the purchase and maintenance of the press for the first year would be nine hundred dollars.

I have made many inquiries relative to the cost of the charts that could be printed on a press, for the last ten years, and regret that I have not been able to obtain any information for you, having been informed by the accounting officers that all the accounts of the navy agents and pursers, both at home and abroad, that served in the navy for that time, would have to be consulted, which would require, as they inform me, a period of six months. I am equally at a loss to inform you of the amount that has probably been expended in the service for those purposes.

In the place of this information, I can offer many reasons for the advantages to be derived from such an establishment, which will probably tend to satisfy you that the expenditure would not be thrown away. In the first place, all the charts now on hand might be made serviceable, by correcting the erroneous parts, viz: By annexing to them small lithographs of those parts corrected, which charts cannot now be supplied to our public vessels without endangering the public property in some degree; thus making what is now worthless valuable. In the second place, charts of harbors and coasts might be furnished our vessels on large and accurate scales, (and which are alone published by the English and French hydrographical officers,) that cannot now be bought. Thirdly, errors that had been discovered by navigators, (which are of frequent occurrence,) could be immediately corrected, which the publishers of charts wholly neglect, or are slow in doing, not only on account of the expense in altering the plate, but the loss in not being able to sell the impressions they have on hand. Fourthly, the ease and small expense at which it would enable the government to extend any hydrographical information to the mercantile marine, and to embody at once, in a useful shape, all hydrographical information that may be obtained; it is believed that many disasters to vessels would be prevented by having small sections of charts, showing the situations of dangers, to enable navigators fully to comprehend them; at once serving to dissipate any erroneous description, and making it clear to the most common understanding. The opportunity of obtaining hydrographical information, well authenticated and illustrated on charts, would facilitate the insurance of vessels, and equalize the risk between the insurer and insured. For the want of this information, and nowhere to obtain it sufficiently authenticated, many merchants are now denied this privilege, and others receive it at a large premium. As it is one of the great objects of our government to afford facilities to its commerce, and spread useful information, there are few ways in which more valuable information could be spread, at so small expense, as by the establishment of a lithographic press connected with this office, which would not only receive there the information, but be enabled to put it in immediate circulation, at the same time that it is a great economy in furnishing the navy with charts, and those that cannot be obtained elsewhere. Fifthly, as the coast survey progresses, it would enable the government to issue copies at a little more than the price of the paper, which alone, contrasted with the amount now expending by Congress in the publication of the survey of Narraganset Bay, would have bought and maintained a lithographic press for three or four years. In connection with all this, it might be employed in printing off circulars for the departments. All this, I am of opinion, would occupy a press fully, and could not be obtained by even employing another printer at the press of the War Department, (which would be the same expense, except the first cost of the press,) as the time of printing could not be at our own disposal, which is a material consideration in the success of the operation, being very much influenced by the state of the temperature.

These are some of the prominent objects that have appeared to me to be embraced in your letter, and which I have the honor respectfully to submit to your consideration.

I am, your most obedient servant,

CHARLES WILKES, JR. *Lieut. U. S. Navy, in charge of Charts, Instruments, &c.*

Hon. LEVI WOODBURY, *Secretary of the Navy.*

F.

General estimate of the expense of the marine corps, for the year 1835.

There will be required for the support of the marine corps during the year 1835, in addition to the balances which may remain on hand on the 1st January, 1835, the sum of two hundred and eighty-seven thousand three hundred and nine dollars and fifty-eight cents.

Paymaster's department.

- 1. For the pay of the officers, non-commissioned officers, musicians and privates, and subsistence of the officers of the marine corps..... \$166,749 55

Quartermaster's department.

- 2. For the provisions for the non-commissioned officers, musicians and privates serving on shore, servants and washerwomen..... \$33,565 60
 - 3. For clothing..... 38,711 25
 - 4. For fuel..... 15,166 00
 - 5. For repair of barracks..... 3,000 00
 - 6. For transportation of the officers, non-commissioned officers, musicians and privates, and expenses of recruiting..... 6,000 00
 - 7. For medicines, hospital stores, surgical instruments, and pay of matron, and acting hospital stewards..... 4,139 25
 - 8. For contingencies, viz: Freight, ferriage, toll, wharfage and cartage; per diem allowance for attending courts-martial and courts of inquiry; compensation for officers and men on extra duty; compensation to judge advocates; house rent where there are no public quarters assigned; incidental labor in the Quartermaster's department; expense of burying deceased persons belonging to the marine corps; printing, stationery, forage, postage on public letters; expenses in pursuit of deserters; candles and oil for the different stations, straw for the men, barrack furniture, bed-sacks, spades, axes, shovels, picks and carpenters' tools..... 17,977 93
 - 9. For military stores, pay of armorers, keeping arms in repair, drums, fifes, flags, accoutrements and ordnance stores..... 2,000 00
- 120,560 03
\$287,309 58

Respectfully submitted.

E. J. WEED, *Quartermaster Marine Corps.*

F. I.

Estimated distribution of the officers, non-commissioned officers, musicians, and privates of the United States marine corps serving on shore.

Where distributed.	Colonel commandant.	Lieutenant colonel.	Majors.	Staff.	Captains.	First lieutenants.	Second lieutenants.	Non-commissioned staff.	Sergeants.	Corporals.	Musicians.	Privates.	Total.

REPAIRS OF BARRACKS.

For what purpose required.	Aggregate amount.
For repairs of barracks at Portsmouth, N. H.....	\$300 00
For repairs of barracks at Charlestown.....	400 00
For repairs of barracks at Philadelphia.....	400 00
For repairs of barracks at Norfolk, Virginia.....	400 00
For repairs of barracks at head-quarters and navy yard.....	1,600 00
Total amount required.....	\$3,000 00

Respectfully submitted.

E. J. WEED, *Quartermaster Marine Corps.*

G.

List of vessels in commission of each squadron, their commanders, and stations.

Class.	Names.	Flag ships.	Commanders of vessels.	Commanders of squadrons.	Station.
Ship of the line.	Delaware	Flag ship	Captain J. B. Nicolson	Commodore D. T. Patterson	Mediterranean.
Frigate	United States		Captain Henry E. Ballard		Mediterranean.
Frigate	Potomac		Captain J. J. Nicholson		Mediterranean.
Sloop	John Adams		Master Commandant David Conner		Mediterranean.
Schooner	Shark		Lieutenant Hiram Paulding		Mediterranean.
Sloop	St. Louis	Flag ship	Master Commandant C. S. McCauley	Commodore J. D. Henley	West Indies.
Sloop	Vandalia		Master Commandant Thos. T. Webb		West Indies.
Sloop	Falmouth		Master Commandant L. Rosseau		West Indies.
Schooner	Grampus		Lieutenant John White		West Indies.
Schooner	Experiment		Lieutenant Thomas Paine		West Indies.
Sloop	Natchez	Flag ship	Master Commandant J. P. Zantzinger	Commodore James Roushaw	Coast of Brazil.
Sloop	Ontario		Master Commandant William D. Salter		Coast of Brazil.
Sloop	Erie		Master Commandant John Percival		Coast of Brazil.
Schooner	Enterprise		Lieutenant A. S. Campbell		Coast of Brazil.
Frigate	Brandywine	Flag ship	Captain David Deacon	Commodore A. S. Wadsworth	Pacific.
Sloop	Fairfield		Master Commandant E. A. F. Valette		Pacific.
Sloop	Vincennes		Master Commandant John H. Aulick		Pacific.
Schooner	Dolphin		Lieutenant Ralph Voorhees		Pacific.
Schooner	Boxer		Lieutenant Hugh N. Page		Pacific.

H.

Statement showing the names, distribution, and condition of the vessels in ordinary, on the 1st of October, 1834.

AT PORTSMOUTH, N. H.

Concord—sloop-of-war, requires to be coppered, and other slight repairs.
Lexington—sloop-of-war, requires considerable repairs.

AT CHARLESTOWN, MASS.

Columbus—ship of the line, requires large repairs.
Independence—ship of the line, requires very large repairs.
Constitution—frigate, in good order.
Boston—sloop-of-war, requires new coppering, and other slight repairs.

AT BROOKLYN, N. Y.

Washington—ship of the line, requires very large repairs.
Franklin—ship of the line, requires very large repairs.
Ohio—hull requires extensive repairs; few of her equipments have ever been provided.
Hudson—frigate, doubtful if fit for sea service; is used as a receiving vessel.
Peacock—sloop-of-war, requires considerable repairs and coppering.

AT PHILADELPHIA.

Cyane—sloop-of-war, condemned for sea service, to be used as a receiving vessel.
Warren—sloop-of-war, requires slight repairs.
Sea Gull—old steam vessel, decayed, unfit for service; her sale is recommended.

AT GOSPORT, VA.

North Carolina—ship of the line, requires middling repairs and coppering.
Guerriere—frigate, requires very large repairs or to be rebuilt.
Java—frigate, unfit for sea service; she is used as a receiving vessel.

I.

Statement of the vessels building at the different navy yards.

Those building under the law for the gradual increase of the navy are distributed as follows:

One ship of the line, one frigate.	AT PORTSMOUTH, N. H.
Two ships of the line, one frigate.	AT CHARLESTOWN, MASS.
Two frigates.	AT BROOKLYN, N. Y.
One ship of the line, one frigate.	AT PHILADELPHIA.
One frigate.	AT WASHINGTON.
One ship of the line, one frigate.	AT GOSPORT, VA.

All these vessels are under cover, and in a good state of preservation.

A frigate is also building at Gosport, Virginia, to replace the *Macedonian*, under a special act of Congress, approved 10th July, 1832.

K.

General statement of the measures which have been taken to carry into effect the laws for the gradual increase of the navy, approved 29th April, 1816, and 3d March, 1821.

NAVY COMMISSIONERS' OFFICE, October 1, 1834.

Under the provisions of the acts, the ships of the line *Columbus*, *North Carolina*, and *Delaware* were built and equipped for service some years since.

The ship of the line *Ohio* was launched, but has never been equipped.

The frigates *Brandywine* and *Potomac* have been equipped and employed.

Five ships of the line and seven frigates remain upon the stocks in the different yards, all under tight houses, and in a good state of preservation. They are so far advanced, that they may be equipped as soon as crews could be collected for them. There are also many valuable materials on hand at the several yards, belonging to this appropriation, preparatory to the completion and equipment of the vessels; but the amount remaining in the Treasury, \$186,613.19, would be insufficient to supply the probable deficiency, as stated in a letter from the board to the Secretary of the Navy, of the 19th June last; but, if the services of these vessels are not expected to be soon required, no immediate appropriation will be necessary for them.

The vessels which have not yet been launched are at the following navy yards, viz:

- At Portsmouth, N. H., one ship of the line and one frigate.
- At Charlestown, Massachusetts, two ships of the line and one frigate.
- At Brooklyn, N. Y., two frigates.
- At Philadelphia, one ship of the line and one frigate.
- At Washington, one frigate.
- At Gosport, Va., one ship of the line and one frigate.

L.

General statement of the measures which have been adopted under the acts of Congress for the gradual improvement of the navy, approved March 3, 1827, and March 2, 1833.

Live oak frame timber have been delivered under contracts, at the respective navy yards, as follows, viz:

- At Charlestown, Massachusetts, for two ships of the line, two frigates, and one sloop-of-war.
- At Brooklyn, New York, for one frigate.
- At Philadelphia, for two frigates and one sloop-of-war.
- At Washington, for one frigate and one sloop-of-war, together with part of a frame for another sloop-of-war.

At Gosport, Virginia, for two ships of the line, one frigate, and one sloop-of-war.

A contract has been made for the frame timber of a frigate and a sloop-of-war at the Navy yard near Portsmouth, New Hampshire, of which about 17,304 have been delivered for the frigate, and about 8,284 feet for the sloop-of-war.

Upon a contract for the delivery of the frame of a ship of the line at Brooklyn, New York, none has been delivered, and there is reason to fear that it may be necessary to resort to legal means to obtain a performance of the contract.

The total quantity of live oak timber on hand, under this appropriation, on October 1, 1834, was 397,906 cubic feet, which cost \$492,030.45.

There have also been procured, and there were on hand at the above date, the following quantities of other timber:

Of white oak timber, 244,998 cubic feet, which cost.....	\$81,150 74
Of white oak plank, 268,929 superficial feet, which cost	13,957 94
Of yellow pine timber, for plank, 217,182 cubic feet, which cost	74,328 19
Of yellow pine timber, for masts and spars, 57,730 feet, which cost	35,750 37
Of white oak knees, 6,253 in number, which cost	32,852 64

Making a total cost of..... \$238,039 88

The expenditure for labor, in receiving and stowing materials, and for other purposes not herein otherwise enumerated, up to October 1, has been about \$138,994.32.

Of the two dry docks authorized, both were so far completed as to be available before the commencement of the last session of Congress.

The one at Charlestown was transferred from the charge of the constructing engineer to that of the commandant of the yard, on September 9th, 1833, and the total cost was \$677,089.78.

That at Gosport, Virginia, was transferred to the charge of the commandant of that yard on the 15th of March, 1834, and the cost to that time had been \$962,459.19. Some parts of its dependencies were not then fully completed; and there has been since expended the sum of \$11,897.50, which makes the total cost to the 1st of October, 1834, equal to \$974,356.69.

Five buildings for the protection of materials have been built and paid for from this appropriation, at a cost of \$136,128.34; and some other expenditures for similar purposes have also been made at New York and Philadelphia, at a further expense of about \$7,380, making a total for building and preserving materials of about \$143,508.84.

Attention has also been given to the selection of public lands, and to other measures for the preservation and cultivation of live oak trees, and an expense has been incurred amounting to about \$66,983.84 in the whole; but this subject has been so recently placed under the immediate charge of the board that they are unable to present any detailed statement upon it.

Offers have been recently accepted, and contracts will be soon made, for the white oak and yellow pine timber which is required to complete the hulls of all the vessels for which frames are provided, and for the iron and copper which will be necessary for the same purpose.

It is intended to make early arrangements for procuring materials for the steam vessels authorized by the act, the board having hitherto delayed action upon this subject for the purpose of obtaining information on some important points.

The amounts which have been appropriated, and which are available to the close of the present year, are \$4,000,000, and of this sum there remained in the Treasury and in the hands of the navy agents, on the 1st of October, 1834, the sum of \$1,278,995.70.

The contracts about to be entered into for timber, iron, and copper will amount to about \$745,500; the amounts required to meet existing contracts to about \$97,500, leaving, of the amount already appropriated, about \$435,995 for the steam vessels, and for the purchase of other materials, and their preservation.

M.

Statement of the amount and description of stocks owned by the navy pension fund on the 1st of November, 1833, the changes made in them by redemption sales and purchases to the 1st of November, 1834, and the periods at which the interest on said stocks is payable.

Privateer pension fund.

Balance in the Treasury, 1st November, 1833.....	\$836 83
Repayment from 1st November, 1833, to 1st November, 1834.....	34,154 05
	<u>\$34,990 88</u>
Payments from 1st November, 1833, to 1st November, 1834.....	32,729 42
	<u>\$1,261 46</u>

N, 2.

Statements showing the balance standing to the credit of the privateer pension fund on the 1st day of October, 1833; the amount of receipts and disbursements on account of said fund from that date to the 1st of November, 1834; and the amount of advances to agents during the same period.

1. Balance in the Treasury to the credit of the fund on the 1st day of October, 1833, per Register's report.....		<u>\$1,304 09</u>
2. Amount received into the Treasury since that time, from whom, and on what account, viz:		
1833.		
Oct. 10.	From the Secretary of the Navy, trustee, for interest on Maryland five per cent. stock.....	\$532 09
1834.		
Jan. 18.	From the Secretary of the Navy, trustee, for dividends on United States Bank stock.....	49 00
Jan. 25.	From the Secretary of the Navy, trustee, for dividends sold in New York.....	52 50
Jan. 30.	From the Secretary of the Navy, trustee, for interest on Maryland five per cent.....	532 09
Jan. 30.	From the Secretary of the Navy, trustee, for proceeds of sale of 15 shares United States Bank stock.....	1,605 18
Mar. 7.	From navy pension fund, to replace this amount, which was erroneously applied to its use, in December last, out of stock sold for privateer pension fund.....	509 98

April 9.	From president Branch Bank United States, at Portland, Me., refunded	\$100 00
April 11.	From Secretary of the Navy, for interest on Maryland five per cents.	532 09
June 20.	From Secretary of the Navy, for proceeds of sale of 16 shares United States stock.....	1,708 00
July 15.	From the Secretary of the Navy, for interest on Maryland five per cents.....	532 09
July 17.	From the Secretary of the Navy, for proceeds of sale of seventeen shares United States Bank stock.....	1,769 93
July 13.	From the Secretary of the Navy, for dividends on United States Bank stock.....	59 50
Aug. 15.	From the Secretary of the Navy, for proceeds of sale of \$5,000 Maryland five per cents.....	5,079 62
Aug. 23.	From the Secretary of the Navy, for proceeds of sale of \$2,500 Maryland five per cents	2,543 63
Aug. 29.	From the Secretary of the Navy, for proceeds of sale of \$7,000 Maryland five per cents	7,052 33
Sept. 3.	From the Secretary of the Navy, for proceeds of sale of \$1,500 Maryland five per cents	1,526 18
Sept. 12.	From the Secretary of the Navy, for proceeds of sale of \$4,000 Maryland five per cents	4,069 80
Sept. 22.	From the Secretary of the Navy, for proceeds of sale of \$5,000 Maryland five per cents	5,087 25
Oct. 21.	From the Secretary of the Navy, for proceeds of sale of \$2,000 Maryland six per cents.....	2,044 88
Total amount of receipts.....		<u>\$35,686 14</u>

3. Disbursements made from the fund, from the 1st of October, 1833, to the 1st day of November, 1834, viz:

1833.			
Oct.	5.	Paid Secretary of the Treasury, for ten shares United States Bank stock.....	\$1,000 00
Dec.	12.	Paid Secretary of the Treasury, for 8 shares United States Bank stock.....	800 00
1834.			
Feb.	22.	Paid Secretary of the Treasury, for 8 shares United States Bank stock.....	800 00
Feb.	22.	Paid J. P. McCorkle, by a transfer in his account.....	\$19 81
Feb.	22.	Paid Richard Smith	235 18
			<u>254 99</u>
Feb.	24.	Paid Richard Smith, for dividends on 15 shares bank stock, sold in December last, erroneously deposited to the credit of the Treasurer, in lieu of the purchaser	52 50
July	15.	Paid Maria Robinson, widow, for pension in full	750 00
July	24.	Paid Secretary of the Treasury for 11 shares United States Bank stock.....	1,100 00
July	31.	Paid Nancy Brown, widow, for pension in full	720 00
Aug.	2.	Paid Margaret Southcomb, widow, for pension in full.....	1,200 00
Aug.	7.	Paid Grace Roath, widow, for pension in full	360 00
Aug.	7.	Paid Mary Burditt, widow, for pension in full	600 00
Aug.	7.	Paid Mary Montgomery, widow, for pension in full	480 00
Aug.	27.	Paid Elizabeth Bartlett, widow, for pension in full.....	360 00
Aug.	27.	Paid Lydia Florence, widow, for pension in full.....	720 00
Aug.	27.	Paid Mary Elliott, widow, for pension in full	480 00
Aug.	27.	Paid Sarah Roach, widow, for pension in full.....	720 00
Aug.	29.	Paid Lavinia Risley, widow, for pension in full	480 00
Sept.	1.	Paid Nancy Tewksbury, widow, for pension in full	600 00
Sept.	1.	Paid Elias Kane, for stationery furnished J. P. McCorkle.....	2 83
Sept.	10.	Paid Rebecca Widger, widow, for pension in full.....	360 00
Sept.	17.	Paid Mary Fish, widow, for pension in full	480 00
Sept.	17.	Paid Agnes Lowzado, widow, for pension in full.....	360 00
Oct.	1.	Paid Hannah Patch, widow, for pension in full.....	360 00
Oct.	1.	Paid Susan Veal, widow, for pension in full.....	600 00
Oct.	1.	Paid Hannah Richardson, for pension in full.....	600 00
Oct.	1.	Paid Christina Fisher, widow, for pension in full	480 00
Oct.	10.	Paid Frances Jones, widow, for pension in full.....	600 00
Oct.	14.	Paid Sarah Dennis, widow, for pension in full.....	360 00
Aug.	9.	Paid Sarah Cale, widow, for pension in full.....	360 00
Aug.	9.	Paid Maria Egbert, widow, for pension in full	360 00
Aug.	9.	Paid Mary Foster, widow, for pension in full	480 00
Aug.	9.	Paid Hannah Green, widow, for pension in full.....	600 00
Aug.	9.	Paid Mary Rankin, widow, for pension in full	360 00
Aug.	9.	Paid Euphemia Dobson, widow, for pension in full.....	1,200 00
Aug.	9.	Paid Sarah Green, widow, for pension in full	720 00
Aug.	13.	Paid Abigail Goldsmith, widow, for pension in full.....	360 00

Total amount of disbursements..... \$20,090 33

4. Advances to agents, to pay pensions, viz:

1834.			
Jan.	28.	To Richard Smith, cashier, to remit to agent.....	\$1,370 00
June	20.	To president of the Bank United States, Philadelphia.....	120 00
June	20.	To president of the Branch Bank United States, Boston.....	1,500 00
June	20.	To president of the Branch Bank United States, Providence, R. I.	54 00
June	20.	To president of the Branch Bank United States, Baltimore.....	212 00
June	20.	To president of the Branch Bank United States, New York.....	240 00
June	20.	To president of the Branch Bank United States, Washington, D. C.	37 00
June	20.	To president of the Branch Bank United States, Portland, Maine.	50 00
July	29.	To president of the Branch Bank United States, Boston.....	324 00
Aug.	15.	To president of the Branch Bank United States, New York.....	1,080 00
		To president of the Branch Bank United States, Portsmouth, N. H.	1,296 00
Aug.	28.	To president of the Branch Bank United States, Boston.....	2,039 10
Sept.	12.	To president of the Branch Bank United States, Portsmouth, N. H.	3,780 00
Sept.	16.	To president of the Branch Bank United States, Portland, Maine..	1,060 00
Sept.	23.	To president of the Branch Bank United States, Portland, Maine..	636 00
Sept.	23.	To president of the Branch Bank United States, Portsmouth, N. H.	432 00
Sept.	23.	To president of the Branch Bank United States, New York.....	1,060 00
Sept.	23.	To Elias Kane, N. A., Washington, D. C.	12 00
Sept.	27.	To president of the Branch Bank United States, Portland, Maine.	318 00
Oct.	10.	To president of the Branch Bank United States, New York.....	20 00
Total amount of advances			\$15,639 10

Q.

Report upon the works executed for the survey of the coast of the United States, under the law of 1832, and their junction with the works made in 1817, by and under the direction of Ferdinand Rodolph Hassler.

1. That part of the work for the survey of the coast, which has been executed since the renewed law of 1832, is grounded upon the work done in 1817, under the first original law of 1807.

Therefore, in this first public report of a more full and general character, which I have the occasion to render, it is necessary to go back to that earlier period, in order to give a proper view of the state of

the work, its systematic connections, and its bearings in every respect; so much the more, as the circumstances of the interruption in 1818 precluded from the presentation of the full report, which was just then in preparation.

2. I may be allowed to suppose the principles upon which the work is to be executed, as sufficiently known, as well from the mathematical elements that must guide such a work in general, as by the plans that have been so repeatedly discussed and approved, upon all the occasions that circumstances have presented for their full consideration, and the test of the public approbation that they have passed.

3. It is, therefore, rather my task here to show how these plans have hitherto been followed; to state the results that have been obtained up to the present time; and to show their consequences.

4. The first distribution of a country into regular geometrical figures, that will approach its form the nearest, and under the most advantageous circumstances to procure accuracy in the survey of it, requires the union of a detailed knowledge of localities and theoretical principles, which is in general foreign to the habitual knowledge of the country in respect to its civil connections: the operator can therefore be guided in it by no other but his personal inspection of the localities.

5. The general outline of the coast of the United States presents, in the neighborhood of New York, a considerable angle between the main directions easterly and southerly, and in some measure a basin, over which lines may be laid and determined between the surrounding elevations fronting these two main directions, thereby furnishing proper base lines for the continuance of the work; though, therefore, I extended my first reconnoitring as far south as the Chesapeake Bay, I was ultimately, for the beginning of my work, arrested particularly by the decided advantages of that locality.

6. Guided by the idea that behind the straight ridge of the Palisadoes, in New Jersey, bordering the Hudson river above New York, a straight valley was likely to be found, that would present the necessary first element of any survey, namely, a nearly level base line, of sufficient length to serve as ground to the triangulation, I directed my attention to, and found the confirmation in, the valley called English Neighborhood; of which I made a detailed survey in the spring of 1817, in order to give it the best location that the ground would admit of, and actually measured the distance between Vreeland's and Cherry hill, as more favorable than any locality that I had visited before with the same views.

7. As habitual for such kind of works, under the expectation of taking the best advantage of the future nearer investigation of the country, and not to make, at the very outset, expenses that might be more advantageously put upon a better line, this base was measured in a preliminary manner with a chain of twenty links, of one metre each, constructed under my direction, by which it was found to be 9,446.15 metres, corresponding to about 30,999.8 feet English measure.

8. From Weasel mountain, one of the prominent rocks of the Newark mountains, first ridge, which formed the first elevated triangle point through a number of other elevated points, a system of triangles was laid over the whole basin of New York Bay, and its surrounding valleys, that presented determined distances, eastward, for the further continuation of the work over Connecticut and Long Island, and southerly over New Jersey, towards the Delaware, over the valley, of which the nature of the country indicates the course for the main triangulation towards the south, to which the survey of the outer coast must attach itself at the two ends, the Delaware Bay and Long Branch, because the sea-shore itself is too flat, too wooded, and deprived of such prominent points as are necessary for a large triangulation.

9. These works exhausted the time of the summer and fall of 1817, until past middle December, even with the omission of the extreme stations which it was intended to occupy the next year, at the same time as the survey would be further extended.

10. Though, in extensive surveys, it is habitual to measure a verification base only at a considerable distance from the first base, I considered it, on the contrary, of importance, in my case, to have a verification, as early as possible, of the proportional accuracy of the base line measured in English Neighborhood, which formed then, and forms as yet, the unit of the whole triangulation.

Therefore, a second, or verification base was measured in December, 1817, upon the sea-shore of Long Island, between a point near the Narrows, and another near Gravesend beach, though not in a very favorable locality.

11. The length of this line was found 7,753 metres, or 25,433 $\frac{1}{4}$ feet English. The results of three different combinations of the triangles carried out upon it, falling all within two-tenths of a metre (or less than eight inches) of the distance measured, and within themselves, I had reason to consider myself sufficiently authorized to use my base line of English Neighborhood as a preliminary standard for my work.

As this coincidence is greater than usual in common geographical operations, I consider myself also allowed to propose to ground, upon the work thus far obtained, the detailed survey of New York harbor, for the next summer, as I proposed in my letter to the Treasury Department of the 18th December, 1817. The great coincidence of the sums of the angles of the triangles with that required by theory, came equally in support of this satisfactory result.

12. The whole of the observations collected during the summer of 1817, I had, of course, to submit to the necessary reductions, calculations, and clearing up of the results, during the ensuing winter. Besides that, I made also the theoretical calculations that must be derived from the theory of the figure of the earth, and the best known results of the elementary magnitudes, to deduce, from the data obtained by the triangulation, the proper location of each point to its place upon the earth, and in time upon a map; from the same principles, I deduced and calculated, also, those principles upon which the future maps were to be constructed, or, as usually called, the projection; which required so much more attention, and reflected calculation, as in the case of the coast survey it shall serve to carry the work out, in the minutest details, upon a large scale, and a great extent of country.

13. While I was engaged in these calculations, the law of 1818 put an end to my further agency in the work, only a few weeks before I would have been able to present a report from my work, that would certainly have been satisfactory, as I stated in my letter to the Treasury Department of the 9th of April, 1818, written in answer to that announcing to me the dispositions that led to the breaking up of the work. In consequence of which, I delivered to the War Department all the journals, books, instruments, and other appurtenances of the survey, together with an unexpended appropriation of upwards of \$5,000.

14. It is necessary that the stations of a work of the nature of the coast survey shall be preserved for future times, and uses in any other surveys to which the determination made by it will serve as fundamental units. Therefore, I had caused hollow cones of stone ware to be made, which were sunk under ground at the station points, deep enough to be sheltered from any plough or light accidental digging: they are well centred to the stations, so that, on their discovery, a signal pole can be placed

in them, to serve at any time equally as at first, as, by their nature, they will remain undecayed for centuries. Where the station point fell upon a solid rock, I caused a hole, about two inches in diameter, and seven or eight inches deep, to be drilled at the station point, and filled with melted brimstone, which will equally serve to indicate the exact point of the station. An exact description of the locality of the station, must, of course, form a part of the journal of each station, to guide in the discovery of the point at any future time.

15. It does not belong here to speak of the chasm that is found, from that time until the renewal of the law of 1807 by that of 1832, which confirmed the former in all its parts, though with the condition that it shall not be considered as authorizing the establishment of a permanent astronomical observatory, which the most enlightened members of the government had, in 1807 and 1816, considered as a natural consequence of the law, because it should, in fact, form the fixed point in the hemisphere of America, to which the work of the coast survey should be attached; wherefore, also, I had been directed to procure, and actually had procured, suitable instruments for such establishments at the same time with those for the survey.

16. This peculiarity of the law of 1832 I have always considered, as stated already in one of my letters to the Treasury Department, as intended to provoke a more direct and separate proposition for the establishment of a proper national observatory upon a greater scale than a mere accessory to the coast survey, and properly adapted to the standing of our country among the civilized nations that have a navy, for which such establishment is an absolute requisite.

17. In taking up the work again in 1832, it was of course proper to take advantage of what had been done in 1817, as base of the operations to be made under the new law, its foundation being good, and all its principal points ascertainable, by the precaution taken, as stated above: the proper acceleration and economy of the work, and good principles, equally indicated that course in preference to any other.

18. The first operation was, therefore, to uncover again the station points of the work of 1817, and to replace signals upon all the essential points; these were easily discovered, and signals placed upon them of the same kind as formerly used, namely, truncated cones of sheet tin elevated upon poles: only two of them, needed only at some future period for the southern extension of the survey, were not yet found by my assistants, who visited the places, but will certainly be found when more especially needed.

19. The direction in which the first extension of the work was by preference to be made, was to be determined by the consideration of where the most advantageous progress could be expected, in order that I might be enabled to present, at as early a period as possible, an actually executed full scheme and example of the work. For these views, the continuation of the work eastwardly, over Connecticut and Long Island, presented evident advantages over that southerly, through Jersey, &c.

20. The line between Weasel mountain, near Patterson, New Jersey, and Harrowhill, near Hempstead harbor, upon Long Island, had been determined, in 1817, to serve for this direction; therefore I reconnoitred in the fall of 1832, and even in the winter, through a part of the Long Island hills, and over the elevations of Connecticut that have those of Long Island constantly in view; and though, in the various intermixtures which they present, all the information that I received from the inhabitants appeared contrary to success, I was so fortunate as to find a series of five to seven hills connecting very properly, and to good advantage for a favorable chain of triangles; and even the corresponding points of Long Island proved more visible from one another than their position, almost in a straight line, had allowed me at first to expect, by the generally wooded state of the interior of the country. Signals were, of course, placed upon all these points, of the same truncated cones as were always used.

21. All the points thus reconnoitred were placed upon a map of Long Island, according to approximate observations made at them, constructed according to the problem of three points, and dependent on the light-houses on both shores of Long Island Sound.

But, besides that the intransparency of the atmosphere near the sea shore in winter, always renders the distant vision indistinct, the actual inclemency of the month of January prevented the full decision upon the visibility of Weasel mountain, from Buttermilk hill, in Dutchess county, behind Tarrytown, which its locality promised to bring in the line from Weasel, through the interruption of the hills of the Pallisadoes, and the northern hills of New York, commonly called the Notch, which was, however, of the greatest importance.

22. Circumstances out of my control delayed my stay in Washington beyond my expectation, during the winter of 1832 to 1833. As soon as I had again arrived in New York, I placed upon the stations of Weasel mountain and Harrowhill signals of larger dimensions, though of the same form as I always used. Then I began the summer campaign with the station at Buttermilk hill, where it was necessary to ascertain first whether that point would actually answer, in full, the condition of joining the triangulation of 1817 with the continuation of it that I had projected. This was actually verified; so that the whole of my projected triangulation promised to be proper and available.

23. Upon this first station I had, of course, also to put the instruments in proper adjustment, and to introduce my assistants into the peculiarities of the work, and the observations; all which protracted so much more the stay upon this first station, in addition to the often unfavorable weather. The extremely unfavorable weather of the most part of the last season, in general, protracted our stay upon all the stations much beyond expectation, and what is hoped will be the case in future, particularly when the arrival of the new instrument expected from London next summer, will dispense, in some measure, with the numerous and anxious repetitions and cares which the present state of the two-feet theodolite, that had to be used for the great triangulation, obliged me to go through: for this campaign has particularly proved that the accuracy and good state of the instruments is one of the greatest means of economy, by the greater celerity with which results can be obtained by them.

24. It would have been desirable, after the success of that station of Buttermilk, to go upon Weasel mountain and Harrowhill, to observe the angles of this main junction triangle, but it was also desirable to ascertain the whole series of triangles projected; and I hoped to make these stations at the close of the campaign, in the fall, with more economy of the moving of the whole establishment. To get, however, the preliminary determination of the distances required for the calculations which it is necessary to make in the field to guide the progress of the work, I determined this triangle by the given distance between Weasel and Harrowhill, of which the angle subtended at Buttermilk was carefully measured by the azimuth carefully observed there, and compared with the one that I had observed in 1817 upon Weasel, though I had far less reason to rely upon its accuracy.

25. I prosecuted, therefore, my northern triangle stations easterly until past New Haven, and, by

return, the southern stations upon Long Island, and laid some triangle points upon the southern sea shore of the island. From these main stations I measured as many angles upon secondary triangle points as the localities, time, and circumstances allowed, in the same manner as I had done in 1817. In the course of the work, also, another station point was found, the substitution of which for that of Buttermilk will furnish a very desirable and very favorable verification of the large distances, by doubling the series of the largest triangles. I made, therefore, the proper observations for that from the stations by which it will join the other triangles, the distribution of which is on another side best adapted for the survey of the details in their neighborhood.

26. Upon one of the southern beaches of Long Island appears to present itself a locality for measuring a base line of more extent, and probably under more favorable circumstances than that of English Neighborhood; this is now under nearer investigation, by Captain Swift, and the necessary preparations for this operation, as important as laborious, tedious, and expensive, are in proper progress, as it must, necessarily, be the first work of this summer's campaign.

27. The operations before described having lasted until December, at which time we were upon the Westhills stations, and the winter setting fully in, with the consequent intransparency of the atmosphere of the sea shore, I was forced to abandon my plan to visit the stations of Weasel and Harrow myself. To obtain, however, a better determination, or verification, I directed these two stations to be occupied, preliminarily, by some of my assistants, though with inferior instruments, that will, therefore, not dispense my observing there, in proper time, myself. So, Mr. Blunt observed the angles upon Harrow, and Mr. Ferguson those upon Weasel; and upon their results, joined with those of Buttermilk hill, the present preliminary determinations are grounded, as far as they are dependent on this part.

28. When I had executed the station at Mount Carmel, the extreme eastern one, to which I had intended to extend my observations that year, I considered myself authorized to form two parties to carry on the secondary triangulations, within the limits of country that my main triangulation embraced, as the triangles could all be sufficiently determined to allow the verifications required in future. Keeping, therefore, only two of my assistants, Captain Swift and Lieutenant Bell, with me, Mr. Ferguson was directed, with the assistance of a secondant, to fill up with secondary triangulations all the parts included between the main northern triangle points and Long Island Sound; and Mr. Blunt, with another secondant, was directed, in a similar manner, for all that related to both shores of Long Island; both equally proceeding from the eastern extremity of our work towards New York.

29. The secondary points thus determined must be sufficiently numerous, and placed in such a manner as to enable from them to fill up the details, by plane table operations on land, and by observations for the soundings upon the water. Considerable advance was made in these secondary parts already in the latter part of last fall, and the works have been taken up again this spring early, though the weather in that neighborhood has again proved very unfavorable.

30. Upon Buttermilk and Toshua regular series of azimuth observations with the sun were made with the two-feet theodolite, by myself; and the latitudes of all the most essential stations were observed by my assistants, partly with the eighteen-inch repeating circle, partly with the ten-inch repeating reflecting circle. By the calculations of this winter, these latitudes were all reduced to one collective result, by means of the azimuths; and their coincidence has been more satisfactory even than I expected.

31. These reductions carried through the works of 1817, to the city hall of New York, the latitude and longitude of which had been determined by entirely different means, gave the points from which the longitudes have been counted, as reduced to Greenwich; there being no other point within the limits of the survey astronomically determined, nor any fixed point in the United States from which the longitude could be counted.

32. As well in my operations of 1817, as in those of last year, the angles of elevation, or depression, of the main station, points from one another, have always been observed, except upon my two stations upon Long Island, because these will be revisited at a future time. These observations will furnish, in time, an interesting collection of data, upon the elevation of all these points over the level of the sea; but neither the winter of 1817 to 1818, nor this last, has it been possible, for want of time, to calculate any results; in fact, it is rather more proper to postpone these calculations until the exact distances are fully determined, upon which these results depend; they will, therefore, with more propriety, form a part of the calculations of next winter.

33. Since I made, in 1818, my calculation of the elements of the projection that will be the most advantageous for the construction of the maps, as most concordant with the results of both the triangulations and the detail surveys, the knowledge of the dimensions and figure of the earth has much improved, and been much more accurately defined; I had, therefore, to make anew all the theoretical calculations thereto referring, upon the most approved elements, of which the leading data are the ellipticity of the earth, and the mean degree of the whole meridian, that is the $\frac{1}{360}$ th part. It would, however, be out of place, in the present state of the work, to enter into these nearer details of theory, which will become of interest hereafter, as the ultimate results of the coast survey must furnish one or more of the data for the perfecting of these results themselves, if it shall take its appropriate standing among the works of this nature; it is to be hoped that it will be properly discussed at the end of the work of the main triangulation.

34. It may be here the place to state the reasons for adopting the metre for the unit measure of the whole survey. 1. I had a fully authentic metre made by the committee of weights and measures in Paris; while of any other measure whatsoever, I could only have a copy more or less accurate. 2. Notwithstanding older ideas to the contrary, I found positively, in my comparisons made for the weights and measures, that, in a general way, the metres are obtained of greater accuracy and coincidence than the English scales. (See my report upon weight and measure comparisons.) 3. By my repeated comparisons of this identical and authentic metre with the scale of Troughton, of eighty-two inches, adopted as English standard in this country, together with a number of other measures, its ratio to either one of them is sufficiently determined to enable at any time to present any distance, in either one of the measures thus compared, as, for instance, to obtain the value in English inches, will need only the addition of the constant logarithm=1.5952859 to the logarithm of any distance recorded in metres. 4. In the ultimate general account, it will be proper to give the distances, both in metres and in yards, or feet, to cause the utility for the various future detail applications for the work.

35. The connection of the station points of the triangulation, by their differences of latitude and longitude, was calculated upon the same theoretical principles stated above; they have coincided with

the results of the latitude observations, that are by their nature entirely independent of the geodetical operations, to such a degree as, notwithstanding all my cares, I did not consider myself authorized to expect; and the reduction to the city hall of New York showed an equal coincidence with observations made some years ago, by Captain Sabine, on the occasion of his pendulum observations.

36. This afforded also an additional proof that the result of the measurement of the base in English Neighborhood, measured in 1817, would be sufficiently relied upon for the preliminary calculations, as it stood the test of being extended to distances about 160 miles from the same. It confirmed equally the near approximation of the azimuths observed last year, &c.

37. It is, however, evident that my dependence for the ultimate azimuths and latitudes of deciding accuracy must as yet be referred to future observations, with the superior means of instruments, &c., that I have in part ordered, and in part still to continue; in respect to the longitude, it is too evident how desirable an observatory will be, as no doubt will be provided in proper time by special means, independent of the coast survey.

38. My attention at the present stage of the work must be directed principally to the measurement of a base line, with all the means of accuracy that I may be able to dispose of, by means of the apparatus of which I have given the description in my printed papers upon the coast survey. The brass parts of the apparatus were put in full good order already, during last summer; the woodwork is in construction in New York, under the direction of Captain Swift; and I have just now put the double metre bars, which shall determine the absolute length, to their proper standard, by means of the apparatus provided for it, and with the help of my assistant in the weight and measure business.

39. In the actual measurement of the base line, I shall unite all my present assistants, principally because they will all take a great interest in the operation, which is, in its kind, of a peculiar nature, and not often occurring, wherein every operator will always follow his peculiar ways, according to his situation and the means at his disposal.

40. As soon as the result of the base line is ascertained, which will require some time and considerable calculations, the result will be applied to the recalculation of all the triangles; and the reductions to the geographical position will be repeated with this new element. Then a projection of the points, upon the scale of the fifty thousandth part, will be made upon papers, distributed over the extent of the work, in such parts as will be best appropriated to the filling up of the detail surveys, by the plane table, and the insertion of the soundings, in which works the most of my assistants will then be distributed, while I shall proceed again in the main triangulation.

41. During the execution of these works, I hope that the instruments ordered of Mr. Troughton, in London, will arrive in this country, at least if he can execute the promises given to that effect. I hope, therefore, to be able to avail myself of the new large instrument, for the continuation of my work in the main triangles, the determination of azimuths, latitude, and all the more delicate observations, upon properly selected favorable stations. The two-feet theodolite, that I have used last summer, I shall then propose to send to Mr. Troughton to have it again put in a proper serviceable state, for that accuracy, of which it is susceptible when in good order.

42. At the same time, with the distribution of the detail surveys upon land, I should like to put in activity two parties of naval gentlemen, for ascertaining the soundings in the neighborhood of the same parts that the detail surveys would embrace; as they would probably sometimes work in conjunction with one another, they would embrace a great part of Long Island Sound, and part of the south shore of Long Island. This, however, will require to take some arrangement previously, in relation to the vessel, or vessels, which it will be necessary to employ in it. Lieut. Bell, of the navy, who has been one of my assistants last summer, will take the direction of at least one of these expeditions, as his acquaintance with the locality will of course assist him much in the proper execution of this task.

43. I join to this report skeleton maps of the triangulations that have been executed hitherto, containing all the main triangles that I executed, and so much of the secondary triangles, of the two separate parties, as have been communicated to me until now. The distances in numbers would be of no interest in this report, and belong only to a final report; upon the scientific part of the work, it is at no rate proper to mention any before the calculations have been grounded upon a final base measured as above stated. These maps present four sheets upon the scale of the one hundred thousandth part, ($\frac{1}{100,000}$) which is that upon which it will about be proper to execute the detail maps for publication; the whole system of the operations, as far as hitherto executed, will become evident by them. It appeared to me to ease the general insight into the bearing of the work, to add a fourth sheet, upon the half scale of the others, that will present the general view of the whole work; the easier reference to the locality of the triangulation will be assisted by the tracing, only in pencil, of the approximate outlines of the coast, for the survey of which the triangles contain the elements. The projections are made upon the principles above stated, and will present no deviation for the filling up to the minutest details, when executed upon the scale of $\frac{1}{100,000}$, in which it is proper to execute the main original copy of the government.

44. It is proper that all the maps should be drawn upon a proportional decimal fraction of the real dimensions. There is a great advantage in being able to ascertain, by the simple measurement, in any length measure whatsoever, the real distances desired; this can only be obtained by such a system of scales, which, therefore, also is the only one adopted in the present times. The scales of so much in inches, or any other small measure per mile, giving altogether an irregular proportion, are very bad, and therefore have been entirely abandoned in the new maps.

45. It is proper to add here some general remarks upon the character which it is necessary to give to the work of the coast survey, its general bearing for the benefit of the country at large, and the influence which its proper execution shall have upon the improvement of the practical mathematical sciences that are so necessary in our country, and the standing of the officers of the army and navy, to whose departments works of this nature, or requiring similar knowledge, are so often referred; though I have already touched this subject upon other occasions.

46. The survey of the coast must evidently, merely as such already, extend land inwards, at any place, until to the ridges of hills or mountains that border the valleys emptying their waters into the sea, or the large bays and rivers; it must present the localities of all the passages and gorges that lead to these valleys, &c., because it must contain all that is needed for the proper defence of the coast in case of any attack whatsoever, just as much as the outlines of the coast and the soundings; because, as these furnish the guide to the navigation, so the others are the elements upon which the directions for a proper defence of the country, in case of need, must be grounded; and all these elements must be so

detailed, and present such a full and self-explaining picture of the country, that, with the map before the eye, the military operations may be properly judged and guided in the cabinet. It is, therefore, also habitual to join for each district a statistical statement of its natural means and resources; it is as desirable to have these accounts of the land part, as those upon the currents in the naval part of the work.

47. This work must besides furnish the elements of any other survey that may be desired for any public aim whatsoever, either within or in the neighborhood of its extent; its accuracy, if properly executed, and its wide range, render it peculiarly fit to become a standard to which all other surveys may, and even shall, be attached; thereby will be gradually obtained the necessary accurate data for any public undertaking of general utility to the country. This feature of the work was felt already in 1817, when the Governor of New Jersey proposed to unite with it the survey of a map of that State, but which was lost by the delay of the decision of the Treasury Department, where I had proposed to accede to the request. It appears equally felt now by the proposition of the State of Maryland for a similar junction of the map of that State, which has been very properly acceded to; and no doubt similar occasions will increase in the same proportion as the general improvement of the country advances, and the proper character of the work of the survey of the coast becomes established; this is another proof of the propriety of the measure that I took at all times properly to secure the station points for future use.

48. The character of a work of the nature of the coast survey is essentially scientific; without that this character be impressed upon it, to the evidence of the public, capable to judge of it, neither credit nor confidence will be given to it; it is, in fact, worse than useless, because it increases the doubts of the cautious and intelligent seamen, and its defects mislead the ignorant who trust to it. Plans, going merely upon what is so wrongfully called sufficient accuracy, are inadmissible, and would prove highly expensive. The economy in the work consists in the certainty of producing the most accurate results.

49. In the execution of the laws in any country, and in a new country in particular, it appears to me to be a duty to take all possible advantage of it, to promote the most general benefit possible of the nation, and especially its scientific improvements, wherever there may be an occasion presented for it, and that upon a liberal scale, because its benefits are always far more extensive than what shows itself at the first outset. I am authorized to this assertion, in the present case, by the approbation which my treating the coast survey with these views has caused me to find in the most enlightened men of the country, and even abroad, as testified, among others, by the late President Jefferson himself, who was the author of the original law, and by many other distinguished citizens; we have, besides, before us, the well-known examples of almost all European countries, who have derived valuable benefits, of various kinds, from the proper execution of similar works, in a scientific form.

50. With these views, also, I found it proper to collect a valuable library of the best works in these parts of mathematics and natural philosophy, that are either directly bearing upon the work itself, or more or less connected with its accessory or influencing branches, by which my assistants may properly improve their scientific standing, and become the more useful to the country in future. It will also be proper to add to the work, as soon as it is in a proper train, such scientific experiments or observations as relate to the pendulum, the magnetic attraction, the tides, refraction, and other similar subjects, which are always connected with such works when properly scientifically treated. I could as yet not do more in this than to cause the magnetic bearing to be observed upon the main stations, merely to determine the declination of the needle at the places and time; but for any other observations nothing is as yet properly provided, nor, in fact, was there time at our disposition for it.

51. By the nature of the services that the navy and the army are engaged to render to the country, these two classes of citizens, that are always of considerable influence in any country, deserve peculiarly, though not to the exclusion of other citizens, to be quoted here in connection with this work. Such officers, in either of these services, as have applied to the study of the higher branches of their profession, of which mathematics form the foundation, will find in the work of the coast survey an occasion of improvement, as well as of gratification for their good dispositions: therefore preference is naturally to be given to those who, with a good foundation in theory, have been successful in the career of practical application of mathematics, in topographical surveying, drawing, and particularly observing and generally in making geodetical and astronomical observations for actual use. Only such officers can reap some benefit for their individual improvement, or be of any service in the work, because this utility must be reciprocal, if success shall attend on either side. The officer or individual whosoever, joining the work, without sufficient knowledge, and even practical ability, cannot reap any benefit from following it, and of course he is also entirely useless for the work, and the coast survey would be improperly laden with him.

52. The success of those officers that have, in the work, both given and received satisfaction, will invite others to acquire the qualifications indispensably required to become serviceable, and thereby to enter the work; but the work itself cannot be the school for him who is too far behind to be of some actual service in it; the distance to be gone through is too great for him; and the functions of all those actually engaged in some part of the work are too constant, and too fully occupying them, that he might be taught and schooled separately who brings not knowledge enough to the work to see himself what he can do, as well in application of his actual acquirements, as in advance of them. All this applies, of course, equally to the assistants from any rank whatever.

53. To all this it is still necessary to add, that habits of assiduity, and devotion to a scientific object, with friendly and open dispositions, without any pretensions, are equally indispensable, moral qualifications to which it is necessary to attend in the selection of the assistants in this work, as much as to their intellectual qualifications and acquirements; for there can, by nature, not be any control upon any observation entrusted to an assistant, or over the assistance rendered in an observation, except the moral strength of confidence; orders from superiors, fear of consequences, and all considerations of that kind, cannot have the slightest power; the morality and ability of the observer, at the very moment, decide what no power whatever can decide; and this is equally applicable to any chief, or any assistant, whosoever, and of whatever grade he may have in the work.

54. In thus exposing the principles that must guide in the selection of the assistants for this work, and which shall therefore ever guide me in the proposition of any assistant, of any rank or class whatever, I give the pledge that I shall always be guided by perfect impartiality as to the personal, though I may propose persons of different qualifications, with the view of their different employments; the moral principle which must guide in all such cases, is simply, that every one must see before him an aim for

his inclination or ambition, to which he will apply his exertions honestly: the result of which will be useful to the work. With these principles I hope to be as successful in my choice as the general chances of human affairs will admit, and to be approved in my selections; therefore to obtain, from the civil, naval, or military rank, always such assistants as will act with pleasure and satisfaction, and therefore do honor to the work and to themselves, thence reflect credit upon our country and nation, convinced, as they must be, that they act before the whole of the civilized world, because the history of such works is always minutely known to every well informed man.

55. I can, therefore, also fully rely upon the concurrence of the Department under which the work is placed, as well in the aim as in the means to reach it successfully. This success must be one of its greatest aims, upon the consideration of usefulness as well as upon that of its high credit.

F. R. HASSLER.

WASHINGTON CITY, *May 17, 1834.*

Notices upon the maps of the triangles herewith joined.

Four sheets upon the scale of 100000 present as well the main triangles as the secondary ones, distributed in such sheets as will be proper, to allow the necessary room for the insertion of the soundings upon the seaside, and the insertion of the details of the land near the coast, thence adapted to the actual execution of the charts and maps for publication upon a large scale; they are of course properly oriented, perpendicular to the meridians and parallels.

No. 1 contains the neighborhood of New York.

No. 2 exhibits the continuation of the country in the same latitude as the former, over Long Island, eastwardly.

No. 3 has that part of the triangulation that falls north of the first sheet, and therefore, principally the triangle points land inwards, connecting with those of the shore.

No. 4 contains the triangle points north of sheet No. 3, thereby presenting the part of Connecticut east of No. 2, and north of Long Island Sound, in the neighborhood of New Haven, &c.

A fifth sheet is added, presenting the union of the whole work, equally oriented, but only upon the half scale of the preceding ones, that is, 200000th part; to show the full connection of the works, to assist in the reference to the localities of the country, the rough outlines of the coast are traced upon this sheet, by which it becomes evident how the triangulation will apply to the detail survey of the minuter configuration of the country, shores, bays, &c., &c.

F. R. HASSLER.

Q, 1.

Report of F. R. Hassler, as superintendent of the survey of the coast, additional to that dated May 17, 1834, containing an account of the progress of that work during the summer, and until November of 1834.

1. I stated in my report, of which this is to be a continuation, as well as in my previous communications, that the accurate measurement of a base line, by the means especially provided for that purpose, the description of which was published long ago, was, after the measurement of the angles of the main part of the triangulation, presented in that report, the first, and, as is well known, most important part of the work; to that I had, therefore, principally to devote my attention and personal exertions the past summer.

2. I also stated in that report, that from the observations upon the stations of Rulands and Westhills, upon Long Island, there appears to present itself the prospect of a base line, far more advantageous, in every point of view, than that measured preliminary in English Neighborhood, New Jersey; namely, upon the beach called Fire Island beach, upon the south shore of Long Island, which separates what is called the Great South Bay from the ocean.

3. Viewed from the two named stations, this beach presented a narrow strip of land that appeared straight between the lighthouse, at the inlet of the bay, and the station point called Head and Horns, and perhaps even farther. Its position lies eminently favorable for the determination of the distance from Westhills to Rulands, which presents itself extremely favorable as a base for the large triangles crossing Long Island Sound over to Connecticut, &c., as evident by the maps of the triangulation joined to my report of last May.

4. These advantages were too great not to decide in favor of this location of the base line, for the execution of which Captain Swift was preparing all the mechanical means in New York, during the time that I wrote my last report, and before. But it would have been very desirable that the actual work could have been begun with the earlier part of the season; this, however, was impossible, on account of a considerable part of my time being taken up in Washington in the latter part of the winter, to give to the Navy Department all the information that was requested, on account of the correspondence of the coast survey being transferred to that Department from the Treasury Department, where all the detail arrangements of the work, and the tenor of the agreements made with me, were known from their very beginning.

5. When I could join my assistants in New York, in the earlier part of June, the means being all on hand, I directed the final adjustment of the whole base measuring apparatus, and what is connected with it: there were also engaged an adequate number of men for the manual assistance required, in the selection of whom we were really fortunate to obtain all efficient, regular men, of such different qualifications as are absolutely required for the very varied exigencies of an accurate measurement of a base line, and the extra works that it requires, in a place entirely isolated, and thence distant from all other means to provide for them.

6. I directed then all the assistants not especially otherwise engaged, the men, and the apparatus, and equipment, to Fire Island lighthouse, in the neighborhood of which the west end of the base line was to fall; and directed the assistants, joining there, to make a detail survey of the beach, from its western end, till to Head and Horns, or even to Watch hill; such a previous survey being always neces-

sary to enable to select the most favorable ground for the actual measurement. The map of this locality, hereto joined, proves this evidently. Two lines between Head and Horns, and some points near the lighthouse, proposed and scrutinized first by my assistants; presented such difficulties by intervening sand hills and bushes, as not only would have required a great length of time in overcoming, but also would have occasioned chances of inaccuracy, besides a great deal of calculation, for the consequent and necessary reductions to the too much interrupted horizontal line.

7. When I could join my assistants upon the beach, in the beginning of July, though by no means in a good state of health, and after having visited the projected lines, the difficulties they presented decided me to try to lay off a straight line upon the outward sandy shore of the ocean, between the sea and the sand hills, which appeared to present a nearly straight line, little different from parallel to the shore. This succeeded so well, that a line was laid out, starting from a sand hill of moderate elevation, somewhat southeast of the lighthouse, and extending over eight miles upon the sandy beach, only in a few instances edging the sand knolls, and in some others going between the high and low water mark on the seaside; the lowering of the first as much as needed, it was easy to accomplish; and the second apparent difficulty was equally easily overcome, by so regulating the work as meet these places during low tide.

8. This line was then laid out accurately straight by means of a transit instrument, and measured, preliminarily, by the same chain of twenty metres which had been used in 1817 for the preliminary measurement of the base line in English Neighborhood, and which serves now for the detail plane table survey of the south side of Long Island. At every 400 metres a peg was driven into the ground, bearing the mark of the distance; these precautions are always required as a great means of security against mistakes, by the omission that might happen of inscribing a measuring bar-box in the registers, as thereby constant verifications are presented.

9. During the months of August, September, and October, this line was then measured in forty-five days, of which, twenty-seven in August, fifteen in September, and three in October; the other part of that time being taken up either by interruption from unfavorable weather, or such days as were necessarily employed for the moving of our encampment along the line, for which it was always necessary to employ all the helps otherwise engaged at the manual part of the base measurement, there being never any doubles of men engaged in our work; and I must add, near the end of it, also, my own increased state of sickness was unfavorable.

10. At every 400 metres, as determined by the accurate measurement, and at every 1,000 metres, strong pegs were driven in the ground, marked by their distance from the west end; and every 2,000 metres was, besides, furnished with one of the stoneware cones that are always used at the station points; these are intended as fixed points, from which the detail points of the soundings in the sea that they border are to be determined.

11. Both ends of the base line thus resting upon two sand knolls, that will, by their position, in all appearance, always be secure from the sea, have been marked by two monuments, each consisting of a Newark red sand stone, about four feet high, hewn square for about eighteen inches from the top, with an even top of one foot square, and a round hole in the centre; under the square cut part a frame was fixed in, consisting of four pieces of hard wood scantling, embracing it closely by grooves made expressly in the stone, the lower part being left rough. These stones were sunk entirely even with the sand, together with their frames, which, by their extending about twenty inches on each side further in the ground, will make them stand more solid, and maintain their perpendicular position.

12. The distance between the monuments will exceed 14,050 metres, or $8\frac{7}{10}$ miles; the accurate number will result from the calculations that I shall make next winter upon the reductions needed for.

1st. The varied state of the temperature.

2d. The elevations and depressions that the localities of the ground obliged to make in many places.

3d. The reduction of the line actually measured upon the shore sand, to that between the monuments, for which all the data have been determined upon the place.

13. The apparatus used for this measurement is that which I have described in my printed papers upon the coast survey, which, though grounded upon entirely new ideas of my own, has obtained the approbation of all the men of science acquainted with such kind of works. It has proved itself practically, yielding the greatest accuracy, as its ultimate product is a line of near nine miles, measured microscopically. It has also proved a very expeditious, therefore even an economical arrangement, as the line was measured in the same time, (45 days,) as the base line of Mr. De Lambre, of 11,840 metres, which mine exceeds, evidently, considerably. In fact, this base is one of the longest ever measured, with an accuracy in any way comparable.

14. The details of the operations in principle, and even the manipulations, are already described in my "papers upon the coast survey;" and as the statement of the final numerical results must naturally be postponed until the adequate calculations will have been made, I have here only yet to state the great satisfaction which it gave me, that my assistants engaged with me in this arduous task, naturally entirely new to them, acquired the manipulations of the apparatus so well, that when otherwise favored by the weather, and the locality, we proceeded with a rapidity far above all expectations; and their cheerful exertions during the whole time, and even that of the laboring men, deserve due praise, and were a great support to my personal exertions, particularly towards the end, when my ill health had rendered my personal exertions very difficult and fatiguing.

15. The detailed account of this operation, which is of rather a scientific nature, I flatter myself will be of interest, and therefore enhance the value or the methods that I have devised for the works of the coast survey, as well as increase the interest for the work with the government, and the well informed public in general; in fact, this account of the work belongs rather to the ultimate scientific account of the main triangulation for the whole work.

16. I had expected, at the close of last campaign, that after the measurement of the base line, I should be able yet, during this campaign, to measure the angles of the triangles, that will determine directly from it the distance from Westhills to Rulands, and also those angles on Harrowhill and Weasel, which connect my work of 1817 to the present; this I intended to do with the large instrument ordered of Troughton, and promised in due time for that purpose. But, unfortunately, not only this instrument has not yet arrived, but even many unexpected impediments have arisen that have made the execution of my projects impossible, and deprive me even now of the use of the means by which I had intended to supply this deficiency. Besides that, the lateness of the season at which the campaign could be opened, postponed naturally everything equally as much as my stay in Washington had been protracted, as above

stated; an accessory result of which was, that the season for living and working at the seashore, falling partly in the equinoctial storms, not only our progress was impeded but it reduced me ultimately to the sick bed, and the lingering state consequent to it, which lasts even now, increased and maintained by the difficulties laid in the way of my progress. I had, therefore, also to avail myself of the assistance of Mr. Blunt, whose operations were near the base line, for the measurement of the accessory and preliminary angles, that had to be measured at different places of the base line; for which, besides, neither I, nor any of the other assistants engaged at the actual measurement, could leave our functions.

17. Though the two assistants engaged in the secondary triangulations, Messrs. Ferguson and Blunt, were some part of the time with me at the base line, particularly Mr. Blunt, they have continued equally their tasks, as I stated in my last report, that they were engaged in, namely, Mr. Ferguson in Connecticut, Mr. Blunt upon Long Island, continuing the secondary triangulations, of which a part is already included in my report of last May. The comparison of the sketch of Mr. Ferguson's triangles here joined, with the maps of my last report, will show his part of progress; the necessity of calling off Mr. Blunt for the triangulation around South Bay and to the base, has made it impossible to present with this report a corresponding sketch of his works, besides that herewith from the said South Bay.

18. It is my intention to have the topography of the south part of Long Island, near the base line, fully executed this fall, as well upon land as for the soundings of the great South Bay that lies between Fire Island beach and the main shore of the island. With that view I marked off a part from the west end of the base, easterly, of such length as would serve as base to triangles, adapted in size to the dimensions of that bay. Such a triangulation was then grounded upon it, by Mr. Blunt, as envelopes the whole bay, from its entrance to its eastern extremity, as shown by the sketch here joined.

19. The results so obtained were projected upon the scale of $\frac{1}{10000}$, to serve for the filling up of the topography with the plane table, at which Mr. Renard is just now engaged.

20. In the same manner Lieutenant Gedney, of the navy, who has been appointed, upon my proposition, for the first expedition of soundings, namely, that of the bay so enclosed in these triangles, and the seashore, adjacent to the beach, has been furnished with a projection of these triangles, upon a scale sufficiently large to make his preliminary constructions for placing the soundings, in which service he is now engaged upon the bay.

21. It was my intention to procure from Paris the materials and implements (which hitherto I have furnished out of my private stock) necessary to have a fully finished map executed of a part of the coast in the vicinity of the base line, where the topographical details are now executing, and the soundings are now taking, by which I would have been able to present this winter, a real sample of the execution of the maps, early enough to lay it before Congress during the course of the coming session; also, exemplars of drawings in all the different scales that it will become necessary to use were to be procured, as I have only (in my private possession) a single exemplar upon one scale, that was presented to me long ago by Mr. Beautemps Beupré, of the Depot de Marine, in Paris; for it must be here observed, that these objects are not attainable from any other place than Paris, or where they were brought to from there, and that there has been established for all such works, a universally understood conventional language of signs and manner of distinguishing the objects, which appears not yet much known in this country, and which it is necessary to adopt, in order to be properly intelligible to everybody, and to present the results also from that side, as it is proper, in the present state of the science. But the impediments mentioned in my correspondence, as laid in my way for the best forwarding of the work, by procuring the necessary means in due time, have frustrated me of the pleasure of giving that satisfaction this year; this can only be remedied the following winter (if in the meantime the difficulties are obviated).

22. The secondary triangulation, made by Mr. Ferguson, is now brought to the Pallisadoes on the west, from New Haven, where its eastern part begins, and that of Mr. Blunt, upon Long Island, parallel to it, both upon the plans as already stated, though I had to interrupt Mr. Blunt several times for work at the base line.

23. Thence, also, of all these parts of the country the work is brought to its ultimate application to the minute details of the topography, which I therefore intend to put in full activity, as soon as the necessary arrangements can be made, which, in the present state of things, is impossible.

24. I am sorry to be obliged to state here, what is evident to every man who occasionally is a witness to the work of the coast survey, that, from the most important to the minutest part of the work, everything is arranged in the most strictly economical manner, and at the same time so as to produce the greatest possible effect, in perfectly accurate results, in the shortest space of time, for in this principle lies the true economy of the work; any arrangement whatsoever not fitting to this aim, is a direct loss, as well in work as actually also in money. My experience, by having made similar works formerly, at my private expense, I find a sure guide in this respect; and I dare to assert, with full confidence, that never so much actually valuable work was obtained in the same space of time, and for the same proportional amount of money, in any other survey whatsoever.

25. By the change of the Department to which this work is committed, it became necessary for me to spend much time in giving the information necessary, to introduce many gentlemen completely new in the business, into the proper genius of the work and its advantageous organization, which lies in documents reaching from 1807 to the present date; during which time, on one hand, the arrangements were constantly perfected, while on another, even the older documents in the hands of the government have been destroyed by the conflagration of the Treasury office; so that now I am alone in the possession of them in their original. I had already some time ago begun the copies to restore these documents, and they needed principally only my revision and signature; but it has become necessary to make use of so many of them, that the collection is now very incomplete, and actually my time is otherwise too much engaged to attend to this part at present.

26. As this report is rather to be made in haste, to reach in due time for the aim of the President, to present it with the message to Congress, in addition to that of last May, minuter details have been excluded. I expect, however, to have presented the principal features, and the state of the work, to sufficient satisfaction for the present purpose, and to have made it evident that I have continued the work according to the principles laid out for me, from its first beginning, in 1816; that is, in a manner *honorable, and permanently useful to the country*, which was already the judgment that late President Jefferson, with whom the first law of 1807 had originated, gave upon my work of 1817; and if nothing is altered in my plans, and my organization of the whole arrangement, I can promise equally good success for the further continuance, and even assure, that by no other means or arrangements it is possible to obtain such a

result; for this the judgment of all the practical and experienced men of science in this line, all over Europe, is already recorded in the scientific prints.

F. R. HASSLER.

23D CONGRESS.]

No. 565.

[2D SESSION.

ON THE IMPORTANCE OF THOMPSON'S ISLAND OR KEY WEST AS A NAVAL DEPOT OR STATION.

COMMUNICATED TO THE SENATE DECEMBER 16, 1834.

NAVY DEPARTMENT, *December 15, 1834.*

The Secretary of the Navy, in compliance with the directions contained in the resolution of the Senate of the United States, of the 16th June last, referring the memorial and documents of John Whitehead and others, owners of Key West, for examination into the facts therein stated, to collect the necessary evidence, and report the names, together with copies of such letters and papers in his Department as relate thereto, to the Senate at its next session, has the honor to make the following report:

The parties interested in the case state that, in consequence of a communication made by them on the 7th December, 1821, representing the peculiar importance of Key West as a naval station, to protect our commerce from pirates, and suppress the slave trade, Lieutenant Perry was ordered, on the 7th of February, 1822, to examine said island and its harbors, &c., and, if deemed necessary by him, to take possession in the name of the United States; and that, on the 28th March following, he made a report of his proceedings.

That instructions were subsequently issued to Captain Patterson, on the 15th November, 1822, who reported the result of his examinations on the 11th of March and 10th of July, 1823.

That Commodore Porter, on the 1st of February, 1823, received his general instructions as commandant of the West India station, and was directed to establish a depot at Thompson's Island, usually called Key West, and land ordnance and marines to protect the stores and provisions.

That the said commander assumed entire control and jurisdiction of said island, forcibly appropriating wood already cut, and causing more to be cut down and used; seizing and using, for his officers and men, hogs and sheep running at large, the property of the memorialists; prohibiting the owners and their agents from building or improving without his permission, and enforced military law upon the said island; of which grievances they state that they informed the Navy Department, by a communication dated the 1st of February, 1825.

In support of these allegations, the memorialists offer the deposition of Griffith W. Roberts, the copy of a letter from Commodore Porter to Lieutenant James M. McIntosh, sworn to by John Whitehead; a letter of Master Commandant M. P. Mix to said Whitehead; a letter of Lieutenant James Moorehead to said Whitehead; certified copies of two letters from P. C. Greene & Co. to Commodore Porter, and the

original of Commodore Porter's reply; a certificate of Lieutenant James M. McIntosh, with copy of Commodore Porter's letter to him, above referred to, and an imperfect copy of the communication of the 1st of February, 1825, which are all hereto annexed, lettered from A to G, inclusive.

The records and files of the Navy Department have been carefully examined, but afford no information nor evidence of the seizures and damages which the memorialists complain that they sustained, nor can any communication be found to have been received from them on the subject, dated the 1st of February, 1825.

The communication of the 7th of December, 1821; the report of the Secretary of the Navy, of the 29th of December, 1822, to the President, and the instructions to Lieutenant Perry, Commodore Patterson and Commodore Porter, and the reports by these officers, to which the memorialists allude, are appended hereto, and numbered from 1 to 8, inclusive.

All which is respectfully submitted.

MAHLON DICKERSON.

23D CONGRESS.]

No. 566.

[2D SESSION.]

RELATIVE TO THE ESTABLISHMENT OF A NAVAL DEPOT AT CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 18, 1834.

NAVY DEPARTMENT, *December 17, 1834.*

The Secretary of the Navy, to whom has been referred the resolution of the House of Representatives, of the 11th instant, requesting him to communicate any papers or documents in his possession, not hitherto communicated, relating to the establishment of a naval depot at Charleston, South Carolina, has the honor to report:

That no other papers or documents are recollected to have been received by the Navy Department, except those forwarded with the report of the Secretary of the Navy to the chairman of the Naval Committee of the House of Representatives of the 2d of May last, (Doc. 541,*) or which are therein referred to as having been previously communicated to Congress.

I have the honor to be, with great respect, your obedient, humble servant,

MAHLON DICKERSON.

To the Hon. JOHN BELL, *Speaker of the House of Representatives.*

23D CONGRESS.]

No. 567.

[2D SESSION.]

ON A CLAIM OF INDEMNITY FOR DAMAGES BY SEARCH AND DETENTION OF AN AMERICAN PRIVATEER BY U. S. VESSEL-OF-WAR IN 1812.

COMMUNICATED TO THE SENATE DECEMBER 24, 1834.

Mr. CLAYTON, from the Committee on the Judiciary, to whom was referred the petition of the representatives of John Donnell, reported:

That the Committee on the Judiciary, at the last session of Congress, made a report on this petition, stating the claim, and the opinion of the committee thereupon, as follows:

"That the claim, as stated by the petitioners, is for consequential damage supposed by them to have resulted from the conduct of Captain Smith, commanding the United States frigate Congress, in exercising the right of search in time of war. The schooner Eleanor, a letter of marque under commission from the United States, sailing from Baltimore, bound to Bordeaux, with a cargo on board, fell in with the President, commanded by Commodore Rodgers, and the Congress, commanded by Captain Smith. On the night of the 16th of October, 1812, the Eleanor was boarded by Lieutenant Nicholson from the Congress, who sent the captain and mate of the schooner on board the Congress, with their papers, for examination. Lieutenant Nicholson remained on board the Eleanor. After examination, and ascertaining the character of the schooner Eleanor, she was released. The complaints are, 1st. That the officers of the Eleanor were detained "for a period of from three to four hours" after the result of the examination had proved satisfactory: 2d. In sending off the master and mate of the Eleanor without any competent supply of hands to manage her: 3d. That Lieutenant Nicholson, whilst he was in possession of the schooner, represented himself to the officers and crew of the Eleanor as a British officer, and themselves and the vessel as a prize of war: whereby "the crew of the Eleanor declined to make any competent exertions, or to obey the commands of their presumed captor, in the navigation of the vessel;" and during the detention she became dismasted, and sustained such serious injury, the weather being boisterous, as to compel the abandonment of her, whereby the vessel and cargo were entirely lost.

"The belligerent right of examination of the armed schooner is unquestionable. No evidence is produced that the officers of the letter of marque, who witnessed the conduct of the officers of the United States, as well as the boisterous winds and waves, ever made complaint. The petitioners expressly disclaim the imputation of culpable misconduct or negligence to any of the officers concerned. No evidence

is produced touching the matter of complaint now alleged by the petitioners; but they propose to adduce evidence as to the facts. Under such circumstances, and after a lapse of twenty-one years and upwards, the committee do not think it reasonable to institute an inquiry into the wire-drawn complaints about a detention of three or four hours in the night, as more or less than sufficient to ascertain the true character and design of the armed schooner; nor to try the relative exertions which the crew did make under Lieutenant Nicholson, compared with what they might have made under the orders of the master and mate of the schooner; nor to investigate the comparative skill of Lieutenant Nicholson, and the master and mate of the schooner, to order and direct her management; nor to enter into a solution of the conjectural problem, whether the schooner would have had strength and capacity, and good fortune, under other officers, to have outlived the gale, and no reason for saddling these complaints upon the government."

Therefore, the committee at the last session, recommended a resolution, that the prayer of the petitioners should be rejected.

In the general principles of that report, the present committee entirely concur. And it thinks it proper to add, with respect to the principle of the claim, that it is by no means prepared to admit that, in the case of a detention of one of our own private vessels by a public armed ship of the United States, on the high seas, without authority, reason, or propriety, either in respect of the detention itself, or of the manner of it, the government is bound to make good to the owner any loss resulting from the irregular or indiscreet conduct of the officer who causes such detention. But be this as it may, it is certain that the officer by whom such detention is made is liable, in a judicial proceeding, to make good to the owner any loss that may fairly be attributed to the irregularity of his conduct; and, as the right of the owner to compensation may thus be established in a judicial proceeding against the officer, the duty of the United States to make compensation ought never to be admitted until the right to it shall have been established in such a proceeding. Much more ought such a claim to be repelled, if in fact the party alleging the grievance has resorted to a judicial proceeding against the officers whose conduct is complained of, and there has been a judicial decision against the claim for compensation from them. Now the committee finds that a suit was brought by the owners of the vessel in question. The Eleanor, against Commodore Rodgers, who commanded the squadron, and Captain Smith, who commanded the frigate Congress, and by whose immediate orders the Eleanor was detained; and it was held, in that suit, by the Supreme Court of the United States, that the officer committed no irregularity, and that the owners of the Eleanor had no claim to compensation against him. (See the case of the Eleanor, Donnell, 2 Wheat, 345.) The petitioners say, indeed, that the evidence of Commodore Warrington, which they have filed with their petition, was not exhibited in their suit. But if it was material, it was the claimants' own fault that it was not laid before the court; and besides, the committee cannot discern that that, or any other evidence now adduced, materially varies the case from the state of it, as it was presented to the Supreme Court of the United States, and decided.

The committee, therefore, recommend the following resolution:

Resolved, That the prayer of the petitioners be rejected.

23D CONGRESS.]

No. 568.

[2D SESSION.]

STATEMENT OF EXPENDITURES FOR SHIP HOUSES AT NAVY POINT OR SACKETT'S HARBOR, AND AT STORRS' HARBOR, NEW YORK, AND FOR PRESERVATION OF UNITED STATES SHIPS NEW ORLEANS AND CHIPPEWA, AT THOSE PLACES, AND TERMS OF THE CONTRACT FOR THE OCCUPATION OF THE LAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 27, 1834.

NAVY DEPARTMENT, *December 26, 1834.*

The Secretary of the Navy, to whom was referred the resolution of the House of Representatives, of the 8th instant, directing him to report "the amount expended in erecting the ship house at Navy Point, and the expense of keeping the same in repair; the like information in relation to the vessel built and lately sold at Storrs' Harbor; the amount of compensation allowed to the officer or officers, persons or persons, who have, from time to time, had charge of the same; the reasons, if any exist, for the further preservation of the vessel and ship house at Navy Point; the amount heretofore paid for the use and occupation of the land now belonging to the heirs of Henry Eckford, deceased, at Navy Point and Storrs' Harbor, on which the vessels New Orleans and Chippewa were built; the terms of any contract which may have been made with the government or its authorized agent, for the use and occupation of such land, and any other information in possession of the Department relative thereto," has the honor, in compliance therewith, to send a communication of the 24th instant, from the Fourth Auditor of the Treasury, marked A, containing information as to the amounts expended in the erection and repair of the ship houses referred to; the amount of compensation allowed to the officers and persons who, from time to time, had charge of the same; and the amount heretofore paid to Henry Eckford for the use and occupation of the land at Navy Point and Hospital ground, and the amount claimed for land at Storrs' Harbor, &c. A letter of the 2d of April last, to the chairman of the Naval Committee, with the printed bill therein referred to, and a report of the Navy Commissioners, dated the 16th instant, marked B and C, also forwarded, afford the reasons for the further preservation of the vessel and ship house at Navy Point. The report of the 17th of March last, by the Secretary of the Navy, to the House of Representatives, to which reference is now respectfully made, contains all the information in the reach of this Department as to any contract for the use and occupation of the lands alluded to, as well as all other information in possession of the Department relating thereto.

All which is respectfully submitted.

MAHLON DICKERSON.

To the Hon. JOHN BELL, *Speaker of the House of Representatives.*

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 24, 1834.*

SIR: In compliance with your letter of the 10th instant, I have the honor to report all the information which can be collected in this office, in reference to the resolution of the House of Representatives, adopted on the 8th, calling for information relative to the ship houses at Sackett's and Storrs' Harbors.

It appears that a regular naval station was maintained at Sackett's Harbor from the close of the war to the 9th February, 1826, of which Captain M. T. Woolsey was in charge down to 17th January, 1825, and Master Commandant S. W. Adams afterwards, until it was broken up. These officers had several others, and a number of men under their command.

From the 9th February, 1825, to 1st February, 1831, the ships and ship houses in question were left in charge of Sailingmaster Augustus Ford, with two shipkeepers to assist him.

From 1st February, 1831, to 31st October, 1834, this charge was entrusted to Sailingmaster Francis Mallaby, with two shipkeepers to assist him, down to October, 1833, and since, one.

The pay, rations, and allowances of Captain Woolsey, during the time above stated, were	\$24,818 69
Of Master Commandant S. W. Adams.....	1,823 57
Of Sailingmaster A. Ford.....	5,576 49
Of Sailingmaster F. Mallaby.....	4,174 75
Of shipkeepers.....	3,228 86

\$39,622 36

Deduct the pay, rations, and allowances of Captain Woolsey and Master Commandant Adams, while Sackett's Harbor was a naval station.....	26,642 06
---	-----------

Leaves for taking care of the public property since.....	<u>\$12,980 30</u>
--	--------------------

The amounts received by Captain Woolsey and Master Commandant Adams are reported, because they may seem to have something to do with the keeping of the ships; those received by others attached to the station during the same time are omitted, because they obviously, in general, had not.

In pursuance to a contract, dated in August, 1815, there was paid for building the ship houses at Sackett's and Storrs' Harbors, the United States furnishing materials, the sum of.....

\$17,000 00

For boards and shingles, from date of contract to 31st December, 1815, about which time they were completed.....	7,046 85
For nails.....	1,145 70

\$25,192 55

For boards and lumber from 1st January, 1816, to September, 1820.....	<u>\$2,735 14</u>
---	-------------------

In none of the above cases do the vouchers specify the purpose for which the articles were purchased, and it is only by inference that they are set down to the account of the ship houses.

Paid for shoring up vessels, in 1820.....	\$98 54
Paid for repairs, in 1828.....	74 87
Paid for repairs, in 1834.....	410 03

\$583 44

Early in 1823, Henry Eckford, Esq., presented an account "for rent of Navy Point and Hospital ground, at Sackett's Harbor, New York, from 1st January, 1815, to 1st January, 1823—eight years, at \$290 per year, \$2,320—which was allowed, and paid by direction of Smith Thompson, Secretary of the Navy. It does not appear that any other payment for rent has ever been made.

In January, 1830, Mr. Eckford presented, in person, an account containing the following items, viz:

For rent of Navy Point and Hospital ground, at Sackett's Harbor, from 1st January, 1823, to 1st January, 1830—seven years, at \$290 per annum.....	\$2,030 00
--	------------

For rent of ground at Storrs' Harbor, from 1st January, 1815, to 1st January, 1830—fifteen years, at \$250 per annum.....	3,750 00
---	----------

\$5,780 00

After an investigation, he was verbally informed that there was no law or contract which could authorize the Treasury Department to allow the charge, and he replied that he would present it to Congress. No other facts are known to me which seem calculated to elucidate the subject of the call.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

B.

NAVY DEPARTMENT, *April 2, 1834.*

SIR: I have the honor to acknowledge the receipt of your note of yesterday, asking my examination of the printed bill which you enclosed, "for the relief of the heirs and legal representatives of Henry Eckford, deceased."

My views on the subject of the claim of the estate of Mr. Eckford were submitted in a report to the House of Representatives on the 17th ultimo, and to which I beg leave to refer for particulars.

As to the second section, I see no objection to its principle, if Congress conclude not to adhere to the idea that the land on which the ship is at Sackett's Harbor does not belong to the United States in trust. If it does, perhaps, as the vessel would not sell for much, it might as well be permitted to remain.

The vessel at Storrs' Harbor has been already sold, and the occupation of the land discontinued.

The printed bill, as requested, is returned.

I am, very respectfully, sir, your obedient servant,

LEVI WOODBURY.

The Hon. SAMUEL L. SOUTHARD, *Chairman of Naval Committee, Senate U. S.*

A BILL for the relief of the heirs and legal representatives of Henry Eckford, deceased.

Be it enacted, by the Senate and House of Representatives of the United States of America, in Congress assembled, That the Secretary of the Navy be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the legal representatives of the late Henry Eckford, deceased, for the use and occupation of the lands belonging to the said Henry Eckford, at Navy Point and Storrs' Harbor, in the county of Jefferson, in the State of New York, the sum of five hundred and forty dollars per annum, for each and every year during which the said lands have been so used and occupied by the United States, with legal interest for the same from the times when the said annual payments became due; deducting therefrom the sum or sums of money which were paid to the said Henry Eckford, by the order of the Navy Department, in the year eighteen hundred and twenty-three.

Secron. 2. *And be it further enacted,* That the Secretary of the Navy be, and he is hereby, authorized and directed to cause, as soon as conveniently may be, the vessels New Orleans and Chippewa, belonging to the United States, now at the said Navy Point and Storrs' Harbor, to be sold, and the possession of said lands to be delivered to the said legal representatives of the said Henry Eckford, deceased.

C.

NAVY COMMISSIONERS' OFFICE, *December 16, 1834.*

SIR: The Commissioners have the honor to acknowledge the receipt of your letter of the 10th instant, covering a resolution of the House of Representatives in relation to the ships and ship houses at Sackett's and Storrs' Harbors, in the State of New York; and, in compliance with your directions, have the honor to report that the files of their office do not furnish information which will enable them to state the expenses which have been incurred upon the objects of the inquiry; but it appears that the commander upon that station was authorized, in 1815, to contract for houses to be built over the New Orleans and Chippewa, and subsequently, special directions were given at two separate times for small expenditures.

The Commissioners have no copy or official record of any contract or agreement made for the use of the land upon which the vessel stood, but it is presumed to be in the office of the Secretary of the Navy.

The amount of compensation allowed to the officer or officers, person or persons, who have from time to time had charge of the same, can, it is believed, only be obtained from the Fourth Auditor's office.

As respects the reasons for the further preservation of the vessel and ship house at Navy Point, the board would respectfully observe, that the ship, although only partially finished, is in a good state of preservation, and may probably be kept in that state for many years by keeping the house in repair, and at an expense which will consist of the rent of the land, the repairs of the house, and the extra allowances to the officer on the station, and which it is believed will not exceed one thousand dollars annually. With this expense, the board are of opinion that a proper regard to the possible wants of the country, upon that frontier, offers a sufficient reason for her preservation.

I have the honor to be, with great respect, sir, your obedient servant,

JOHN RODGERS.

HON. MAHLON DICKERSON, *Secretary of the Navy.*

23D CONGRESS.]

Fleet surgeon—William Turk.

Assistant surgeons—Robert M. Baltzer, Lewis Wolfey, Napoleon C. Barrabino.

Purser—Francis A. Thornton.

Chaplain—George Jones.

Acting master—Passed Midshipman Thomas Turner.

Passed midshipmen—Simon B. Bissell, Oliver S. Glisson.

Midshipmen—Charles A. Auzé, James F. Armstrong, Richard Bache,* Wm. B. Beverley,* Henry Logan Chipman,† Henry Eld, jr., Andrew F. V. Gray, Chas. R. Howard, Wm. E. Le Roy, Peter U. Murphy, Jno. S. Neville, David D. Porter, Carlisle P. Patterson, Ferdinand Pepin, Richard Wainwright, Maxwell Woodhull,† Wm. Anderson Wayne.

Boatswain—Thomas Ring.

Gunner—Asa Curtis.

Sailmaker—James Davis.

Frigate United States: [Returned home since Register was put to press.]

Captain—Henry E. Ballard.

Lieutenants—Franklin Buchanan, George A. Magruder, T. O. Selfridge, A. K. Long, S. S. Lee.

Surgeon—Stephen Rapalje.

Assistant surgeon—John C. Spencer.

Purser—John N. Todd.

Chaplain—Charles S. Stewart.

Sailingmaster—Frederick W. Moores.

Passed midshipman—Timothy A. Hunt, second master.

Midshipmen—Richard Bache, jr., Jno. Contee, Thomas W. Cumming, James M. Frailey, James L. Heap, Edmund C. Kennedy, Dominick Lynch, Jr., Thomas W. Magruder, Richard D. McDonald, Allen McLane, Matthew S. Pitcher, Charles Richardson, Woodhull S. Schenck, Richard L. Tilghman, William S. Williamson.

Acting boatswain—J. Marsey.

Gunner—Samuel G. City.

Carpenter—Patrick Dee.

Sailmaker—Jno. Beggs.

Marine officers:

Brevet captain—Benjamin Macomber.

Lieutenant—T. M. W. Young.

Passengers:

Lieutenants—E. Ridgeway, Wm. G. Woolsey, James L. Lardner.

Passed midshipman—Samuel T. Gillett.

Midshipman—William B. Beverly.

Frigate Potomac:

Captain—John J. Nicholson.

Lieutenants—H. H. Cocke, Jos. B. Hull, Jacob Crowninshield, R. A. Jones, H. Pinkney, R. W. Jones.

Surgeon—George Terrill.

Assistant surgeons—Hugh Morson, Robert T. Barry.

Purser—Garrett R. Barry.

Passed midshipmen—L. G. Keith, acting master; John C. Carter, second master; George Minor, Wm. C. Griffin; Jos. F. Green, John De Camp, Benj. More Dove, John B. Marchand, A. M. Pennock, H. C. Flagg.

Midshipmen—Thomas M. Brasher, Wm. Reynolds, A. H. Wells, John W. Bryce, James M. Bankhead, Wm. H. Macomb, R. S. Wey, R. M. Bowland, Eugene Boyle, Jesse Elliott Duncan.

Acting boatswain—Theodore Fernald.

Gunner—Wm. B. Brown.

Carpenter—Wm. L. Shuttleworth.

Sailmaker—Wm. Ward.

Marine officers:

Captain—Ward Marston.

Lieutenant—Jabez C. Rich.

Sloop John Adams:

Master commandant—David Conner.

Lieutenants—Wm. H. Gardner, C. Ringgold, Wm. F. Lynch, Isaac S. Sterett, C. W. Chauncey.

Surgeon—B. R. Tinslar.

Assistant surgeon—Lewis B. Hunter.

Purser—D. McF. Thornton.

Passed midshipmen—Wm. Bradford, acting master; J. M. Gilliss, Wm. S. Young, Overton Carr, Jas. M. Lockert, James E. Brown.

Midshipmen—Wm. S. Smith, Johnston B. Carter, Simon F. Blunt, M. C. Marine, Samuel Smith, E. M. Hunter, John J. Guthrie.

* Returned in the frigate United States.

† Transferred to schooner Shark.

Boys acting as midshipmen—B. S. Porter, Wm. Callender, Wm. C. Brashears.
 Boatswain—William Waters.
 Gunner—David Taggart.
 Sailmaker—John Roser.
 Carpenter—Elisha Ellis.

Schooner Shark:

Lieutenant commanding—H. Paulding.
 Lieutenants—William G. Woolsey,* Owen Burns.
 Purser—Andrew McD. Jackson.
 Passed midshipmen—J. S. Palmer, acting master; Alberto Griffith, Ferdinand Piper.
 Midshipmen—James Riddle, Maxwell Woodhull, Henry L. Chipman.
 Gunner—Alexander Russell.
 Sailmaker—George Thomas.

WEST INDIA SQUADRON.

Commodore John D. Henley, commanding.

Sloop Vandalia:

Master commandant—Thomas T. Webb.
 Lieutenants—Joseph Mattison, R. D. Thorburn, Wm. S. Ogden, John Cassin, Wm. E. Hunt, Harry Ingersoll.
 Fleet surgeon—L. Osborne.
 Assistant surgeon—Charles A. Hassler.
 Purser—James Brooks.
 Passed midshipmen—S. C. Rowan, acting master; Wm. M. Walker, George R. Gray, G. H. Scott, Richard Forrest, Charles F. McIntosh.
 Midshipmen—Roger N. Stembel, Lafayette Maynard, E. A. Drake, A. C. Blount, G. M. Collier, Thomas O. Glascock.
 Acting boatswain—John Mills.
 Gunner—Samuel Daggett.
 Carpenter—Joseph Cox.
 Sailmaker—Maddison Wheeden.

Sloop St. Louis:

Master commandant—Chas. S. McCauly.
 Lieutenants—Samuel Mercer, Richard H. Morris, N. C. Lawrence, Chas. M. Armstrong, A. B. Fairfax, James Noble.
 Surgeon—Samuel W. Ruff.
 Assistant surgeon—Geo. W. Peete.
 Purser—F. B. Stockton.
 Passed midshipmen—Samuel Swartwout, acting master; R. W. Meade.

Sloop Natchez:

Master commandant—Jno. P. Zantzinger.

Lieutenants—William W. McKean, A. B. Pinkham, Samuel Barron, Arthur Sinclair, acting.

Surgeon—Samuel Mosely.

Assistant surgeon—William F. McClenahan.

Purser—Samuel P. Todd.

Passed midshipman—J. R. Goldsborough, acting master.

Midshipmen—Edmund Jenkins, William D. Hurst, Francis E. Baker, E. J. DeHaven, Francis Winslow, Wm. Ross Gardner, Wm. T. Smith, Jno. Banister, E. G. Parrott, R. P. Lovell.

Acting boatswain—William Burgin.

Acting gunner—Daniel Kelly.

Acting carpenter—Francis Russ.

Acting sailmaker—John Reece.

Marine officer:

Lieutenant—H. N. Crabb.

Sloop Ontario:

Master commandant—William D. Salter.

Lieutenants—John W. West, Law, Pennington, Edward G. Tilton, A. H. Marbury.

Surgeon—George W. Codwise.

Assistant surgeon—Daniel S. Green.

Purser—B. J. Cahoon.

Passed midshipman—Alexander Gibson, acting master.

Midshipmen—Jno. J. Almy, John P. B. Adams, Nathaniel Reeder, O. H. Berryman, Jos. P. Sanford, Robert Burts, Wm. G. Benham, William H. Wallace,

Boatswain—James Springer.

Acting gunner—John Martin.

Carpenter—Alonzo Jones.

Sailmaker—John Heckle.

Sloop Erie:

Master commandant—John Percival.

Lieutenants—James Williams, John Pope, Henry Eagle, John E. Bispham,

Fleet surgeon—Chas. Chase.

Assistant surgeon—Ninian Pinkney.

Purser—G. C. Cooper.

Passed midshipmen—Alfred Taylor, acting master; Jno. A. Russ, Jno. B. Tucker, Hendrick Norvell.

Midshipmen—Townsend Dale, C. B. Poindexter, Henry A. Wise, George Wells, John L. Worden, Nathan Barnes, Frederick A. Bacon, Thomas F. Davis.

Boatswain—Edward Crocker.

Acting gunner—William Phillips.

Acting carpenter—David Marple.

Sailmaker—Nathaniel B. Peed.

Marine officer:

Lieutenant—Jacob Zeelin, jr.

Schooner Enterprise:

Lieutenant commanding—Arch. S. Campbell.

Lieutenants—James D. Knight, William H. Noland, Richard L. Page.

Assistant surgeon—Jno. A. Lockwood.

Purser—William A. Bloodgood.

Passed midshipmen—Jno. C. Sharpe, acting master; Thomas R. Rootes, H. J. Harlestine.

Midshipmen—James J. Forbes, Samuel J. Shipley, Reed Werden, R. L. Browning, Henry Cadwallader, William M. Wallace.

Gunner—Francis Gardner.

PACIFIC SQUADRON.

Commodore Alexander S. Wadsworth, commanding.

Frigate Brandywine:

Captain—David Deacon.

Lieutenants—William Inman, Edward S. Johnson, H. H. Hobbs, Henry Bruce, G. J. Van Brunt.

Fleet surgeon—A. B. Cooke.

Assistant surgeons—A. G. Gambrill, J. C. Palmer.

Purser—Joseph H. Terry.

Chaplain—Thomas R. Lambert.

Passed midshipman—S. F. Hazard, acting master; Samuel P. Lee, second master; Luther Stoddard, William C. Spencer, William B. Ludlow, Charles Green, Edward M. Yard, John J. White.

Midshipmen—Charles Robinson, James S. Biddle, John S. Patterson, M. D. E. W. Watson, Charles H. Piper, Benjamin R. Nichols, Cornelius Vanalstine, Jas. W. Read, Lewis M. Wilkins, Sam'l Pearce, Francis Winslow,* Daniel M. Key, Francis Lowry, Joseph Norvell, C. R. P. Rodgers.

Acting boatswain—John Ball.

Gunner—Daniel James.

Carpenter—Charles Bordman.

Sailmaker—James R. Childs.

* Transferred to the Natchez, on Coast of Brazil.

Marine officers:

Captain—Charles C. Tupper.

Lieutenant—George W. Robbins.

Sloop Fairfield:

Master commandant—E. A. F. Vallette.

Lieutenants—James P. Wilson, John A. Carr, Henry W. Morris, Samuel Lockwood.

Surgeon—Wm. F. Patton.

Assistant surgeon—M. G. De Laney.

Purser—Jno. A. Bates.

Passed midshipmen—E. L. Handy, acting master.

Midshipmen—Alex. R. Rose, Washington Gwathmey, William P. Gamble, Charles Burdett, James D. Morrison, Henry Waddell, William P. McArthur, John M. Mason, Stroug B. Thompson, Washington A. Bartlett.

Acting boatswain—Henry P. Lunt.

Gunner—Lewis Parker.

Carpenter—Wm. Hatch.

Acting sailmaker—John Burdine.

Sloop Vincennes:

Master commandant—John H. Aulick.

Lieutenants—Charles H. Bell, Theodore Bailey, Edmund M. Russell, Robert L. Browning, Charles H. Davis, John S. Missroon.

Surgeon—A. A. Adee (transferred from Brandywine).

Assistant surgeon—J. Frederick Sickels.

Purser—Edward N. Cox.

Passed midshipmen—Robert Handy, Theodore P. Green.

Midshipmen—John B. Dale, John H. Sherburne, Stephen Decatur, William A. Jones, A. G. Clarey, William A. Parker, John C. Henry, John Carrol, James L. Hannegan, John Hall, O. H. Perry, George Butterfield.

Boatswain—John Morris.

Gunner—Charles Cobb.

Acting carpenter—Henry P. Leslie.

Sailmaker—Henry Bacon.

Marine officer:

Lieutenant—A. N. Brevoort (brevet captain.)

Schooner Dolphin:

Lieutenant commanding—Ralph Voorhees.

Lieutenants—John W. Turk, Joseph Lanman, acting.

Assistant surgeon—Henry S. Reynolds.

Passed midshipman—Wm. C. Chapin, acting master.

Midshipmen—Chas. Sperry, George W. Doty, Latham B. Avery, Hun Gansevoort, Daniel D. Henrie.

Acting gunner—Jacob Carpenter.

Schooner Boxer:

Lieutenant commanding—Hugh N. Page.

Lieutenants—Charles H. Jackson, Peter Turner, H. M. Houston.

Passed Assistant Surgeon—Thomas L. Smith.

Purser—Edward T. Dunn.

Passed midshipmen—Cicero Price, acting master; A. W. Prevost.

Midshipmen—B. F. Anderson, A. Harrell, William L. Blanton (transferred from the Vandalia), C. St. George Noland.

Acting gunner—Benjamin F. Barber.

[23D CONGRESS.]

[No. 570.]

[2D SESSION.]

ON THE CLAIM OF CAPTAIN JOHN DOWNES, OF THE NAVY, TO BE RELEASED FROM THE PAYMENT OF A SECOND CHARGE FOR THE SAME AMOUNT IMPROPERLY MADE AGAINST HIM BY THE FOURTH AUDITOR OF THE TREASURY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1835.

Mr. BANKS, from the Committee on Claims, to whom was referred the petition of John Downes, a captain in the navy of the United States, reported:

That it appears that, in the year 1825, the petitioner was ordered on from Boston to Washington, as a member of the court-martial which sat on the trial of Commodore Porter; that, while he was at Washington on this business, or public duty, he was informed by Tobias Watkins, who was then Fourth Auditor, that there was a balance due him from the Navy Department; that his account was accordingly made out, including pay, rations, traveling expenses, and attendance as a member of the court-martial, up to the date of said settlement; that there was a balance due him of seven hundred and twenty-three dollars and sixty cents; that, when the papers were prepared and ready, said Watkins asked him if he wanted to use the money in Washington, or whether he preferred the money or a draft on the navy agent at Boston;

that the petitioner replied that he did not wish to use the money in Washington, and would prefer a draft on the navy agent at Boston for the amount; Watkins then said, "Give me an order for the amount due you in favor of my messenger, and when you are ready to start for Boston I will give you the order for the amount"; that the petitioner did give the order for the amount of seven hundred and twenty-three dollars and sixty cents, and received a certificate of the amount due him; that, in a few days, when he was prepared to leave Washington, he called at the office for his money, and on presenting the certificate received the draft, which was duly paid by the navy agent at Boston, amounting to seven hundred and twenty-three dollars and sixty cents; that the petitioner soon after went to sea, and, when he returned to Washington in 1830, was informed, for the first time, that he stood charged on his account with the first sum of seven hundred and twenty-three dollars and sixty cents, which had been drawn on his order in favor of the messenger of the Fourth Auditor, and also with the same amount which he had received on the official draft on the navy agent at Boston, and that the present Fourth Auditor had directed the purser of his ship to stop its amount from his pay. This appears to be the history of the transaction, as disclosed by the petitioner. The petitioner laid his claim, to be relieved from this double charge for the same payment, before the Fourth Auditor; he refused to alter the charge under the belief that, in the first instance, the petitioner had, in substance, drawn his pay, and lent the money to Watkins, thereby making it a private debt, and that he had received the official draft, and drawn the money of the public from the navy agent, in payment of this private debt. The petitioner now asks Congress to pass a law granting him relief from this charge.

There is nothing in the case, so far as has come to the knowledge of the committee, which satisfies them that the petitioner had drawn and lent the money to Watkins. It does not appear that Watkins asked the petitioner for the loan of the money. It does not appear that he even intimated to him that he wanted to use it, or intended to use it. There is no proof that the petitioner took a note or other security from Watkins when he gave the order—not even a promise to pay the money. He took a certificate, as he states, of the amount due to him when he gave the order to the messenger. The whole arrangement was at the suggestion of the Fourth Auditor. The petitioner was ignorant of the forms of the office, and no doubt supposed that the directions of the officer were necessary to enable him to obtain the draft for his money. He might very readily suppose that the directions conformed to the rules of the office. He did not transact the business with Watkins in any other capacity than as Fourth Auditor. He placed confidence in him, and took his directions as an officer of the Treasury Department. He received payment but once: he did not intend to receive his claim more than once. He intended nothing more, and did nothing more, on his part, than he was led to believe necessary to enable him to get his draft for the amount due him from the government, and not a private debt due him from Watkins. We do not conceive that he intended to release the government by his order, and give credit to Watkins for the same. He appears to have been entirely innocent of any misplaced confidence in Watkins. There does not appear to have been any improper motive on the part of the petitioner. Under these circumstances it would be a stain upon the justice of the country to suffer this loss to fall upon the petitioner, without any fault whatever in him. The committee, therefore, report a bill in his favor for the sum of seven hundred and twenty-three dollars and sixty cents.

23D CONGRESS.]

No. 571.

[2D SESSION.

ON CLAIM OF LOAMMI BALDWIN, SUPERINTENDENT OF DRY DOCKS AND INSPECTOR OF NAVY YARDS, FOR A PER DIEM ALLOWANCE FOR EXTRA SERVICE WHILE RECEIVING AN ANNUAL SALARY.

COMMUNICATED TO THE SENATE JANUARY 20, 1835.

NAVY DEPARTMENT, *January 19, 1835.*

SIR: I have the honor, in compliance with the resolution of the Senate, dated the 14th instant, to send herewith sundry letters and papers, with a schedule enumerating them, which contain "so much of the correspondence of this Department with Loammi Baldwin as relates to his compensation as superintendent of dry docks and inspector of navy yards, together with copies of all accounts rendered by him connected with his services in the inspection of navy yards."

All which is respectfully submitted.

M. DICKERSON.

To THE PRESIDENT of the Senate of the United States.

Schedule of papers sent to the Senate of the United States, in the case of Loammi Baldwin, Esq., January 19, 1835.

- No. 1. Extract of a letter from Secretary of the Navy to Loammi Baldwin, Esq., dated March 13, 1827.
- No. 2. Extract of a letter from Loammi Baldwin, Esq., to Secretary of the Navy, dated March 18, 1827.
- No. 3. Extract of a letter from Secretary of the Navy to Loammi Baldwin, Esq., dated March 28, 1827.
- No. 4. Extract of a letter from Loammi Baldwin, Esq., to Secretary of the Navy, dated April 2, 1827.
- No. 5. Extract of a letter from Loammi Baldwin, Esq., to Secretary of the Navy, dated June 7, 1827.
- No. 6. Copy of a letter from Secretary of the Navy to Loammi Baldwin, Esq., dated June 15, 1827.
- No. 7. Letter of the Fourth Auditor of January 19, 1835, with accompanying papers therein referred to by letters and numbers, viz: A to D, and 1 to 7, inclusively.

No. 1.

Extract of a letter from S. L. Southard, Secretary of the Navy, to Loammi Baldwin, Esq., dated—

MARCH 3, 1827.

SIR: By the passage of a law at the last session of Congress, it has become the duty of the Executive to cause two dry docks to be erected.

The places selected are Charlestown and Gosport. To execute the work properly, it will be necessary that some one skillful and competent person should be appointed, who will direct and be responsible for it, and who will have, to aid him, a superintendent at each place, able to attend to and perform the duty in his absence.

It is the will of the President that you should be appointed, provided it be your pleasure to accept it upon such terms as will meet the views of the Executive.

I beg from you an early answer on this subject, stating the lowest annual compensation for which you will be willing to undertake it. There are other duties which will be required of you in the course of the year, and probably sufficient at all times to occupy you, and requiring your undivided attention to be devoted to the interests of the government.

No. 2.

Extract of a letter from Loammi Baldwin, Esq., to S. L. Southard, Secretary of the Navy, dated—

MARCH 18, 1827.

The proposed situation of engineer to superintend the construction of the dry docks will be very acceptable to me; and if I can be employed upon terms mutually satisfactory to the government and myself, I shall at once lay aside any other employment.

The annual compensation for my services would be four thousand dollars, paid quarterly, together with all proper and reasonable expenses of board and traveling, &c., when from home.

In this case I should call Boston or Charlestown (for I should probably reside in the latter place) my home; and when traveling to the south, or whenever I leave home on business connected with my official duties, I should expect the government to pay the necessary traveling and other expenses.

No. 3.

Extract of a letter from S. L. Southard, Secretary of the Navy, to Loammi Baldwin, Esq., dated—

MARCH 28, 1827.

SIR: I have received your letter of the 18th instant, and I have pleasure in accepting the terms offered by you, of *four thousand dollars* per year, paid quarterly, with proper and reasonable expenses of board and traveling when from home.

But, as it may be inconvenient to keep, render, and settle an account of your expenses, and as you will, on all the duties to be performed, probably be absent nearly or quite one half of the year, I would suggest whether it would not be best for you to fix some settled amount for these expenses, exclusive of traveling, and for that receive fifteen cents per mile, the sum allowed by regulation to the officers of the navy. On this point you will decide for yourself. I should prefer a fixed sum, with the traveling allowance of fifteen cents per mile.

No. 4.

Extract of a letter from Loammi Baldwin, Esq., to S. L. Southard, Secretary of the Navy, dated—

APRIL 2, 1827.

I perfectly agree in your suggestion, that it would be much better to have a sum stipulated for the expenses, when absent from home, rather than incur the embarrassment of long detailed accounts of small items, incurred by expenses of traveling. Such sum, in addition to the regular salary of four thousand dollars, to cover all extra charges of traveling and board when from home. But what this sum should be, I have no proper means at present to determine, and it will perhaps be best and satisfactory to both parties, to let that subject rest until I have made the proposed journey to Norfolk, &c., and until I shall have the honor of again seeing you. In this manner we may probably obtain sufficient data to estimate the gross sum which may be proper to allow per annum or per month.

No. 5.

Extract of a letter from Loammi Baldwin, Esq., to S. L. Southard, Secretary of the Navy, dated—

JUNE 7, 1827.

As to my pay when from home, I am willing to accept the common mileage which you propose, of 15 cents a mile, as paid to all naval officers for traveling expenses, and a fixed sum per month for board,

&c., while engaged at any place from home. What this sum should be, I can hardly state; but, as it will be convenient both for me and yourself to fix some sum, I propose eighty dollars per month, or twenty dollars a week, and at that rate for any other time. I first proposed to you one hundred dollars per month, as I thought it would cost that sum to live, as I should find it necessary at Norfolk, during five or six months of a year. Should I find that eighty dollars is too much, I will agree to any modification the Navy Board, or the board of naval officers shall suggest, after conversing with them.

No. 6.

NAVY DEPARTMENT, *June 15, 1827.*

SIR: Your letter of the 9th inst. is duly received.

I accept the proposition which you have made, and will allow to you when absent and actually engaged in the performance of your public duties, at the rate of eighty dollars per calendar month, on account of board and other incidental expenses, except those for traveling, for which you will be allowed 15 cents per mile.

I am, respectfully, &c.,
LOAMMI BALDWIN, Esq., *Boston.*

S. L. SOUTHARD.

No. 7.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 19, 1835.*

SIR: In compliance with the request contained in your letter of the 16th inst., enclosing a copy of the resolution of the Senate, calling for information relative to the account of Loammi Baldwin, Esq., I have the honor to transmit copies of the following papers, viz:

Letter of Loammi Baldwin, Esq., to Fourth Auditor, dated September 8th, 1827, marked A.

The Fourth Auditor's reply, dated 22d September, 1827, marked B.

Account for travel and board, rendered by Mr. Baldwin, and settled in this office, marked (1) to (7) inclusive.

Duplicate letter of the Secretary of the Navy, to Mr. Baldwin, dated 2d February, 1834, marked C; transmitted to this office, with the accompanying papers, viz: Letter of Mr. Baldwin to the Secretary, dated 3d February, 1832, marked C, 1, and the account therein referred to, marked C, 2.

Letter of the Fourth Auditor to Mr. Baldwin, dated 8th February, 1834, marked D.

These are all the papers on record or on file in this office, which appear to come within the scope of the Senate's call.

Very respectfully, your obedient servant,
Hon. MAHLON DICKERSON, *Secretary of the Navy.*

AMOS KENDALL.

A.

NAVY YARD, *Charleston, September 8, 1827.*

SIR: I had prepared an account as engineer, which Mr. Wilson, the purser at this yard, offered to pay; but upon conversation with him, I concluded to write to you for your instructions or approbation as to the mode of making it out. My salary, by an agreement with Mr. Southard, is \$4,000 per annum, to be paid quarterly. His letter, by which the agreement was closed, is dated March 8th last, from which I thought it just my salary should commence, and I accordingly made up my time from that day to the first of this month,

Amounting to 5 months, \$4,000 per annum.....	\$1,666 67
And 3 days.....	33 33
	<hr/>
	\$1,700 00
	<hr/>
I shall now wait until the 1st October, when the amount will be for 6 months.....	\$2,000 00
3 days.....	33 33
	<hr/>
	\$2,033 33
	<hr/>

Should this statement meet with your concurrence, you will oblige me by stating it; and if not, will you have the goodness to inform me how the account should be made up, to conform with the rules of your Department?

My expenses for travel, board, &c., when absent from home, on public service, have been settled with Mr. Southard as follows: 15 cents mileage for traveling expenses, as naval officers are usually paid; and \$80 per calendar month, for board, &c., when engaged at Norfolk, or elsewhere, on public service as engineer.

But I am not acquainted with the practice of making up these accounts. I went to Norfolk through Washington, last spring, and was there ten days with the Commissioners upon navy yards. I accompanied them to Portsmouth, where we were engaged four days; and on our recent visit to the New York yard, we were there six days. In making up the account, I should call a month thirty days; and cast the parts of a month accordingly.

In this view my account would stand thus:

To traveling expenses from Boston to New York, through Washington, — miles, at \$0.15 per mile.....	\$
To traveling expenses from New York to Boston, through Washington, — miles, at \$0.15 per mile	
To ten days' allowance for board, \$80 per month, \$2.66 per day	26 60
To traveling expenses from Boston to Portsmouth, — miles, at 15 per mile	
To traveling expenses from Portsmouth to Boston, returning, \$0.15 per mile	
To four days' allowance for board, \$80 per month	10 64
To traveling expenses from Boston to New York, — miles, at \$0.15 per mile	
To traveling expenses from New York to Boston, returning, \$0.15 per mile	
To six days' allowance for board, \$80 per month	<u>15 96</u>

The navy agent here, I presume, would pay this last account; but I do not know how many miles are commonly allowed in your office for those journeys, and I should probably not make one correctly. Is my mode of stating the account correct? If it is not, I shall be obliged by receiving your instructions how it should be made up, and whether the navy agent or the purser will be authorized to pay it.

I should not have troubled you upon this subject, were I not about writing on other points, but intended leaving it to be settled when in Washington, on my way to Norfolk this fall.

I have been called upon to assist the Board of Commissioners upon plans of the navy yards, in surveying, drawing plans, &c., and shall probably have considerable labor, together with assistants, in this service for a year. My own services will not be distinguished from the work of the docks, and my traveling expenses can be always so stated in the accounts as to indicate the object upon which they are incurred. But I am obliged to employ others to assist in this department; and I have sent a surveyor and two assistants to Portsmouth, to make some necessary surveys under directions of the board. Their daily pay will be, as it has hitherto been, kept on the rolls here, and paid by the purser, as other men employed under me are paid. But their actual traveling expenses and board, when absent on this duty, ought to be paid soon; and it would be most simple and convenient if their accounts of such expenses, when examined and approved by me, could be paid by the navy agent or the purser, to be put to a distinct account of "improvement of the navy," or "survey and plans of navy yards." They will return in four or five days, when I presume it will be desired by them to be paid their expenses. They will not expect anything besides their daily wages, more than the necessary expenses incurred. Although they will be paid their wages, in the same manner as other laborers are paid, a distinct account of the amount for this duty is kept, so that at any time the amount may be separated from the expenses connected with the dry dock.

I presume Mr. Southard will confirm the statements I make as to the salary, allowance for traveling, &c.

With sincere esteem, your obedient servant, L. BALDWIN.

TOBIAS WATKINS, Esq., *Fourth Auditor of the Treasury, Washington.*

B.

TREASURY DEPARTMENT, *Fourth Auditor's Office, September 22, 1827.*

SIR: I have received your letter of the 8th instant. The letter of the Secretary of the Navy, accepting the terms offered by you (agreeably to the copy received from him) bears date the 28th March, 1827; on that day your compensation will commence, at the rate of \$4,000 per annum, which you can make up to the 30th of the present month, inclusive, as suggested in your letter, and present it to the navy agent for payment. You will also make up your account for traveling expenses and board, as stated in your letter, and when approved by Commodore Morris, it will likewise, on presenting it, be paid by the agent. In charging the mileage, you will be governed by the distance published by the General Post Office; those mentioned by you as already traveled, are as follows, viz: from Boston to Norfolk, Virginia, 665 miles; from Boston to Portsmouth, New Hampshire, 64 miles; from Boston to New York, 210 miles. I am not in possession of any information respecting the compensation to be allowed to the assistant employed by you; but nothing more, however, can be allowed them in addition to their daily pay, than actual expenses of their transportation; and when their accounts are made out, certified by you, and approved by Commodore Morris, they may be presented to the navy agent for payment, who will charge them, as well as your accounts for salary, and traveling expenses, and board, to "improvement of the navy."

I am, sir, respectfully, your obedient servant, T. WATKINS.

LOAMMI BALDWIN, Esq., *Boston, Massachusetts.*

C.

NAVY DEPARTMENT, *February 3, 1834.*

SIR: Your letter of this date, claiming allowances for services in 1827, 1828, 1829, has been received, and referred to the Fourth Auditor.

If there be any rule of the Department which will justify the payment of any part of these claims, the Fourth Auditor is requested to admit them.

But if not, it is impossible for me, after this lapse of time, to decide properly upon them, and especially to sanction them in the absence of any written explanations, or approval by my predecessors, under whose administration of the Department the services appear to have been performed.

If accident, or oversight, produced the unusual delay in presenting these claims, or the omission to get them duly approved by my predecessors, I have no doubt that Congress, on application, and proof of the facts, would give any relief shown to be equitable and just.

I am, respectfully, sir, your obedient servant,

LEVI WOODBURY.

L. BALDWIN, Esq., *Washington, D. C.*

C, 1.

WASHINGTON, *February 3, 1834.*

SIR: I take the liberty of enclosing, for your consideration and allowance, an account for extra services rendered to the Navy Department, as engineer of the dry docks, under the following circumstances: The four first charges, amounting to \$500, were made while Mr. Southard was Secretary of the Navy, in February, 1829, by his consent and approbation, but while he was confined to his house by sickness, he having agreed to allow that amount. The next day after I had his agreement that such a charge was equitable and just, I presented the account at his office, and the clerk said it would be attended to, but that the Secretary was then too unwell to attend to business. The day following, I was obliged to leave Washington, and have never learned whether it had his signature approving it or not, but understood he had not acted upon it. I presume it will be found among the unsigned or incomplete papers of that time, left by him on file in the office. I should have received the amount then had he not have been confined by sickness.

The second sum is for my services in going to Pensacola with Commodore Rogers and Commodore Patterson, as Commissioners of the Navy, as stated in the account; and for the value of my services on that occasion, I can now only refer to Commodore Rogers. I present these claims with a perfect consciousness of their justness and equity, presuming, upon consideration, you will find it reasonable to allow them, and direct them to be paid.

With great respect, your obedient servant,

L. BALDWIN.

To Hon. LEVI WOODBURY, *Secretary of the Navy.*

C, 2.

The United States, Department of the Navy,

To L. Baldwin,

Dr.

1827.	To additional compensation for my services as engineer, assisting the board of commissioners for the improvement of the navy in survey and plans of the Navy yard at Portsmouth, N. H., at the request of the Secretary of the Navy, ten days, at five dollars per day	\$50 00
	To additional compensation for examination of Navy yard at New York, in company with the commissioners, ten days, at five dollars per day.....	50 00
1828.	March. To additional compensation for attending at Washington with said commissioners, making plans of Charlestown, Gosport, Philadelphia, Washington, and Portsmouth navy yards; twenty-three days, at five dollars.....	115 00
1829.	Feb. 10. To additional compensation for attending the Naval Commissioners at New York, surveying and making plans of Governor's Island and Navy yard, at New York, by direction of the Secretary of the Navy, fifty-seven days, at five dollars per day..	285 00
June 23.	To additional compensation to going to Pensacola Navy yard with Navy Commissioners, to survey and examine the yard for wharf and railway, and survey Dry Tortugas Island, by direction of the Navy Department, from April 6th to June 23d, inclusive, seventy-nine days, at five dollars	389 00
		\$895 00

D.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 8, 1834.*

SIR: The Secretary of the Navy has referred to me your letter of the 3d instant, enclosing an account for services performed in the years 1827, 1828, and 1829. I am not aware of any rule or regulation of the Navy Department which will justify the payment of your claim. It appears, by the files of this office, that during the whole period for which you claim a per diem allowance, you have been in the receipt of your salary of four thousand dollars per annum, as "civil engineer of dry docks." It also appears that you have been paid for your traveling expenses, going to and returning from the several places stated in your account, with the additional allowance of eighty dollars a month for board while engaged on the duties for which you claim a per diem; therefore, I consider your claim altogether inadmissible.

I am, sir, very respectfully, your obedient servant,

AMOS KENDALL.

L. BALDWIN, Esq., *Washington, D. C.*

23D CONGRESS.]

No. 572.

[2D SESSION.

ON CLAIM OF A LIEUTENANT COLONEL OF MARINES, FOR COMPENSATION FOR EXTRA SERVICES IN ISSUING CLOTHING AND ACCOUTREMENTS TO THE MARINES UNDER HIS COMMAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 26, 1835.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Anthony Gale, reported:

That the prayer of the petitioner, and the opinion of the committee upon his memorial, presented at the last session, are fully stated in a report therein made to the House on the 28th March last,* to which the committee ask a reference. The subject has been again brought up for consideration upon the allegation of the petitioner that cases did exist of allowances, similar to those claimed by him, being made by the Navy Department.

*See antecedent, No. 541 of this series.

It will be observed that the period for which Colonel Gale asks compensation is from the year 1804 to the year 1817. In answer to a letter addressed by the committee to the Navy Department, asking "copies of vouchers relative to payments or allowances to officers of the marine corps for the distribution of clothing, accoutrements, &c., since the year 1804," a letter has been received from the Fourth Auditor, which is herewith submitted, by which it appears "that no vouchers can be found in which the services mentioned are specified or known to be included, going back to an earlier period than 1817." With the exception of one case, no allowance has been made for services similar to those claimed by the petitioner earlier than 1822. The account of Captain Joseph L. Kuhn, herewith submitted, marked H, is for services stated to have been performed in the Mediterranean from the first January, 1817, to the 20th May, 1821. By the letter of the Fourth Auditor, and the receipt on this account, it appears that the amount was not allowed or paid until the year 1828; "it does not appear ever to have had the sanction of the Secretary of the Navy," but was passed by Tobias Watkins, the late Auditor, seven years after the last of the services was performed, and no allowance like that referred to by the Auditor can be found, other than that to the quartermaster himself, which was provided for by law.

The case in question, even if it went back to the period of Colonel Gale's claim, (which it does not,) affords no precedent to justify the charges made by him, nor are any of the cases cited by the Fourth Auditor subsequent to 1822 similar in their nature to that of the petitioner.

The further and minute investigation of the committee only leads to the conclusion already stated, that the claim is without support by law or any contemporary usage or allowance by the Navy Department.

The committee, therefore, report that the prayer of the petitioner ought not to be granted.

TREASURY DEPARTMENT, *Fourth Auditor's Office, December 26, 1834.*

SIR: Upon the letter of the Hon. Campbell P. White, on behalf of the Committee on Naval Affairs of the House of Representatives, dated the 16th instant, referred to me on the 18th instant, asking for "copies of vouchers" "relative to payments or allowances made to officers of the marine corps for the distribution of clothing, accoutrements, &c., since the year 1804," I have the honor to report that no vouchers can be found in which the services mentioned are specified or known to be included, going back to an earlier period than 1817. In the quartermaster's account for the fourth quarter of 1823 appear the vouchers, copies of which are herewith submitted, marked A and B. These vouchers, with the remarks at foot made at the time of settlement, seem to show that no regular allowances for performing quartermaster's duties, other than those to the quartermaster himself, had been made up to that time, and that an assistant quartermaster was then appointed, with an extra pay of fifteen dollars (\$15) per month.

Copy marked C, appears to exhibit the first claim settled after this change, being \$15 per month from the 1st February to the 31st December, 1823. This charge appears to have had the approval of the Secretary of the Navy.

Copy marked D, is in continuation of this allowance. It was continued to Lieutenant Edson at the same rate to December 31, 1827. From that time to 30th June, 1831, when he left that service, he was paid by the quartermaster at the rate of \$20 per month. On settlement of the quartermaster's account in 1829, (it having been then unsettled from 1826,) the authority for this increase of the allowance was required. As none could be produced, other than an alleged verbal direction of the Secretary of the Navy to the quartermaster, which was not considered sufficient to justify the passage of the account, the additional \$5, as far it had then been paid, was recharged to Lieutenant Edson. Having since satisfied the present Secretary that he received the money under the verbal authority of the Secretary for the time being, it has, by his special direction, been allowed. Copy marked E, shows the extension of a similar allowance of \$15 per month to the commanding officer of marines at Norfolk.

From the statement of the quartermaster upon the paper, it would appear that the action of the Secretary upon this claim was subsequent to the 18th of January, 1828. Copy marked F, appears to show the first allowance to any one of the \$15 per month for acting as assistant quartermaster at sea. It extends from April 1 to September 30, 1825, and was probably allowed by the Secretary about the 10th November, 1825, the time the receipt is dated, though not passed at the Treasury until the 22d July, 1826.

Copy marked G, appears to show the first allowance of the kind made in the Mediterranean squadron. The charge was \$30 per month, from May 1, 1825, to May 31, 1827, but the Secretary allowed only \$15.

Copy marked H, shows an allowance of this character to Captain Joseph L. Kuhn, from 1st January, 1817, to 20th May, 1821, at the rate of \$30 per month. This allowance does not appear ever to have had the sanction of the Secretary of the Navy, but was passed by the accounting officers, as indicated by the endorsement, dated 18th June, 1828. No allowance like that referred to in the endorsement can be found, other than \$30 to the quartermaster himself, which was provided for by law.

An allowance of \$15 per month for responsibility on account of clothing had, prior to 1829, been extended to the senior marine officer in each of the four squadrons, the Mediterranean, West Indian, Brazilian and Pacific; to the two latter, it is believed, upon analogy, without any written authority from the Navy Department.

In April, 1829, all these allowances on shore and at sea were suspended by the action of this office, but were restored by resolution of Congress at the subsequent session, and have continued down to the passage of the late act putting the marine officers under the army laws.

Presuming that it is not the desire of the committee to obtain copies of *all* the numerous vouchers which have been produced by these allowances, I have sent only such as go to show their origin and varieties, and have taken the liberty to accompany them with these explanations, which seem necessary to make them intelligible. Mr. White's letter is returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

HON. MAHLON DICKERSON, *Secretary of the Navy.*

H.

	The United States, marine corps,		
		To Captain Joseph L. Kuhn,	<i>Dr.</i>
To my services as quartermaster while on the Mediterranean station, from the 1st of January, 1817, to 20th May, 1821, is 52 months and 20 days, at \$30 per month.....			\$1,580 00
To house rent while on the Mediterranean station, from the 1st of January, 1817, to 30th April, 1817, is 4 months, at the rate of \$250 per year, is.....			83 33
To fuel from 1st January to the 30th April, 1817, is 4 months, at \$10 per month.....			40 00
			<u>\$1,703 33</u>

Received, Washington, 8th January, 1828, of the United States Navy Department, one thousand seven hundred and three dollars and thirty-three cents, in full for the above account.

JOSEPH L. KUHN, *P. M. M. C.*

\$1,703.33.

At the period embraced in the within account, it appears, from accounts settled at this office, that the allowance of \$30 per month for doing the duties of quartermaster was the regular rule of the office, and under the sanction of the Secretary of the Navy. From this circumstance, it seems to be no more than just that the allowance should be made to Captain Kuhn, and it is accordingly admitted.

T. W.

JUNE 18, 1828.

	The United States, marine corps, quartermaster's department,		
		To Major R. Smith,	<i>Dr.</i>
For his extra allowance for attending to the reception, distribution, and inspection of clothing, for the United States marine corps, from the 6th of March to the 6th of July, 1822, being 122 days, at \$1.50 per day			<u>\$183 00</u>

WASHINGTON CITY, *October 15, 1823.*

Received of E. J. Weed, Esq., quartermaster of the marine corps, one hundred and eighty-three dollars, in full for the above account.

RICHARD SMITH, *M. M. C.*

\$183.

This is allowed upon the explanation of Quartermaster Weed, who states that an officer of the station has been appointed to act as assistant quartermaster to perform such duties, with the additional pay of fifteen dollars per month, and that all extra charges will be discontinued, of this nature.

	United States, marine corps,		
		To Lieutenant Levi Twiggs,	<i>Dr.</i>
For services inspecting marine clothing furnished at New York, from 7th March to 6th July, 1822, 122 days, at \$1.00 per day.....			<u>\$122 00</u>
Approved.		RICHARD SMITH, <i>M. M. C.</i>	

NOVEMBER 1, 1823.

Received from Lieutenant Elijah J. Weed, quartermaster of the marine corps, one hundred and twenty-two dollars, in full of the above bill.

L. TWIGGS, *Lieut. Marines.*

\$122.

An appointment of an officer as assistant quartermaster has been made on this station, with the additional pay of fifteen dollars per month, and that charges of this nature will not be made in future, therefore allowed.

	United States, marine corps,		
		To Lieutenant James McCauley,	<i>Dr.</i>
To services as acting assistant quartermaster of the marine corps, from 1st of February to the 31st December, 1823, at fifteen dollars per month, is.....			<u>\$165 00</u>

WASHINGTON CITY, *December 31, 1823.*

Received of Lieutenant E. J. Weed, quartermaster marine corps, one hundred and sixty-five dollars, in full of the above account.

JAMES McCAULEY, *Lieut. Marines.*

Lieutenant McCauley received, inspected, packed and distributed the clothing from the time charged in the above account. In previous years, more than the amount charged has been paid to citizens and officers for performing the same duties, as per diem allowance.

E. J. WEED. *Q. M. M. C.*

	The United States, marine corps, quartermaster's department,		
		To Lieutenant Alvin Edson,	<i>Dr.</i>
For pay as assistant quartermaster of the marine corps from the 1st of January to the 31st December, 1824, at fifteen dollars per month, is.....			<u>\$180 00</u>

WASHINGTON, December 31, 1834.

Received of E. J. Weed, quartermaster of the marine corps, one hundred and eighty dollars, in full for the above account.

A. EDSON, *Asst. Q. M. M. C.*

NOTE.—The allowance of \$15 per month was continued to 31st December, 1827, when it was increased by verbal direction of the Secretary of the Navy to quartermaster of marines, E. J. Weed, to \$20 per month. The difference, \$5 per month, was disallowed in settlement of accounts, but has been sanctioned by the present Secretary of the Navy. G. G.

The United States, marine corps, quartermaster's department,	
To Brevet Major William Anderson,	<i>Dr.</i>
To services rendered in the quartermaster's department, on the Norfolk station, from the 1st January, 1823, to the 31st December, 1827, being sixty months, at fifteen dollars per month	\$900 00

Let the allowance be made from the separation of the pay and quartermaster's duties. S. L. S.

The separation referred to in the approval took place in December, 1825.

From the 1st December, 1825, to the 31st December, 1827, is twenty-five months, at fifteen dollars per month, is.....	\$375 00
---	----------

Received, Washington city, February 7, of E. J. Weed, quartermaster marine corps, three hundred and seventy-five dollars, the amount of the above account.

WM. ANDERSON, *Major Commanding.*

\$375.

I hereby certify that the extra duties in the quartermaster's department, performed by Major William Anderson, on the Norfolk station, from the 1st of January, 1823, to the 31st December, 1827, have been much more arduous, and involved a much heavier responsibility, than those of any other officer on a detached station, (with the exception, perhaps, of the officer commanding at New York,) as exhibited by the books now in my office.

The numerous arrivals of detachments of marines at his station, from the West India and other squadrons, frequently without a commissioned officer of the corps, with their returns in the greatest confusion, rendered the duty often perplexing. Without doubt his indefatigable attention to it has prevented considerable loss to the government.

E. J. WEED, *Quartermaster Marine Corps.*

QUARTERMASTER'S OFFICE, *January 18, 1828.*

The United States, marine corps, quartermaster's department,	
To Lieutenant J. C. Hall,	<i>Dr.</i>
To services as acting assistant quartermaster in the West Indies, by appointment of the quartermaster, with consent of the Secretary of the Navy, from April 1, 1825, to September 30, 1825, six months, at fifteen dollars per month.....	\$90 00

Received, Washington city, November 10, 1825, of E. J. Weed, quartermaster of the marine corps, ninety dollars, in full for the above account.

J. C. HALL.

Allowed.

No. 573.

[2D SESSION.]

INFORMATION COLLECTED BY THE NAVY DEPARTMENT RELATING TO ISLANDS, REEFS, SHOALS, ETC., IN THE PACIFIC OCEAN AND SOUTH SEAS, AND SHOWING THE EXPEDIENCY OF AN EXPLORING EXPEDITION IN THAT OCEAN AND THOSE SEAS BY THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 29, 1835.

NAVY DEPARTMENT, *January 24, 1835.*

SIR: I have the honor to send herewith an original report of J. N. Reynolds, Esq., dated the 24th of September, 1828, describing certain islands, reefs, and shoals in the Pacific ocean, &c., and which is presumed to be the report called for by the resolution of the House of Representatives of the 23d instant, and referred to as dated the 9th October, 1829. When no longer required, it is respectfully requested it may be returned.

I am, very respectfully, your obedient servant,

M. DICKERSON.

Hon. JOHN BELL, *Speaker of the House of Representatives.*

To the Hon. Samuel L. Southard, Secretary of the Navy:

SIR: In obedience to your orders of June 30, I repaired without delay to New London, Stonington, Newport, New Bedford, Edgartown, Nantucket, and other places where information might be found of the Pacific ocean and South seas. The whaling captains were ready to communicate such knowledge as they had treasured up or recorded in their numerous voyages. The owners of the whale ships were equally anxious to do all in their power to assist me in the object of my visit to them. In these places the navigators are certainly better acquainted with those seas than any other people in this or any other country can be. The information had, in some measure, been gathered in gross, but without order or much arrangement; and I had to go over the whole ground, and examine at Nantucket every individual navigator of those seas who could be found at home, with their log books, and journals and charts. The doing of this, and putting the intelligence into such form as might save you much time in reading, was a work of no trifling magnitude, which I mention only to excuse the delay of this report. It was pleasant for me to find that all I had heard before was confirmed by a long train of witnesses, and every calculation I had previously made fell far short of the truth.

The first objects of my inquiry were the navigation, geography, and topography presented by the whole range of the seas, from the Pacific to the Indian and Chinese oceans; also, the extent and nature of our commerce and fisheries in these seas.

The whole number of vessels in the whale fishery, with those engaged in the sealing business, far exceeded the number I had given in my communication to the Naval Committee, and their tonnage was much greater. There are at least two hundred ships employed, being on an average of two hundred and seventy-five tons; some as large as five hundred, and others under two hundred tons. The average length of their voyages, taking one hundred and seventy-eight voyages, from 1815 to 1824, was twenty-nine months, and the average cargo of oil from the same ships was exceeding seventeen hundred barrels. But it should be observed that the ships are now generally larger than they were formerly, the small ones being sold out of the fleet, as the whalers call their ships, or broken up from decay and age. The length of their voyage is naturally increasing, from the fact that our whalers are traversing new seas for the whale, sometimes doubling the Cape of Good Hope, and taking an eastern direction, meeting their brethren of the same pursuits, who have doubled Cape Horn, while the latter sail over the ground, in an opposite direction, which the former had just traversed.

The crews of these ships, I found from general inquiry and a close inspection of their log books and journals, are remarkably healthy. What sickness they have is from the scurvy, a disease incident to long voyages, and which is avoided only by the utmost care and the frequent use of fresh provisions. The whaling ships are provisioned with beef, pork, and bread, for three years; but they never exceed three months on their whaling ground without recruiting themselves with fresh provisions from some neighboring island. The utmost care is taken in fitting out these ships with many delicacies; and it is a general remark among whalers, that they live better at sea than on shore. Tea, coffee, and chocolate are freely used as anti-scorbutics. These vessels are navigated with the utmost caution. Two men are constantly placed at mast-head as sentinels: for many of the islands, rocks, and reefs are not laid down in any chart; and those laid down or not, are many of them so low, that this precaution is indispensably necessary for their safety. From this precaution, many rocks, reefs, and islands have been discovered by them, and pretty accurately noted. The whalers are much advanced in mathematics and practical navigation beyond other navigators: for, on their long voyages out and home, the most intelligent officers assist the younger in their mathematical and nautical studies; and thus schooled, all come home improved in their branches, distinction in them being the direct road to preferment. The scarcity of the whale on the common whaling ground may be easily accounted for, when it is understood that it takes about ninety whales, as they average, to make a full cargo, and that from this calculation our own whalers take about eight thousand a year, and, from a moderate calculation, more than two thousand are mortally wounded that cannot be taken, making ten thousand a year destroyed by us. I have stated these particulars to show how necessary it will be to explore new grounds in higher southern latitudes for the right whale, when the sperm whale become scarce in the equatorial regions. And, from the accounts I have received, there is an immense extent of ocean in the high southern latitude westward, of which there is no account given; or, if there be any, but little more is known than this, that the geo-

grapher has marked it on his maps and charts with a sweeping hand, to fill up the mighty space of which the world is as yet ignorant, and will long remain so, if the enterprise of our government does not explore it.

I shall now proceed to give you a list of the discoveries of our enterprising and careful navigators in those seas, in as concise a form as may be consistent with a clear view of the extent and importance of these discoveries. The English charts, and those of other countries, are as yet very imperfect. Much of their information has been obtained from loose accounts from whalers, who were careless in some instances, and forgetful in others, and which were seized with greediness by the makers of maps and charts, in order to be the first to make these discoveries known. But perhaps it does not become us to be hypercritical upon other nations, as we have as yet no maps or charts of our own to compare with them.

From all the accounts I have received of the islands, reefs, rocks, &c., in these seas, I draw the inference that most of them are of volcanic origin, and have arisen, in the lapse of ages, in groups or single islands, as it has pleased the Great Creator of the universe to call them into existence; and by the same great engine of nature they may be constantly changing.

The information I have collected, if not perfectly accurate, is certainly the most so that can be found. It has been drawn from purely original sources; nothing has been received at second hand. I have examined the log books, journals, maps, and charts of the navigators themselves, and in most cases have questioned them personally. Many of these facts have been received from several quarters, and I have had opportunities to compare them with others that had been offered before. Nantucket often confirmed the information from New Bedford, and *vice versa*. When the individuals were equally good in point of intelligence, and their statements in any way differed, I have given both accounts; but if there was a decided difference in the intelligence of the authority, I have adopted that which was held in the most general estimation.

Some of those whom I have examined, whose voyages were of very recent date, or were connected with a train of remarkable facts, I have considered distinctly, and have given their statements as made to me verbally, or have taken extracts from their journals without placing their discoveries under the general heads. Their brief statements of the most recent date will show most distinctly that the field for discoveries is still prolific, and that there will be a sufficiency of subjects in those seas to employ the enterprise of our country for many generations to come.

The currents have, in many instances, been given; and from all I could gather from the statements made to me, they are caused by the winds, rather than from any motion of the earth, and of course are perpetually varying in such a manner that but little reliance on the experience of any one can be placed. The variations of the needle I did not find noticed by many of the navigators. Captain Swain, of Newport, has noted the variations in some latitudes, which will be given in this report. There is one fact worthy of remarking, which I obtained from the most experienced navigators, which is, that in all their voyages round Cape Horn, from the first commencement of their entering the Pacific until the present day, not a single vessel has been wrecked or lost in doubling the cape; and these navigators sail from home whenever they are ready, without the least regard to the season of the year: still, however, all agree that March and April are the best months to double the cape, as fresh gales are then frequent, without dangerous storms. I noticed, from their log books and journals, that they reach the most dangerous parts of the cape navigation in about ninety or one hundred days from our shores.

Reefs and islands.

Galago Island, 1 deg. 48 min. north latitude, 104 deg. 6 min. west longitude. Not on the charts.

Fanning's Island, 3 deg. 49 min. north latitude, 158 deg. 29 min. west longitude (by others, 3 deg. 44 min. north latitude, 159 deg. 6 min. west longitude; also, 3 deg. 50 min. north latitude, 158 deg. 45 min. west longitude.) The centre of Fanning's Island lies in 3 deg. 52 min. north latitude, and 158 deg. 56 min. west longitude, by lunar observation and chronometer. It is a lagoon island, the land about five feet above the surface of the water. Cocoa trees, sixty or seventy feet in height, are on it: the remains of a stone hut, about twelve feet square, and in it human bones, stone hatchets, and blackfish teeth with holes drilled through them. Some parts of the land had been cultivated, as appeared by the gardens, fences of stone, &c., remaining. The island is about forty miles in circumference, the mouth of the harbor thirty rods in width on the south side; soundings going in, from three to seven fathoms. There is a good harbor under the eastern point. The Lion was lost on a reef which makes off to the south from the entrance of the harbor, on the starboard hand going in. The tide ebbs and flows about five feet, and in its strength runs six to seven knots out and in. Deep water all round the land close in. About ninety miles distant is Washington's Island.

Washington's Island, 4 deg. 30 min. north latitude, 126 deg. west longitude (by others, 4 deg. 50 min. north latitude and 160 deg. 30 min. west longitude.)

Island, 6 deg. 36 min. north latitude, 166 deg. west longitude.

Barber's Island, 8 deg. 54 min. north latitude, 178 deg. west longitude; also, 8 deg. 33 min. north latitude and 177 deg. 59 min. west longitude.

Reef, 10 deg. north latitude, 179 deg. 24 min. west longitude. Not on the charts.

Clipperton's rock, (low island,) 10 deg. 23 min. north latitude, 109 deg. 19 min. west longitude.

Island, 11 deg. 33 min. north latitude, 164 deg. west longitude. Not on the charts.

Island, (probably the same,) 13 deg. 6 min. north latitude, 168 deg. 24 min. west longitude.

Island, (probably the same,) 13 deg. 6 min. north latitude, 166 deg. west longitude.

Island, (probably the same,) 13 deg. 19 min. north latitude, 168 deg. 55 min. west longitude.

Shoal, 14 deg. 44 min. north latitude, 170 deg. 30 min. west longitude, (13 deg. 32 min. north latitude, same longitude.)

Gaspar's Island, 15 deg. north latitude, 176 deg. 13 min. west longitude, (by some, in east longitude.) On the charts, in 176 deg. 18 min. east longitude.

Island, 16 deg. north latitude. 133 deg. west longitude.

A cluster, from 16 deg. to 17 deg. north latitude, and 133 deg. to 136 deg. west longitude.

Roca coral, 16 deg. 12 min. north latitude, 136 deg. 12 min. west longitude.

Island, 16 deg. 15 min. north latitude, 133 deg. 30 min. west longitude.

Island, 16 deg. 30 min. north latitude, 163 deg. 54 min. west longitude.

- Island, 17 deg. north latitude, 136 deg. west longitude.
 New Blada, 18 deg. 12 min. north latitude, 114 deg. 3 min. west longitude. Probably Cloud's Island.
 Island, 18 deg. 22 min. north latitude, 155 deg. 15 min. west longitude. The situation given this island is only forty miles southeasterly from the most southern point of Owhyhee—doubtful.
 Shoal, 18 deg. 22 min. north latitude, 170 deg. 30 min. west longitude. Not on the charts.
 Clarion's Island, (plenty of wood,) 18 deg. 23 min. north latitude, 114 deg. 45 min. west longitude.
 Another situation for Cloud's Island.
 Island, 19 deg. 15 min. north latitude, 166 deg. 52 min. west longitude. Perhaps another situation for Mallon's Island, which is found on the charts.
 Island, (fresh water,) 19 deg. 22 min. north latitude, 115 deg. 15 min. west longitude. See Cloud's Island, two lines below.
 Mallon's Island, 19 deg. 23 min. north latitude, 165 deg. 23 min. west longitude.
 Cloud's Island, 19 deg. 46 min. north latitude, 115 deg. west longitude. (See above.) So many different situations are assigned to an island or islands in this neighborhood, that it would seem desirable that the true latitude and longitude should be accurately determined. There are, in fact, two islands on the charts, near this situation.
 Copper Island, 20 deg. 6 min. north latitude, 131 deg. 54 min. west longitude. Placed on the charts in east longitude.
 Island, 21 deg. north latitude, 176 deg. 30 min. west longitude. Near Krusenstern's rock, which is placed on the charts in latitude 22 deg. 5 min., longitude 175 deg. 40 min.
 Shaler's Island, 22 deg. 6 min. north latitude, 112 deg. 14 min. west longitude. Not on charts—doubtful.
 Massachusetts Island, 22 deg. 28 min. north latitude, 177 deg. 5 min. west longitude. Placed on the charts in 28 deg. 30 min. north latitude, 176 deg. 40 min. west longitude.
 Henderson's Island, (fresh water,) 24 deg. 6 min. north latitude, 128 deg. 30 min. west longitude.
 By others, in 24 deg. 26 min.
 Reef, shoal, 24 deg. 14 min. north latitude, 168 deg. 35 min. west longitude. Two Brothers lost on it.
 Pollard's Island, 24 deg. 48 min. north latitude, 168 deg. west longitude.
 Gardner's Island, 25 deg. 3 min. north latitude, 167 deg. 40 min. west longitude.
 Cooper's Island, 25 deg. 4 min. north latitude, 131 deg. 27 min. west longitude.
 Maro's reef, 25 deg. 24 min. north latitude, 170 deg. 12 min. west longitude (by others 25 deg. 48 min. north latitude, and 170 deg. 52 min. west longitude; also, 25 deg. 48 min. north latitude, and 170 deg. 20 min. west longitude.)
 Island, 25 deg. 22 min. north latitude, 131 deg. 26 min. west longitude. A repetition of Cooper's Island.
 Laysan's Island, 25 deg. 50 min. north latitude, 171 deg. 51 min. west longitude; also, 26 deg. 2 min. north latitude, and 173 deg. 40 min. west longitude.
 Group, (Pearl and Hermes, British whalers, lost in 1822,) 27 deg. 46 min. north latitude, 176 deg., or 176 deg. 30 min. west longitude.
 Bunker's Island, 28 deg. north latitude, 173 deg. 30 min. west longitude.
 Island, 28 deg. north latitude, 176 deg. 50 min. west longitude.
 Cure's Island, (low and dangerous,) 28 deg. 25 min. north latitude, 178 deg. 42 min. west longitude.
 Swift's Island, (Otter Island,) 33 deg. north latitude, 119 deg. 6 min. west longitude.
 New Nantucket, 11 min. north latitude, 176 deg. 20 min. west longitude. Not on charts.
 St. Berto Island, (wood and water,) 18 deg. north latitude, 110 deg. west longitude.
 Island, 13 deg. 6 min. north latitude, 168 deg. 24 min. west longitude.
 Reef, 3 deg. 28 min. north latitude, 157 deg. 59 min. west longitude.
 Shoal, 13 deg. 38 min. north latitude, 170 deg. 30 min. west longitude.
 Island, 13 deg. 5 min. north latitude, 168 deg. 31 min. west longitude. Same as third above.
 Island, 20 deg. north latitude, 151 deg. 30 min. west longitude. Not on charts.
 Wake's Island, 16 deg. 49 min. north latitude, 169 deg. 40 min. west longitude. Here wrong placed.
 Shoal, 13 deg. 36 min. north latitude, 170 deg. 30 min. west longitude.
 Ann's Island, 13 deg. 4 min. north latitude, 168 deg. 21 min. west longitude.
 Week's reef, 16 deg. 49 min. north latitude, 169 deg. 40 min. west longitude. See third line above.
 Reef, 1 deg. north latitude, 179 deg. 34 min. east longitude.
 Strong's Island, 5 deg. 23 min. north latitude, 163 deg. 10 min. east longitude. An island, called Teyoa, is placed on the charts in latitude 6 deg. north, 162 deg. 35 min. east.
 Group, 9 deg. 5 min. north latitude, 164 deg. 37 min. east longitude. A group of islands is found on the charts in the same latitude, 166 deg. east.
 Catherine Island, 9 deg. 8 min. north latitude, 166 deg. 10 min. east longitude.
 Aricief's Island, 9 deg. 18 min. north latitude, 161 deg. 18 min. east longitude. Island de Arresites is found on the charts in latitude 10 deg. north, longitude 160 deg. 30 min. east, and the Island Casbobas 9 deg. 40 min. north, and 161 deg. 50 min. east.
 Reef, 10 deg. north latitude, 179 deg. 24 min. east longitude. This reef is placed, in a preceding part of the list, in 179 deg. 24 min. west.
 Island, 16 deg. north latitude, 171 deg. 42 min. east longitude. Not on charts.
 Cornwallis Island, 16 deg. 48 min. north latitude, 169 deg. 22 min. east longitude.
 Tarquin Island, 17 deg. north latitude, 160 deg. east longitude. Not on charts.
 Folger's Island, 18 deg. 22 min. north latitude, 155 deg. 15 min. east longitude. Not on charts.
 Granger's Island, 18 deg. 28 min. north latitude, 146 deg. 14 min. east longitude.
 Reef, 17 deg. 6 min. north latitude, 156 deg. 14 min. east longitude.
 Halcyon Island, (wood,) 19 deg. 6 min. north latitude, 163 deg. 33 min. east longitude.
 Week's or Wilson's Island, 19 deg. 21 min. north latitude, 166 deg. 55 min. east longitude. Week's Island.
 Island, 20 deg. 30 min. north latitude, 152 deg. 50 min. east longitude. Reef on chart.
 Lamira, 20 deg. 30 min. north latitude, 166 deg. 42 min. east longitude. Placed on chart in 164 deg. 15 min.
 Reef, 21 deg. 5 min. north latitude, 136 deg. 48 min. east longitude.
 Peru Island, 21 deg. 12 min. north latitude, 141 deg. 42 min. east longitude.

- Reef, 22 deg. 7 min. north latitude, 142 deg. 24 min. east longitude.
 Dexter's Island, 23 deg. 24 min. north latitude, 163 deg. 5 min. east longitude.
 Marcus Island, 24 deg. 18 min. north latitude, 153 deg. 42 min. east longitude. Probably Island de Sebastian Lobos, placed on chart about 55 miles to the north, same longitude.
 Island discovered by R. Weeks, 24 deg. north latitude, 154 deg. east longitude. Probably same as preceding.
 Island, 25 deg. 12 min. north latitude, 131 deg. 36 min. east longitude. A rock, "seen by Captain Bishop in 1796," is placed on the charts in latitude 25 deg. 20 min. north, longitude 131 deg. 55 min. east.
 Reef, 25 deg. 30 min. north latitude, 152 deg. 50 min. east longitude. Not on the charts.
 Forbes's Island, 25 deg. 42 min. north latitude, 131 deg. 13 min. east longitude.
 Island, 25 deg. 53 min. north latitude, 131 deg. 17 min. east longitude.
 Island, 26 deg. 5 min. north latitude, 131 deg. 52 min. east longitude.
 Lasker's Island, 26 deg. north latitude, 173 deg. 24 min. east longitude. Reef on chart.
 Reef, 26 deg. 6 min. north latitude, 160 deg. east longitude. Not on chart.
 Tree Island, 26 deg. north latitude, 145 deg. 44 min. east longitude. Placed on the charts, latitude 27 deg. to 27 deg. 30 min. north, same longitude.
 Island, 28 deg. 30 min. north latitude, 176 deg. 50 min. east longitude. Perhaps Massachusetts, here wrongly placed in east instead of west longitude.
 Galunus Island, 28 deg. 53 min. north latitude, 162 deg. east longitude.
 Island, 29 deg. 26 min. north latitude, 143 deg. east longitude. Island, 29 deg. 40 min. north latitude, 143 deg. 6 min. east longitude. Island, 30 deg. north latitude, 143 deg. east longitude. Island, 30 deg. north latitude, 144 deg. 24 min. east longitude. Island, 30 deg. north latitude, 141 deg. 30 min. east longitude. Three of these islands are on the charts, and another, St. Thomas, in latitude 30 deg. 20 min. north, longitude 142 deg. 20 min. east.
 Ganges Island, 30 deg. 45 min. north latitude, 154 deg. 25 min. east longitude. An island is on the charts in latitude 31 deg. north, longitude 155 deg. south; no doubt intended for the same.
 Ganges Island, 31 deg. north latitude, 147 deg. 10 min. east longitude. Not on charts.
 Reef discovered by R. Weeks, 31 deg. 15 min. north latitude, 153 deg. east longitude. This reef is placed on the charts in latitude 33 deg. north, same longitude.
 Island, 31 deg. 30 min. north latitude, 140 deg. east longitude. Not on charts.
 Reef, near 32 deg. north latitude, 147 deg. east longitude. Not on charts.
 Roca di Plata, 33 deg. 48 min. north latitude, 160 deg. 48 min. east longitude. Roca di Plata is found on the charts in latitude 32 deg. 30 min. north, longitude 170 deg. east.
 Bank, sixty-four fathoms, 34 deg. 25 min. north latitude, 178 deg. 30 min. east longitude. Mellish's bank.
 Starbuck's group, 173 deg. 30 min. east longitude. No latitude given.
 Reef, northeast from Robert's Island, (one of the Marquesas,) distant twenty-one miles; six miles long from northeast to southwest.
 Magnus shoal, 23 deg. 22 min. north latitude, 130 deg. 11 min. east longitude. Not on charts.
 Reef, 1 deg. north latitude, 178 deg. 24 min. east longitude. On charts, but placed in 179 deg. 24 min. east longitude. See also forward, 13th item, where the same longitude is given.
 Reef, 20 deg. 30 min. north latitude, 152 deg. 50 min. east longitude.
 Island, 17 deg. north latitude, 176 deg. 50 min. east longitude. Not on chart.
 Talsam's Island, 9 deg. 30 min. north latitude, 166 deg. 45 min. east longitude. Not on chart.
 Reef, 2 deg. 30 min. north latitude, 158 deg. 60 min. east longitude. Not on chart.
 Island, 21 deg. 15 min. north latitude, 145 deg. 48 min. east longitude. Not on chart.
 Rock, 31 deg. 9 min. north latitude, 138 deg. 29 min. east longitude. Not on chart—doubtful. See 10th item forward.
 Island, 30 deg. 33 min. north latitude, 139 deg. 36 min. east longitude. Very near the situation of Todos los Santos on the charts.
 Abyos Island, 23 deg. 22 min. north latitude, 130 deg. 11 min. east longitude. The same latitude and longitude as given (in the 9th item preceding) to Magus shoal. Abajos Island, or shoal, is found on the charts in latitude 20 deg. 20 min. north, longitude 130 deg. 10 min. east.
 Reef seen by Captain Trask, 2 deg. 40 min. north latitude, 178 deg. 50 min. east longitude. Not on charts.
 Reef, 2 deg. 30 min. north latitude, 153 deg. 50 min. east longitude. Not on charts.
 Island, 21 deg. 15 min. north latitude, 145 deg. 48 min. east longitude. Same island given in the 6th article preceding.
 Reef, 22 deg. 12 min. north latitude, 142 deg. 42 min. east longitude.
 Reef, 1 deg. north latitude, 179 deg. 24 min. east longitude.
 Three Islands, 26 deg. 6 min. north latitude, 145 deg. 44 min. east longitude. See Tree Island, preceding.
 Rock, 31 deg. 42 min. north latitude, 141 deg. 10 min. east longitude. Not on charts.
 Rock, 31 deg. 9 min. north latitude, 139 deg. 29 min. east longitude. Not on charts. See 9th item preceding. Todos los Santos is placed on the charts in latitude 30 deg. 45 min. north, longitude 139 deg. 22 min. east.
 Spartan Island, 1 deg. 10 min. north latitude, 159 deg. 30 min. east longitude. Not on charts.
 Moore's Island, 30 min. south latitude, 166 deg. 35 min. east longitude. High land and well inhabited.
 Reef, thirty miles from Pelmore's island—very bad one. Longitude taken in a strong current.
 Bunker's shoal, 17 min. south latitude, 160 deg. 40 min. west longitude.
 Island, 26 min. south latitude, 159 deg. 50 min. west longitude. An island called Jarvis's Island, and a shoal or reef seen by Captain E. Clark, are placed very near this situation on the charts.
 Island, 1 deg. 5 min. south latitude, 138 deg. 54 min. west longitude. Not on charts.
 Brock's Island, 1 deg. 13 min. south latitude, 159 deg. 30 min. west longitude.
 Clark's Island, 3 deg. south latitude, 151 deg. 30 min. west longitude.
 Island, 3 deg. 14 min. south latitude, 170 deg. 50 min. west longitude. Birney's Island, in latitude 3 deg. 20 min. south, longitude 171 deg. 30 min. west; and Sidney's Island, in latitude 4 deg. 25 min. south, longitude 171 deg. 20 min. west, discovered by Captain Emmert, will be found on the charts.

- Island, 3 deg. 32 min. south latitude, 173 deg. 44 min. west longitude.
 Island, 3 deg. 35 min. south latitude, 170 deg. 40 min. west longitude.
 Sidney's Island, 4 deg. 30 min. south latitude, 171 deg. 20 min. west longitude.
 Island, 3 deg. 57 min. south latitude, 154 deg. 20 min. west longitude. Maldone's Island, of Lord Byron, placed on the charts 155 deg. west longitude.
 Reef, 5 deg. 30 min. south latitude, 175 deg. west longitude. Not on the charts.
 Starbuck's Island, 5 deg. 40 min. south latitude, 155 deg. 53 min. west longitude.
 Loper's Island, 6 deg. 7 min. south latitude, 177 deg. 40 min. west longitude. Not on the charts.
 Island, 6 deg. 32 min. south latitude, 167 deg. west longitude. An island is placed on the charts in latitude 6 deg. 30 min. south, longitude 166 deg. west.
 Island, (probably the same,) 6 deg. 36 min. south latitude, 166 deg. west longitude.
 Island, (probably the same,) 6 deg. 45 min. south latitude, 160 deg. 48 min. west longitude.
 Island, 10 deg. 5 min. south latitude, 162 deg. 20 min. west longitude. Reirson's Island and Humphrey's Island, discovered by Captain Patrickson in 1822, are placed on the charts in latitude 10 deg. 30 min. south, longitude 160 deg. 55 min. west, and latitude 10 deg. 12 min. south, longitude 160 deg. 50 min. west. A shoal is also laid down in latitude 11 deg. south, longitude 165 deg. 48 min. west, and an island in latitude 10 deg. 55 min. south, longitude 166 deg. west.
 Island, 10 deg. 30 min. south latitude, 161 deg. 28 min. west longitude.
 Reef, 10 deg. 46 min. south latitude, 136 deg. 6 min. west longitude.
 Island, 11 deg. 47 min. south latitude, 162 deg. west longitude.
 Winslow Island, (inhabited) 14 deg. 10 min. south latitude, 177 deg. 10 min. west longitude.
 Island, 15 deg. 38 min. south latitude, 161 deg. 18 min. west longitude. Not on charts.
 Island, 15 deg. 47 min. south latitude, 161 deg. 14 min. west longitude. Not on charts.
 Islands, 16 deg. south latitude, 139 deg. west longitude. Not on charts.
 Island, 16 deg. 28 min. south latitude, 143 deg. 30 min. west longitude.
 Island, 17 deg. south latitude, 138 deg. west longitude.
 Island, 20 deg. south latitude, 167 deg. 30 min. west longitude.
 Macy's Island, 20 deg. 52 min. south latitude, 178 deg. 47 min. west longitude. On chart with other names.
 Elizabeth Island, 21 deg. 6 min. south latitude, 178 deg. 36 min. west longitude. On chart with other names.
 Eunice's Island, 21 deg. 8 min. south latitude, 178 deg. 47 min. west longitude. On chart with other names.
 Raratongo Island, (inhabited) 21 deg. 17 min. south latitude, 159 deg. 40 min. west longitude.
 Orurute Island (an inhabited island) is placed on the charts in latitude 21 deg. 20 min. south, longitude 160 deg. west. No doubt the same.
 Armstrong's Island, (inhabited) 21 deg. 21 min. south latitude, 161 deg. 4 min. west longitude.
 Orurute Island (an inhabited island) is placed on the charts in latitude 21 deg. 20 min. south, longitude 160 deg. west. No doubt the same.
 Maria's Island, 21 deg. 45 min. south latitude, 155 deg. 10 min. west longitude. Not on chart.
 Oeno Island, 23 deg. 57 min. south latitude, 131 deg. 5 min. west longitude. Laid down on charts as discovered by Captain Bond, in longitude 131 deg. 35 min. west. Captain G. B. Worth found it in latitude 23 deg. 57 min. south, longitude 131 deg. 5 min. west, about eighty miles northwest by north of Pitcairn's Island, with a dangerous reef extending from the south point.
 Elizabeth Island, 24 deg. 6 min. south latitude, 127 deg. 50 min. west longitude. (By others 24 deg. 26 min. south latitude, and in east longitude.)
 Anderson's Island, 24 deg. 21 min. south latitude, 128 deg. 30 min. west longitude. Probably the same as Elizabeth Island, placed on the chart in latitude 34 deg. 30 min. south, longitude 128 deg. west.
 Pilgrim's Island, 24 deg. 40 min. south latitude, 104 deg. 40 min. west longitude.
 Group, 25 deg. 12 min. south latitude, 130 deg. 30 min. west longitude. If this group exists, it must be a few miles only south of Pitcairn's Island. Very doubtful.
 Gwinn's Island, 26 deg. 25 min. south latitude, 105 deg. 30 min. west longitude. Another situation for Pilgrim's Island. Ya de Salas y de Gomes, of the charts.
 Island, 28 deg. 6 min. south latitude, 95 deg. 12 min. west longitude. Not on charts; doubtful.
 Group, 31 deg. 6 min. south latitude, 129 deg. 30 min. west longitude. Not on charts.
 Rock, 51 deg. 51 min. south latitude, 64 deg. 42 min. west longitude. Not in the Pacific.
 Sidney's Island, 4 deg. 29 min. south latitude, 172 deg. 17 min. west longitude. See above, where it is placed in 4 deg. 30 min. south latitude, and 171 deg. 20 min. west longitude.
 Coconut Island and reef, 18 deg. 12 min. south latitude, 174 deg. 15 min. west longitude. Not on chart. If correctly placed, must be between Amagura and the Mayorga Islands. See chart.
 Mary Balcourt's Islands, 2 deg. 47 min. south latitude, 171 deg. 58 min. west longitude. Surrounded by a reef twenty leagues in circumference, with only four openings where boats can enter.
 Byron's Island, 1 deg. 10 min. south latitude, 175 deg. 40 min. west longitude. Placed on the charts in latitude 1 deg. 10 min. south, and longitude 177 deg. 12 min. east. A reef on the north end, two miles distant.
 Island, 20 deg. south latitude, 167 deg. 30 min. west longitude.
 Clark's reef, 1 deg. 13 min. south latitude, 159 deg. 45 min. west longitude.
 Island, 21 deg. 29 min. south latitude, 131 deg. 28 min. west longitude. Not on chart.
 Shoal, 1 deg. 15 min. south latitude, 159 deg. west longitude. Very near Clark's reef; probably the same.
 Reef, 1 deg. 32 min. south latitude, 160 deg. west longitude. Very near Clark's reef; probably the same.
 Island, 11 deg. south latitude, 162 deg. west longitude. French Island, 10 deg. 30 min. south latitude, 162 deg. 15 min. west longitude. Francis Island, 10 deg. south latitude, 161 deg. 45 min. west longitude. Very near the situation of Reirson's and Humphrey's Islands. See above, and also account given by Captain Coffin, of ship Ganges.
 Reef, 1 deg. 15 min. south latitude, 159 deg. 42 min. west longitude. Clark's reef. See above.
 Island, 20 deg. south latitude, 157 deg. 30 min. west longitude.
 Island, 20 deg. south latitude, 161 deg. 30 min. west longitude.

- Falcon's Island, 21 deg. 17 min. south latitude, 159 deg. 40 min. west longitude.
 A large island, 19 deg. 56 min. south latitude, 140 deg. 16 min. west longitude. Thirty miles north and south.
 A large round island, 18 deg. 36 min. south latitude, 141 deg. 30 min. west longitude. An island called Sostanges, about thirty-six miles southwesterly of this, is placed on the charts as discovered in 1823.
 Starbuck's Island. 6 deg. 54 min. south latitude, 155 deg. 47 min. west longitude.
 Phenix Island, (small and sandy, three miles in circumference) 2 deg. 35 min. south latitude, 171 deg. 39 min. west longitude. Barney's Island (a lagoon, twenty miles in circumference) 3 deg. 9 min. south latitude, 171 deg. 41 min. west longitude. These two islands, with Mary Balcourt's Island, given before, in nearly the same latitude and longitude, are probably the same as Birney's Island.
 Two reefs, bearing north-northeast from Keppel's Island twenty-eight miles, about a cable's length apart.
 Independence Island, 3 deg. 36 min. south latitude, 144 deg. 35 min. west longitude. Not on charts.
 Sarah Ann, 4 deg. south latitude, 154 deg. 18 min. west longitude. Probably the same as Maldone's Island, placed on charts in 155 deg. west longitude.
 Fenua Laosa Oroa, west-northwest from Mopelia about 60 miles.
 Gardner's Island, 4 deg. 30 min. south latitude, 174 deg. 22 min. west longitude. Not on charts; discovered by Captain Coffin, of ship Ganges.
 Coffin's Island, 31 deg. 13 min. south latitude, 178 deg. 54 min. west longitude. Not on charts; discovered by Captain Coffin, of ship Ganges.
 Ganges Island, 10 deg. 25 min. south latitude, 160 deg. 45 min. west longitude. On charts; seen by Captain Coffin.
 Ganges Island, 10 deg. south latitude, 161 deg. west longitude. On charts; see Captain Coffin's printed account.
 Nederlandich Island, 7 deg. 10 min. south latitude, 177 deg. 33 min. east longitude. Not on charts. See printed account.
 Tracy's Island, 7 deg. 30 min. south latitude, 178 deg. 45 min. east longitude. Not on charts.
 Mitchell's group, 9 deg. 6 min. south latitude, 179 deg. 48 min. east longitude.
 Plasket's Island, 9 deg. 13 min. south latitude, 179 deg. 50 min. east longitude. Probably one of Mitchell's group.
 Independence Island, 10 deg. 25 min. south latitude, 179 deg. east longitude. Not on charts.
 Island, 10 deg. 45 min. south latitude, 179 deg. 35 min. east longitude. Not on charts.
 Hunter's Island, 15 deg. 31 min. south latitude, 176 deg. 11 min. east longitude.
 Reef, 23 deg. 48 min. south latitude, 164 deg. 14 min. east longitude.
 Reef, 26 deg. 6 min. south latitude, 160 deg. east longitude.
 Island, 31 deg. 19 min. south latitude, 160 deg. 42 min. east longitude.
 Reef, 26 deg. 6 min. south latitude, 160 deg. east longitude. Repetition of reef given above.
 Reef, 21 deg. 15 min. south latitude, 160 deg. east longitude.
 Island, 30 deg. 33 min. south latitude, 139 deg. 36 min. east longitude. Inland, on New Holland.
 Moore's Island, 30 min. south latitude, 166 deg. 35 min. east longitude. See page 691, with Spartan Island and reef.
 An island, with plenty of wood and water, from 1 deg. north to 2 deg. south latitude, 125 deg. 6 min. east longitude.
 Island, 30 deg. 6 min. south latitude, 144 deg. 24 min. east longitude.
 Island, 29 deg. 31 min. south latitude, 143 deg. east longitude.
 Island, 31 deg. south latitude, 155 deg. east longitude.
 Lydne's shoal, 3 deg. 20 min. south latitude, 146 deg. 50 min. east longitude.
 Ocean Island, 41 deg. south latitude, 170 deg. 48 min. east longitude.
 Ocean Island, 2 deg. 30 min. south latitude, 152 deg. 40 min. east longitude.
 Reef, 1 deg. 40 min. south latitude, 159 deg. 30 min. east longitude.
 Reef, 8 deg. 30 min. south latitude, 144 deg. 45 min. east longitude.
 Island, 21 deg. 59 min. south latitude, 131 deg. 38 min. west longitude.
 Island, 5 deg. 1 min. south latitude. Seen by O. Starbuck, northwest from Marquesas.
 Sherdoff's Island, 14 deg. 41 min. south latitude, 144 deg. 59 min. west longitude.
 Reef, very low, 5 deg. 38 min. south latitude, 170 deg. 50 min. west longitude.
 Island, 4 deg. 45 min. south latitude, 174 deg. 40 min. west longitude.
 Island, 14 deg. 15 min. south latitude, 138 deg. 47 min. west longitude.
 Reef and island, 14 deg. 57 min. south latitude, 144 deg. 26 min. west longitude.
 Island, 14 deg. 41 min. south latitude, 144 deg. 59 min. west longitude.
 Jarvis' Island, 23 min. south latitude, 160 deg. 15 min. west longitude.
 Malden Island, 3 deg. 59 min. south latitude, 155 deg. west longitude.
 Mante Island, 20 deg. 8 min. south latitude, 157 deg. 18 min. west longitude.
 Starbuck's Island, 5 deg. 58 min. south latitude, 155 deg. 58 min. west longitude.
 Island, 28 deg. 6 min. south latitude, 94 deg. 12 min. west longitude.
 Island, 9 deg. 57 min. south latitude, 149 deg. 30 min. west longitude.
 A rock, bearing from the Diego Ramirez, north 73 deg. east 30 miles.
 A rock, 31 deg. 24 min. south latitude, 177 deg. 55 min. west longitude.
 Island of Oratoa, 20 deg. 14 min. south latitude, 159 deg. 45 min. west longitude. Well inhabited.
 Island, 19 deg. 56 min. south latitude, 158 deg. 12 min. west longitude.
 Island, 20 deg. south latitude, 157 deg. 15 min. west longitude.
 Rorotonga Island, 23 deg. 6 min. south latitude, 157 deg. 55 min. west longitude.
 Remitara Island, 22 deg. 30 min. south latitude, 152 deg. 8 min. west longitude. Inhabited.
 Island, 15 deg. 50 min. south latitude, 155 deg. 5 min. west longitude.
 Island, 8 deg. 35 min. south latitude, 159 deg. 40 min. west longitude.
 Island, 20 deg. south latitude, 156 deg. west longitude.
 Island, 20 deg. south latitude, 156 deg. 40 min. west longitude.
 Island, 22 deg. 32 min. south latitude, 152 deg. 9 min. west longitude.

- Island, 21 deg. 18 min. south latitude, 159 deg. 36 min. west longitude. Probably Falcon's, 21 deg. 17 min. south latitude, 159 deg. 40 min. west longitude.
- Island, 21 deg. 28 min. south latitude, 161 deg. west longitude.
- Helicon's Island, 22 deg. 28 min. north latitude, 177 deg. 5 min. east longitude.
- Gaspar Island, 15 deg. north latitude, 176 deg. 18 min. east longitude.
- Reef, 2 deg. 30 min. north latitude, 153 deg. 50 min. east longitude.
- Island, 21 deg. 15 min. north latitude, 145 deg. 48 min. east longitude.
- Cooper's Island, 21 deg. 48 min. north latitude, 131 deg. 48 min. east longitude.
- Island, 3 deg. north latitude, 144 deg. 24 min. east longitude.
- Rock, 31 deg. 42 min. north latitude, 136 deg. 29 min. east longitude.
- Island, 30 deg. 33 min. north latitude, 139 deg. 36 min. east longitude.
- Allegos Island, 23 deg. 22 min. north latitude, 120 deg. east longitude.
- Island, 1 deg. 7 min. north latitude, 155 deg. 10 min. east longitude.
- Island, 2 deg. 46 min. north latitude, 154 deg. east longitude.
- Island, 5 deg. 18 min. north latitude, 163 deg. 12 min. east longitude.
- Island, 8 deg. 54 min. north latitude, 165 deg. 38 min. east longitude.
- Island, 17 deg. north latitude, 156 deg. 18 min. east longitude.
- Three rocks, 31 deg. 15 min. north latitude, 153 deg. 40 min. east longitude.
- Buckle's Island, 28 deg. north latitude, 178 deg. west longitude.
- Island, 21 deg. north latitude, 176 deg. west longitude.
- Golconda Island, 54 min. north latitude, 132 deg. west longitude.
- Island, 1 deg. 6 min. north latitude, 139 deg. 5 min. east longitude.
- Burick's, 15 deg. 15 min. north latitude, 146 deg. 46 min. west longitude. A chain of islands so called; wooded.
- Islands, 11 deg. 11 min. north latitude, 190 deg. 9 min. west longitude. A chain, 25 miles from north to south.
- Ocean Island, 28 deg. 25 min. north latitude, 177 deg. 42 min. west longitude.
- Allen's breakers, 25 deg. 30 min. north latitude, 170 deg. 30 min. west longitude.
- Island, 28 deg. 5 min. north latitude, 95 deg. 12 min. west longitude.
- Mellish's bank, 34 deg. 25 min. north latitude, 181 deg. 31 min. west longitude. Sixty-four fathoms.
- Cloud's Island, 19 deg. 46 min. north latitude, 115 deg. west longitude.
- Lassion's Island, 26 deg. 2 min. north latitude, 173 deg. 35 min. west longitude.
- Island, low, 10 deg. 8 min. north latitude, 189 deg. 4 min. west longitude. Three miles in length.
- Group, largest Oteda, 9 deg. 28 min. north latitude, 139 deg. 44 min. west longitude.
- Island, 4 deg. 44 min. north latitude, 163 deg. 39 min. west longitude.
- New Island, 19 deg. north latitude, 133 deg. west longitude.
- Wreck reef, 16 deg. 49 min. north latitude, 169 deg. 40 min. west longitude.
- Island, 30 deg. north latitude, 178 deg. 30 min. west longitude.
- Island, 16 deg. 30 min. north latitude, 169 deg. 45 min. west longitude.
- Massachusetts Island, 30 deg. north latitude, 178 deg. 30 min. east longitude. Mentioned in three or four other places, differently situated.
- Island, 20 deg. 20 min. north latitude, 155 deg. 24 min. east longitude.
- Reef, 31 deg. 42 min. north latitude, 141 deg. east longitude.
- Three islands, from 25 deg. 58 min. to 36 deg. 30 min. north latitude, 158 deg. east longitude.
- Guardian Islands, three, 22 deg. 30 min. north latitude. 350 miles northeast of Ono.
- Incarnation of Quiros. North-northwest from Pitcairn's Island, distant 90 miles.
- Henderson's Island. 110 miles east of Pitcairn's Island, and 7 miles south.
- Bowen's Islands, 26 deg. 44 min. north latitude, 143 deg. 20 min. east longitude. Dangerous.
- Group of small, low islands, 4 deg. 43 min. north latitude, 169 deg. east longitude. In form of a horse shoe, open at the north-northeast side, with a harbor eight or ten miles over in the middle of the chain.
- Group of low islands, 8 deg. 3 min. north latitude, 166 deg. 15 min. east longitude. Covered with wood, and surrounded with rocks and reefs; inhabited.
- Ellis's group of islands, 8 deg. 27 min. south latitude, 118 deg. 4 min. west longitude.
- Depeyster's Island, 8 deg. 5 min. south latitude, 181 deg. 45 min. west longitude.
- Island, 14 deg. 15 min. south latitude, 138 deg. 47 min. west longitude.
- Romanzoff's Island, 14 deg. 57 min. south latitude, 144 deg. 28 min. west longitude.
- Island, small, 26 deg. 40 min. south latitude, 104 deg. west longitude.
- Island, 26 deg. 32 min. south latitude, 103 deg. 59 min. west longitude. Low, rocky, barren, two and a half miles long by two in width, with a deep bay.

Captain Edmund Gardner, of New Bedford, having visited the Pacific ocean (both north and south) several times, gave his opinion as to the coasts and islands which it would seem more immediately necessary to explore and survey, viz:

CALIFORNIA.

This coast has been very imperfectly surveyed, particularly from Ceros Island, south, to the end of the Peninsula. From Ceros Island, north, was partially surveyed by Vancouver. There are, however, many bays, harbors, islands and reefs, that were not laid down by him. There has lately been a reef discovered by Captain Pease, of the ship Hesper, of this port, in latitude 32 deg. 34 min. north, longitude 119 deg. 34 min. west, which was not seen till the ship was passing over one end of it. It was seen from the mast-head nearly under the ship. They sounded on it, and found from two and a half to sixteen fathoms.

Northwest to west-northwest from the Sandwich Islands, (a track much frequented by our whaling ships) there are a number of islands and reefs but imperfectly known. In this direction three ships have been lost, viz: Two Brothers, of Nantucket, and Hermes and Pearl, of London. He should consider this track one of the first that should be explored.

The next that should call the attention of the expedition would, in his opinion, be a track, north and west, perhaps more north than west, from the Ladron Islands to the Islands of Japan, a chain of islands extending nearly across in this direction, and the true situation of which is very little known.

South-southwest from South Island, near the coast of Japan, Captain Clark, of the barque Elizabeth, of New Bedford, discovered a reef, latitude 31 deg. 45 min., longitude 137 deg. 50 min. east, The Sisters, of London, in company at the time.

A rock, called The Haystack, said to lie in latitude 29 deg. 53 min. north, longitude 137 deg. 50 min. east, has also been recently discovered. The latitude is possibly correct; the longitude is given differently by different navigators.

Extracts from the log book of Captain George Rule, of Nantucket.

———. Made an island he discovered in 1823, and named it Lydra Island, latitude 11 deg. 48 min. south, longitude 164 deg. 47 min. west. No inhabitants; plenty of wood and fish, but no water that he could find; not laid down in any chart they had; one and a half mile south-southeast to north-northwest in extent; a reef around it 100 rods from shore; no bottom 100 yards from the reef.

———, 1824. Made Friends' rock, bearing half compass west half south, distance four leagues from above, at 1. A. M. At noon it bore south, distant twelve miles, latitude 31 deg. 23 min. south. Next day discovered a reef, upon which the sea breaks high; at first thought to be whales breathing. It bears from the Friends' rock northwest, distance about four leagues. Latitude, of reef, 31 deg. 15½ min.; the day previous, the longitude, by chronometer, 177 deg. 50 min. west.

Bonin Islands have had a place on the charts for some time; but little, indeed nothing, was known of them, except that land had been reported in that neighborhood, and some map-maker put it down on his charts. They are regarded as new discoveries in Nantucket, made by Captain Coffin, 12th September, 1824, while he commanded the ship Transit, from Bristol. There is a freshness in the account he gives of them, that is really interesting; and he may with some justice claim the honor of the discovery, as they were not laid down on his charts. He found the group to consist of six islands, besides a number of large rocks and reefs. Captain Coffin sailed in the employ of Fisher, Kidd & Fisher, and, in honor of his employers, called two of the islands by their names, the largest of which is four leagues in length. The one most southern of the group he called South Island; and the fourth, from the great number of pigeons he found on it, he named Pigeon Island. About four miles east-northeast of South Island, lie two round, high islands, to which he gave no names. Fisher's Island lies from south-southeast to north-northwest, and Kidd Island, the most western of the group, lies southeast from the northwest part of Fisher's Island. Between the two last-mentioned islands there is a beautiful clear bay, two miles wide, and five miles up to the head. Captain Coffin sailed up this bay about four miles, where he found a fine small bay, where he anchored his ship, and, he remarks, as there is some justice due one's self, called it Coffin's harbor. This harbor is sheltered from all winds except from west-southwest, and a vessel will ride with as much safety as in Hampton Roads, with no current or swell. Captain Coffin took fifty tons of water on board, of the purest kind, with a supply of wood, both of these essential articles being in any abundance, and more easily procured than at any other place he was at. Turtle and pigeons were so plenty that any number could be obtained. The water in the bay was stored with a variety of fish, and with plenty of choice lobsters, and the cabbage tree was among the productions of the island, so that any desirable quantity might be easily procured. Captain Coffin did not discover any quadruped, reptile or insect, not even an ant. The islands are covered with large and beautiful forest trees, but not a single mark, even of a knife, could be traced upon one of them; nor did it appear that the footsteps of man had ever been imprinted on any of these islands. For whale ships, or those bound from Canton to Port Jackson, or the northwest coast of America, they will furnish a valuable place of refreshment. They are about south of Sandown Point, on the coast of Japan, and the distance may be sailed in four days. The bay where Captain Coffin anchored is in latitude 26 deg. 30 min. north, longitude 141 deg. east.

In the year 1825, the same captain, and while on the same cruise, discovered, in latitude 27 deg. north, longitude 141 deg. 10 min. east, a high island, well wooded, from the west side of which he procured good turtle and wood. Six leagues north of this, he discovered a high lump of an island, and many small ones near it, with a dangerous reef extending from one island to the other, and as far as to latitude 28 deg. north. These islands and reef were not laid down on his charts. The navigation of the ocean around, and particularly north of this group, is dangerous, from our imperfect knowledge of it.

From many inquiries made of Captain Macy, about the Loo Choo Island, I am of opinion it will be found well worthy of more minute examination. It is situated in north latitude 26 deg., and 125 deg. east longitude; is well cultivated; all kinds of refreshments may be procured, and a good harbor will probably be found on the southwest part. The inhabitants are peaceable, and seem disposed to form acquaintance, and establish friendly intercourse with foreigners. Vessels have seldom stopped at this island, and the world is yet ignorant of its inhabitants, their peculiarities, &c., except what information may be found in Capt. Hall's book, royal navy.

Monmouth Island, one of the Baske Isles, is thickly inhabited, and well stocked with all kinds of provisions common to the islands in those latitudes. It affords good anchorage on the northeast part. The people on this island wear the Chinese costume, and appear very friendly, and anxious to trade with strangers. The island abounds with sheep; and there are many islands in its neighborhood, of more or less importance.

A cluster of islands, said to have been discovered in 1716, and laid down on most charts in latitude 35 deg. north, and longitude 146 deg. east, is now considered of doubtful existence. By Captain Coffin's log book, he has frequently sailed and whaled over the very spot, without being able to see them from the mast-head.

The natives of "New Islands" and the surrounding groups are generally well disposed, and willing to barter in all the productions of the islands. The group of islands between Francisco and Jida should be more attentively examined. Several of them are well peopled, and the inhabitants, like the Japanese, are reserved and distrustful of strangers. From the southeast part of New Islands, there is a small island, well inhabited with curly-haired people, who appeared a warlike race. This island affords a good harbor, and probably abounds with beche-le-mer.

Captain Richard Macy, of Nantucket, a very intelligent man, has long been engaged in the whale fishery, and has shown more than usual skill in his observations, as well in noting the facts he has seen as in taking a great many sketches of islands, reefs, harbors, coasts, &c., which will be found very useful to the expedition. Captain Macy discovered an island four or five miles in extent, in south latitude 59 deg., and west longitude 91 deg., his ship passing near enough to see the breakers. The island abounded

with sea dogs, or seals, and the water was much colored, and thick with rockweed. While crossing the Pacific, on a return voyage, he passed between the latitudes 50 deg. and 55 deg. south, and found the water much colored, abounding with rockweed and seals—conclusive indications that land was near; but he could not stop to make any researches. He mentions the following islands, reefs, and shoals, as deserving particular attention. Some of them, it is true, are laid down on the charts, some are not, and all require nearly the same examination. It is not at all surprising that the positions of those islands are not well defined. Their places were often given from observations, without making any allowance for refraction, and from the run of the log, without knowing or stopping to ascertain the direction and velocity of currents. One island, without any name, in 15 deg. 45 min. south, and longitude 154 deg. 15 min. west; one, 16 deg. south, 139 deg. west, not well known; another island, 17 deg. south, and 138 deg. west, not named; one island, not laid down on any of the charts, nor published in any list of newly discovered islands, lies in 16 deg. south, and 143 deg. west.

Phillips' Island, discovered on his late passage, in 11 deg. 20 min. south, and 148 deg. 50 min. west, is very low and dangerous, and cannot be seen but at a short distance; lying in the track of our homeward bound ships, between the Sandwich and Society Islands. A few small shrubs and trees are on this island, but no inhabitants.

In latitude 5 deg. 30 min. south, and longitude 155 deg. and 50 min. west, an island was discovered in 1826, of about five miles in length. It lies low in the water, and presents a coast as dangerous as a reef, as it cannot be seen any distance. This island could not be found on any charts, and is a new and interesting discovery, inasmuch as it is an island dangerous to vessels if not well known.

There are a dangerous reef, and some rocks, in the neighborhood of 190 deg. 50 min. south, and 167 deg. 30 min. west.

In June, 1825, an island was discovered northwest from the Feejee Islands, in latitude 15 deg. 30 min. south, and longitude 175 deg. 30 min. east. This island is not placed on any of the charts, is well inhabited, abounds in yams, and the natives are very friendly.

The Island Rotunah is situated in about 12 deg. south. This island has long been known, and deserves attention, as a place where all refreshments known to the South seas can easily be procured.

Due west from this island, and about 15 deg. south, there is a dangerous reef. Its extent and bearing are unknown, and it requires further attention.

Duke of York's Island is laid down on the charts in 8 deg. and 30 min. south, and is said to be uninhabited. Captain Macy says he saw natives on it. This point should be settled, and I venture the prediction that the whaler is correct. The island contains refreshments.

Savage Island. The natives are warlike; great caution necessary in landing.

Wytootach and Navigator's Islands, all contain refreshments, abound in hogs, and the natives are noted for their passionate fondness for large blue beads.

There is an island sixty miles west from the above, and also a reef, the former not inhabited, nor laid down on the charts.

Some islands have lately been discovered, extending from 169 deg. to 172 deg. east, and from 30 deg. to 1 deg. south. These are not named, nor placed on any chart, nor included in any list of newly discovered islands.

In the year 1827, Captain Macy discovered a small group of islands in latitude 6 deg. north and 153 deg. east. This group he called by the name of the ship he commanded, the Harvest. The islands are all enclosed by a reef, and abound in trees. He did not land, nor does he know if they are inhabited.

In latitude 9 deg. north, and from 150 deg. 30 min. to 152 deg. east, there is a chain of islands, fifteen in number. Some of them are ten miles apart, but are enclosed by one reef, ninety miles in extent. These islands are low and beautiful, entirely covered with cocoa nut trees. He did not land, but thinks them inhabited.

Captain Macy visited another group of islands in 7 deg. 40 min. north, longitude 144 deg. east. Some of them are well inhabited, but not marked on the charts.

St. Andrew's Islands, per charts, are sixty miles out of the way. Laid down 5 deg. 20 min. north latitude, 130 deg. 20 min. east longitude. True position, 5 deg. 20 min. north latitude, 132 deg. 20 min. east longitude.

Disappointment Island is placed on the charts in latitude 27 deg. 30 min. north, longitude 139 deg. 20 min. east. True position, 27 deg. 30 min. north latitude, 139 deg. 55 min. east longitude.

Armstrong's Island was discovered in 1824, and is situated in latitude 21 deg. 21 min. south, and longitude 161 deg. 4 min. west. This island is fertile, well peopled, and affords a good anchorage to the north, and abounds in refreshments. The natives had never been visited before, nor had they any knowledge of civilized people. They were timid, and much alarmed at the approach of the vessels, showing no hostile appearances. The captain landed with a boat, when the fears of the natives soon subsided, and they gathered round him in great numbers. They would not allow him to move or walk a step, but carried him wherever he wished to go. They regarded him as a superior grade of being, and paid him every homage they knew how. The number of inhabitants is unknown, and the island has never been visited since its discovery.

In Captain Macy's last voyage but one, he discovered a group of islands, eleven in number. They are many miles apart, and all surrounded by a coral reef, situated in 9 deg. north, and 164 deg. 40 min. east. Several of them are well inhabited by dark and savage looking fellows, although they behaved very well, came off in their boats and bartered cocoa nuts. Captain Macy did not land, nor is it probable the island has ever been landed on by any other ship's crew. The reef enclosing the group is very dangerous, extending, in some places, fifteen miles from the land.

Broom's range affords a good place for wooding.

Lord Howe's group is inaccurately laid down.

There is a bank, latitude 36 degrees north, longitude 179 degrees east, on which some whalers have sounded, but no one knows its extent and bearings.

Captain Coffin, as stated by Captain Macy, discovered a reef in latitude 32 degrees north, and longitude 140 degrees east.

Sixty miles southwest from Ohituo is a newly discovered island, thickly inhabited by very friendly natives. Refreshments may be procured at it in any quantity, and good anchorage found.

The same captain, in the year 1824, discovered a group consisting of three islands, in latitude 21

degrees north, longitude 179 degrees west. The islands are ten miles apart: many inhabitants are seen on them, but he did not land, or hold any communication with them, nor is it probable they were ever visited.

Ceno island, in 23 degrees 50 minutes south, 130 degrees 15 minutes west, not laid down on the charts, unless it be on some of the late editions.

A group of islands in latitude 31 degrees 6 minutes north, and longitude 129 degrees 30 minutes east, is not accurate on the charts, and the islands are not named.

A number of reefs, situated about 27 degrees south, and longitude 160 degrees east, are dangerous, and should be examined. One more in 24 degrees south, and 164 degrees 30 minutes east. A dangerous rock somewhere about 27 degrees 30 minutes south, and longitude 130 degrees 30 minutes east.

From the Marquesas to 20 degrees south, and to at least 20 degrees north, and from 150 degrees west to 150 degrees east, is a portion of the globe where all our intelligent captains of whale ships agree many important discoveries may yet be made. Within these limits, there are many islands, reefs, and shoals, not yet discovered, and many but partially known.

Captain John Gardner, of the ship *Atlantic*, reports the following discoveries, which he made while on his last voyage in the Pacific:

The first island, in north latitude 8 degrees 48 minutes, longitude 144 degrees 35 minutes east.

The second island, in north latitude 1 degree 7 minutes, longitude 165 degrees east.

The third island, a cluster, south latitude 2 degrees 15 minutes, longitude 152 degrees 5 minutes east.

Also, a cluster of reefs and shoals, extending N. N. E. and S. S. W. between the latitudes of 1 degree 35 minutes and 2 degrees 15 minutes south, and longitude 153 degrees 45 minutes and 153 degrees 15 minutes east.

John Weeks, second officer, saw an island in 2 degrees north, longitude 150 degrees east, one mile long, surrounded by a coral reef six miles from shore. This island is low, and abounds in cocoa nuts.

Captain George Washington Gardner discovered the following islands, &c., which are not laid down on any of the charts:

An island, north latitude 30 degrees, east longitude 144 degrees.

An island, north latitude 39 degrees, east longitude 39 degrees.

An island, north latitude 30 degrees, east longitude 44 degrees 20 minutes.

Rocks, north latitude 31 degrees, east longitude 155 degrees.

An island, north latitude 37 degrees, east longitude.

On the coast of New Albion, an island, north latitude 33 degrees, west longitude 119 degrees 30 minutes.

On the coast of New Albion, an island, north latitude 21 degrees 55 minutes, west longitude 155 degrees 10 minutes.

Maria Island, not on the charts, abounds with fish and wood, but no water; is low and dangerous.

A rock, in latitude 20 degrees south, longitude 167 degrees 45 minutes west, not on charts, nor any published list; dangerous shoals in the neighborhood.

Palmyra Island is in 5 degrees 58 minutes north, and 162 degrees 30 minutes west longitude. There is a dangerous reef 30 miles north, extending E. N. E. and W. N. W., very narrow, and fifteen miles in length.

Captain R. Joy, of *Nantucket*, reports a harbor, in latitude 45 degrees south, in West Patagonia, in which he found good, safe anchorage. By proper surveys, he thinks it might be made a place of refreshments for our whale ships.

I have generally remarked that all our seamen, who have had occasion to touch at any point on the west of Patagonia, agree that the coast should be surveyed from Cape Horn to Cape Pilares. They have often been sealing on the islands around this coast, and all agree that very little reliance can be placed, by the mariner, in the accuracy of the charts in common use. The shores, in many places, are so bold, that a vessel may be made fast to the trees growing on the land.

Sidney's Islands vary, on different charts, from 4 degrees 50 minutes to 5 degrees 30 minutes. The northernmost is in latitude 3 degrees, and longitude, according to Arrowsmith's charts, 176 degrees 50 minutes. The islands are very numerous; some are very small, from two to three acres, others larger, and one twenty miles in extent.

Again, the captains who have visited Fanning's Island, say it affords a good harbor, of four or five fathoms water, and abounds in wood and water, both easily procured. The island is found, by charts, in latitude 3 degrees 48 minutes north, and longitude 153 degrees 40 minutes west. Good fish in the harbor and around the island, and peppergrass on the island, good for the scurvy.

The Kingsmills group, lying 1 degree south, and 175 degrees 30 minutes east, consists of a number of beautiful islands, all thickly inhabited. A steady current sets westerly from this group.

Captain Joy discovered a barren island and a reef in 23 degrees north, and 177 degrees 15 minutes west, which has never been surveyed.

Wake's Island, mentioned in the above list, in 19 degrees 20 minutes north, and 166 degrees 50 minutes east, affords wood in abundance; no water discovered on it, but probably may be found by examining the island.

In 1825 there was an island discovered by the captain of the ship *Spartan*, which bears the name of the ship (of *Nantucket*.) It lies low in the water, and is in latitude 1 degree 10 minutes south, and 159 degrees 30 minutes east.

In latitude 1 degree 30 minutes south, and longitude 166 degrees 35 minutes east, there is an island lately discovered. It lies high, and is well watered, and is called *Morris' Island*. This island lies near the track of Captain Butler, in 1794, and is S. W. from *Pleasant Island*.

An American gentleman, in a letter from Valparaiso, dated the 10th of April, 1828, to the editor of the *Salem Register*, gives an account of an island which he considers a new discovery. In this supposition he is correct; but it was first discovered by Captain Ray, of *Nantucket*, in the year 1825. It lies in 26 degrees 32 minutes south, and longitude 103 degrees 59 minutes west. The nearest land to it is *Easter Island*, in latitude 27 degrees south, and longitude 109 degrees 46 minutes west.

Captain R. Closly says he never saw but one island inhabited, and not laid down on his chart; and this was in latitude 8 degrees 3 minutes north, and 166 degrees 15 minutes east. It is a small, low island

covered with wood, and is not to be found on Purdy's large and late edition of charts of the world, published in 1827.

In latitude 10 degrees 30 minutes north, and east longitude 166 degrees 40 minutes, the same captain discovered a large group of islands surrounded by many insulated rocks and reefs, and no inhabitants.

Captain Worth informed me that the Grigan Island, found on all the charts, north by west of the Ladrões, is worthy of some notice. Fresh water may be had at it, by digging wells near the southwest side of the island, within a few feet of the beach. Plenty of firewood of good quality may be had. Natural productions, cocoa nuts, bread fruit, yams, &c., are found. There is no sounding until near the shore; but in case of necessity a vessel may anchor in from 12 to 50 fathoms of water; dark grey sand on the southwest side. There is a volcano in the middle of the island.

Captain Bennett laid down an island in 5 deg. 30 min. north, longitude 139 deg. 20 min. west. This is near Fanning's Island. He called it Madison Island.

St. Pert's Island. Against the name of this island, Captain Bennett has marked in his log-book, "wood and water." Its position is 18 deg. north, longitude 116 deg. west.

Captain Briggs discovered an island west and north of Sandwich Islands, in 25 deg. 47 min. north, longitude 172 deg. west. The island is low, with not more than 60 feet in any part from the water; 3 miles long and 2 across it.

Captain Edward Gardner, while in command of the whale ship *Bellona*, discovered an island in 1823, in latitude 19 deg. 15 min. north, longitude 166 deg. 32 min. east, which he judged was 20 or 25 miles long. A reef appeared to make off from the east end of it, to the distance of 2 miles, with detached rocks to the west. The situation given is from the centre of the island. "Wake's Island" is placed on Arrowsmith's and other charts nearly in the above situation. The island was covered with wood, having a very green and rural appearance.

The island to which Captain Seely proposes to give the name of Beverly Island, was probably not, as he supposes, a new discovery. On Purdy's smaller charts of the world, published in 1821, as well as on the previous edition of that chart, an island is laid down in 18 deg. 30 min. north, longitude 113 deg. 30 min. west, to which he gives the name of "St. Rosa;" and, though the longitude differs considerably, I am disposed to believe it is the island Captain S. describes. It is not laid down in Arrowsmith's charts; and it is a little remarkable that, in Purdy's edition of his large charts, published in 1821, and improved in 1825, it is not to be found. Nor has Bowditch any reference to it in his tables of latitudes and longitudes. The island has been seen by some others of our whalers who have cruised in that neighborhood; and Captain Swain, late of the ship *Charles*, ran near it, and made the longitude 113 deg. 13 min. west, the same as given in Purdy's former maps.

On some old charts, I perceived an island laid down in the same parallel of latitude, and about 120 deg. west longitude, but which is not found in the best modern charts.

Captain Swain, while passing from Sandwich Islands to Cape Horn, ran farther south than usual for whale ships, and discovered an island in latitude 59 deg. south, and longitude 90 deg. west, covered with snow, and abounding with sea dogs and fowls. This must be the same island discovered by Captain Macy, an account of which is given before; and this is only introduced to show how practical men tell their plain stories, and, without any previous concert, confirm each other.

Captain H. Bunker, in 1823, discovered an island in 15 deg. 30 min. north, and 136 deg. west longitude. Lying to windward, and it blowing strong, he could not get to it to make any observations.

In the same year, he landed on an island in 24 deg. 22 min. north, longitude 153 deg. 18 min. east, by reckoning, not being able to make an observation that day; nor has he visited or heard of the island since.

Captain H. C. Bunker, about three years ago, discovered an island not on his charts; it is called by the natives *Pearotuah*, is 3 miles from east to west, about 20 miles in circumference, high, mountainous, rocky and rugged, free from all dangers around it, with two boat harbors, one northwest of the other, on the northwest side; the land productive. The missionaries had visited it, and Mr. Williams was on it at the time. The natives are estimated at 5,000 in number. It is in latitude 21 deg. 17 min. south, and longitude 159 deg. 40 min. west. There is no trace of this island on Purdy's charts to the latest editions.

Captain S. Chase, of Nantucket, on one of his late voyages, fell in with a canoe containing a number of natives, S. S. W. from the Kingsmills group. They had lost their track, but pointed in the direction they thought they came from. Captain Chase steered to that point, and found the island where they belonged. On going ashore, the islanders gathered round them in great numbers, and conducted Capt. Chase to the residence of their chief, who treated him with great kindness, and loaded his boat with fresh provisions. Captain Chase is of opinion that the island had never been visited before, and states it to be a good place for recruiting. The latitude and longitude are not given, nor have I been able to find them among any of the records in Nantucket; the captain, at present, being on a whaling voyage in the Pacific.

Penrhyn's Island. On Arrowsmith's charts this island is laid down in latitude 9 deg. 14 min. south, longitude 167 deg. 48 min. west, which, by a comparison with Captain Alexander Macy's journal, kept during his late voyage in the ship *Peruvian*, is probably erroneously given on the charts, or Captain Macy has discovered a new island.

On the 21st of July, 1827, Captain Macy discovered land, bearing from west-southwest to south by west 12 miles distant, his ship then heading south by east. On the following day he saw two other islands, or prominent parts of the island seen the day before, with valleys intervening, (which was probably the fact, as no water could be seen between them,) lying to the south and west, the nearest part at four miles distant. This island was well wooded, and found to be inhabited. At 3 P. M., a canoe with five natives, of large stature and ferocious countenances, well armed with spears and clubs, came under the stern of the *Peruvian*, and remained there nearly an hour. Soon after many other canoes were at the leeward, paddling in a direction as though their object was to intercept the course of the ship. The manoeuvres of the natives appeared so hostile, that Captain Macy made all sail off shore, and at dark saw canoes in chase of the vessel, which, however, they did not succeed in overtaking. Captain Macy supposes, from the appearance of the natives, and the few articles he saw in the canoe which visited the ship, that they have never had any intercourse with, or knowledge of civilized people. The latitude of the island is 8 deg. 52 min. south, longitude 157 deg. 23 min. west. Whether this be a new island or not, is a subject of curious inquiry; and certain it is, our knowledge of it is very imperfect.

From the account given by Captain Allen, the dangerous reef of rocks near Cape St. Roque is erroneously laid down on the charts. He experienced moderate weather while in the neighborhood of

the island, which subjected his vessel to a strong westerly current, causing her to fall to leeward of the port about 90 miles of latitude. "May 24, land was seen west-southwest and west 20 miles, latitude, by observation, 5 deg. 24 min. south. Stood in, and at the distance of 10 miles from land tacked off, being 24 miles south of Cape shoals, by the chart. Observed the day following 5 deg. 25 min. south, and stood in towards the southwest and west-southwest, working to windward; and 4½ hours after, with my position, as per chart, 25 miles south of the shoals, the prominent headlands being precisely as the day before, and judging the same distance off, (10 miles,) while in the act of veering, the vessel struck on the reef, bilged, and filled in three hours; proving, according to my observation, and information subsequently obtained on shore, that the shoals were placed on the chart erroneously 25 to 30 miles: latitude by chart 5 deg., their true latitude 5 deg. 25 min. to 5 deg. 30 min. The Cape is also erroneously laid down, authors differing from 5 deg. 3 min. to 5 deg. 34 min. south. The latest edition of the 'American Coast Pilot' places them nearly in their true position."

Captain M. Hart, on a late trading voyage from New York to the northwest coast, from thence to Canton, and back to New York, via the Sandwich Islands, embraced every opportunity in his power to obtain the true position of islands, shoals, rocks, reefs, &c., and the accuracy with which they are laid down in the charts in common use. The general correctness of his observations, I think, may be relied on, as he is a man of considerable science, of great experience, had on board two good chronometers, and was, besides, well versed in the use of lunar observations. In latitude 15 deg. 30 min. north, and longitude 123 deg. 20 min. west, are laid down the dangerous rocks called "Villa Robos." Captain Hart sailed over the very spot, and saw nothing of them. They no doubt exist somewhere in the neighborhood, and should be looked after, and their position accurately defined. On all the published charts the island "Gaspar Rico" is laid down in 15 deg. north latitude and 172 deg. east longitude. Smith's Island, and also St. Bartholomew's, have the same latitude, and 170 deg. and 164 deg. east longitude. Capt. Hart run for these islands, tacked several times, had a number of good observations, and decided to his entire satisfaction that they are not to be found within fifty miles of their positions given on the charts. The island "Pagon" is laid down 25 miles too far to the north. The third Volcano island could not be found in the latitude and longitude given by some navigators. Captain Hart run for the island "Tres Colunas," and came to in latitude 27 deg. north and 160 deg. east longitude, the very position given this island, and, with a clear atmosphere, he could not discover land in any direction from the mast-head, and with the best of glasses. Of course, this island does not exist, or is inaccurately laid down on the charts. "Gold Island" is not laid down correctly, as land was not in sight in 29 deg. 30 min. north and 151 deg. 30 min. east, the position given on all the large charts.

The information I have thus far communicated has been derived chiefly from our citizens engaged or interested in the whale fishery. I regret that I am not at liberty to communicate in writing all the interesting facts which I have been enabled to collect from those engaged in the seal trade, or, as they call it, the "skinning business." The occupation of these men leads them into seas and parts of the globe far beyond the common pathway of the whaler. Their voyages and adventures, too, are of the most daring kind. In small vessels they venture into high southern latitudes, and have actually taken seal, with profit, in some instances, within the south antarctic circle. In the history of the seal trade, secrecy in what they know, has been deemed a part, and a very important part, too, of their capital. There is nothing more common at this time, than that islands are frequented for animal fur, and their positions known to no one on board but the captain; and when an island is discovered, the observations are made and noted down by the captain in his private journal.

In frequent and familiar conversations with these practical men, who have spent so many years of their lives in these high latitudes, I have been enabled to draw out a great deal of information in relation to the manner of conducting a vessel with safety through the ice, and the proper season of the year to make the attempt to reach high latitudes, with a world of useful hints and observations of a kindred nature. These I do not deem it necessary to give in detail, but have recorded them in my private notes for future use. I have also been enabled to ascertain, with a good deal of precision, the portion of the southern hemisphere where these attempts to reach a high latitude have always proved ineffectual. And they have communicated to me, also, where their experience has fully shown that vessels may advance with no great difficulty into very high latitudes, if not to the 90th degree itself. From all which, as well as from answers received to a circular letter addressed to many whom I could not net see, I have been enabled to make the following estimate:

That they have been beyond 70 deg. south latitude in a few instances, in which latitude they experienced moderate weather, a clear sea, and no land or ice to the south. They all agree that the ice to be met with is first formed and attached to land, and that the greatest impediment to navigation from ice will be found from 62 deg. to 68 deg. south, except in those meridians where they have not been able to go far south at any time. They have seen lands to the east of the Shetlands, but give no account of any animal or vegetable productions on any of them.

The southern part of the New South Shetlands extends farther than any one has yet penetrated. The shores are bold, and in many places afford spacious harbors, which look as if they might extend far into land, like Hudson's or Baffin's Bay.

In latitude 63 deg. south, and 63 deg. west longitude, from the Island Pisgah, our sealers have sailed along a high and rugged coast, tending southwest to 75 deg. west longitude, and 66 deg. south latitude. Captain Pendleton, of Stonington, Connecticut, one of the most practical and intelligent sealers I met with, and who has spent many years in the South sea fur trade, is strongly of opinion that there are many valuable discoveries to be made in the seas southwest of the Shetlands. The quality of the ice, nature of the currents, &c., make his conjecture highly probable.

The Island Deception abounds with volcanoes; and there are several places where a man may stand on ice and snow, and cook his dinner in water that boils a few feet below him. On the northern part of Palmer's land, and in latitude 66 deg. south, and about 63 deg. west longitude, Captain Pendleton discovered a bay, clear of ice, into which he run for a great distance, but did not ascertain its full extent south. In those seas the prevailing winds are from west-northwest to west-southwest, and all gales from northeast. A gale seldom continues more than six hours. Clear weather from south-southwest and south-southeast, which is not many days in a month.

Captain Pendleton relates a curious fact of Deception Island. The middle of the island has been thrown up entirely by internal fires and volcanic eruptions, until the main body of the island has disappeared. In one place the melted lava ran into the ocean, leaving a passage of fifteen fathoms water,

over which he passed with his vessel into the centre of the island, which had the appearance of an immense bowl. He sounded without being able to find bottom.

Captain Morrill, who sailed from this city (New York) on a sealing voyage, while he commanded the brig *Wasp*, between the years 1822 and 1825, sailed between the latitude of 59 deg. 30 min. and 69 deg. 15 min. south, from 117 deg. east to 110 deg. west longitude, discovered several islands, and saw many indications of land, but had not time to run for it. On the meridian 46 deg. west he fell in with land, and coasted it from 60 deg. 47 min. to 71 deg. south, and does not know how much further it extends.

The captains who have sailed within the Straits of Magellan all report that, if properly surveyed, it would become the principal passage to the Pacific ocean. They state that the snow storms are not frequent, nor of long duration, to the south, and generally come with E. N. E. and S. S. E. winds. Currents, among the Shetlands, mostly set N. E. at one and half and two miles an hour.

Captain James C. Swain states that he has been several times in the Pacific ocean, and found the best time to double the cape in March and April, as then the winds are most variable, and the weather the most pleasant, with but now and then some rain and hail. The highest point of south latitude he made was 59 deg. 18 min. long. 67 deg. 20 min. W., being then ninety-five days out. The snow storms lasted but a short time in that latitude. Short passages are made by keeping near the land. On the 5th of April he saw birds in lat. 56 deg. 20 min., long. 80 deg. W. The birds were small and could not have flown far. From the appearance of the water, and from the drift wood, as well as from the birds, he conjectured that land was not far off. He crossed the equator on the 24th of June, in long. 115 deg. 22 min., when the variation was 5 deg. easterly. In lat. 7 deg. 9 min. N., long. 121 deg. 25 min. W., the variation was 5 deg. 45 min. In lat. 11 deg. N., long. 123 deg. 55 min. W., and from thence to long. 129 deg., and to lat. 18 deg. 22 min., he saw driftwood and imagined land was near. From 33 deg. 28 min. N. lat. and on 144 deg. 50 min. W. long. to 153 deg., the variation was about 10 deg. He says it does not answer to come from high to low latitudes until October. In lat. 23 deg. 25 min. S., long. 52 deg. 50 min. W., he saw an island, called by the natives "Remat." It appeared to be about fifteen miles in circumference, not then laid down in any chart. The inhabitants mild and peaceable; the land low, and the productions the same as the Friendly Islands.

Much other and more minute information has been given me respecting the mode of doing business in the whale fishery by the gentlemen I have consulted; as, also, the number and nature of their losses, with all the facts they have in their possession in regard to those ships now missing, which may enable the expedition to use the best methods of extending to those unfortunate people assistance, if they are within the reach of aid. But these matters, fully written out, would extend my communication to an unwarrantable length. Enough has already been given, of what I have collected, to show how much remains to be done in that portion of the globe; and enough, also, to prove to the Department that it is in possession of more information of those seas than the admiralty of any other nation, however commercial, for those seas are truly our field of fame. Too much credit cannot be given to our whalers, sealers, and traffickers in those seas for the information they have acquired, and the liberality, generally speaking, with which they have imparted it. But, after all their exertions, justice to ourselves, as a great people, requires that this mass of information should be reviewed, analyzed, classified, and preserved in careful literary labors for the benefit of mankind.

That this may be accomplished in your administration of the marine of our country, and under your auspices and especial care, to the satisfaction of the public, and the honor of our country, is my ardent wish. It is a desideratum for which I have labored, and am ready to labor while my arm has a sinew or my heart a pulse.

Very respectfully, your obedient servant,

J. N. REYNOLDS.

CITY OF NEW YORK, September 24, 1828.

No. 574.

[2D SESSION.]

ON CLAIMS OF CAPTAIN JAMES BARRON, OF THE NAVY, TO COMPENSATION FOR THE USE OF HIS PATENTED INVENTION FOR VENTILATING SHIPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1835.

Mr. WISE, from the Committee on Naval Affairs, to whom was referred the petition of Commodore James Barron, praying compensation for the use of his invention, called "a ventilator of ships," upon relinquishing his patent right to the United States, reported:

That the petitioner is the inventor of the "ventilator," and has obtained a patent right for it from this government. That it has been, and is now, adopted for the use of the ships of the United States, and found to be the most simple and efficient agent hitherto employed for *preventing decay in ships' timbers, cleansing bilge water, purifying the air of the holds of ships, and preserving the health of their officers and crews.* The petitioner applied, January, 29, 1834, to the Secretary of the Navy, who referred him to Congress for relief. The attestations, by several of the most respectable officers in the naval service, of the inestimable value and importance of the invention for the purposes mentioned, are full and ample; and, as the good effects and usefulness of the machine have been already sufficiently tested for several years, by its actual use in the navy of the United States, your committee report a bill.

[2D SESSION.

OPINION OF THE SECRETARY OF THE NAVY, THAT NO OTHER MODE OF ALLOWANCE FOR TRAVELING EXPENSES TO OFFICERS OF THE NAVY CAN BE SUBSTITUTED FOR THE MILEAGE ALLOWANCE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1835.

NAVY DEPARTMENT, *January 21, 1835.*

SIR: In answer to your letter of the 16th instant, I have to observe that I cannot discover any practicable arrangement by which the allowances to officers of the navy, for traveling expenses, can be dispensed with. Such arrangement, however, if it could be adopted, would be a great relief to this Department.

Both justice and policy require that the officers of the navy should be selected from all parts of the United States. Each State should bear its proper proportion of the burden, and receive its due share of the honor of defending the country. Should no traveling expenses be allowed, those at a great distance from our naval stations would, when ordered into service, be compelled to resign, or incur expenses in many instances beyond their means of payment.

It is evident that an increase of pay to all, in lieu of traveling expenses, would operate unequally and unjustly, inasmuch as it would give too much to some, or too little to others. The only regulation which it appears to me can with propriety be adopted, is to limit the amount of allowance per mile, so as not to exceed the extra expenses necessary to be incurred.

I am, with great respect, your obedient servant,

M. DICKERSON.

HON. JOHN G. WATMOUGH, *House of Representatives.*

23D CONGRESS.]

No. 576.

[2D SESSION.

ON CLAIM OF A SURGEON IN THE NAVY TO PAY AND RATIONS FROM THE TIME HE WAS ENTITLED, AS ASSISTANT SURGEON, TO BE EXAMINED FOR PROMOTION, HE BEING ON DISTANT SERVICE, HIS PROMOTION HAVING TAKEN EFFECT AT THAT TIME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 3, 1835.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Samuel W. Ruff, a surgeon in the navy of the United States, reported:

That the petitioner, being a surgeon in the navy, was entitled, by his time of service as such, to an examination for the appointment of surgeon, before the 4th April, 1831, at which time others of his date were examined. The petitioner was at that time absent from the United States on foreign service, having been ordered to sea in June, 1828. He requested permission to return to the United States for the purpose of being examined with those of the same date with himself, but it was refused to him, and assurances given that he should not be prejudiced thereby. He did not return until the year 1832; and the first opportunity for examination which occurred, being in June, 1834, he was duly passed and commissioned as surgeon, giving him rank from the 4th April, 1831, the date at which he was entitled to examination, but from which he was prevented by absence on foreign service.

The petitioner claims his pay and rations:

1. As a surgeon of the navy, (instead of the pay and rations of an assistant surgeon,) from the 4th April, 1831, to the time when he was commissioned, after having passed an examination in June, 1834.

2. He claims pay and rations of a surgeon during the time he acted as such, under orders, on board the United States ships *Fairfield* and *Ontario*, in the Mediterranean, in the years 1829 and 1830.

The case has been referred to the Secretary of the Navy, whose letter, and the report of the Fourth Auditor, herewith submitted, contain "the reasons which prevent the allowances claimed by Dr. Ruff," under the act of 24th May, 1832, "for the better organization of the medical department of the navy of the United States," in the construction of which the committee concur.

But inasmuch as the absence of Surgeon Ruff, which prevented him from an examination at the time he was entitled to it according to law, was against his will, and contrary to his request for permission to return, and the refusal accompanied with assurances that he should not be prejudiced thereby, the committee concur in opinion with the Navy Department that he ought, in equity, to be allowed the pay and rations of a surgeon from the time he was so entitled to examination in April, 1831, up to the receipt of his commission in 1834; and they report a bill accordingly.

NAVY DEPARTMENT, *January 29, 1835.*

SIR: In answer to your letter of the 17th instant, transmitting the petition of Surgeon Ruff, I have the honor to send you a report of the Fourth Auditor.

I have only to add, that I agree with the Fourth Auditor in the view which he has taken of the subject.

The petition is herewith returned.

I am, very respectfully, sir, your obedient servant,

M. DICKERSON.

The Hon. JAMES PARKER, *of the Naval Committee, House of Representatives.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 28, 1835.*

SIR: In reference to the letter of the Hon. James Parker, of the Naval Committee in the House of Representatives, dated 17th instant, enclosing the memorial and papers of Doctor Samuel W. Ruff, surgeon in the United States navy, by you referred to me, I have the honor to make the following report, viz:

The claim of Surgeon Ruff divides itself into two branches:

1. He was appointed a surgeon in the navy of the United States, after having passed examination on the 17th day of June, 1834, and received a commission giving him rank as surgeon from the 4th day of April, 1831; and he claims the pay and rations of a surgeon from the time his commission gives him rank up to the time of his appointment.

2. While holding the commission of assistant surgeon, under an appointment by the President, with the consent of the Senate, according to law, he was called upon in sundry cases, by his commanding officers in the navy, to discharge the duties of surgeon, and during the period he was discharging those duties he claims the pay and rations of a surgeon.

These claims have been pressed upon the Treasury Department, supported by reference to the regulations and usage in other branches of the naval service, and to some few precedents in similar cases in the same branch, but they have been rejected on the ground that they are clearly contrary to the letter and spirit of the act of 24th May, 1828, "for the better organization of the medical department of the navy of the United States," and that the precedents referred to were but the unauthorized and inadvertent continuance of a prior usage, which was superseded by that act; nor was Surgeon Ruff's case the first, or the only one, as he seems to suppose, to which this rule of decision has been applied.

The first section of the act provides that "no person shall receive the appointment of assistant surgeon in the navy of the United States, unless he shall have been examined and approved by a board of naval surgeons, who shall be designated for that purpose by the Secretary of the Navy Department; and no person shall receive the appointment of surgeon in the navy of the United States until he shall have served as an assistant surgeon at least two years on board a public vessel of the United States at sea, and unless, also, he shall have been examined and approved by a board of surgeons constituted as aforesaid."

The third section provides that "assistant surgeons, who shall have been commissioned less than five years, shall each receive thirty dollars per month and two rations a day; after five years' service they shall be entitled to an examination by a board of naval surgeons, constituted as aforesaid, and, having been approved and passed by such board, they shall each receive an addition of five dollars a month, and one ration a day; and after ten years' service, a further addition of five dollars a month, and one ration a day."

The fourth section provides that "every surgeon who shall have received his appointment, as is hereinbefore provided for, shall receive fifty dollars a month, and two rations a day; after five years' service, he shall be entitled to receive fifty dollars a month, and an additional ration a day; and after twenty years' service, he shall receive seventy dollars a month, and the rations as last aforesaid."

The following points appear to be clearly established by this act, viz:

1. The President of the United States has no power to make any one an assistant surgeon of the navy of the United States, unless he shall have been first "examined and approved by a board of naval surgeons."

2. The President cannot make any one a surgeon of the navy of the United States until after he "has served as an assistant surgeon at least two years, on board a public vessel of the United States, at sea," nor until after he "has been examined and approved by a board of surgeons."

That an appointment of any one by the President as an assistant surgeon, or as surgeon, prior to the examination and approval required by law, would be utterly void, is too evident to admit of an argument. And is there more room to doubt as to his power, after examination and approval, to give the appointment a retrospective effect, and confer upon the individual receiving it all the benefits he could have derived from examination, approval and promotion, two, three, or ten years before his actual examination and approval? Will it be maintained that the President can give an *assistant* surgeon date, rank, and pay, years before his examination and approval? Yet he has, by the act of Congress, precisely the same power to do so as he has to give retrospective rank and pay to a surgeon. An assistant surgeon stands in the same relation to the rank of surgeon that a private citizen does to that of assistant surgeon. As well may a retrospective commission give rank and pay to an assistant surgeon for years before his appointment, while he was a private citizen, as to a surgeon years before his appointment, and while he was an assistant surgeon.

If there were no other clause in the act bearing upon the point except those which peremptorily require examination and approval before appointment, those must, I think, be construed as conclusive. But the whole act is in harmony with this view of the subject—assistant surgeons acquire no *right of promotion* by length of service, or even by examination and approval. They may be examined at any time within five years that the Secretary of the Navy may direct, and, having been approved and passed, they become *qualified for promotion*, provided they shall also have served two years at sea; but they do not acquire any *right* to promotion, nor indeed any other right. It is not until after five years' service that they acquire any new right; and what is that? If they have not been examined, it is first a *right to examination*; and if they pass, or if they had passed at a previous examination, a *further right*, not to promotion, but to an *increase of pay of five dollars per month and one ration per day*. By ten years' service they acquire *another right*, not even then to promotion, but *only to an additional five dollars and another ration*. A service of twenty or fifty years gives them no additional right, and they must remain assistant surgeons during life, unless the interests of the service, or the will of the appointing power, shall make them surgeons.

The error of the opposite construction is evident from the absurdities to which it leads. It will not be denied that the approval of the board of surgeons is the *only evidence of qualification* upon which the appointing power is authorized to predicate an appointment; and how can the appointing power undertake to say that an approval in 1834 is evidence of qualification in 1831? How can he act upon the presumption, that because the assistant surgeon passes in 1834, he would have passed had he been examined in 1831? Might he not as legally and as reasonably presume that all assistant surgeons would pass if examined, and upon that presumption dispense with examination altogether?

Again: it will be remarked that an assistant surgeon's compensation, after ten years' service, is forty

dollars a month and four rations a day, which in all is equivalent to seventy dollars; while the lowest grade of surgeon's compensation is fifty dollars a month and two rations a day, equivalent, in all, to sixty-five dollars. An assistant surgeon of more than ten years, when promoted, is reduced, in his compensation, at the rate of five dollars per month; but must he be charged with the excess over surgeon's pay which he may have received after ten years, according to the express letter of the law? If while he was an assistant surgeon at a *lower* rate of compensation, he must or can be allowed surgeon's pay, retrospectively, when promoted, so also while assistant, at a *higher* rate, the excess actually received must be charged to him.

The act of Congress could not have intended any such absurdities. It can mean only what it says, viz: *that an assistant surgeon shall be recognized and paid only as an assistant surgeon until promoted; and that no appointment, either of surgeon or assistant surgeon, shall entitle any one to rank or compensation years or days before his actual appointment.*

This conclusion is fortified by the language of the act as to commencement of their compensation. Section 3d says, "*that assistant surgeons, who shall have been COMMISSIONED less than five years, shall each receive,*" &c. The *time of commissioning*, therefore, is the time at which the assistant surgeon's compensation must commence. The 4th section says, that "*every surgeon who shall have RECEIVED HIS APPOINTMENT as is HEREINBEFORE PROVIDED FOR,*" (viz., *after having "served as an assistant surgeon at least two years on board a public vessel of the United States, at sea," and after having "been examined and approved by a board of surgeons,"*) shall receive fifty dollars a month," &c. The *time of appointment*, therefore, is the time at which a surgeon's compensation must commence. It would be sufficient, in any case to reject a claim to compensation as surgeon, to show that the person claiming had not, *at the time covered by the claim*, been appointed in the manner "*hereinbefore provided*" in the act of Congress, it being by its express letter an appointment *after* compliance with its special requisitions, and that only, which could legalize such an allowance.

It must be observed that neither this nor any other act of Congress declares what shall be the *duties* of a surgeon or assistant surgeon of the navy, or whether one or both shall be attached to any public ship, navy yard, or station.

Those matters are all left to the orders or regulations of the Secretary of the Navy. He declares what shall be the duties of a surgeon, and what those of an assistant surgeon; whether a surgeon and assistant, or a surgeon only, or an assistant surgeon only, shall be attached to any particular ship, station, or yard, or any particular class of ships, stations, or yards. But it is quite obvious that none of these orders, regulations and arrangements can, in the slightest degree, affect the compensation of surgeons and assistant surgeons, because the act of Congress fixes that upon *another* and *independent* basis. It is *appointment after examination and approval*, and *length of service*, not the performance of any particular species of medical or surgical duty, which fix and regulate their compensation. When the act of Congress has been so explicit upon this point, is it to be imagined that the Executive authority of the government, by declaring what shall be the duties of a surgeon, and then ordering an assistant surgeon to perform those duties, can entitle him to the compensation of a surgeon? The act of Congress provides that he shall be entitled to surgeon's pay only after two years' sea service, examination, approval, and subsequent appointment, and prescribes another grade of pay for him until these prerequisites be complied with. Can the Secretary of the Navy direct that, in the complement of a sloop-of-war, or any other vessel, there shall be a surgeon and assistant surgeon, and then, by ordering only an assistant surgeon on board such vessel, entitle him to compensation as a surgeon? And if he should choose to alter that regulation, and direct that thereafter only an assistant surgeon should be attached to a sloop-of-war, would the assistant, acting as surgeon, and entitled to be paid as such, at once be reduced to the compensation of an assistant, although performing the same duties? It will not be maintained that the provisions of the law can be superseded or defeated by any such expedient.

If the Secretary of the Navy cannot entitle an assistant surgeon to a surgeon's compensation, by ordering him upon surgeon's duties, much less can a subordinate officer. What the Secretary of the Navy and the President himself cannot lawfully do, cannot be done by the commander of a squadron, or of a single vessel. He cannot, by any order, or arrangement of duties, elevate an assistant surgeon to the pay of a surgeon, because the only mode in which that can be done has been prescribed by the legislative power, which it is the duty of all to obey. An assistant surgeon must be an assistant still, at least in compensation, no matter upon what duty he may have been ordered, until appointed a surgeon in the mode pointed out by the act of Congress.

These arguments are strengthened by considering the same provisions of the act in their *favorable* bearing towards the officers under consideration. It declares that assistant surgeons who have been commissioned less than five years "*shall each receive thirty dollars per month and two rations a day.*" It declares that a surgeon "*shall receive fifty dollars a month and two rations a day.*" Now, when these are the express declarations of the law, without regard to the condition in relation to orders or service in which these officers may stand, will it be maintained that the Secretary of the Navy can, by any order or regulation of his, directly or indirectly, *take away* a portion or the whole of his pay and rations? Can he direct that they shall have no rations, and only half pay? Will waiting orders, or leave of absence, or even furlough, have any effect on the pay and rations? Clearly not, because no exception is made in the law. They cannot, by any order or regulation of the Department, be placed on a *less* compensation than that which is provided for them by law. And if the Executive authority cannot *reduce* their compensation, by parity of reasoning that authority cannot *increase* it.

In fine, the act of 24th May, 1828, has been construed at the Treasury *to fix the compensation of surgeons and assistant surgeons of the navy beyond the reach of Executive authority.* It is maintained that neither the Secretary of the Navy nor the President himself can, directly or indirectly, pay them, or cause them to be paid, as surgeons or assistant surgeons, a day before their actual appointment, *after examination or approval*; and that no order or regulation emanating from any other source than the legislative power of the nation, no circumstances under which they may be called to act, and no duties of a medical or surgical character they may be required to perform, can add to, or take from, the monthly pay and daily rations provided for them by existing laws.

The certainty thus obtained in one branch of the public accounts, it is, in my opinion, highly important to maintain and extend. It relieves both the Navy and Treasury Departments from immense trouble and responsibility; it shields them from unjust imputations in the exercise of their judgments; it stops the most prolific sources of error, abuse and corruption. You, sir, I am sure, would feel a weight thrown

off your shoulders, as certainly as I should myself, were the same fixed principles and rules extended into every other branch of the naval service. I cannot, therefore, but hope that, whatever relief it may be thought proper to extend to individuals, in any cases of peculiar hardship, it will not be done in such a way as to change the general law in this respect, or weaken the force of the construction it has already received.

The foregoing considerations present "the reasons which prevent the allowances claimed by Dr. Ruff;" and I now proceed to give "an opinion upon the merits of his claim in an equitable point of view," as requested by the committee.

It is my opinion that the first part of Surgeon Ruff's claim ought to be allowed by Congress, and that all the rights and benefits intended to be conferred upon him by his commission should be secured to him by law. He was appointed assistant surgeon on the 12th of August, 1826; was ordered to sea in June, 1827; and was continued in sea service until May, 1832. It is understood that when others of his date were examined, in 1831, he requested permission to return to the United States for the purpose of being examined with them; but it was refused to him, with assurance that he should not be prejudiced thereby, the Secretary of the Navy believing that he possessed the power to commission him from that date after a subsequent examination and approval. His merit is acknowledged to be great, and it is not doubted that he stood, at the time, among the first of his class. Had the Navy Department put the same construction upon the act of Congress that the Treasury has done, he would, undoubtedly, have been permitted to return, would have been examined, passed, and commissioned, with the rank and date of his present commission. He ought not to suffer from the error of the Department, if error it was; and his case, in that respect, is one which justly invokes legislative relief.

The other portion of this claim, in my opinion, ought not to be allowed. It is believed to have been the intention of the act of 1828, that the compensation there allotted to assistant surgeons should command their whole time and services until promoted, and that it would be inexpedient to deface the features of that act in this respect. To sanction the principles on which this claim rests, would enable not only the head of the Executive power, but every commanding officer in the navy, when on distant service, to promote assistant surgeons to the rank and pay of surgeons, for the time being, without examination and approval, and even without the two years' sea service which they are required to perform before they can even be made *candidate* for promotion. In addition to these considerations, the trouble and responsibility which necessarily attend these almost discretionary allowances, arising from the difficulty of ascertaining what is right, and the greater difficulty of satisfying all claimants with the justice of the public administration, are potent objections against this whole class of allowances, and render it desirable to get rid of them in all other branches of the service, instead of extending them to the medical department of the navy. In fine, this portion of the claim of Surgeon Ruff appears to me to be unsustained by law or equity, and on general principles extremely objectionable.

An argument has been drawn from the usage of the service in relation to the medical department before the passage of the act of 1828, and to other branches of the service before and since. In reply, it seems necessary only to say: *First*, that the act of 1828 superseded all usages in relation to the medical department which are inconsistent with its provisions; of which number this is one. *Secondly*, that the medical department is, by that act, placed upon a footing altogether different from other portions of the naval service. And, *thirdly*, that the whole usage, in all portions of the service, is a bad one, and ought rather to be curtailed than extended.

The letter of Mr. Parker, and Surgeon Ruff's memorial, are herewith returned.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

FEBRUARY 2, 1835.

Sir: In reply to your note in relation to the papers supposed to have accompanied the petition of Doctor Samuel W. Ruff, I would respectfully observe, that I am not aware of having received any in the case of that officer, excepting the petition, and that was returned on the 29th ultimate, with my letter enclosing the report of the Fourth Auditor.

I am, very respectfully, yours, truly,

M. DICKERSON.

To Hon. JAMES PARKER, *Naval Committee, House of Representatives.*

23D CONGRESS.]

No. 577.

[2D SESSION.

ON THE EXPEDIENCY OF AN APPROPRIATION FOR TESTING THE INVENTION OF CAPTAIN JAMES BARRON, OF THE NAVY, OF A "PROW-SHIP" FOR THE DEFENCE OF BAYS, RIVERS, AND HARBORS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1835.

Mr. WISE, from the Committee on Naval Affairs, to whom was referred the memorial of Commodore James Barron, in relation to his invention called a prow-ship, reported:

All inventions or plans for the defence of the bays, rivers, and harbors of the United States, submitted by practical men of science, such as the petitioner in this case, must be worthy of the most respectful and attentive consideration, from their great importance to a country like this, with a coast so extensive, so numerously indented by inlets from the sea and consequently so accessible to every mode of attack.

This invention is intended only for the protection of our inland navigation on the seaboard; for the attack of blockading squadrons of enemies' ships anchoring, or wind and tide-bound, or sheltering themselves from the effects of battle or wind, or from being crippled by either, in our waters. From a careful examination of its structure and its powers, and from the testimony of competent judges, it seems as wisely and certainly adapted to its end as any plan of its kind heretofore submitted.

A model has been long prepared, and is approved by nautical men and engineers of reputation. A full description of the construction and probable effects of the prow-ship is herewith filed, together with the opinions of its utility referred to. Its chief recommendations are its *simplicity*, its *mobility by steam*, its *comparative indestructibility*, its *safe protection of its crew*, the *small force required to man it*, its *certainty of operation*, its *irresistible momentum*, and its *cheapness*.

It is simply a combination of *three vessels*, constructed of solid seasoned timbers, bolted together transversely, of *white pine* or other wood, the specific gravity of which will safely admit of the imposition of all machinery required to propel the ship by steam. The dimensions, of course, will be according to whatever scale may be adopted; but the exterior vessels, and the prow and stern of the intermediate, are proposed to be of such a solid thickness as to exceed by far the maximum penetration of a cannon shot. And the *transverse construction*, it is believed, will much diminish that maximum penetration into the sides, prow, or stern of this ship. The middle vessel is to be constructed with just hollow capacity in the centre sufficient to contain the machinery, fuel, and the crew, consisting of engineer, fireman, helmsman, pilot, and a few armed men if required. The water wheels are to ply on either side, as usual, of the middle boat, protected by the exterior boats. Every part of the machinery is to be below deck, out of reach of shot or immediate concussion of any kind: and the whole interior of the ship is to be secured by a strong, thick deck, without aperture above, except through holes ingeniously opened horizontally for the eye of the pilot. The whole exterior to be sheathed in such manner as to be comparatively incombustible by ordinary means.

Its *mobility* constitutes it not only a *defensive*, but an *offensive* machine of attack. In this it has decidedly the advantage of fortifications. Propelled by steam, its velocity must greatly exceed that of a ship with full wind, and no motion of a ship in calms, by any means of seamanship, could possibly avoid its attack or lessen much its effects. But, if the ship pursued should fortunately escape from the chase, then the only result is, *your enemy would be driven away*; and that every man-of-war would most carefully avoid its neighborhood, beware of its contact, and run from its approach, is confidently thought by men in our navy, who are not used to run from the proudest ships of England's fleets.

Its *comparative indestructibility* exceeds that of any *offensive* machine of warfare yet invented. A battery of cold shot would but be arrested by a solid body of peculiar power of resistance, and be buried in its mass. But few could penetrate before the prow would sink every port hole of a ship of the line, even if approaching the muzzles of a broadside; but the angle of approach would always be with the selection of the prow-ship when it could approach at all. *It could not be sunk*, because nothing could penetrate her thickness, and, if penetrated or filled, such would be her solid mass, compared with her hollow capacity, that still her specific gravity would be less than that of water. When in contact with an enemy, the crew, as stated, are beyond the reach of shot below the deck. If boarded by the crew of a sinking ship, her men under hatches are safe, and the pilot and helmsman alone may make every boarder a prisoner of war as quick as steam power could run the ship to the shore.

The modes of destroying this ship are reduced only to these: *by liquid fire or other combustibles*, by *bombs*, *hot shot*, by *derangement of machinery by the prow-ship's own concussion*, or by the *bursting of boilers*.

From the first danger there are a variety of means of protection by various kinds of sheathing, as already remarked. The chances of the prow-ship's being hit by ordinary bombs thrown from mortars on board ship, at a swift moving object of her size, must be few indeed, when they are so uncertain at stationary objects of much larger size on the land. If other bombs, called *concussion bombs*, thrown horizontally, are used, and it is problematical whether such can be used with effect *by ships*, still it is believed that a bomb itself would not more than shatter the *outside of a solid mass*, constructed as this is proposed, without materially disabling the prow-ship; particularly a *concussion bomb*, which explodes at the first contact. *Hot shot* may penetrate, but, without passing through and through, which they could not do in a solid mass, there would be *no ventilation* to fan their flames, and their ignition would be smothered in the solid wood, or their fires would smoulder for hours, until a single man, with the smallest syringe, could extinguish them, when, too, an enemy was not near. Besides, the prow-ship is *on the water* with an immense machinery, which is in its nature adapted, or may be easily modified, to *immerse the whole vessel with a flood of water* in a moment, to extinguish her flames. But admit her to be easily combustible wrapped in flames this prow-ship is at once the *very desideratum of fire-ships*. Whether burning or not herself, she must be equally terrible to sink or to burn her enemy.

That her machinery will be liable to derangement by her own concussion against the sides of a ship, is not to be supposed, when we know of no instance where the machinery of our largest and swiftest steam-boats, with the greatest momentum, has ever been thrown out of gear or into derangement by the boats striking suddenly and stopping upon the "*sawyers*" or other obstructions of our western waters, with an impetus hardly resistible, and with machinery, too, not particularly guarded against such injuries. If liable to this derangement, however, it is one which can well be prevented by the usual and probable means employed to adapt the strength of any machine to its offices and ends. And the *boilers* of this boat can certainly be made as safe as those of ordinary boilers, which burst so seldom on the waters of the coast, where this means of defence must be stationed. Such is the comparative indestructibility of this invention: we say *comparative*, because the same wit of man which can create can destroy; and it is deemed hardly possible to conceive of any object, created by man, to be exposed to all the dangers of war and all the casualties of accident which this and every warlike means must be and are made to be exposed to, which will be *absolutely* indestructible. But it may be confidently said that no *offensive* warlike machine has ever yet been recommended or adopted, liable to be destroyed by *so few* means, so well guarded against, even those means by which it *may* be destroyed, or so little subject to annoyance even as this now proposed. And this recommendation, if true, is enough in itself; for the quality which ensures safety to those making the attack, ensures victory and success, if the prowship be as capable of doing damage herself, as it will be invulnerable by the foe.

It is proposed that this ship shall strike or impinge with an iron-bound pyramidal prow, extending in solid thickness in its own length, and in the mass of the three vessels, *fifty feet* at least, which no coh-

cussion could in the least impair. From its pyramidal form, it will enlarge the aperture broke in the ship's side the more it penetrates; and, in backing from the wreck, the prow will be at once disengaged the moment the pressure forward is withdrawn by the reversed action of the water-wheels.

The momentum of a prow-ship 230 feet long, with 387,000 cubic feet, a specific gravity of 9,288,000, (allowing 24 lbs. to each foot of white pine,) and a velocity of fourteen feet in a second, would be 130,032,000! And the momentum of each foot of the prow, 4 by 12 feet, on its first presentation, would be 2,708,475. With such a momentum, such strength of construction, propelled by steam, so invulnerable and indestructible, this prow-ship must be irresistible, certain, and annihilating; in its destructive effects. It is proposed to build one, sufficiently large for an experiment, for the sum of \$75,000. The subject is so simple, so easily understood, and so capable of reduction to mathematical certainty, that it can hardly be denominated an appropriation for an *experiment*, if Congress shall vote that sum. Our fortifications have multiplied and must be increased to an enormous extent on our Atlantic, Mexican, and lake coasts, for complete defence. This cost of construction is immense. They have cost this government within the last fifteen years not less than \$25,000,000! It is time we had thought of some cheaper means of defence. If this experiment succeeds, it will, at least, be the substitute for fortifications which cannot be erected for many years to come, and the auxiliary of those now built. If it fails, much valuable and needed information, to lead to more certain results, must be derived from the trial. No invention is perfected at first; all the benefits to mankind have followed eventually from fruitless attempts at first; all the lights of science have been elicited by *experiments alone*; experiments, for purposes like these in view, no private individuals or corporations are interested or able to make; this government is interested, able, and competent to make them; and your committee, therefore, report a bill.

PHILADELPHIA, October 25, 1834.

SIR: In compliance with your request, I have given my attention to the subject of the prow-ship, which you did me the favor to submit to my consideration for an opinion on the character and probable effects such an instrument of war would have in destroying enemies' vessels-of-war, in our bays, sounds, or rivers, should a favorable opportunity be afforded for that purpose. These favorable opportunities would consist in their being found, in light winds and calms, at anchor in our waters, so wind and tide-bound as to prevent retreat; vessels aground on the shore, shoals and coast; vessels sheltering themselves in our waters from the effects of battle, or the violence of winds, or from being crippled by either; all of which cruising ships-of-war, and a blockading force, are constantly subject to.

Enemies' vessels, found under the foregoing circumstances, within our waters, I am decidedly of opinion, could instantly be sunk or destroyed by propelling against them a machine such as your letter describes the prow-ship to be. As it regards the effects on a ship-of-war, from the pinging of such a body against her, propelled by steam power at a velocity of fourteen feet per second, it is mathematically demonstrable and can be placed on the basis of a certainty.

It having been, in a great measure, proved by the result of your calculation submitted to me, together with the comparative pinging of a common ball, cannot but remove every doubt of the most sceptical, as regards its utility in war, and the immense effects it would produce both in destroying enemies' vessels in our waters, and intimidating them from approaching near our coasts wherever such machines are to be found.

I have the honor to remain, very respectfully, your most obedient servant,

CHARLES STEWART.

Com. JAMES BARRON, commanding the Navy Yard, Philadelphia.

On the application of steam power to the purposes of war.

I would propose that a vessel be constructed of solid logs of light timber, the gravity of which would not exceed $\frac{1}{4}$ that of water, and be of such bulk that the upper part of the solid log work would float six or eight feet above its surface. Let this vessel, or combination of vessels, be of large dimensions, say two hundred, or two hundred and fifty feet long, and seventy or eighty feet wide, and resembling in their form a steamboat of the treble construction. The prow should be very strong, and for a few aft, a little sharp, but not so much so as to impair its strength. The point of it should not be reduced to a less thickness than three or four feet, and that prominence covered with iron plates from four to six inches thick, eight or ten inches wide, and six or eight feet long, on each arm, formed into an acute angle to fit the shape of the prow, and enlarged at their junction on the point of the prow to about eighteen or twenty inches in thickness, and rounding outwards in sharp pointed knobs, cut in large diamond form. These plates should be placed four or five inches apart from each other, and let half their thickness into the wood, which would produce a saw-shaped space upon the prow, and prevent the glancing of the vessel from her object, either up, or down, or sideways.

The logs that form the prow should be at least two feet square, thirty or forty feet long, and of the hardest and toughest wood, such as oak, hickory, &c., and occupy a space of eight or ten feet up and down, and should be supported on each side by the same kind of timber. The iron plates should be securely bolted through the whole mass, but particularly so through these logs of hard timber. To protect the crew and machinery from shot, let the guards, around the centre vessel be fifteen or twenty feet thick, and projected a sufficient distance from the sides to embrace the paddle wheels. These barricadoes should be of sufficient elevation to cover the upper part of the wheels; and also each of the lower parts must form a bottom similar to the centre one, and be secured to it forward and aft, and by the cross logs of which the centre vessel is constructed, projecting from her sides to such a distance as to allow spaces for the paddle-wheels on each side, and from as many other points as might be required for strength. The water is admitted to these paddle-wheels between the three bows of these vessels through a channel formed by an inverted arch, the lowest point of which must descend to a level with the lower part of the wheel, and

escape aft in the same manner. The solid log work, forward and aft, forms a mass of at least thirty feet in thickness.

Over the top of these three vessels lay a tier of logs about two feet square, which will serve as a protection to the crew and machinery, from any assaults by boarding, &c. The middle vessel may be partly rolled out if more buoyancy is required.

The object of this vessel is to destroy men-of-war, by running into them with such impetuosity as to break down their sides sufficiently to admit water in such quantities suddenly as would defy all possible efforts to prevent immediate sinking.

Only about eight or ten feet of the prow of this vessel ought to be allowed to strike the ship that is assailed; the other parts, above and below, should recede or incline aft, and this eight or ten feet space should be so situated as to come in contact with the side of the enemy two or three feet above the water, and six or eight feet below its surface. The resistance to the stroke would be less impeded than it would be were it given by a greater portion of the prow, and of course it would be more certain to pierce or break down that part of the side of the enemy's ship which it might come in contact with.

Three steam engines, of one hundred and fifty horse power each, would propel such a vessel at the rate of eight or ten miles per hour, and should be preferred to larger ones, as they would be less liable to damage from the shock to which they might be exposed, when the vessel should come at her full speed in contact with the enemy.

Let those who are curious or doubtful of the efficiency of this plan, calculate the effect which would be produced on a stationary body by a concussion so violent as would be occasioned by a stroke of the prow of this massive vessel. To make it apparent that the strongest ships in the world are entirely inadequate to resist such force, it need only be observed that they seldom come in contact with each other, with any violence, without sinking, or sustaining a most destructive degree of damage.

Ancient, as well as modern history furnishes us with many proofs of the decided effects of this mode of attack. The Romans and the Carthaginians were in the practice of running into each others vessels, at their greatest speed, impelled by their oars, and it is recorded of them, that when they found their enemies entangled with their friends, so as to render them stationary for the moment of their assault, that it seldom failed to produce that description of destruction contemplated by the adoption of this invention. The power of steam, and the solid construction of this vessel, would give this mode of attack a decided advantage over all others attempts, of a similar nature, heretofore resorted to, and beyond a doubt ensure success.

The proof of the effects of an attack made by a whale on the ship *Essex*, of New Bedford, in the year 1819, are conclusive that no construction of a ship now known, could resist the shock by a vessel similar to the one which I have described.

JAMES BARRON.

23D CONGRESS.]

No. 578.

[2D SESSION.

ON THE EXPEDIENCY AND IMPORTANCE OF AUTHORIZING A NAVAL EXPEDITION TO
EXPLORE THE PACIFIC OCEAN AND SOUTH SEAS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 7, 1835.

Mr. DUTCH J. PEARCE, from the Committee on Commerce, to whom were referred numerous memorials from citizens of various sections of the United States, praying that an exploring expedition to the Pacific ocean and South seas may be authorized by Congress, reported:

That the number and character of the memorialists, and the opinions they have expressed on the subject of the memorials, have called the committee to an attentive and careful consideration of the objects to be attained by the expedition, as well as of the reasoning and facts adduced in favor of the undertaking.

It is represented that the intercourse between the different parts of the nation and the islands and countries of the Pacific has become a matter of public interest, and deserving the protecting care of the national legislature. The fur business, hitherto carried on between the Pacific islands and China, has afforded rich returns, and increased the wealth of our common country. Besides this employment of national industry and enterprise, it is represented that there are engaged in the whale fishery, from various parts of the country, an aggregate of one hundred and thirty-two thousand tons of shipping and ten thousand men.

Besides this amount, engaged directly and exclusively in the trade, there is a vast amount of capital incidentally dependent on it, and in transporting oil to Europe, and in return cargoes, as well as the different parts of our own coast; so that, from the most careful computation, it has been found that not less than one hundred and seventy thousand tons of shipping, navigated by twelve thousand men, are employed in this branch of business, and the capital invested not much, if any, short of twelve millions of dollars. This view of the astonishing increase in this branch of our national industry is fully sustained by records, and is ably treated in an article of unusual merit in the *North American Review*, of January, 1834.

The memorialists further represent, that the increased extent of the voyages now pursued by the trading and whaling ships into seas but little explored, and to parts of the world before unknown, has increased the cares, the dangers, the losses of their merchants and mariners. Within a few years their cruises have extended from the coasts of Peru and Chili to the northwest coast, New Zealand, and the isles of Japan. This increase of risk has been attended by an increase of loss. Several vessels have been wrecked on islands and reefs not laid down on the charts, and, in some instances, no soul survived to tell their fate.

That something should be done, on the part of government, for the protection of this widely extended and important interest, seems to be the undivided opinion, as it is evidently the interest, of a large portion of the country; and the anxiety of the public mind has been evinced by the various memorials to this

House from legislative bodies, from the hardy and enterprising citizens of Nantucket, and other places interested in the whale trade.

A recent expression of the legislature of Rhode Island is contained in the following words:

"State of Rhode Island and Providence Plantations, in general assembly, October session, A. D. 1834.

"Resolved, That, in the opinion of this general assembly, the subject of the memorial of J. N. Reynolds and others, dated November, 1834, praying that provision may be made by law for a voyage of discovery and survey to the South seas, is highly important to our shipping and commercial interests, and is hereby recommended by said assembly to the favorable consideration of the Congress of the United States."

Following this resolve of the legislature of Rhode Island, the East India Marine Society, of Salem, Massachusetts, a society which has filled a large space in the commercial history of our country, in their memorial, use strong and decisive language, and speak with a practical knowledge which entitles their views to the most respectful consideration; for among them are those who were the first to display our national colors in our commerce to the eastern world; among them are those who have been engaged in trade on coasts and among islands but little known; and they have felt, in losses, and in painful solicitude, the want of the protection of their government, as well to point the position of a dangerous reef as to defend them against the natives, who had seen nothing of our power to restrain them from unlawful attacks upon their vessels and their lives; among them are those who have visited the islands in the Pacific as well as those in the East, and have seen and felt the dangers our vessels are exposed to, for the want of such protection as an expedition fitted out for the express purpose alone could give.

They further state, "that they will refrain from going into any computation of the immense amount of tonnage and capital engaged from the United States in the whale fishery, all of which is more or less interested in such an expedition. Without attempting to designate the groups of islands most important to be examined, your memorialists would simply call the attention of your honorable body to one point, which may serve as an index to the rest: the Feejee or Beete Islands—what is known of them? They were named, but not visited, by Captain Cook, and consist of sixty or more in number. Where shall we find a chart of this group, pointing out its harbors and dangers? There are none to be found, for none exist! And yet, have we no trade there? We speak not for others, but for ourselves.

"From this port the following vessels have been, or are now, employed in procuring *beche le mer* and shells on the Feejee Islands, in exchange for which eastern cargoes are brought into our country, and thus contributing no inconsiderable amount to our national revenue.

"Ship Clay, brig Quill, have returned; brig Faun, lost at the island; ships Glide, Niagara, also lost; and barque Peru, greatly damaged, and, in consequence, condemned at Manilla; brig Spy, damaged, but repaired again; brig Charles Daggett, barque Pallas, brig Edwin, ship Eliza, ship Emerald, ship Augustus, and brig Consul.

"The Charles Daggett has recently returned, in consequence of having a portion of her crew massacred by the natives. The ship *Ceno*, of Nantucket, was lost on one of these islands, and her officers and crew, consisting of 24 in number, were all massacred in like manner, save one.

"Thus it must appear to your honorable body, that the losses sustained at this single point, to say nothing of the value of human life, which is above all price, would not fall far short, if any, of the amount necessary to fit out an expedition for the better examination of such points in the Pacific ocean and South seas as require the attention of government."

In recurring to the memorials hitherto presented, and now on file, your committee find them thus alluded to in a letter from J. N. Reynolds, Esq., transmitting them to the Hon. Andrew Stevenson, at that time Speaker of the House (see document 209, 1st session, 20th Congress). The writer says:

"Among these memorials you will find one from Albany, dated October 19, 1827, and signed by his excellency Nathaniel Pitcher, lieutenant governor of the State of New York, the Hon. Erastus Root, speaker of the house of representatives, and by nearly all the members of the legislature. I have also the honor of transmitting to you three other memorials.

"The first is dated Charleston, South Carolina, May 31, 1827, and signed by the mayor of the city, president of the chamber of commerce, and by a long list of respectable citizens.

"The second is dated Raleigh, North Carolina, December 24, 1827, and contains the signatures of his excellency James Iredell, governor of the State, and Hon. B. Yancy, speaker of the senate, the Hon. James Little, speaker of the house of commons, and by a large proportion of the members of each branch of the legislature.

"The third memorial is dated Richmond, Virginia, January 1, 1828, and is sustained by a number of respectable citizens, by the Hon. Linn Banks, speaker of the house of delegates, and by a large and respectable number of the members of the legislature."

With these memorials Mr. Reynolds transmitted, in like manner, to the speaker, the following preamble and resolution, adopted by the house of delegates of the State of Maryland:

"Whereas, foreign nations have long turned their attention towards the acquirement of a more perfect knowledge of the geography of the earth, by means of voyages of discoveries, and by these means have not only acquired reputation, but extended the weight of their influence, opened new channels for commercial interprise, and benefited the human race, by enlarging and improving the boundaries of knowledge; and whereas, the government of the United States has attained a high standing among the nations of the earth, the practical result of the most stupendous as well as successful experiment ever made in politics; a population fast increasing; commercial relations and interests co-extensive with the civilized world; nautical skill, perseverance and enterprise, if not unequalled, at least not surpassed; and whereas, the sending out one or two vessels on a voyage of discovery would not be attended with any very heavy demands on the public Treasury, and would seem to be in strict accordance with the character and liberal policy which ought to be pursued by a government, whose political existence is, in a great measure, dependent upon the general intelligence of the people; and whereas, a great number of the most enlightened citizens of various sections of our country have memorialized the Senate and House of Representatives of the United States in Congress assembled, and have set forth in their memorials that, under the patronage of the United States, an expedition should be fitted out without delay, and

proceed to acquire a more perfect knowledge of the interesting and extensive field for enterprise in the southern hemisphere, and, provided for the purpose with hardy seamen and scientific persons, bring home to us the result of their labors, for the honor of our country and the benefit of mankind; and whereas, voyages of this kind, even when they fail in making important discoveries, bespeak a liberal policy, and give character to the people who undertake them; therefore,

Resolved, by the general assembly of the State of Maryland, That we do highly approve of the views of the said memorialists, believing that an expedition, if properly conducted, could scarcely fail in adding something to the general stock of national wealth and knowledge, and to the honor and glory of the United States."

It is, perhaps, unnecessary to remark, that this expression of public sentiment, though extensive, and deserving the most respectful consideration, is small when compared with other and similar memorials, introduced during the same session, from the legislatures of Pennsylvania, Ohio, &c.

These memorials having been referred to the Committee on Naval Affairs, on the 3d of March, 1828, a letter was addressed, by order of the committee, to the Hon. Samuel L. Southard, Secretary of the Navy, asking his "opinion respecting such an expedition, and briefly his reasons for it."

To this inquiry the Secretary replied:

"I entertain the opinion that such an expedition is expedient. My reasons are briefly these:

"That we have an immense and increasing commerce in that region, which needs the protecting kindness of the government, and may be greatly extended by such an expedition. Of the extent and nature of this commerce it is not easy to write briefly, nor is it necessary. It is better known to none than to some of the members of the Naval Committee in the House of Representatives. The estimate of its value has been much augmented, in the view of the Department, by the reports which have been made, *under its order*, by our naval officers, who have commanded vessels-of-war in the Pacific, and which are now on file.

"The commercial operations carried on in that quarter are difficult and hazardous. They are correctly represented in the memorial of the inhabitants of Nantucket, to which I would refer, as well as to some of the many other memorials which have been addressed to Congress on this subject. It would seem wise in the government to render these commercial operations less hazardous and less destructive of life and property, if it can be done by a moderate expenditure of money.

"The commerce in the Pacific ocean affords one of the best nurseries of our seamen. An expedition, such as that proposed, would be calculated to increase that class of citizens—an increase in which the government and nation are deeply interested.

"We now navigate the ocean and acquire our knowledge of the globe, its divisions and properties, almost entirely from the contributions of others. By sending an expedition into that immense region, so little known to the civilized world, we shall add something to the common stock of geographical and scientific knowledge, which is not merely useful to commerce, but connects itself with almost all the concerns of society; and, while we make our contribution to this common stock, we shall not fail to derive the best advantages to ourselves, and be richly paid, even in a calculation of expenditure and profit."

On the 25th of March the committee made their report to the House, and expressed themselves in the following terms:

"In relation to the interests, individual and national, connected with such an expedition, the committee refer to a statement submitted to them by Mr. J. N. Reynolds on the 10th of February, 1828, in answer to inquiries addressed to him by order of the committee. So much of the statement as exhibits the amount of our commerce in the Pacific seas, the committee think is fully sustained by the reports of the officers of our navy, who have, by order of the Secretary, heretofore made reports upon that subject to which Mr. Reynolds refers, and with which his statement has been compared, as well as with the accounts of others familiar with those branches of our trade.

"The dangers to which an immense amount of property is exposed, as well as the hazard to human life, for the want of knowledge, by more accurate surveys, of the regions to which our commerce is extending, and the probable new sources of wealth which may be opened and secured to us, seem, to your committee, not only to justify but to demand the appropriation recommended; they therefore report a bill for the purpose."

During the same session this report was acted on, and a bill (No. 240) making an appropriation passed the House of Representatives.

From that period to the present no legislative action has been taken upon the subject, though scarcely a session has passed that memorials from one section or other of the country have not been presented; and the continued solicitude of the public mind, evinced in favor of the enterprise, now that the condition of our country and its financial concerns can so easily afford the small demand upon the Treasury, which such an expedition will require.

The action of Congress is not invoked in favor of a measure of doubtful expediency. The requisite information in forming an enlightened judgment, and in directing the action of government, is ample and complete, and will be found in the accompanying documents.

The report of Mr. Reynolds on the islands in the Pacific shows, at a single view, what remains to be accomplished. To examine such of these islands as may be found to contain harbors and places of refreshment for our fishermen, would, of itself, more than justify the expenditure necessary for an expedition, to say nothing of the collateral advantages to be derived in the attainment of much useful knowledge, so highly to be prized by every enlightened mind.

Our interests in those seas have, indeed, become immense, and extend beyond all former example; for our whalers, sealers, and traffickers are pursuing their voyages in parts of the world where, a few years ago, it would have been adventurous for a discovery ship.

The following statement from Mr. Reynolds, in answer to an inquiry addressed to him, shows the amount of our interests afloat among these islands at this moment:

"JANUARY 30, 1835.

"SIR: In answer to the inquiry contained in your note of the 25th ult., I send you a statement of the amount of tonnage and capital at "this moment afloat," and engaged in the sperm whale fishery.

"The document from which this statement is taken has recently been prepared with great care by very competent persons in Nantucket.*

"The details comprise the names of the ships and barques thus employed, names of the masters, ports to which they belong, dates of departures, periods of absence, quantities of oil when last heard from, and tonnage of vessels, respectively, together with much other valuable information.

"On inspecting this tabular statement, it is found that the whole number of ships engaged in this valuable branch of the fisheries is 273, of which 257 are now absent, viz:

"From New Bedford 94, Nantucket 63, Fairhaven 14, Bristol 13, New London 9, Hudson 9, Warren 7, Edgarton 6, Falmouth 6, Newport 6, Sag Harbor 5, Salem 3, Newburyport 3, Poughkeepsie 2, Portsmouth 2, Dartmouth 2, and one from each of the following ports, viz: Boston, Plymouth, Wareham, Rochester, Portland, Wiscasset, Fall River, Providence, Stonington, Newburgh, New York, and Wilmington, Delaware. Sixteen ships only are in port, belonging as follows: To New Bedford 7, Nantucket 5, Fairhaven, Plymouth, Sag Harbor, and Edgarton, one each.

"The aggregate tonnage of the 257 absent ships is nearly one hundred thousand tons. The number of seamen and navigators employed on board these vessels is not far from nine thousand.

"This document furnishes a very careful estimate of the quantity of spermaceti oil imported into the United States during the year 1834. Since the 1st of January there have arrived, from the Pacific ocean, fifty-five ships, viz: Into the port of Nantucket 11, New Bedford 25, Plymouth 2, Fairhaven 6, New London 2, Edgarton 2, Sag Harbor 2, Warren 2, Falmouth, Bristol, and Hudson, each one. The cargoes of these ships average little more than two thousand barrels each; add, to this quantity, sixteen thousand barrels, estimated to have been brought from the South Atlantic ocean, making about 128,000 barrels, and we have the entire quantity of spermaceti oil imported in the course of the last year. Of this quantity, 70,577 barrels were received at New Bedford, and the residue at Nantucket and other places.

"Among the ships now abroad, there are thirty-one which sailed in 1831, seventy-three in 1832, eighty-eight in 1833, and sixty-five in 1834. The number of spermaceti whale ships expected to arrive within the year 1835 may be set down at seventy, and their cargoes at 135,000 barrels, valued at more than *three millions of dollars*.

"Very respectfully, your obedient servant,

"J. N. REYNOLDS.

"Hon. DUTEE J. PEARCE."

In addition to all this information, your committee have availed themselves of a letter from one of our ablest and most experienced commanders, addressed to an honorable member of this House; and the liberal and practical views expressed entitle the opinions of the writer to great weight.

"CHARLESTOWN, *Mass., January 21, 1835.*

"DEAR SIR: In compliance with your request that I would communicate to you, in writing, my views on the subject of a voyage of discovery to the South seas and Pacific ocean, I have to regret that the circumscribed limits of a letter will allow but little more than the simple expression of an opinion on a subject of so much national importance, and in relation to which so much might be said in detail.

"I have had some experience in the navigation of the less frequented parts of the Pacific, at an earlier period of my life. During my late voyage in the Potomac, I have had an opportunity to add greatly to the knowledge acquired in former years. An expedition fitted out for the purpose of improving our knowledge of the hydrography of those seas has often been the subject of my reflections. As the representative of a district largely engaged in the whale fishery, you must frequently have seen, from the reports of masters of vessels engaged in that business, accounts of new islands and reefs being frequently discovered, and which are either not laid down on the charts, or so erroneously marked that they can give no security to the mariner. It is probable that not less than five hundred of these islands and reefs have been marked with sufficient accuracy by our whalers, sealers, and traffickers of one kind or another, to enable an expedition to examine the most important of them, without much loss of time in seeking their positions. This will enable the discovery vessels to do more, in less time, than has probably ever been effected by a similar enterprise from any other country. Of the extent of our interest in those remote seas I need not speak, as you are conversant with the subject; besides, the interest has been fairly represented by memorials to Congress. During the circumnavigation of the globe, in which I crossed the equator six times, and varied my course from 40 degrees north to 57 degrees south latitude, I have never found myself beyond the limits of our commercial marine. The accounts given of the dangers and losses to which our shipping are exposed by the extension of our trade into seas but little known, so far, in my opinion, from being exaggerated, would admit of being placed in bolder relief, and the protection of government implored in stronger terms. I speak from practical knowledge, having myself seen the dangers, and painfully felt the want of the very kind of information in the guidance of a vessel in those seas which our commercial interests so much need, and which, I suppose, would be the object of such an expedition as is now under consideration before the committee of Congress to give. Indeed, the whole of this business, it seems to me, is a plain and practical affair. The commerce of our country has extended itself to remote parts of the world, is carried on around islands and reefs not laid down on the charts, among even groups of islands from ten to sixty in number, abounding in objects valuable in commerce, but of which nothing is known accurately; no, not even the sketch of a harbor has been made, while of such as are inhabited our knowledge is still more imperfect. It would seem to require no argument to prove that a portion of our commerce might be rendered more secure, and probably greatly increased, by vessels sent, properly prepared, to examine such islands. There are also immense portions of the South seas, bordering on the antarctic circle, well deserving the attention of such an expedition, especially during the most favorable months of the southern summer. Islands discovered in that quarter will probably be found to yield rich returns in animal fur. Indeed, discoveries of this kind have recently been made by some English whalers, supposed to be of great extent, the vessels having sailed along three hundred miles of coast, lying south of the Cape of Good Hope. This may lead to other very interesting discoveries, which will probably be found, on further examination, to be a continuation of Palmer's Land, lying south of the South Shetland Islands, or only separated from it by a

* Nantucket Enquirer.

narrow channel. Much might be said in favor of a speedy examination of this portion of the South seas; indeed, I hardly know where an expedition could go where it might not be in the way of doing good—to say nothing of the credit our country would acquire in promoting such an enterprise.

“As to my opinion of the class of vessels best suited for such an expedition, I should unhesitatingly say: two brigs or barques, of 200 tons each, and a tender, of from 80 to 100 tons. A great many weighty reasons might be given to show that in the same ratio, were vessels beyond this size, the chances of safety and extensive usefulness would be proportionally decreased.

“Very respectfully, your obedient servant,

“JOHN DOWNES.

“Hon. JOHN REED, *Member of Congress.*”

In the conclusion of the report alluded to by the Committee on Naval Affairs, and dated February 10, 1823, (Rep. 209, 1st sess. 20th Cong.,)* Mr. Reynolds holds the following appropriate language:

“The opening of the ports in South America has already changed our course of trade in the Pacific greatly for the better, and will more and more benefit us, if we take care of our rights in those seas, and send a sufficient force to protect our commerce, which, no doubt, it will be the policy of our government to pursue.

“To look after the merchant there, to offer him every possible facility, to open new channels for his enterprise, and to keep a respectable naval force to protect him, is only paying a debt we owe to the commerce of the country; for millions have flowed into the national treasury from this trade before one cent was appropriated for its protection.

“The naval commanders we have sent into the Pacific have done all that wise, active and experienced men could do. They have not only taught the natives that we are a powerful people, and could defend ourselves in that distant country as well as other nations, but these new States and empires which have arisen in South America have been shown that we could punish wrongs and enforce rights, and had the good of mankind, as well as our own prosperity, at heart. *Power judiciously exhibited is the great peacemaker of the world;* and a people whose institutions are not yet thoroughly established, as those in South America, want looking after with a steady eye. In attending to these duties, it is impossible for our naval commanders to explore those seas for the purpose of discovering new places. Their duty is to watch the old; and this is a sufficient task for any force we can send there.

“The whale ships, having a specific object in view, and generally under strict orders, cannot waste an hour in the business of discovery; nor can they, consistently with their duties, stop a day to explore and examine what they may accidentally discover. The northwest coast trader has also a specific object, and a more direct path than the whaler.

“It seems well understood, at this time, that it is for our interest and our *honor* to be well acquainted with the *capacities* of the globe; to see what resources can be drawn from that great *common* of nations—the *ocean*. The enlightened statesman, therefore, surveys all parts of it, with the view of opening new channels for commerce and trade; and he does not refuse to advance them by a present expense, when coupled with the certainty of a future and a greater good.

* * * * *

“No one who has reflected on the vast resources of the earth, ‘which is our inheritance,’ can doubt that a large portion of it contains many things which may be turned to good account by the enterprise and good management of our people; and those are the true profits of commerce. The great mass of the intelligence of the country is for it, and is calling on the national legislature for aid in the undertaking.

“The States, whose legislative bodies have sanctioned it, are represented on the floor of Congress by one hundred and twenty-nine members, to say nothing of the memorials from large cities and other places, and the aggregate of citizens of these States, near six millions.

“We have been an industrious, a commercial and enterprising people, and have taken advantage of the knowledge of others, as well as of their trade; for, although our entrance and our clearance, without looking at our immense coasting trade, amounted to eight thousand seven hundred and sixty-six vessels, yet not one of those were sailed a mile by a chart made by us, except we may suppose the chart of George’s bank may have been used by a few of the navigators of these vessels. We are dependent on other nations for our nautical instruments as well as charts; and if we except Bowditch’s Navigation, an improvement on Hamilton Moore’s book of the same kind, we have not a nautical table or book in our navy, or amongst our merchantmen, the product of our own science and skill; and we are now among the three first commercial nations of the world, and have more shipping and commerce than all the nations of Europe had together when Columbus discovered this continent, but a little more than three centuries since; and our navy, young as it is, has more effective force in it than the combined navies of the world could have amounted to at that period. Out of the discovery of this continent, and a passage to the Indies, grew up the naval powers of Europe. On the acquisition of the New World, Spain enlarged her marine; France and England theirs, to hold sway with Spain; and that of the Netherlands sprang from the extent of their trade, connected with the wise policy of enlarging and protecting it.

“Our commercial and national importance cannot be supported without a navy, or our navy without commerce, and a nursery for our seamen. The citizens of Maine, of New York, of Georgia, of Ohio, and of the great valley of the Mississippi, are as deeply interested in the existence of our gallant navy, and of the extension of our commerce, as they are interested in the perpetuity of our institutions and the liberty of our country. Indeed, liberty and commerce have been *twin sisters* in all past ages, and countries and times; they have stood side by side, moved hand in hand. Wherever the soil has been congenial to the one, there has flourished the other also; in a word, they have lived, they have flourished, or they have died together.

“Commerce has constantly increased with the knowledge of man; yet it has been undergoing perpetual revolutions. These changes and revolutions have often mocked the vigilance of the wary, and the calculations of the sagacious; but there is now a fundamental principle on which commerce is based, which will lead the intelligent merchant and the wise government to foresee and prepare for most of these changes; and that principle consists in an intimate knowledge of all seas, climates, islands, continents, of every river and mountain, and every plain of the globe, and all their productions, and of the nature,

* See American State Papers, on Naval Affairs, vol. 3, No. 363, page 190.

habits and character of all races of men; and this information should be corrected and revised with every season.

"The commercial nations of the world have done much, and much remains to be accomplished. We stand a solitary instance among those who are considered commercial, as never having put forth a particle of strength, or expended a dollar of our money, to add to the accumulated stock of commercial and geographical knowledge, except in partially exploring our own territory.

"When our naval commanders and hardy tars have achieved a victory on the deep, they have to seek our harbors, and conduct their prizes into port, by tables and charts furnished perhaps by the very people whom they have vanquished.

"Is it honorable for the United States to use forever the knowledge furnished us by others, to teach us how to shun a rock, escape a shoal or find a harbor, and add nothing to the great mass of information that previous ages and other nations have brought to our hands?

"Tyre, Greece, Carthage, Venice, Florence, whose commerce has ceased, and whose opulence is gone forever, have still left the historic glory of having shown succeeding ages the way to wealth, and honor, and power, by means of knowledge. The ancient commercial and naval monuments are theirs, and every niche of the modern temple of Neptune is filled by others—not ourselves. The exports, and more emphatically the imports of the United States, her receipts and expenditures, are written on every pillar erected by commerce on every sea and in every clime; but the amount of her subscription stock to erect these pillars, and for the advancement of knowledge, is nowhere to be found.

"To open new sources of traffic and of commercial wealth, has gratified the pride as well as the avarice of man, in every age; and the adventurous deeds by which this has been achieved, have been commemorated by every historian, poet, and even fabulist in all past times; for the Argonautic expedition for the golden fleece, as given us by the poets and mythologists, is only in the form of a generous and munificent commemoration of the voyage of one who ventured much to open a new path to commerce, for the aggrandizement of his own country.

"We have been plundered by the English and French, by Spaniards and Neapolitans, Danes, Norwegians, and the Barbary powers, while our commerce was extending everywhere, and protected nowhere. Some of these insults and depredations have been settled for, and others are quietly, but surely, approximating to a day of *restitution* or *retribution*. The spirit of the nation is aroused on these subjects, and can never sleep again; honor, justice, feeling, conscious of physical strength, all forbid it.

"Have we not, then, reached a degree of mental strength that will enable us to find our way about the globe without leading-strings? And are we forever to take the highway others have laid out for us, and fixed with mile-stones and guide-boards? Permit me to conclude, in humble imitation of the great discoverer of this continent to his patrons: 'We fear no storms, no icebergs, no monsters of the deep, in any sea; we will conduct ourselves with prudence, and discretion, and judgment; and, if we succeed, the glory and profit will be yours; if we perish in our attempt, we alone shall suffer, for the very inquiry after us will redound to your honor.'"

* * * * *

"WASHINGTON, February 26, 1828.

"SIR: The Committee on Naval Affairs in the House of Representatives, through their chairman, have recently addressed me a note, requesting my views of the character, value, and extent of our trade in the South seas and Pacific ocean.

"A reply to that letter is herewith enclosed for your perusal; and as you have recently been in the Pacific, on official duty, and have improved the favorable opportunity you had of acquiring much useful information in relation to our important and growing commerce there, I would thank you to inform me, in writing, how far your own views extend in corroboration of the report I am about to submit to the consideration of the committee.

"Be pleased to accept the assurance of the high consideration with which I am, sir,

"Your obedient servant,

"J. N. REYNOLDS.

"To Captain THOMAS AP CATESBY JONES, *United States Navy.*"

"WASHINGTON, February 28, 1828.

"DEAR SIR: I have received, and read with great satisfaction, the memorial which you did me the honor to submit for my perusal. My recent cruise to the Pacific ocean, in the course of which I spent some time among the Society, Sandwich, and other islands, afforded me a good opportunity of seeing, in partial operation, most of the branches of commerce, the advantages of which you so clearly demonstrate in your address to the Committee on Naval Affairs.

"That there is a great field open for national enterprise, in the region to which you have invited the attention of the American people, cannot be *doubted*; and I accord most heartily with you that such a voyage as you contemplate would open to our commercial, and, of course, national interests, sources of great wealth, which cannot be brought into action without the protecting aid of government.

"That success may crown your most laudable exertions, is the wish of, sir,

"Your obedient servant,

"THOMAS AP CATESBY JONES.

"To J. N. REYNOLDS, Esq."

The committee, having thus fully presented the views and wishes of the memorialists, and noted the legislative action hitherto had upon the subject, deem it unnecessary to go into any prolonged arguments, in the conclusion of their report.

Other nations have deemed it wise to protect their fisheries, at all hazards, and by heavy expenditures. Some have sent out voyages of discovery, that had little or no commerce to be benefited. Previous to the year 1770, the English, in their strenuous efforts to compete with the Dutch in the northern whale fishery, had paid, in bounties, not less than three millions of dollars; and down to the year 1786, the aggregate amount of bounty paid was not less than six millions three hundred and thirty thousand dollars.

The American fishermen have received no bounty, and they are now pursuing their avocation in seas beyond the reach of ordinary protection. That places of refreshment may be examined, new channels of

trade opened, and dangers pointed out, seem not only reasonable and just, but called for by considerations of public interest; and it is believed that this can be best accomplished by sending out small vessels expressly provided for this duty; while the demand on the public treasury will be small, compared with the good which may be accomplished.

The late British expeditions for the discovery of a northwest passage, undertaken for scientific purposes, at great expense, nevertheless richly repaid the British nation for her expenditure, by transferring the whale fishery from East to West Greenland.

In like manner, in addition to the specific objects to be attained by an expedition, many collateral advantages may be secured to the whaler and trafficker in the Pacific, and the sealer in the higher latitudes south.

While your committee, in coming to their conclusion in favor of recommending an expedition such as has been prayed for by the memorialists, have been influenced solely by commercial views, and place the policy of the measure solely on these grounds, they are not indifferent to the valuable fund of knowledge which may be gathered during the voyage, and which, properly analyzed and written out, may be interesting, not only to the American people, but the whole civilized world.

Your committee therefore report a bill.*

NAVY DEPARTMENT, *January 24, 1835.*

SIR: I have the honor to send herewith an original report of J. N. Reynolds, Esq., dated the 24th of September, 1823, describing certain islands, reefs, and shoals in the Pacific ocean, &c., and which is presumed to be the report called for by the House of Representatives of the 23d inst, and referred to as dated the 9th October, 1829. When no longer required, it is respectfully requested it may be returned.

I am, very respectfully, your obedient servant,

M. DICKERSON.

Hon. JOHN BELL, *Speaker of the House of Representatives.*

Letters from Passed Midshipmen Maury and Godon.

FREDERICKSBURG, *Va., December 26, 1834.*

DEAR SIR: Your friendly letter, of the 25th inst., lays open before me.

It affords me pleasure to give you all the facts within my reach, which may bear upon the subject of the memorial alluded to.

I earnestly hope you will gather the richest fruit from your report—the consciousness of doing good, and of benefiting your fellow-citizens.

I have cruised in the Pacific for nearly seven years, and have seen and conversed with many of our whalers. They all urge, in the strongest terms, the necessity of a survey of the many dangers which speak their fishing grounds.

You will observe that the islands, rocks, &c., of which you have a list, place the “fishing ground” between the west coast of Africa, the coast of Japan, and South Africa. An accurate survey of the western coast of our continent is much to be desired. I was sailingmaster of a United States vessel in the Pacific for nearly three years.

By the testimony of other navigators, and the concurring result of my own astronomical observations, I found many places along the coast mislocated on our charts, which were of the most recent publication, and compiled by the most approved hydrographers.

To the north of Lima, there is a line of coast several hundred miles in extent, to every point of which, according to the observations of those who sail along it, the charts assign a wrong locality.

Upon the shoal of Topocalma, near Valparaiso, several vessels, (one last year,) have been lost, through ignorance of its true locality.

The hydrography of the northwest coast, and of that bordering near the mouth of the Columbia river, is most lamentably imperfect. The United States have a valuable interest there in the fur trade with the east, which has been, and is, a valuable field for the enterprise of our citizens.

Extract from my note book.

“CALLAO, *May, 1832.*

“Captain Merit, an American, of the brig *Convoy*, tells me he has been in the fur trade, on the northwest coast, for many years; he has frequently entered the mouth of the Columbia river; the ingress very dangerous; he has seen the breakers breaking feather-white, almost entirely across the entrance; a bar of quicksand extends across it; he saw a vessel and all her crew perish on it; there is no chart of the mouth of this river.

“About five miles to the northward of Baker’s Bay is a very large bay, with a narrow mouth opening into the ocean; he was twelve hours in a canoe pulling across this bay, at the rate of six miles per hour; thinks the water in this bay is deep; saw the breakers across its mouth. The Indians tell of an English vessel that came into this bay, mistaking it for the mouth of the Columbia river; this bay is not laid down upon any chart.”

“If the hydrography of the coast and the main land be so imperfectly established, what is to be expected of that of the islands, and of places apparently of less importance?”

* For report of Secretary of the Navy, of 24th January, 1833, and letter from J. N. Reynolds, see antecedent, No. 573, *Naval Affairs.*

"Captain Swain, of the Mercury, and Chase, of the Leda, (whalers,) say that Norfolk Island, Gallapagos group, does not exist. The chart places it thirty-four miles from Cholam Isle. They sailed from Cholam Isle in search of it; the day was perfectly clear; could see twenty-five miles around; they did not see Norfolk Island.

"Captain Bennett, of the Rajah, (whaler,) has been in Wake's Island, (recently discovered;) latitude 19 deg. 26 min. north, longitude 166 deg. 45 min. east; it is low; is about a half mile long; has no anchorage; boats can land on the lee side of it; it has 'beche le mer' on it.

"Captain B., in company with another vessel, saw an island in latitude 3 deg. south, and 171 deg. 51 min. west; it is barren; has a reef around it; is ten miles long, four broad. Next morning they saw another in 172 deg. 10 min., and 2 deg. 40 min. south. Thinks this is not barren, and that its length is about twenty miles."

Copy of a letter from Captain Mayrs.

"On our passage from the Marquesas to the coast of Chili, we fell in with several islands not laid down in our charts. That which we first saw is situated about eighty or ninety miles from the Dog Island of Schuten and Le Maix, southwest by south, and is, according to our dead reckoning, in latitude 16 deg. 14 min. south, longitude 139 deg. 18 min. west. But as we had no observation the preceding or following days, the position we have given it may be very incorrect. It was between five and six P. M. when we first saw it, and the weather at that time thick and squally, which induced me to tack and stand back in my own track during the night, to avoid all danger that chance might throw in our way. At daylight land was again seen in a northwest direction, which I supposed to be another island. Not many days after, we fell in with another at daylight in the morning, near which we lay becalmed the greater part of the day; this is in latitude 17 deg. 18 min. south, longitude 138 deg. 30 min. west. Its greatest extent is north-northeast twelve or fourteen miles; land low, a cluster of cocoa nut trees on the western end, and on its southwest part is an extensive reef, connecting it with the island, and enclosing a large lagoon. The people were seen in considerable numbers on the beach, who, on approach of the boat that was sent to examine it, assumed a threatening attitude, and prevented the landing of the party with their slings, which led us to believe they had never been visited by a vessel. As we stood on to the southwest, immense numbers of birds hovered daily around the ship, which induced us to believe we were in the vicinity of land. It was at last seen in the southeast. This island is in latitude 18 deg. 27 min. south, longitude 136 deg. 18 min. west; it is twenty-five miles long, northeast; it is very low. From the light winds, we could not near it enough to tell if it were inhabited or not. It was thought by some to be Gule's Island, seen by Captain Wilson, in the Duff, which we saw next day, agreeably to our calculation, which gave us less reason to doubt our own reckoning."

The above, sir, are all the facts which I can furnish you, with regard to the "unknown west."

I have set down in my note book the number of whale ships, constantly in the Pacific, at two hundred and eighty, averaging twenty-three men to each, and two thousand eight hundred barrels, each barrel containing thirty-two and a half gallons of oil, and each ship to require thirty-four months to fill herself. I think this is rather above than below the proper estimate.*

Yours, respectfully, &c.,

M. F. MAURY,
Passed Midshipman U. S. Navy.

HON. DUTEE J. PEARCE, *House of Representatives, Washington.*

WASHINGTON CITY, *February 1, 1835.*

SIR: As an officer of the United States navy, I cannot look upon the efforts you have been making towards getting up an expedition to the South seas with feelings of indifference. They are noble, sir, and the design is worthy of them. I had the good fortune to perform the cruise of the Potomac, under the command of Commodore Downes, in which we circumnavigated the globe, increasing our latitude from forty degrees north to upwards of fifty-six degrees south; and, in this immense range of ocean, we were never once beyond the reach, or in fact within some degrees of the limits of our whaling and sealing interests. While among the islands of the Pacific ocean, and during a cruise of some eighteen months on the west coast of South America, I had numerous opportunities of observing the immensity of our whaling and other commercial interests in those seas; and alas! of mourning (from the reports of numberless merchants and whaling captains) over the imperfections of our charts of those very regions now become the field of enterprise of those daring navigators. Newly discovered islands are yearly being made, and already a list of upwards of four hundred has been made. Some of these lists I have seen; but they have, I believe, some time since been laid before the House of Representatives by the untiring and highly to be commended exertions of J. N. Reynolds, Esq. I am well convinced, by a practical knowledge, of the utility of the proposed expedition, towards a thorough examination of those seas, for the preservation of our commerce and the encouragement of our seamen engaged in a service already, perhaps, the most dangerous of any, independent of unknown islands and undiscovered reefs.

Without entering into any learned or far-fetched argument in support of the existence of undiscovered land in high southern latitudes, abounding in articles of commercial interest, allow me, sir, to refer you to a communication made to the Royal Geographical Society, in the year 1833. It appears, from this paper, that one Captain Biscoe, in the brig Tula, accompanied by a small cutter, the Lively, on the eighth of February, 1831, discovered land, and during one whole month remained in the vicinity of it. He

*A call on the Secretary of the Treasury would give the number of sperm whalers, which only fish in the Pacific, &c.

clearly discerned the *black peaks* above the snow, but he was unable to approach nearer than thirty miles to it, from the boisterous state of the weather and ice. The stormy petrels were the only birds seen, and no fish. It has been named *Emberly's land*; longitude forty-seven degrees 30 minutes east, latitude sixty-six degrees thirty minutes south; an extent of 300 miles was seen. In consequence of the bad state of the health of his crew, Captain Biscoe was compelled to return into warmer latitudes, but, in the early part of February, 1832, he was again in the vicinity of an immense iceberg, when it fell to pieces, accompanied by a tremendous noise, and, on the 15th of the same month, *land* was seen to the southeast, latitude sixty-seven degrees fifteen minutes, longitude sixty-nine degrees twenty-nine minutes west. It was found to be an island near the head land of what may hereafter be called the southern continent. On the island, about four miles from the shore, was a high peak, and some smaller ones. On the twenty-first of February, Captain Biscoe landed in a spacious bay, on the main land, and took possession in the name of his Majesty, William IV. It will probably, on further examination, be found that this very land is but a continuation of the same chain of islands which are entirely and undoubtedly an American discovery; but the honor may be snatched from us, and the glory of naming them be lost to the country, should the present expedition fail, to say nothing of the advantages that may be lost in the collection of animal fur. I will not trouble you longer, sir; I may already have taken a liberty in writing to you on the subject. I have too much pride in my country, to suppose for one moment that a few months will not see the South Sea expedition filling to the breeze, and waiting on to national fame. Few hearts in the navy will not beat high with hope of participation, and many—(and I say it with professional exultation)—yea, many noble spirits will be found ready and willing to venture all, and patiently meet the dangers and privations which such an expedition may demand, to fill the measure of their country's glory. Sir, may I venture further, and look to the end of three short years, and foretell the return of the gallant little band crowned with success—rich in knowledge of tropical seas, and bearing the high honor of having unfurled the stars of liberty even to the verge of the southern hemisphere. And with what pride—what glowing, conscious pride, will not you, sir, and the honorable committee to which the subject has been referred, hail the return of that expedition which your efforts pushed forward; bearing, too, that information which is to render the South seas and Pacific ocean more safe to our daring fishermen and other traffickers.

With high hopes for the success of yourself and the honorable committee, and with many sentiments of respect,

I remain, sir, your obedient and humble servant,

SYLVANUS GODON, *Passed Midshipman U. S. Navy.*

To the Hon. DUTEE J. PEARCE, *Member of the Committee on Commerce.*

23d CONGRESS.]

No. 579.

[2D SESSION.]

ON CLAIM OF A CLERGYMAN TO PAY FOR SERVICES AS CHAPLAIN, VOLUNTARILY RENDERED AT THE NAVAL ASYLUM AND NAVY YARD, PHILADELPHIA, HE NOT HAVING AN APPOINTMENT AS SUCH, NOR AN ENGAGEMENT TO BE PAID.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 10, 1835.

Mr. PERKINS, from the Committee on Naval Affairs, to whom was referred the petition of James Wiltbank, reported:

That the petitioner applied to the President of the United States for an appointment as chaplain to the Naval asylum at Philadelphia, and, in answer to his application, the President, on the 30th October, 1832, directed that "when the Secretary of the Navy deems it proper that a chaplain should be appointed to the Naval asylum, the petitioner should be appointed."

A letter was in consequence addressed to him by the Secretary of the Navy, in the following words, namely:

"NAVY DEPARTMENT, October 31, 1832.

"SIR: As it is represented that the services of a chaplain at the Naval asylum near Philadelphia are occasionally necessary, and would probably prove useful as a permanent arrangement, you are hereby authorized to discharge those services. But as no specific appropriation now exists for the payment of such a chaplain, and as the regulations for the Naval asylum and Naval hospital have yet made no provision for the appointment and payment of such an officer, it is to be distinctly understood that till such an appropriation, or till such regulations are made as sanction the payment, you will perform the above services entirely at your own expense, and in your capacity of a private citizen.

"Respectfully, yours,

"LEVI WOODBURY."

"Rev. JAMES WILT BANK, of Philadelphia."

On the 29th of December, 1832, the navy yard at Philadelphia being destitute of a chaplain, the memorialist wrote to the Secretary of the Navy that he would, with his approbation, supply the vacancy. To this application, the Secretary replied as follows:

"NAVY DEPARTMENT, January 3, 1833.

"SIR: In reply to your letter of the 29th ultimo, I have to state that I have no objection to your performing any religious service at the yard which may be agreeable to the commander and yourself; but I regret there is no vacancy in the corps of chaplains, or any funds by which any compensation can be given by the Department.

"Very respectfully, your obedient servant,

"LEVI WOODBURY.

"Rev. JAMES WILT BANK, Philadelphia."

It appears by a certificate of Lieutenant Colonel Miller, dated 21st March, 1834, that the Rev. James Wiltbank, the petitioner, did perform the duties of chaplain, from the 13th January, 1833, to the 30th March, 1834, and the same services are attested by D. D. Baker, lieutenant of the United States marines.

Colonel Miller certifies, on the 13th December, 1834, that the petitioner has officiated at the Navy barracks, from the 5th May, 1834, to the 16th November, 1834, in addition to the former term of service.

The petitioner claims payment for the services rendered, at the rate allowed chaplains in the navy.

The case has been submitted to the Secretary of the Navy, whose report thereon, herewith submitted, and dated 1st February, 1835, refers to the letter of the late Secretary as the only authority existing on the files of the Department, under which Mr. Wiltbank claims compensation for services, which being "neither an appointment nor a promise to make compensation," his account could not be settled by any authority from the Department; but it is admitted by the Secretary that "his claim seems to be an equitable one for compensation for services rendered under circumstances that induced him to believe that he would be remunerated."

There seems to be no doubt that Mr. Wiltbank performed the duties of a chaplain at the navy yard, when the regular chaplain had been ordered to another station; and although no remuneration was promised him, yet the denial by no means precluded his just expectation than an appropriation and authority to pay him would be hereafter made, although none existed at the time.

The claim resolves into one where services allowed and directed to be performed by law have been performed by the petitioner, though without a regular appointment; and the committee see no reason why remuneration should be withheld by the United States. A bill is accordingly reported.

NAVY DEPARTMENT, *February 1, 1835.*

Sir: In reply to your letter enclosing the petition of James Wiltbank, as acting chaplain of the navy, and asking my answer as to the merits of the claim, and the objections to its settlement, I have to state, that the only authority appearing upon the files of this Department, under which Mr. Wiltbank claims compensation for services rendered as chaplain in the navy, is the letter of the Secretary of the Navy, of the 3d of January, 1833, a copy of which is herewith transmitted.

As this letter is neither an appointment nor a promise to make compensation, it is evident that his account could not be settled by any authority from this Department.

His claim seems to be an equitable one for compensation for services rendered under circumstances that induced him to believe that he would be remunerated. These circumstances he has stated in his petition, in which he refers to several documents not upon the files of this Department.

At the last session of Congress, he applied for compensation for his services, but was unsuccessful. He continued, however, to perform services at the navy yard, as before, (under his former permission, it is presumed, as no new permission was given,) until he was superseded by Mr. Grier, a regular chaplain of the navy. That Mr. Wiltbank considered himself authorized to continue in the performance of his duties until he was so superseded, will appear by his letter of the 29th of September, 1834, to this Department, a copy of which was enclosed in your letter, and now returned.

Mr. Grier has been paid his allowances and emoluments as chaplain at the Navy yard at Philadelphia, from 15th July last. Mr. Wiltbank, in his petition, states that he has the assurance of the Secretary of the Navy that his claim shall have his sanction.

This was no more than an assurance that, should I be consulted, I would express a hope, which I now do, that for his services, which I believe had been very faithfully performed, agreeably to his statement, he might receive from Congress an adequate compensation.

The papers enclosed to me are herewith returned.

I am, very respectfully, sir, your obedient servant,

M. DICKERSON.

Hon. JAMES PARKER, *House of Representatives, Washington.*

23d CONGRESS.]

No. 580.

[2d SESSION.]

ON CLAIM OF CAPTAIN JOHN DOWNES, OF THE NAVY, FOR REMUNERATION FOR PRESENTS MADE TO THE ACTIVE AUTHORITIES OF THE SANDWICH AND SOCIETY ISLANDS, AND EXTRAORDINARY EXPENSES CONNECTED WITH THE CRUISE OF THE FRIGATE POTOMAC, IN 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 10, 1835.

Mr. E. EVERETT, from the Committee on Foreign Affairs, to whom was reported the memorial of Captain John Downes, of the navy of the United States, reported:

That, in the summer of 1831, Captain Downes was dispatched, in the frigate Potomac, to perform an arduous and important service on the coast of Sumatra, and afterwards to take command of the United States squadron in the Pacific, and to visit the chief resorts of the American commerce in that ocean. He arrived on the coast of Sumatra in February, 1832, and, in pursuance of the instructions of the government of the United States, inflicted chastisement upon the people of Quallah Batoo for the outrages committed on the American ship Friendship. The beneficial effects of the discreet and vigorous manner in which this important service was performed by Captain Downes are believed, by the committee, to have been felt and acknowledged by our navigators who have subsequently visited the coast. After remaining twelve days near Quallah Batoo, Captain Downes proceeded to Batavia, and thence to Canton, where he rendered an essential service to an American ship, belonging to Providence, by taking out of her six mutineers and supplying their place with six men from the Potomac. From Canton Captain Downes pro-

ceeded to the Sandwich Islands, and arrived at Oahu on the 23d July, 1832. While there, it was in his power to render important services to several American vessels, and to secure the acknowledgment, by the King of those islands, of claims of American citizens against him, to the amount, as the Captain believes, of fifty thousand dollars. While in this quarter, Captain Downes received from the King supplies of animals, fruits, and vegetables, which were served out as fresh provisions to the ship's company, to the great advantage of their health and comfort, after a twelvemonth passed at sea. It was deemed proper by Captain Downes, and, as the committee think, with reason, to make some return for these supplies. Nor was it less desirable to perpetuate the favorable impressions, with respect to the United States, recently made by a visit of a public ship in these seas, and to cultivate a good understanding with the native authorities. Such a course was fully in accordance with the policy and instructions of the government, and highly important in reference to our extensive and growing commerce in the Pacific. To promote these ends, Captain Downes presented the King with swords for a troop of cavalry, with articles of clothing, and other articles of considerable value; and he also gave an entertainment, at his own expense, to the King and other persons high in authority in these islands.

From the Sandwich Islands, Captain Downes proceeded to the Society Islands, and arrived at Tahiti in the month of September, 1832. He here received from the Queen ample supplies of provisions, which were furnished to the ship's company, and, in return, deemed it his duty to present to her, and other persons in authority, articles of considerable value; and also to invite them to an entertainment on board his ship.

Captain Downes arrived on the coast of South America in the month of October. His official reports and dispatches contain the proof of the important services rendered, in the course of his voyage of circumnavigation, to the commerce of the country, to our extensive whale fishery, and to all the interests depending on a good understanding with the native authorities in the Pacific ocean. From the opportunities which the committee have had to acquaint themselves on the subject, they believe that no vessel-of-war has ever been dispatched from the United States to the Pacific which has performed more valuable services.

For the expenditures made by Captain Downes in gratuities to the native princes, the committee consider him entitled to a reasonable indemnity; the rather, as a portion of their value has already been realized in advance to the United States, in the form of provisions received from the islands, and consumed by the ship's company on board of the Potomac, with a consequent saving of an equal amount of the ship's stores. But the nature of the case seems to preclude an accurate statement of the precise amount of the advantage thus accruing to the United States.

In consideration of services of the same kind as those performed by Captain Downes, and in reimbursement of similar expenditures, made for the same objects and to the same authorities, by Captain Finch, in the United States ship Vincennes, two years previous, Congress appropriated five thousand dollars, the whole of which was allowed, by order of the President, to Captain Finch. On examining the report of the Fourth Auditor in reference to the cruise of the Vincennes, its great similarity with that of the Potomac is remarkable; and the same grounds of equity exist for a reasonable reimbursement to Captain Downes of the expenses incurred by him, as above set forth.

The committee have found some difficulty in satisfying themselves as to the measure of the allowance that ought to be made. The nature of the expenditures did not, in all cases, admit of an accurate account being kept, and Captain Downes thought he might safely rely on the willingness of the government to extend the same liberality to him which had been manifested to his predecessor. Among the articles furnished as presents were forty cavalry swords, with their appendages complete; a costly rifle in its case; twenty yards of blue broadcloth, with trimmings; thirty pieces of nankin; 268 pounds of Java coffee; 200 pounds of sugar; seven pieces of silk, and a great variety of articles of clothing of every description; the whole estimated by the Captain to have cost him one thousand and eighty dollars. For the entertainment to the King and persons in authority at the Sandwich and Society Islands, the committee are not prepared to recommend any allowance.

The committee, considering the foregoing facts, and referring to the case of Captain Finch, to whom five thousand dollars were allowed, having deemed the sum of one thousand and eighty dollars, at which Captain Downes estimates his expenses, as exceedingly reasonable, have, accordingly, reported a bill to allow him the payment of that sum.

ON THE CLAIM OF PURSER SAMUEL HAMBLETON, WHO WAS WOUNDED IN BATTLE ON LAKE ERIE IN 1813, WHILE VOLUNTARILY ACTING AS AN OFFICER COMMANDING A DIVISION OF GUNS, FOR ARREARAGES OF PENSION.

COMMUNICATED TO THE SENATE FEBRUARY 12, 1835.

Mr. BLACK, from the Committee on Naval Affairs, to whom was referred the petition of Samuel Hambleton, a purser in the navy of the United States, reported:

That it appears that the petitioner made application for a pension to the Navy Department, which was granted on account of wounds received by Purser Hambleton, September 10, 1813, in the engagement between the American and British fleets on Lake Erie, while acting as a volunteer, commanding a division of guns on board the United States brig Lawrence. The pension was granted to take effect from the 30th August, 1834, the time of application. The petitioner asks to have all arrearages paid from 10th September, 1813, when he was wounded, as though the application had then been made.

The committee are of opinion that it would be impolitic to extend the principle of granting pensions to the payment of arrearages under such circumstances. The government is prepared, and at all times ready to pay pensions to those who are legally entitled to demand them, and can establish their claims

under the provisions of the acts of Congress. It cannot know who is entitled to a pension, or who intends to avail himself of the benefit of the provisions of the law upon that subject, except from its being claimed; and when no application is made, particularly for any length of time, is a fair presumption that it is intended to be waived.

The adoption of this as a general principle will, it appears to the committee, be productive of this beneficial result: it will induce those who intend to avail themselves of the advantages of the law to prefer their claims immediately, while the recollection is fresh, and all the circumstances attending each case distinctly remembered; and will in some degree prevent stale and unmeritorious claims from rising up, years after the event in which they originated has transpired, when many of the attendant circumstances are forgotten. It would not be politic to offer advantages as a premium for delay.

The committee would not wish to be understood, in offering these general reasons, as intimating that Mr. Hambleton's claim to a pension was granted without merit; on the contrary, they highly appreciate the spirit and patriotism which led him to volunteer his services on the important occasion; they place a high estimate on services thus voluntarily rendered, and would without hesitation be in favor of the allowance of his claim, but for the adoption of a principle which might be mischievous in its consequences. They therefore respectfully submit the following resolution:

Resolved, That the prayer of the petitioner be not granted.

23D CONGRESS.]

No. 582.

[2D SESSION.]

ON THE EXPEDIENCY AND ADVANTAGE OF SUBSTITUTING COTTON INSTEAD OF HEMP AND FLAX FOR THE CANVAS AND CLOTHING FOR THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 16, 1835.

NAVY DEPARTMENT, *February 11, 1835.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 2d instant, to send the enclosed letter of the Navy Commissioners, dated the 10th instant, with accompanying papers, from No. 1 to 12, as containing the copies of naval reports and other documents relating to the employment of cotton canvas in the American navy, and the propriety of providing cotton clothing for the seamen, therein called for.

It is very important to the country that cotton should be substituted for hemp and flax in making canvas for our navy, as far as it can be done without injury to the service. Although hemp and flax may be produced here to any extent that may be required, yet, as they are produced more cheaply abroad, we shall continue to import them, as we long have done, for the use of our navy. In case of war, our commerce with countries from which we import these articles may be obstructed, and our supplies cut off.

The production of cotton in this country already exceeds the demand for it from abroad and for domestic consumption. The supply of the article will always exceed the demand, in war or peace; and, in this point of view, it has an advantage over articles indispensable to our navy that we import. Should we, after long experience, ascertain that cotton canvas will answer the purposes of our ships, it will diminish, in a considerable degree, the expense of equipping our navy.

Our citizens have generally found an advantage in substituting fabrics of cotton for those of flax and wool in their wearing apparel, and there can be no reason to doubt that the use of cotton clothing could be introduced into the navy with equal advantage. In this case there would undoubtedly at first be a prejudice against any innovation, on the part of our sailors, but this prejudice would yield, upon the conviction that the change would substantially promote their comfort.

It is believed that an increased use of cotton for canvas and for clothing in our navy may be introduced with great advantage.

I have the honor to be, very respectfully, sir, your obedient servant,

M. DICKERSON.

The Hon. JOHN BELL, *Speaker of the House of Representatives.*

NAVY COMMISSIONERS' OFFICE, *February 10, 1835.*

SIR: In compliance with your endorsement upon the resolution of the House of Representatives, of the 2d instant, calling for information in relation to cotton canvas and cotton clothing, the Board of Navy Commissioners have the honor to transmit, herewith, all that is to be found on the files of this office, numbered from 1 to 12, inclusively.

No. 1 shows the information attained by them up to the 27th of January, 1829, and the opinion of the then board upon the subject.

No. 2, with its enclosure No. 3, furnishes information obtained in 1830, with the opinion of the board upon cotton clothing.

No. 4, with the enclosures Nos. 5, 6, 7, 8, and 9, contains the result of a survey, in 1831, upon the cotton sails of the United States ship Peacock, for which sails special instructions were given to procure canvas of the best quality, as appears by No. 10.

Nos. 11 and 12 contain the results of experiments made in the navy yard at this place, to ascertain the comparative strength of cotton and flax canvas.

I have the honor to be, with great respect, &c., your obedient servant,

JOHN RODGERS.

Hon. MAHLON DICKERSON, *Secretary of the Navy,*

No. 1.

NAVY COMMISSIONERS' OFFICE, *January 27, 1829.*

SIR: Upon the various points embraced in the resolution of the House of Representatives of the 2d instant, (received on the 26th,) the Board of Navy Commissioners respectfully report:

The only results received by this board, of the experiments reported in January, 1826, to be in progress for the purpose of testing the comparative fitness of cotton and hemp canvas for the use of sails in our public ships, will be found in the following extracts of letters from commanding officers:

From Captain Woolsey, March 8, 1827.

"In answer to your letter of the 20th of December, relating to the cotton main topsail, I have to remark, that it had lain in store a long time at Key West before it was received on board the Constellation; one of the middle cloths, near the head of the sail, was damaged in store, and had soon to be mended, but the rest of the sail has had a fair test in all weathers, is now bent, and still continues good. For the West India service, I think canvas of that description as good as hempen, and for all the light sails I should think cotton equal in all respects to hempen in any climate."

From Captain Wilkinson, of the John Adams, of February 5, 1857.

"In reply to your letter of the 21st of December, which I this day received, I had only a main topsail of cotton; that was bent at Norfolk in March last, and has been in constant use nearly the whole time. My ship has been actually at sea 240 days, and sailed 18,587 miles in the above period, including the hurricane months, which were excessively boisterous, and this ship requiring the main topsail, it was always carried as long as practicable. The injury which topsails sustain from frequent reefing, &c., is well known to the Commissioners. I had the above-mentioned topsail middle-stitched, to strengthen the sewing, which had given way in many places, and I now pronounce it as good as it ever was, having this day examined it minutely to enable me to make this report. Cotton sails hold more wind, are much more pliable, and easily handled, and, upon the whole, I think highly of them for square sails."

From Commodore Warrington, October 7, 1826.

"From what I have seen of that sail, (the one reported on by Captain Wilkinson,) I am inclined to think favorably of the article for sails, and to believe we have no cause to fear its greater combustibility than canvas made of hemp; it stands flapping and chafing as well, if not better, than sails commonly do of other materials.

"Other experiments upon the subject of cotton canvas have been instituted, but the results have not yet been reported.

"As to the comparative *expense* of canvas made of hemp and cotton, so far as regards the *first cost*, that of hemp or flax continues as stated in our letter of the 28th January, 1826, while that of cotton has fallen. Their relative prices may now be considered as follows:

No. 1. Flax, 47½ cents per yard.	Cotton, 41 cents per yard.
No. 2. Flax, 43¾ cents per yard.	Cotton, 39 cents per yard.
No. 3. Flax, 42½ cents per yard.	Cotton, 37 cents per yard.
No. 4. Flax, 41¼ cents per yard.	
No. 5. Flax, 40 cents per yard.	Cotton, 34 cents per yard.
No. 6. Flax, 38¾ cents per yard.	
No. 7. Flax, 37½ cents per yard.	Cotton, 32 cents per yard.
No. 8. Flax, 36¼ cents per yard.	

"In this scale, no prices are fixed for Nos. 4, 6, and 8 of cotton canvas, because we have not recently contracted for any of those numbers. They no doubt bear prices proportionate to those of the other numbers, and may be stated as follows: No. 4., 35½ cents; No. 6, 33 cents; and No. 8, 30 cents per yard.

"The use of cotton canvas for boat sails, awnings, hammocks, hammock cloths, wind sails, bags, boat and boom covers, and tarpaulings, is so far approved, that it is now generally used for these purposes, and it may be used with advantage, it is believed, for *light* sails generally, but its use for topsails and courses, particularly for large ships, would be attended with so many hazards to the safety of the ships, that the board would not take upon itself the responsibility of substituting it for hemp canvas for such purposes."

I have the honor to be, &c.,
HON. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

JOHN RODGERS.

No. 2.

NAVY COMMISSIONERS' OFFICE, *September 13, 1830.*

SIR: The Commissioners have received your letter of the 11th instant. Frocks, trowsers, and banyans, made of cotton, have, at different periods, been used in the service, but objections were made to it. Washing it in salt water turns it yellow, and when scrubbed with a brush (the usual mode of washing at sea,) it wears out quickly.

If dyed in indigo, it would probably cost more than duck made of flax. This, however, can be ascertained by inquiries of the manufacturers of cotton. It appears to the Commissioners that blue would not be a suitable color for shirts. It would not have the same cleanly, wholesome appearance that white has.

If, however, you should think proper to gratify Commodore Elliott, in clothing the crews of the West India squadron with cotton dyed blue, the Commissioners will make, in their next contracts, arrangements to carry your views into effect.

I have the honor to be, &c., &c.,
HON. JOHN BRANCH, *Secretary of the Navy.*

JOHN RODGERS.

No. 3.

Extracts from communications from Commodore Elliot, Captain McCall, and Lieutenant Beerum, to the Secretary of the Navy, and transmitted by him to the Board of Navy Commissioners on September 11, 1830.

From Commodore Elliott.

UNITED STATES SHIP PEACOCK, *Pensacola*, August 23, 1830.

On an examination of that part of the report of Master Commandant McCall, of this ship, and of Lieutenant Boerum, of the *Erie*, you will perceive that the experimental sails, manufactured of cotton, are in the full force of successful operation; and I will take occasion to suggest the propriety of having cotton for the wearing apparel, manufactured of the same materials, twilled, and dyed of a good indigo blue for shirts, trowsers, and jackets; this cannot fail to be acceptable to them, and equally healthy in a climate which requires a better absorbent material than linen.

From Captain McCall.

UNITED STATES SHIP PEACOCK, *Pensacola*, August 23, 1830.

I have the honor to inform you that this ship has been now in commission twelve months, during which time she has been kept almost constantly at sea, and her sails, which are composed of cotton canvas, have been in constant use during that time, having stood the test of the north winds on the coast of Mexico during the last winter, which are very severe, and often very violent, and, during the rainy summer months, the squalls are frequently severe, but of short duration. They are in a trifling manner mildewed, and a little chafed.

From Lieutenant Boerum.

UNITED STATES SHIP *ERIE*, *Pensacola*, August 25, 1830.

With regard to our cotton sails, I have to inform you, sir, that I am much pleased with them, and, so far as my experience may avail, I think they will stand every test. We found as little difficulty in man-aging them in heavy, wet weather, as the other sails, and that they hold better wind, nobody will deny.

No. 4.

NAVY COMMISSIONERS' OFFICE, *May 25*, 1831.

SIR: The Commissioners of the Navy respectfully submit copies of a letter from Commodore Morris, dated the 20th instant, with other papers therein referred to, upon the subject of the sails of the *Peacock*, which were made of cotton canvas.

It was the pleasure of the late Secretary of the Navy to extend the use of cotton canvas, hence the board does not feel itself at liberty to give to Commodore Morris a reply which might conflict with that direction; but the opinion expressed by the surveying officers, concurring as they do with that heretofore entertained and expressed by the board upon the same subject, appears to justify a reference of the question to you, that you will enable the board to inform Commodore Morris whether the use of cotton canvas is to be continued or not.

For certain purposes (say for bags, awnings, wind-sails, hammocks, hammock cloths, and the lighter sails of the vessels-of-war,) cotton canvas may, it is believed, be used without disadvantage to the service; indeed, for many years it has been used for most of these purposes, but the Commissioners could not take upon themselves the responsibility of recommending cotton canvas for the courses, topsails, or other principal sails of any vessel-of-war larger than a schooner.

I am, &c.,

JOHN RODGERS.

Hon. LEVI WOODBURY, *Secretary of the Navy.*

No. 5.

NAVY YARD, *Charlestown*, *May 20*, 1831.

SIR: In examining the cotton sails of the *Peacock*, preparatory to the alterations required by a change of masts and spars, they were found to be so much more defective than their general appearance indicated, that I was induced to order a particular survey upon them; and as they had been exposed to considerable service, and seemed to offer a favorable opportunity of comparing them with other canvas, I directed the same surveying officer to obtain particular information from the officers of the ship, as to the time they had been used, and general character of the weather; and to report their opinion of its value for naval purposes, compared with flax canvas.

I enclose a copy of their report for the information of the board.

As the surveying officers consider the cotton courses, topsails, and jib to be unworthy of repair, I have to request your instructions whether they shall be replaced with sails made from cotton or from flax canvas.

Very respectfully, &c.,

C. MORRIS.

Com. JOHN RODGERS, &c., &c.

No. 6.

NAVY YARD, *Charlestown, May 13, 1831.*

GENTLEMEN: You will carefully survey and examine the sails of the United States ship Peacock, and report to me their condition, specifying such as require and are worthy repairs, and such as are unfit for service.

You will also make a separate report of the state of the sails which are made from cotton canvas, specifying particularly its comparative strength, and all other facts which you can ascertain in relation to its advantages or disadvantages for use in the navy, when compared with canvas made from flax, together with your opinions of the propriety of using it generally, made up from an examination of the sails, and the information you may be able to obtain from the officers of the ship.

Respectfully, &c.,

C. MORRIS.

Capt. JOHN DOWNES, C. W. MORGAN, and Master Comdt. C. S. McCauley. *Present.*

No. 7.

SIR: In compliance with your order of the 13th instant, we have surveyed the sails of the United States ship Peacock, and having carefully examined the same, we find that the following cotton sails are so rotten as to be unworthy of repairs, viz: one main course, one main topsail, one fore course, one fore topsail, one mizen topsail, one jib.

We also find the following cotton sails to be injured, but to be worthy of repair, viz: one main topgallant sail, one fore topgallant sail, one mizen topgallant sail, one fore royal, one main royal, one mizen royal, one spanker, one fore topmast staysail.

And we find the following cotton sails to be in good serviceable order, viz: one fore spencer, one main spencer, one flying jib, one middle staysail, one topgallant staysail, one royal, two lower steering sails, two fore topmast sails, two fore topgallant sails, two fore royal sails, two main topmast sails, two main topgallant sails, two main royal sails.

We find also the following sails, made from flax canvas, to be strong and serviceable, but the roping to be so heavy that we recommend that it be changed: one foresail, one fore topsail, one fore top gallant sail, one royal, one mainsail, one main royal, one mizen topsail, one mizen topgallant sail, one mizen royal, one spanker, one main topsail, one main topgallant sail, one main jib, one flying jib.

And we find one fore storm staysail of flax canvas a little worn, but worthy of repair.

We are, &c., &c.,

JNO. DOWNES, *Captain.*
CHAS. W. MORGAN.
C. S. McCAULEY.

To Com. CHARLES MORRIS, &c., &c.

No. 8.

U. S. NAVY YARD, *Charlestown, Mass., May 14, 1831.*

SIR: In further compliance with your instructions of the 13th instant, having reference to a comparison between the cotton and flax cloth, together with the propriety of its general use in the navy, in which you wish the undersigned to be governed in some measure in the present survey of the Peacock's cotton sails, and the information obtained from the officers of the ship, they report:

That, agreeably to the report of the first lieutenant, the ship has been about seventeen months on the West India station, and two hundred and thirty-seven days at sea, using but a single suit of cotton sails. During the cruise, the topsails, courses, jib and spanker, have undergone extensive repairs; and, if sound in the first instance, we are of opinion that they are far inferior to the flax cloth sails usually worn by our ships-of-war. Such has been the decay of all the cotton sails continued in use, that they may, with ease, be torn between the thumb and fingers in any direction.

They are further of the opinion that, with equal numbers or sizes of canvas, it would require double the power to tear the flax cloth; which, besides being very soft and pliable, does not absorb half the weight of water of the other; while the cotton, on the contrary, is stiff and heavy, and the sails difficult to handle, especially in wet weather, which requires a much greater force at all times to manage. Oil or grease of any kind have a very destructive tendency upon cotton cloth; this, together with its combustible qualities, may be urged as serious additional objections, both in reference to discharging firearms, or when accidentally stowed away wet.

Doubtless, one-half of the canvas used in the navy might be furnished of cotton, viz: for boats' sails, awnings, white hammock-cloths, hammocks, bags, men's clothing, and covers of every description. It might also be used for schooners' sails, and partially on sloops-of-war. But it must be palpable to men acquainted with heavy ships-of-war, or to disinterested persons who know anything of the subject, that it would be jeopardizing a ship of the line, or a frigate, to entrust it to cotton canvas.

We are, &c., &c.,

JNO. DOWNES.
CHAS. W. MORGAN.
C. S. McCAULEY.

To Com. CHARLES MORRIS, *commanding Naval Station, &c.*

No. 9.

UNITED STATES SHIP PEACOCK, *May 21, 1831.*

SIR: In compliance with your order, I have to report that the whole suit of cotton sails were first bent in New York on the 18th September, 1829, and have been in constant use ever since, with the exception of two months and a half at Pensacola, during the last summer, when they were unbent.

The weather has been unusually mild, excepting the first five months the sails were in use; during that time the ship was in the Gulf of Mexico, and experienced several northers, but in every instance we have had sufficient warning to get under snug sail before the gale became severe; we have no time been caught with much sail upon her in a heavy squall of wind.

The ship has been at sea during her cruise two hundred and thirty-seven days; there has been no flax canvas used, with the exception of the fore storm staysail, and that because we had none of cotton.

I have the honor to be, sir, very respectfully, your obedient servant,

G. J. VAN BRUNT.

Com. CHARLES MORRIS, *commanding U. S. Navy Yard and Station, Charlestown, Mass.*

No. 10.

NAVY COMMISSIONERS' OFFICE, *August 20, 1829.*

SIR: The Commissioners of the Navy request you will be pleased to apply to Mr, Isaac McKim to ascertain where the best cotton canvas can be procured, and, on obtaining the necessary information, purchase and ship the quantity specified in the enclosed bill to Commodore Chauncey, at New York.

This canvas is to be charged to "repairs," and you will send a bill of its cost to this office.

I am, very respectfully, &c.,

JOHN RODGERS.

ISAAC PHILIPS, Esq., *Navy Agent, Baltimore.*

[23D CONGRESS.]

No. 583.

[2D SESSION.]

ON CLAIMS FOR ARREARS OF NAVAL PENSIONS, AND THE NECESSITY OF CONFINING THE ALLOWANCES TO THE ORIGINAL OBJECTS OF THE NAVY PENSION FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1835.

Mr. GRAYSON, from the Committee on Naval Affairs, to whom were referred the petitions of Mary McPherson, Mary W. Rose, Eliza C. Porter, and others, praying arrears of pensions granted at various times, reported:

That it is not expedient, in their opinion, that the prayer of the petitioners be granted.

As this decision of the committee depends rather on a general principle, applicable to all similar cases, than to anything peculiar to the petitions referred, they will submit, as briefly as they are able, a few remarks on the objects and application of the navy pension fund.

This fund was established by the law of April, 1800. It consisted of money accruing to the Treasury from the sales of prizes. The objects of its creation were: First. To provide pensions for officers, seamen, and marines in the service of the United States, disabled in the line of their duty. Second. From any surplus remaining after such provision, to make further provision for the same classes of persons. Third. To provide for those who, although not disabled, may merit, by their bravery or long and faithful services, the gratitude of their country. For the sufficiency of the fund, so far as concerns the first class of cases provided for, the faith of the nation is formally pledged.

The purposes of the law of 1800 have been accomplished partially only. Provision has been made for the first and second classes, but nothing has been done in favor of the third, except perhaps in the single case of Captain Tucker. Yet this third class of persons provided for by the law, consisting of those who have performed acts of distinguished courage, and of deserving officers and seamen whose age makes it desirable, perhaps necessary, for them to retire, is one which well merits the provision made for them by the law. Why, then, has the benefit of the pension fund not been extended to them? The only cause that can be assigned is, the application of the fund to purposes not within the original provisions of the law.

By laws passed at various times, the navy pension fund has been made to embrace, first, the widows of officers killed or dying in consequence of wounds received in the service of their country, then to the widows and orphans of seamen and marines; and finally, by the law of 1817, to the widows and orphans of those who should die of disease or casualty while in the line of their duty. In some few cases, the benefit of the fund has also been given to the mothers of a few seamen killed in battle. This diversion

of the law from its original purpose gave the advantages of its provisions to such a large number of persons as threatened to cut off, altogether, the original objects of the act of 1800. The law of 1817 was consequently repealed by that of 1824.

But again, the claim for arrears of pensions granted from time to time, if successful, would perhaps produce the same effects; and the Committee on Naval Affairs, in their report of 1831, recommended that pensions should commence not more than six months previous to the completion of the proof upon which the pension should be granted. Every reason that suggested the law of 1824, and the report of 1831; is equally strong now for preventing the extension of the benefits of the navy pension fund, to the injury or exclusion of the original objects of the law. The present applications are only the forerunners of others, to satisfy which, the fund would be inadequate.

If it be thought expedient to establish a fund for the payment of the arrears claimed, it would be better to meet the subject fairly by proposing to draw the money from the Treasury, and not from a fund on which it was not originally intended that any pensions, of the description paid to the petitioners, should be imposed.

The committee are, therefore, of opinion that these claims, and all others for arrears of pensions, ought not to be granted, as they would lead to a vast number of the same description, and more than exhaust the income of the fund.

23d CONGRESS.]

No. 584.

[2D SESSION.]

STATEMENT SHOWING THE PAY, RATIONS, AND ALLOWANCES, AND THE IRREGULAR ALLOWANCES, TO ALL COMMISSIONED OFFICERS OF THE NAVY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1835.

NAVY DEPARTMENT, *February 7, 1835.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 12th ultimo, to send a report, dated the 5th instant, from the Fourth Auditor of the Treasury, with statements A and B, therein referred to as containing the information as to the sums allowed for pay, rations, house rent, fuel, candles, stationery, furniture, commissions, &c., to the officers enumerated in the resolution.

I have the honor to be, very respectfully, sir, your obedient servant,

M. DICKERSON.

Hon. JOHN BELL, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 5, 1835.*

SIR: In compliance with your letter of the 15th ultimo, and the accompanying resolution of the House of Representatives, I have the honor to enclose herewith:

1. A statement exhibiting the regular pay, rations, and allowances, of all commissioned officers of the navy, at sea and on shore, according to existing laws and regulations, marked A.
2. A statement exhibiting the irregular allowances to all commissioned officers of the navy, according to existing regulations, marked B.

These two papers are believed to contain all the information asked for by the House of Representatives in their resolution.

Very respectfully, your obedient servant,

AMOS KENDALL.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

A.

Statement exhibiting the pay, rations, and allowances of each grade of officers in the navy of the United States.

Grades.	Pay per month.	Pay per annum.	Number of rations per day.	Amount of rations per annum.	Cabin furniture.	House rent per annum.	Candles per annum.	Cords of wood per annum.	Commutation price of wood, Sept., 1833, for year ending Sept. 30, 1834.	Value of wood at commutation price, from Oct. 1, 1833, to Sept. 30, 1834.	Servants, at \$8 per month and one ration per day.	Servants, at \$6 per month and one ration per day.	Amount of pay for servants per annum.	Amount of rations for servants per annum.	Stationery per annum.	Extra allowance per annum.	Total amount received per annum.

1835.]

PAY, RATIONS, AND ALLOWANCES.

REMARKS.

1. The following officers, in addition to those noted in the foregoing "statement," when on *furlough*, receive half their *monthly pay* only, without *rations*, viz: sailingmasters, chaplains, pursers, passed midshipmen, midshipmen, teachers of naval schools, boatswains, gunners, carpenters and sailmakers.

2. Masters commandant, commanding a recruiting rendezvous, receive the same pay, rations, and allowances as when attached to a navy yard.

3. No allowance is made to officers on account of servants' "clothing."

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 5, 1835.*

B.

Irregular allowances.

Chamber money, at the rate of two dollars per week, is allowed to officers who are compelled to remain at places where no quarters are provided for them, except officers regularly attached to navy yards, for whom no house rent is provided in the estimates.

Allowances, at the following rates, are made to all officers detained at any place other than their station or residence, upon surveys of yards or vessels, courts or boards of examination, viz:

To judge advocates, not of the navy.....	\$10 00 per day.
To judge advocates, being of the navy.....	5 00 per day.
To captains and masters commandant.....	3 00 per day.
To surgeons, lieutenants, and citizens.....	2 00 per day.
To all others.....	1 50 per day.
To provost martial of a court, in special cases.....	1 50 per day.

An additional allowance of ten dollars is made to judge advocates, not of the navy, for every fifteen pages of the record and other copying, and five dollars if of the navy.

A commission of two and a half per cent. is allowed to the navy agent at Norfolk, on all disbursements for the Navy hospital.

Pursers are allowed a commission of five per cent. on the cost of clothing distributed to the crew, and on the sales of dead men's clothes; twenty-five per cent. on the cost of articles of secondary necessity; and fifty per cent. on luxuries, such as tea, coffee, sugar, and tobacco, furnished to officers and crew.

The commission is increased five per cent. in vessels of twenty guns, and ten per cent. in vessels under twenty guns.

A purser acting as special agent in the Pacific squadron is allowed \$2,500 per annum, in addition to his regular pay and rations, together with his actual expenses while necessarily acting on shore. He is empowered to employ a secretary at \$1,000 per year, or sub-agents at the same cost, and payment of actual expenses.

An extra allowance of one dollar and fifty cents per day is made to lieutenants, surgeons, and assistant surgeons, on duty at recruiting rendezvous.

The necessary sick expenses of officers in actual service, deducting one-half their pay and rations, are allowed when said officers are in situations not to receive the attention of naval surgeons or assistant surgeons.

Traveling expenses are allowed at the following rates, viz:

To captains, masters commandant, and judge advocates, by land, fifteen cents per mile; by water, ten cents; to all others, by land, twelve cents; by water, eight cents. The distance on the nearest mail route is taken as the basis; the actual distance necessarily traveled by land on said route is allowed as land travel, and the rest of the mail distance as water travel, whatever may be the actual distance traveled by water.

The actual cost of transportation is allowed to officers returning from distant service under orders, or upon sick ticket, when they have no opportunity to return in a public vessel.

In special cases, where an officer is in command of a vessel or squadron at a distance from any naval station, and is obliged to raise funds for his ship by drawing on the Department, a commission of one per cent. is allowed on his bills drawn and negotiated for such a purpose.

The actual expenses of officers necessarily detained on shore in foreign countries, upon the public service, are allowed when duly vouched.

Officers employed in surveying harbors, bays, &c., have been generally allowed one dollar and fifty cents per day, and in some instances three dollars per day.

Lieutenants employed on the survey of the coast, under Mr. Hassler, are allowed two dollars per day extra, and midshipmen one dollar.

Surgeons and assistant surgeons, doing temporary hospital duty at naval stations, in times of much sickness, as upon the prevalence of the cholera, have been allowed, for the time being, house rent, fuel, &c., the same as regular hospital surgeons.

TREASURY DEPARTMENT, *Fourth Auditor's Office, February 5, 1835.*

[24TH CONGRESS.]

No. 585.

[1ST SESSION.]

ANNUAL REPORT OF THE SECRETARY OF THE NAVY, SHOWING THE CONDITION OF THE NAVY IN THE YEAR 1835.

COMMUNICATED TO CONGRESS, WITH THE PRESIDENT'S MESSAGE, DECEMBER 8, 1835.

NAVY DEPARTMENT, *December 5, 1835.**To the President of the United States:*

Sir: In presenting to your consideration the condition of our navy for the past year, it affords me great satisfaction to state that all the available means for its improvement have been successfully applied, and that its operations in protecting our commerce, although inadequate to the exigencies of that great and growing interest, have been highly honorable to the officers serving upon our naval stations at home and abroad.

Since my report of the 29th November, 1834, the ship of the line *North Carolina* has been thoroughly repaired in her hull, has been lately taken out of dock, and may be fitted for sea in eighty days.

The repairs of the ship of the line *Independence*, now in dock at Boston, have been commenced, and are progressing with great dispatch. The frigates *Constitution* and *Constellation* have been equipped and sent to sea. The frigate *United States* has been prepared, and is ready for the reception of a crew. The hull of the frigate *Columbia*, at Washington, has been so nearly completed, under the law for the gradual improvement of the navy, that she may be launched in the course of this month. The sloops-of-war *Peacock* and *Vandalia* have been equipped and sent to sea. The sloop-of-war *Warren* is taking in her crew, and will sail in a few days. The sloops-of-war *Concord* and *Boston* have been prepared and are ready for the reception of their crews; and the *Lexington* will be equally prepared in a few weeks.

The repairs of the sloops-of-war *Falmouth* and *Natchez*, and of the schooner *Grampus*, have been recently commenced, and it is believed that in a few weeks they may be ready for the reception of their crews.

The building of a store-ship, authorized by a law of the 30th of June, 1834, has been commenced at Philadelphia, and a steam vessel has been commenced at New York, but will not be ready for service until some time in the summer of 1836.

The ships of the line *Alabama*, *Vermont*, *Virginia*, *Pennsylvania*, *New York*, and the frigates *Santee*, *Cumberland*, *Sabine*, *Savannah*, *Raritan*, and *St. Lawrence*, are on the stocks, well protected from the weather, and as nearly completed as it is proper they should be, until it is determined to launch them.

For a more detailed statement of the condition of those vessels, as well as that of the ships of the line *Franklin*, *Washington*, *Columbus*, and *Ohio*, and their means of repair, I beg leave to refer to a report of the Commissioners of the Navy Board, herewith submitted, marked K; and for the amount of timber, iron, and other materials procured for the gradual improvement of the navy, I refer to their report, marked L.

The ship of the line *Delaware*, the frigate *Potomac*, the sloop *John Adams*, and the schooner *Shark* have been employed in the Mediterranean during the last year. The frigate *Constitution* sailed for that station on the 19th of August last from New York. The frigate *United States* returned from the Mediterranean on the 10th of December last. The *Delaware* is ordered to the United States, and is daily expected.

On the West India station the sloops-of-war *Vandalia*, *St. Louis*, and *Falmouth*, and the schooners *Grampus* and *Experiment*, have been employed. The *Vandalia*, after undergoing considerable repairs, sailed from Norfolk on the 14th of January last, to resume her station in the West Indies. The *Falmouth* returned from that station on the 1st of August last, and is now at Norfolk; the schooner *Experiment* also returned from that station in April last, and has been employed on the survey of the coast. The *Grampus* returned to Norfolk on the 23d of September last, is undergoing repairs, and will soon resume her station in the West India squadron. The frigate *Constellation* sailed for the West Indies on the 8th of October last from Norfolk.

The sloops-of-war *Natchez*, *Erie*, and *Ontario*, and the schooner *Enterprise*, composed the squadron on the Brazil station. The *Natchez* has lately returned to the United States, having arrived at New York on the 3d of October. The schooner *Enterprise* has been detached from that station, and ordered on a cruise to the East Indies; she sailed in company with the sloop *Peacock* from Rio on the 12th of July last, the *Peacock* having sailed from New York for that station on the 23d of April; in June last, the *Ontario* was ordered to the coast of Africa, with instructions to visit the Island of *St. Thomas*, *Bassa Cove*, *Cape Palmas*, and *Mesurado*.

The vessels which have been employed in the Pacific are, the frigate *Brandywine*, sloops *Fairfield* and *Vincennes*, and the schooners *Dolphin* and *Boxer*. The *Vincennes* has been ordered home by the way of the East Indies, and the *Fairfield* has lately arrived at Norfolk.

The events of the last year furnish much additional evidence that our naval force in commission is not adequate to the protection of our rapidly increasing commerce. The frequent insurrections and revolutions in the governments of South America and of Mexico endanger our merchant vessels upon the Atlantic as well as Pacific ocean, and in the Gulf of Mexico, and even upon our own coast.

Influenced by a knowledge of these circumstances, and in accordance with your suggestions, I have asked and obtained from the Board of Navy Commissioners an estimate of the increased annual expense of adding two frigates, three sloops-of-war, and four steam vessels to our force now in commission, to be employed upon foreign stations as well as upon our own coast.

By their report it appears that such an addition to our vessels in commission would require annually an appropriation of four hundred and seventy-eight thousand dollars: but as not more than one steam vessel can be finished in the next year, the appropriation wanted for 1836 for this purpose need not exceed four hundred and thirty-four thousand dollars. The sum is small compared with the benefits that may be fairly calculated to result from its expenditure in affording protection to our commerce, independently of the advantage to the efficiency and discipline of our navy, by calling into active service a large number of officers now unemployed.

A large portion of the entire expenditure for the additional force proposed must be incurred, even if it should not be called into service.

The vessels necessary for such increase of force (except the steam vessels) will, if not so employed, remain at our wharves, affording no benefit to the country, and suffering more from decay than they would do if at sea; and a large portion of the officers necessary for their command, although earnestly asking for service, will remain on shore, receiving pay, but performing no duty; adding nothing to their professional skill, but losing their habits of discipline, which can only be preserved by constant exercise.

Should the proposed increase of force be sanctioned by Congress, we shall have in commission, in the year 1836, one ship of the line, six frigates, fourteen sloops-of-war, five schooners, and one steam vessel, with an addition of three steam vessels in succeeding years, as soon as the same can be prepared, the estimated expense of which appears by the report of the Commissioners, marked D, 1.

Appropriations for the gradual improvement of our navy yards are next in importance to the like appropriations for the gradual improvement of our navy. The necessity of more ample means for protecting our shipping, as well as the immense amount of public property in the different yards, must be apparent to every one who is acquainted with the subject; and the expediency of increasing the facilities for constructing and repairing our ships is not less apparent. Moderate appropriations, in addition to those that are usual, for three or four years, would accomplish those important objects. In accordance with this view of the subject, I submit a letter of the Board of Navy Commissioners, marked No. 2, together with an estimate, marked E 1, of the probable cost of the proposed improvements, which amounts to three millions five hundred thousand dollars, including that of the dry dock at New York, amounting to nine hundred thousand dollars.

A national foundry for the purpose of casting cannon, shot, and shells, as well for the army as the navy, was a subject of discussion before the two Houses of Congress at their late session, but was postponed in consequence of the shortness of the session and the pressure of more urgent business. No doubt can be entertained of the importance of such an establishment, when we consider the great improvements made in the fabrication of small arms at the different armories of the United States.

In our future wars, especially on the ocean, we must rely much upon the excellence of our cannon. The bursting of a single cannon may cause, as it often has done, the loss of a battle. The disasters from this cause, that occurred during the revolutionary as well as the late war, admonish us to guard against like disasters in future, which, it is believed, may be avoided by the means proposed.

It is only by a long series of experiments, and those attended with great expense, that we can hope to discover the best material for making cannon which our country affords, and the art of fabricating them with the most perfect accuracy and efficiency. Believing that such discoveries and improvements are attainable, and that they would be highly important in the army, and still more so in the navy, I must be permitted to express a hope that the subject will be revived at the approaching session of Congress, and that a plan of a national foundry will be adopted.

The importance of rearing a body of seamen, by enlisting into the service of our navy boys over the age of thirteen and under the age of eighteen, until they should arrive at the age of twenty-one years, has already attracted the attention of Congress. At the last session a bill for this purpose was introduced into the Senate. Every year the importance of this measure becomes more apparent. Able seamen are much wanted, while there are boys enough in our cities, leading lives of idleness and vice, for want of employment, who, if thus enlisted, under judicious regulations, would, in a few years, afford us a sufficient corps of able seamen to man our navy, and, in the meantime, render services to their country worth their pay.

The compensation to be given, by the late pay bill, to professors of mathematics, is such as to command the services of those who are every way competent to perform the duties of this station. A regulation is adopted to appoint none to this station who shall not receive a certificate of competency, after submitting to a rigid examination by scientific gentlemen who shall be appointed for that purpose. This will be of great advantage to the young officers of the navy; and if a large portion of them should be called into active service, by employing an additional naval force for the protection of our commerce, they will be enabled to perfect themselves in seamanship, the most important part of their education, and which can be acquired only at sea; but to make them accomplished officers something more is required than can probably be derived from those sources. A knowledge of military tactics, of engineering, and drawing, is deemed indispensable in the education of an officer of the army, and which ought to be deemed equally so in the education of a naval officer. So much of chemistry, mineralogy, geology, and natural history, as is taught at the Military academy, although not absolutely essential to the military or naval officer, yet is decidedly more important to the latter than to the former.

If provision should be made for the admission of a class of one hundred midshipmen at a time at the academy at West Point, to pursue such studies as should be prescribed by the Navy Department, and to be succeeded at the end of one or two years by another class, all, in their turn, might receive the advantage of this course of studies, highly necessary to their education as accomplished officers of the navy, and at a small expense; as the midshipmen, while at the academy, would receive no more pay than if attending the schools at the navy yards, or if waiting orders.

A national observatory, although not immediately necessary to the defence of our country, is remotely so; and considered with reference to the bearing it would have upon our navy, our commerce, and scientific pursuits, it assumes an importance worthy the consideration of Congress.

It is hardly to be doubted that we shall, at some future period, make such an establishment, and I will venture to express an opinion that no time can be more propitious for such an undertaking than the present. It would not be attended with any great expense. It is necessary now to employ an officer of science to keep our maps and charts, to regulate our chronometers, and to preserve all mathematical and philosophical instruments required for the naval service, and buildings are necessary for these purposes.

These duties would properly devolve upon the superintendent of an observatory, and the buildings necessary to such an establishment would be amply sufficient for the preservation of our maps, charts, and instruments.

Under the act concerning naval pensions and the navy pension fund, eighteen invalid pensions have been granted since my last report, making the number on the roll three hundred and five, and the annual amount required to pay them \$24,944; and forty-one widows' pensions have been granted, making the number on the roll one hundred and fifty, and the annual amount necessary to pay them \$32,594.

The annual charge, therefore, according to the present roll, will amount to \$57,538.

It is not probable that all on the list will claim; but as the death of a pensioner is not officially known except when the account is settled by his or her representative, the number is made out from the rolls in this Department. Some have not claimed for two, three, four, and five years, but, as they are not known to be dead, their names are still continued on the rolls. The receipts and expenditures on account of the fund, to the 30th September last, will be seen in the statement marked M, and the amount and description of stocks belonging to the fund in the statement marked M, 1.

Under the act of the 19th June, 1834, respecting pensions chargeable to the privateer pension fund, since my last report, six widows have received five years' pension each, amounting to \$2,400; more than five years having elapsed since the date to which they were last paid. Two invalid pensions have also been granted, making the number on the roll thirty-six, and the annual amount required to pay them \$3,184.

The account of stock, and of receipts and expenditures, will be seen in statement N.

The condition of the navy hospital fund, including receipts and expenditures, will appear in statement O. The annual receipts are much greater than the disbursements; and, as they will probably continue to be greater for several years, I respectfully repeat the suggestion in my last report, that authority be given to vest the surplus in some well secured stock, for the benefit of the fund.

Under the act of 30th June, 1834, the widows of all officers, seamen, and marines, who have died in the naval service since the first day of January, 1824, or who may die in said service, by reason of disease contracted, or of casualties by drowning or otherwise, or of injuries received while in the line of duty, are entitled to pensions equal to half the amount of the pay to which their husbands respectively were entitled at the time of their deaths.

The act of the 3d of March last, "to regulate the pay of the navy of the United States," and which increased the pay of many officers, is silent as to pensions. A difficulty arises in ascertaining the proper amount of pension to be allowed to widows of naval officers whose pay has been increased by this act. The pay of a captain in command of a squadron was increased to four thousand dollars a year; when on other duty, to three thousand five hundred dollars; and when off duty, to two thousand five hundred dollars. A corresponding increase of pay is made to other officers.

In the case of a captain dying when in command of a squadron on a foreign station, a question arises whether his widow should receive a pension to the amount of six hundred dollars a year, to which she would have been entitled if this act had not passed, or whether she shall receive half the amount of pay to which her husband was entitled at the time of his death, as a captain commanding a squadron, as captain on other duty, or as a captain off duty.

After much deliberation, it has been decided to allow a pension in such cases of \$1,135.62 a year, being the half pay of a captain commanding a squadron, reduced by the amount of \$1,728.75, equal to his allowance before this act. The salary of four thousand dollars a year to a captain in command of a squadron is in lieu of former pay and emoluments. Those emoluments, excepting one ration a day, amounted to \$1,728.75, which sum, deducted from \$4,000, leaves \$2,271.25, the half of which, \$1,135.62, is considered as the proper amount of the widow's annual pension.

Questions on pensions more complicated than this may arise under this act, especially in the case of the deaths of surgeons and assistant surgeons, whose grades of pay are more numerous than those of captains.

The necessity of an explanatory act, to obviate these difficulties, is respectfully suggested. By the act of Congress of the 10th July, 1832, it is required that any surplus money belonging to the navy pension fund shall be vested in the stock of the Bank of the United States. The amount so vested is \$619,000, and this Department has no authority to make a different investment of money without the further action of Congress.

Previously to the passing of the act of the 30th of June, 1834, for the better organization of the United States marine corps, double rations had been allowed to the commandant of that corps, and to the officers of the same, commanding at the Navy yards at Portsmouth, Boston, New York, Philadelphia, Washington, Norfolk, and Pensacola, and to the senior marine officers in the squadrons in the Mediterranean, the West Indies, the Brazilian coast, and the Pacific ocean, all receiving the sanction of Congress by their appropriations. By this act, the officers of the marine corps are to receive the same pay, emoluments, and allowances as are given to officers of similar grades in the infantry of the army.

The act of the 16th of March, 1802, fixing the military peace establishment of the United States, authorizes allowances, to the commanding officers of each separate post, of such additional number of rations as the President of the United States shall from to time direct.

These provisions of this last act were continued by an act of the 3d of March, 1815, fixing the military peace establishment.

The paymaster of the marine corps made payments for double rations to officers heretofore receiving the same, from the 1st of July to the 30th of September, 1834; but the accounting officers of the Treasury did not think proper to allow the same, inasmuch as the commands of these officers had never been designated as separate stations, agreeably to the rule prescribed for the army. This is a case of difficulty which, it is respectfully suggested, requires the interposition of Congress.

Being still of the opinion expressed in my last report, that the public interests would be promoted by having the marine barracks placed without the navy yards to which they are attached, as early as may be practicable, estimates are submitted for purchasing sites and erecting barracks at places where they are deemed most necessary.

In performance of my duty under the act of the 3d of March last, authorizing the construction of a dry dock for the naval service, in the harbor of New York, or its adjacent waters, I proceeded in May last to the city of New York, where I was met by an able engineer, Loammi Balwin, Esq., whom I had previously engaged to make the soundings and other examinations necessary to a proper selection of a suitable site. After a long and laborious examination, Mr. Baldwin made his report, which has been submitted to your consideration, by which it appears that the proposed dry dock may be advantageously constructed in the Navy yard at Brooklyn. A selection of this place for this purpose is recommended by the consideration that the land occupied as the Navy yard belongs to the United States, and that the public buildings upon it, which are of great value, cannot be abandoned without serious loss.

One difficulty presented itself, which created some delay in making this selection; a building for the purpose of distilling turpentine had been erected so near the navy yard as greatly to endanger the public property; other buildings for similar purposes, or for purposes equally dangerous, might be erected near

the yard, if not prevented by some act of legislation. I am happy to state that the common council of Brooklyn, when the case was laid before them, promptly passed an ordinance, which, it is believed, will effectually secure the property in the navy yard from the danger of this nuisance and all similar ones; and it cannot be doubted that the common council of Brooklyn will grant all reasonable protection and accommodation to this navy yard, and that the State of New York will protect and promote the interests of the same by any legislative acts that may be found to be necessary and proper.

I shall therefore proceed, under your direction, with as much dispatch as present and future appropriations will permit, to cause the dry docks thus authorized by law to be constructed in the Navy yard at Brooklyn.

Under the act of the 30th of June, 1834, "authorizing the Secretary of the Navy to make experiments for the safety of the steam engine," and appropriating \$5,000 for that purpose, many proposed improvements have been submitted for the purpose of being tested by experiments. Some of these were so easily tested by those having steam engines in operation, that the aid of government was not needed. Others were attended with greater difficulty, and could not be tested without the expense of constructing boilers and other machinery for the purpose. These proposed improvements have not been such as, in my opinion, to warrant a large expenditure of money, and no experiments have been made upon them. Such experiments, however, would have been made, if they could have been so made without the expense of constructing engines.

The act seemed particularly to require that the steam engine devised by Benjamin Philips, of Philadelphia, should be examined and tested, and that Mr. Philips should be employed in making the experiments. Mr. Philips was, therefore, employed to construct a model engine, with boilers and other machinery which he deemed necessary for the purpose of testing his improvements, which he brought to this district, where he remained several weeks, making his experiments before many members of the two Houses of Congress, before the officers of the different departments, and others.

I attended very carefully to these experiments, but have not been able to perceive in them any improvement increasing the safety of the steam engine.

The money paid for Mr. Philips' machinery, preparation and experiments, amounts to \$519.75; the residue of the appropriation remains unexpended.

The fourth report of Mr. Hassler, superintendent of the coast survey, upon the operations performed in that work between the months of May and December, 1835, together with his detailed estimate of the appropriations required for the same for the next year, are herewith submitted, marked T.

Much work appears to have been done on the secondary triangulations, on the topographical operations, and by the sounding parties. That more has not been done in the primary triangulations is explained in the report.

Of the appropriations heretofore made for this survey, there remained, on the first day of this month, an unexpected balance of \$8,823.

The duties of the sounding parties are performed by the officers and seamen of the navy, and the chief part of the expense is charged to the navy appropriations. As, however, there are some expenses which cannot be charged to these appropriations, they must necessarily be charged to the appropriations for the coast survey. In September, 1834, the schooner *Jersey*, not wanted for any purposes of the navy, was purchased for the sounding party under the command of Lieutenant Gedney. The price of this vessel, (\$3,350) therefore, could not be charged to the naval appropriations; it was properly charged to the appropriations for the coast survey. For the same reason, the boats, equipments, and other expenses for the schooner, amounting to \$1,888.60, were charged to the same appropriation, as was also the charge for the extra pay to the officers, amounting to \$650 in all, for the year 1834, to \$5,888.60.

During the present season the expenses of this schooner, chargeable to the coast survey, have amounted to \$1,399, making the whole expense of this schooner, for the years 1834 and 1835, chargeable to the coast survey, amount to \$7,287.60.

It is not probable that the expense of this schooner, chargeable to the coast survey appropriation, will, for the next year, exceed \$1,500.

The schooner *Experiment*, employed by the sounding party under Lieutenant Blake, belongs to the navy. The coast survey appropriation has, therefore been charged only for equipments, which were not necessary for the purposes of the navy. These, with other expenses attending the operations of the sounding party on board this schooner, from the 1st of July last, when she was sent upon the survey, to the 30th of September last, amounted to \$2,517.73.

As most of the equipments of these schooners will last for several years, with but little expense for repairs and supply of articles which may be lost by accident, it is believed that the expenses of both schooners and the sounding parties on board of them, for the next year, chargeable to the coast survey, will not exceed \$4,000.

It will be seen that this differs widely from the statement of Mr. Hassler, which may be explained by the circumstance that he did not derive his information from the books of the Treasury Department.

By a statement hereunto annexed, marked P, it appears that of the appropriations heretofore made for the suppression of the slave trade, there remains in the Treasury a balance of \$13,489.55.

In my last report I took the liberty of stating that some of the clerks in my Department did not receive salaries proportioned to their services, or adequate to the decent support of themselves and families; and I respectfully solicited that the salaries, particularly of the chief clerk of the Navy Board, the warrant clerk, and the clerk keeping the register of correspondence of this Department, whose duties are arduous, requiring both talent and experience, should be increased, so that the first might receive \$1,700 per annum, and the others \$1,490 each. I repeat the solicitation, from a thorough conviction that their faithful services fully merit this increase of compensation.

The superintendent of the southwest executive building receives but \$250 per annum for his services, which, it is believed, is a compensation too small to command the services of one competent to perform the duties of the station. The sergeants acting as clerks to the commandant and staff officers of the marine corps are paid at the rate of less than \$700 a year for all their services, which, it is respectfully suggested, is not an adequate compensation.

The necessary references to papers and documents connected with this report will be found in a schedule hereunto annexed.

All of which is respectfully submitted.

MAHLON DICKERSON.

Schedule of papers accompanying the report of the Secretary of the Navy to the President of the United States, of November, 1835.

- No. 1. The letter of the Commissioners of the Navy to the Secretary, transmitting the general and special estimates of the navy for the year 1836.
- No. 2. Letter of the Commissioners, submitting estimate marked E, 1.
- A. Estimate for the office of the Secretary of the Navy.
- B. Estimate for the office of the Commissioners of the Navy.
- C. Estimate for the expenses of the southwest Executive building.
- D. The general estimate for the navy.
- Detailed estimate D, 1, for vessels in commission.
- D, 2, for receiving vessels.
- D, 3, for recruiting stations.
- D, 4, for officers and others attached to navy yards and shore stations, and the abstract or recapitulation.
- D, 5, for officers waiting orders and on furlough.
- D, 6, for provisions.
- D, 7, for improvements and repairs of navy yards, and recapitulation.
- E. Special estimate for magazines, hospitals, steam vessels, and coast survey.
- E, 1. Estimate of the several works, and their probable cost, which it is proposed to construct at the several navy yards.
- F. General estimate for the marine corps.
- Detailed estimates for the marine corps, F, 1 to 4.
- G. List of vessels, in commission, of each squadron, their commanders and stations.
- H. List of vessels in ordinary.
- I. List of vessels building.
- K. Report of the proceedings under the law for the *gradual increase* of the navy.
- L. Report of the proceedings under the law for the *gradual improvement* of the navy.
- M. Statement of the condition of the navy pension fund.
- M, 1. Amount and description of stocks belonging to the navy pension fund.
- N. Statement of the condition of the privateer pension fund.
- O. Statement of the condition of the navy hospital fund.
- P. Statement of the proceedings under the law for the suppression of the *slave trade*.
- Q. List of deaths.
- R. List of resignations.
- S. List of dismissions.
- T. Mr. Hassler's fourth report on coast survey.

No. 1.

NAVY COMMISSIONERS' OFFICE, *November 18, 1835.*

SIR: The Navy Commissioners have the honor to transmit, herewith, the estimates for the navy for the year 1836, together with the reports of the condition of the vessels building and in ordinary, and of the measures which have been taken under the laws for the gradual increase and gradual improvement of the navy.

Special estimates are also submitted for steam vessels, according to your directions, and for other objects, which do not fall within the usual annual appropriations for the navy, but which are deemed essential to the public interests.

The general estimate for the usual appropriations of the navy presents two columns, one showing the amounts estimated for the year 1836, and the other showing the amounts appropriated for the year 1835. This arrangement shows, at a single view, the differences between the amounts for each of the items of the appropriation, as well as in the total amounts.

It will be perceived that the total amount of the estimate for the year 1836 exceeds the amount appropriated for 1835, in the sum of \$622,151.75.

A comparison of the differences between the appropriations and estimates for *each* of the two first items cannot be accurately made, because the additional appropriation made March 3d, 1835, in consequence of the law establishing the pay of the navy, does not distinguish the amounts applicable to each of the items; but the difference between the sums of the two items for the two years shows an increase for 1836 of \$184,141.75.

This increase arises, in part, from a proposed addition to the force to be employed in commission, consisting of two frigates, three sloops-of-war, and one steam vessel; in part, from a modification of the pay of the officers by the laws of last session, and partly from a small increase of pay to some persons at navy yards, as stated in connection with estimate D, 4.

Under the third item, of provisions, there is also an increase of \$140,000. This arises, in part, from additional numbers of persons proposed to be employed, and partly because the amount in the Treasury is not supposed to justify a reduction from the total estimate under this head, proportional to that made for 1835.

Under the fourth head, of repairs of vessels in ordinary, &c., the amount of the estimate is less than the sum appropriated for the year 1835, in the sum of \$24,000.

The appropriation for 1835, and the estimate for 1836, under the fifth head, for medicine and hospital stores, are the same, notwithstanding the proposed increase of force, in consequence of the large sum still remaining in the Treasury.

Under the sixth head, for improvements and repairs of navy yards, there is an increase in the estimates for 1836, over the appropriations for 1835, of the sum of \$237,010. This increase is large, but is deemed necessary to meet the immediate wants of the public service. Although much has been done in

the different yards since the adoption of approved plans, under the law of March 3d, 1827, much still remains to be done to provide adequate means for the preservation of the materials which a prudent foresight has directed to be collected for future use, or to prepare the necessary conveniences for building, repairing, and equipping ships with proper economy and dispatch. The board refrain from any further remarks upon the subject at this time, as they have recently presented you with their views upon it in great detail.

The increase of \$35,000, under the seventh head, for ordnance and ordnance stores, is occasioned by the necessity of renewing the supplies of several articles embraced under that head of expenditures.

The estimates for enumerated contingent is the same as the appropriation for 1835. It is possible that the alterations made by the law of the last session for regulating the pay of the navy might authorize some small reduction under this head; but, as the force in commission, and number of persons to be employed, is proposed to be increased, and the appropriations under the former laws were uniformly found to be insufficient, it has been deemed best to make no alteration until the effects of the change shall be practically tested.

The ninth item, for other contingencies, is the same as asked and granted for 1835.

The board beg leave to again call your attention to the salary of their chief clerk, and to request, if it should comport with your views, that your recommendation may be given for granting the additional hundred dollars to his salary, as proposed in paper B, placing him on the same footing as the chief clerks of his grade in other offices.

I have the honor to be, with great respect, sir, your obedient servant,

JNO. RODGERS.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

No. 2.

NAVY COMMISSIONERS' OFFICE, *November 12, 1835.*

SIR: The Board of Navy Commissioners beg leave respectfully to present for your consideration the propriety of asking from Congress appropriations for a series of years, for the purpose of carrying forward the works of a general and permanent character in the different navy yards, which have been designated on the plans, in addition to those of a more special character, which are usually embraced in the annual estimates.

Regular plans were first made and approved for most of the navy yards in 1828, in conformity to the act of March 3d, 1827; previous to that time the buildings in the respective yards were generally temporary in their character, limited in extent, and calculated for present wants, and special rather than for general purposes. Since that time, two dry docks have been built, and other important improvements and additions made in different yards; but there is much still to be done to properly preserve the materials which are authorized to be collected, and to provide the means of economically and rapidly increasing, equipping, or repairing our vessels-of-war. Among the most important of these objects, and which seem to require a special appropriation, to continue for a series of years, are, the dry dock within the waters of the harbor of New York, for which Congress has made a partial appropriation; the construction of permanent quay walls, to prevent injury to the channels by their decay or want of stability; the construction of secure and durable building slips and launching ways, ready for building vessels; for ship houses to cover and shelter ships during their construction, and whilst policy may require them to be kept in readiness for launching; for the construction of timber docks and sheds, to season and prepare the quantities of timber which a just regard to our future wants requires us to keep prepared; for building pile wharves, where the quay walls are not intended to approach so near the channel as to admit vessels to come to them for repairs and equipment; for the construction of hydraulic docks, or inclined planes, in some of the yards, upon which to examine and repair small vessels, and thus to leave the docks for the examination and repair of the large ships; for gradually constructing the proposed wet basins, and for reducing the surface of the yards to a proper graduation, by leveling and excavation; and for the purchase of sites, when necessary.

The construction of the other buildings, as storehouses and workshops, and the ordinary repairs to the different buildings, may perhaps be best provided for as heretofore, that is, by annual appropriations for the respective yards, upon estimates stating the particular objects of proposed expenditure, made with reference to the particular wants of each year.

There being at present no civil engineer employed in the navy, particular estimates of the expense of the different objects could not be procured, which could be entirely depended upon for their accuracy. It was deemed sufficient, however, for the general purposes in view, to take the cost of objects which have already been built as the probable cost of those which are to be constructed, making such allowances as the difference in dimensions, nature of soil, and of difficulties to be overcome, seemed to demand.

From this general estimate, it is believed that the sum of three millions five hundred thousand dollars will be required for the purposes herein named, and that this sum may be advantageously expended in the course of the next five years, if it should be deemed expedient by Congress to appropriate, annually, the sum of seven hundred thousand dollars for that period. (See the estimate enclosed herewith.)

In presenting this subject to your consideration, the board would respectfully recall your attention to the great disadvantages which the public service would experience from a want of the improvements proposed, should they be delayed till a change of circumstances shall require any great and sudden extension of our naval force in commission; and to the great increase of expense, as well as inconvenience, if these works were to be constructed when other objects of great and pressing importance might claim a large portion of the financial resources of the country.

I have the honor to be, your obedient servant,

JNO. RODGERS.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

A.

Estimate of the sums required for the support of the office of the Secretary of the Navy for the year 1836.

Secretary of the Navy.....		\$6,000 00
Six clerks, per act of 20th April, 1818.....	\$8,200 00	
One clerk, per act of 26th May, 1824.....	1,000 00	
One clerk, per act of 2d March, 1827.....	1,000 00	
		<u>10,200 00</u>
One clerk of navy and privateer pension funds, and navy hospital fund, per act of 10th July, 1832.....	\$1,600 00	
Messenger and assistant messenger.....	1,050 00	
Contingent expenses.....	3,000 00	
		<u>5,650 00</u>
		<u>\$21,850 00</u>
Submitted:		
For two clerks, \$400 additional each, now at 1,000 each, per annum.....	\$800 00	
		<u>800 00</u>
		<u><u>\$22,650 00</u></u>

NOTE.—The last item in this estimate was submitted in my report of November, 1834. It was not acted on. It is again respectfully submitted, with the hope that it will receive favorable notice. Justice to the two gentlemen who are intended to be benefited by it, requires me to say that their grade, as compared with the clerks of the other departments of the government, as well as their important services and strict attention to duty, entitle them to the increase of salary proposed.

B.

Estimate of the sums required for the support of the Navy Commissioners' office for the year 1836.

For the salaries of the Commissioners of the Navy Board.....	\$10,500 00	
For the salary of the secretary.....	2,000 00	
For the salaries of their clerks, draughtsmen, and messenger, per acts of 20th April, 1818, 20th May, 1824, and 2d March, 1827.....	\$8,450 00	
Additional to the chief clerk, making his salary equal to that allowed to all other chief clerks of his grade.....	100 00	
		<u>8,550 00</u>
For contingent expenses.....	1,800 00	
		<u>\$22,850 00</u>

C.

Estimate of the sums required for the expenses of the southwest Executive building for the year 1836.

Superintendent.....	\$250	
Two watchmen, at \$500 each.....	1,000	
Contingent expenses, including fuel, labor, oil, repairs of building, engine, and improvement of the grounds.....	3,350	
		<u>\$4,600</u>

D.

There will be required for the navy during the year 1836, in addition to the balances that may remain on hand on the first day of January, 1836:

	Amount of estimate for 1836.	Amount appropriated for 1836.
1. For the pay of commission, warrant, and petty officers, and of seamen..	\$1,974,538 91	
2. For pay of superintendents, naval constructors, and all the civil establishment at the several yards.....	68,340 00	\$1,858,737 16
3. For provisions.....	590,000 00	450,000 00
4. For the repairs of vessels in ordinary, and the repairs and wear and tear of vessels in commission.....	950,000 00	974,000 00

	Amount of estimate for 1836.	Amount appropriated for 1836.
5. For medicines and surgical instruments, hospital stores, and other expenses on account of the sick	\$40,000 00	\$40,000 00
6. For improvements and the necessary repairs of navy yards, viz:		
Portsmouth, N. H.	\$67,000	
Boston	199,575	
New York	84,300	
Philadelphia	11,750	
Washington	37,500	
Norfolk	167,000	
Pensacola	64,000	
	631,125 00	344,115 00
7. For ordnance and ordnance stores.....	50,000 00	15,000 00
8. For contingent expenses that may accrue for the following purposes, viz:		
For the freight and transportation of materials and stores of every description; for wharfage and dockage, storage and rent, traveling expenses of officers, and transportation of seamen; house rent for pursers when attached to yards and stations where no house is provided; for funeral expenses; for commissions, clerk hire, office rent, stationery and fuel to navy agents; for premiums and incidental expenses of recruiting; for apprehending deserters; for compensation to judge advocates; for per diem allowance to persons attending courts-martial and courts of inquiry, or other services as authorized by law; for printing and stationery of every description, and for working the lithographic press; and for books, maps, charts, mathematical and nautical instruments, chronometers, models and drawings; for the purchase and repair of fire engines and machinery, and for the repair of steam engines; for the purchase and maintenance of oxen and horses, and for carts, timber-wheels, and workmen's tools of every description; for postage of letters on public service; for pilotage and towing ships-of-war; for furniture of vessels in commission, and fixtures in houses for officers as allowed by law; for taxes and assessments on public property; for assistance rendered to vessels in distress; for incidental labor at navy yards, not applicable to any other appropriation; for coal and other fuel, and for candles and oil; for repairs of magazines or powder houses; for preparing moulds for ships to be built, and for no other object or purpose whatever.....	295,000 00	295,000 00
9. For contingent expenses for objects not hereinbefore enumerated	3,000 00	3,000 00
	<u>\$4,602,003 91</u>	<u>\$3,979,852 16</u>

NOTE.—The excess of this estimate for 1836 over the appropriation for 1835, amounting to \$622,157.75, arises from a proposed increase of force to be employed in commission, from a proposed increase of expenditure for improving the navy yards, and from the late modifications in the pay of the officers.

The letter from the Board of Navy Commissioners to the Secretary of the Navy, of the 18th November, 1835, and the detailed estimates, give further and more particular explanations of the causes of this difference.

JOHN RODGERS.
I. CHAUNCEY.
C. MORRIS.

D, 1.

Estimate of the amount of pay that will be necessary for the year 1836, for the following vessels in commission, viz: one ship of the line, five frigates of the first class, and one frigate of the second class, fourteen sloops-of-war of the first class, five schooners and one steam vessel, being part of the first item of the general estimate.

Five commanders of squadrons.....	\$20,000 00
One ship of the line.....	152,455 25
Five frigates, 1st class, at \$88,905.25.....	444,526 25
One frigate, 2d class.....	72,951 91
Fourteen sloops-of-war, 1st class, at \$44,023.25.....	616,325 50
Five schooners; at \$18,103.25.....	90,516 25
One steam vessel.....	26,091 25
	<u>\$1,422,866 41</u>

D, 2.

Estimate of the number and pay, of officers, &c., required for five receiving vessels, for the year 1836, being part of the first item in the general estimate.

	Boston.	New York.	Philadelphia.	Baltimore.	Norfolk.	Total number.	Aggregate amount.

Under this item of the estimates, the following changes are proposed for 1836, in the number of persons and their compensation, as allowed for the year 1835, viz:

In the naval branch.—A steward, as an assistant to the purser at Washington, is proposed, at the usual pay of \$30 per month, equal to \$360. The number of mechanics employed at this yard renders this addition necessary, in the opinion of the board.

In the hospital branch.—An increase of pay, from \$18 to \$30 per month, is proposed for the *stewards* of the hospitals at Boston, New York, Philadelphia, Norfolk, and Pensacola, amounting, in the whole, to \$720. This addition is proposed, from the belief that it will be necessary to command the services of persons possessing the requisite information to perform the increased duties, and sustain the increased responsibilities, which will hereafter be allotted to them in the permanent hospitals now about to be opened.

In the civil branch.—It is proposed to increase the compensation of the master builder and inspector of timber at Portsmouth, N. H., to the amount of \$300. The compensation for the performance of both duties has, for some years past, only been equal to that allowed for the performance of the duties of inspector of timber at other yards. As the duties will be greater hereafter, in consequence of the quantities of timber delivering under contracts, it is deemed just to increase the compensation in a corresponding degree. The compensation to the principal clerks to the storekeepers at Boston, New York, and Norfolk, is proposed to be increased from \$600 to \$750. The second clerks, at the same yards, from \$360 to \$450. The storekeepers' clerks at Portsmouth, Philadelphia, and Pensacola, from \$350 to \$500; and at Washington, from \$500 to \$750. An increase is also proposed for the clerks to the master builders at Boston, New York, and Norfolk, from \$500 to \$650, and those at Portsmouth and Philadelphia, from \$400 to \$500 each. The person charged with the management and repair of steam engines and sawmills, formerly paid by an annual salary of \$800, it is now proposed to place on daily pay, to be paid for his actual attendance only. This renders the whole increase under this head equal to \$1,570, making the total increase equal to \$2,650.

An increase of compensation to the different clerks has been solicited by them, upon the grounds that their present compensation was insufficient to meet their necessary expenses at their several places of residence, and that it was not proportioned to the compensation granted to other persons in the yards having no greater responsibilities, and performing duties requiring no greater qualifications. From the representations made by the commandants of the yards, and other officers, the board were satisfied that the first ground taken by the clerks was generally correct, and they coincided in opinion with them as respects the relative responsibilities and necessary qualifications.

The board, influenced by these considerations, have, therefore, proposed to place the principal clerks of the storekeepers, as heretofore, at the same compensation as the second clerks to commandants, which was established by the law of the last session, and to submit a proportionate increase to the other clerks, modified, in a slight degree, by the amount of labor to be performed, and the ordinary cost of subsistence, at the respective yards.

D, 5.

Exhibit of the commission and warrant officers that will be waiting orders, and on furlough, for the year 1836, by the estimates, being part of the first item in the general estimate.

D, 6.

Estimate of the amount required for provisions for the year 1836, explanatory of the third item in the general estimate.

6,269 persons in vessels in commission, besides the marines embarked.
 524 marines embarked in vessels in commission.
 396 enlisted persons attached to receiving vessels and shore stations.

Making 7,189 persons in total, at one ration each per day, makes 2,623,985 rations, which, at twenty-five cents per ration, is equal to	\$655,996 25
From this sum there may be deducted (estimating the balance that may remain in the Treasury on the 1st January, 1836, which, it is presumed, will not be required) the sum of	65,096 25
Which will leave	<u>\$590,000 00</u>

Being the amount asked for in the third item of the general estimate.

D, 7.

Estimates of the proposed improvements and repairs to be made in navy yards during the year 1836, explanatory of the sixth item in the general estimate.

NAVY YARD, PORTSMOUTH, NEW HAMPSHIRE.

For building timber shed	\$18,000 00
Towards mast and boat house	25,000 00
For a timber dock	20,000 00
Repairs of all kinds	4,000 00
	<u>\$67,000 00</u>

NAVY YARD, BOSTON.

For the ropewalk	\$63,000 00
For the tarring house	9,000 00
For the steam engine and machinery for laying up	30,000 00
For spinning machinery	15,000 00
For a hemp house	38,000 00
For storehouse No. 15	35,275 00
For repairing and replacing masting shears	3,575 00
For yard wall at northeast corner	1,500 00
For completing the change of fronts to officers' quarters	1,225 00
For the repairs of docks, wharves, and buildings in the yard	3,000 00
	<u>\$199,575 00</u>

* Embracing seventy-five midshipmen, who, after examination, may be entitled to be arranged as passed midshipmen, in addition to their pay as midshipmen, \$300 each.

NAVY YARD, NEW YORK.

E.

Special estimates for extraordinary purposes, or for objects not embraced in the usual annual estimates for the current service of the navy.

No 1.

FOR STEAM VESSELS.

For completing the steam vessels-of-war, now building at the Navy yard, Brooklyn, New York, in aid of the amount which may be available from the appropriation for the gradual increase of the navy	\$150 000 00
For building, equipping and arming complete, three steam vessels-of-war.....	675,000 00
Total.....	<u>\$825,000 00</u>

The Board of Navy Commissioners would respectfully remark that, from a want of experience in the construction and equipment of steam vessels-of-war in this country, it is possible that these estimates may not prove as accurate as might be wished; but, from the best information which they have been able to obtain, they believe that the amounts asked will be sufficient for the objects proposed.

No. 2.

HOSPITALS.

For the completion of the hospitals near New York and Boston, and for regulating the grounds, and building necessary enclosures, and repairing the Naval asylum and all other hospitals, and the buildings, wharves and landings dependent upon and connected with them, and for preparing suitable burying grounds.....	<u>\$45,410 00</u>

F.

General estimate of the expenses of the marine corps for the year 1836.

There will be required for the support of the marine corps during the year 1836, in addition to the balances which may remain on hand on the 1st of January, 1836, the sum of \$488,856.19.

Paymaster's department.

- | | |
|---|--------------|
| 1. For the pay of the officers, non-commissioned officers, musicians and privates, and subsistence of the officers of the marine corps..... | \$163,077 25 |
|---|--------------|

Quartermaster's department.

2. For the provisions for the non-commissioned officers, musicians and privates serving on shore, servants and washerwomen.....	\$33,517 72
3. For clothing.....	38,655 00
4. For fuel.....	14,589 00
5. For repair of barracks near Portsmouth, N. H., and for repairs at other stations.....	8,900 00
6. For the purchase of sites and erection of barracks near Charlestown, New York, Norfolk, and Pensacola.....	200,000 00
7. For transportation of officers, non-commissioned officers, musicians and privates, and expenses of recruiting.....	6,000 00
8. For medicines, hospital stores, surgical instruments, and pay of matron.	4,139 29
9. For military stores, pay of armorers, keeping arms in repair, drums, fifes, flags, accoutrements, and ordnance stores.....	2,000 00
10. For contingencies, namely: Freight, ferriage, toll, wharfage, and cartage; per diem allowance for attending courts-martial and courts of inquiry; compensation to judge advocate; house rent where there are no public quarters assigned; incidental labor in the Quartermaster's department; expenses of burying deceased persons belonging to the marine corps; printing, stationery, forage, postage on public letters; expenses in pursuit of deserters; candles and oil for the different stations, straw for the men, barrack furniture, bed sacks, spades, axes, shovels, picks, and carpenter's tools....	17,977 93
	325,778 94
Total amount.....	\$488,856 19

NOTE.—The excess of this estimate over the appropriations for 1835 arises principally from the sum of \$200,000, proposed for the purchase of sites and erection of barracks.

H.

Statement showing the names, distribution, and condition of the vessels in ordinary.

AT PORTSMOUTH, N. H.

Concord—sloop-of-war, nearly ready for sea.

Lexington—sloop-of-war, repairs nearly completed.

AT CHARLESTOWN, MASS.

Columbus—ship of the line, requires large repairs.

Independence—ship of the line, under repair.

Boston—sloop-of-war, nearly ready for sea.

AT BROOKLYN, N. Y.

Washington—ship of the line, requires very large repairs.

Franklin—ship of the line, requires very large repairs.

Ohio—ship of the line, requires large repairs; few of her equipments have ever been provided.

United States—frigate, nearly ready for sea.

Hudson—frigate, considered unfit for sea service.

Natchez—sloop-of-war, recently arrived, supposed to require considerable repairs.

AT PHILADELPHIA.

Warren—sloop-of-war, nearly ready for sea.

Cyane—sloop-of-war, condemned, as unfit for service.

Sea Gull—an old steam vessel, decayed and unfit for sea service.

AT GOSPORT, VA.

North Carolina—ship of the line, under repair.

Guerrriere—frigate, requires large repairs or to be rebuilt.

Java—frigate, unfit for sea service.

Falmouth—sloop-of-war, requires large repairs.

Grampus—schooner, requires large repairs.

I.

Statement of the vessels building at the different navy yards.

Those building under the laws for the gradual increase of the navy are distributed as follows:

AT PORTSMOUTH, N. H.

One ship of the line, one frigate.

AT CHARLESTOWN, MASS.

Two ships of the line, one frigate.

AT BROOKLYN, N. Y.

Two frigates, one steam vessel.

* On her return to the United States.

† Arrived at Gibraltar Sept. 11, 1835.

One ship of the line, one frigate.

AT PHILADELPHIA.

One frigate.

AT WASHINGTON.

One ship of the line, one frigate.

AT GOSPORT, VA.

All these vessels are under cover, and generally in good order, with the exception of their keels, keelsons, and deadwoods, of which some have been found to be defective.

There is building at Norfolk a frigate, under the authority of the act of Congress of July 10, 1832, to replace the Macedonian; she has a roof over her, and is in a state of perfect preservation.

K.

Statement of the measures which have been taken to carry into effect the laws for the gradual increase of the navy, approved April 29, 1816, and March 3, 1821.

The ships of the line Columbus, North Carolina, and Delaware, have been built and in service for several years.

The ship of the line, Ohio, was launched in May, 1820, but has never been equipped, nor has her hull been completed; she now requires repairs.

The frigates Brandywine and Potomac have been completed, and employed for several years.

Five ships of the line and seven frigates remain upon the stocks, all under tight houses. They are generally sound and in good condition, with the exception of the keels, keelsons, and deadwoods, of which some have become defective, and will require to be replaced. The ships are all, however, so far advanced that it is believed they can be completed and equipped by the time that crews could be collected for them.

A steam vessel has been recently commenced, under this appropriation, at the Navy yard at Brooklyn, and such arrangements made as the present state of the appropriation will justify. The amount in the Treasury on the 1st of October, 1835, was but \$156,261, and, as a part of this must necessarily be devoted to the completion of the frigate Columbia, which has been directed to be launched, some further provision will be necessary to complete the steam vessel. This may be made by a direct appropriation, or, if admissible, by the transfer of materials purchased for "gradual increase," but which are not now wanted for that appropriation, to "repairs," for which they are required, and by transferring their value from the appropriation for "repairs" to the appropriation for "gradual increase."

Besides the articles which might be thus transferred with advantage, there are others to a large amount in the different navy yards that can be advantageously preserved for this appropriation, to which they belong.

The distribution of the ships building is shown in statement I.

It may be proper to remark that additional appropriations will be necessary before these vessels can be completed, as was more fully stated in a recent communication from the board.

L.

Statement of the measures which have been adopted to carry into effect the laws for the gradual improvement of the navy, approved March 3, 1827, and March 2, 1833.

The live oak frames for four ships of the line, for seven frigates, and for four sloop-of-war, complete, have been delivered; the greater part of the frames of a frigate and sloop-of-war have also been delivered at the Navy yard, Portsmouth, New Hampshire, and part of the frame of a sloop-of-war at the Navy yard at Washington.

The complete frames are distributed as follows:

At the Navy yard, Charlestown, Massachusetts, for two ships of the line, for two frigates, and for one sloop-of-war.

At the Navy yard, Brooklyn, New York, for one frigate.

At the Navy yard, Philadelphia, for two frigates and one sloop-of-war.

At the Navy yard, Washington, for one frigate and one sloop-of-war.

At the Navy yard, Gosport, Virginia, for two ships of the line, one frigate, and one sloop-of-war.

Contracts have been entered into, and have been in part executed, for the white oak and yellow pine timber, and for the copper and iron necessary to complete the hulls of these vessels, and for their masts and spars.

Dry docks at Charlestown, Massachusetts, and at Gosport, Virginia, have been built from this appropriation, and other expenses incurred, under the provisions of the law, for buildings to preserve the materials, for receiving and storing them, and for the purchase, selection, preservation and improvement of lands for the cultivation of live oak trees.

The cost of works and materials to the 1st of October, 1835, under this appropriation, have been as follows:

For the dry dock at Charlestown, Massachusetts.....	\$677,089 78
For the dry dock at Gosport, Virginia.....	974,356 69
For timber sheds and other buildings.....	143,508 84
For receiving and storing materials.....	142,894 59
For purchase of land, cultivation and preservation of live oak trees.....	68,224 76

For 395,143 cubic feet live oak timber.....	\$499,297 35
For 236,653 cubic feet white oak timber	94,653 08
For 327,531 <i>superficial</i> feet white oak plank.....	17,304 25
For 7,718 white oak knees	42,803 87
For 251,056 cubic feet of yellow pine, for plank	79,936 37
For 120,595 cubic feet yellow pine, for masts and spars	58,902 99
For 45,896 cubic feet yellow pine, for beams, &c.....	23,489 73
For 915,670 lbs. of iron	34,384 02
For 826,449 lbs. of copper	173,244 73
Total	\$3,030,091 05
From which deduct reservations as security for completion of contracts not yet paid	27,335 25
Leaves a balance of.....	\$3,002,755 80
Which, deducted from the whole amount appropriated to the present time, equal to.....	4,500,000 00
Leaves a balance of.....	\$1,497,245 20
Of which there remained in the Treasury on the 1st Oct., 1835, the sum of	\$1,454,316 46
The balance, supposed to be in the hands of navy agents, is.....	42,929 34
Making a total, as above, of.....	\$1,497,245 20
Of this sum there will be required, to meet existing engagements under contracts, about	616,000 00
Leaving, for other purposes, about	\$881,245 20

Advertisements have been issued inviting offers for furnishing the live oak frames for five ships of the line, six frigates, five sloops-of-war, five schooners, and three steamers, which, if contracted for, will probably require about \$600,000 of the balance remaining, after meeting existing engagements.

M.

Statements showing the balance standing to the credit of the navy pension fund on the first day of November, 1834; the amount of receipts and disbursements on account of said fund, from that date to the first of October, 1835; and the amount of advances to agents during the same period.

T.

Fourth report of F. R. Hassler, as superintendent of the survey of the coast, upon the operations performed in that work between the months of May and December, 1835; with an estimate of the appropriation required for the next year's work.

1. My report of last May has shown how much work had been prepared by the primary and secondary triangulations of the preceding year; the works of 1817, and all the works connected with them; and how these have been furnished with the most essential element of an accurate base line.

2. The map of assemblage, joined to my last report, shows that near thirty maps were prepared to be executed last summer, if the appropriation had allowed to carry on the topographical works with the activity which I had contemplated, and which it would have been most economical to make immediately.

3. My report also stated the different direction which I was compelled to give to the work under the circumstances which I have there detailed, and I must take the liberty to refer to it.

4. This effect was still increased by the ordering of the schooner Experiment, in the coast survey work, to a station for which the necessary previous calculations had been deferred, with a view to begin the soundings of Long Island Sound only next spring, as the state of the work, as well as of the appropriation, would naturally have dictated.

5. This circumstance necessitated me to stay in Washington with two assistants, all engaged in executing the calculations and projections, upon which all the detail works and soundings connected with it had necessarily to be grounded.

6. However, this delay gave me, also, the facility to attend more closely to the construction of standards of weights and measures, which is equally my task as the coast survey, according to the let-

ter of the Treasury Department, of August 9th, 1832, and upon which I render a separate account to the Treasury Department, under which it stands.

7. The reconnoitring and placing of signals for the junction of the survey of Maryland with the coast survey, by which the work is intended to be brought so much the quicker to the Chesapeake, as was always contemplated, could, on account of these circumstances, not be entered upon until in October, when Mr. Alexander joined me in Washington; from whence we proceeded, selecting stations and placing signals on both sides of the Patuxent and the western shore of the Chesapeake, to Philadelphia, when the press of time required me to go to New York, and I committed the further examination to some of the assistants in the coast survey.

8. The works performed by my assistants during the last season are as follows:

Captain Swift has extended the triangulation between Connecticut and Long Island from New Haven so far eastwardly as the main triangulation would allow. Besides his very laborious task of keeping the very extensive and complicated accountability over the coast survey expenditures, he has not been favored enough by the weather to present a completed result, though he has done much work. There are only two triangles required before a corrected result can be presented; these works will then unite the work of New Haven with the eastern extremity of Long Island Sound, near the Rhode Island State line.

Mr. Ferguson has made the secondary triangulation which is included in my main triangulation of 1817, covering all the inner Bay of New York, and the surrounding elevations of New York and New Jersey.

Mr. Blunt has extended his triangulation, begun the year before, all over the part of Long Island west of the base line and Ruland's hill.

These two gentlemen joined these works by several stations common to both.

Mr. Renard has continued the topographical works which he had begun last fall over the whole extent of Mr. Blunt's triangulation on Long Island, and a great part of the Bay of New York, to the Neversinks, over an extent of about eighty miles of coast. In this course he has, besides, constantly worked jointly with Lieutenant Gedney, to furnish him with the necessary fixed points for his operations of soundings.

Lieutenant Gedney has finished the soundings which he had begun in Great South Bay, and from thence continued westerly along the coast to the light-house of Sandy Hook, including all the offings and outer bar of the Bay of New York.

Lieutenant M. Eakin has made the topographical detail survey from the neighborhood of Black rock, westerly, to Narroton, between the turnpike and the shore; always furnishing Lieutenant Blake with determined points to ground his soundings upon.

Lieutenant Blake has made the soundings of the shore of which Mr. Eakin made the topographical survey, and was proceeding to the opposite southern shore, when the weather became so unfavorable as to prevent his progress in the work there, because that part of the shore presented no safe enough harbor for his vessel.

Lieutenant Mackey, after having assisted in Washington in the projecting and laying out of points for different detail and sounding maps, proceeded to the north shore of Long Island, opposite to Lieutenant Blake's station; which he left afterwards, as Lieutenant Blake did not work in that neighborhood, to make with him a small addition to Mr. Eakin's works towards the east, over the neighborhood of Bridgeport.

Midshipman Dahlgren continued with me all the time that the calculations and plottings lasted, occupied at these calculations, and, after that, joined Mr. Ferguson in his secondary triangulations, and the consequent calculations.

9. The maps thus produced are, of course, all upon too large a scale to be presented with this report, and are to remain in the office of the Coast Survey, to be further worked out, and then to be employed when the whole of the country between New York and Block Island, or that neighborhood, will be finished; to be formed in proper special and general maps over that whole part of the coast.

10. The copy of the map of assemblage, here joined, exhibits the works of this year, by its comparison with that presented last spring, by the sketches of the country surveyed topographically, and the detail triangles of those parts added this year, the intermediate previous secondary triangles presented last year being expressly omitted, and only the main triangulation of that part preserved, to show the connection.

11. It is now necessary to execute, if possible, in continued regular succession, all the topographical part of the country which is now covered by the primary and secondary triangulations, because the signals now standing present the proper facility and economy for the work, and also on account of the great chance of their being lost, by the want of respect paid to such public undertakings, and the consequently too frequent destruction of the signals, and even of the secret marks placed in the ground. It might be desirable that they could be properly protected by a special law, as that is the habit in Europe, where such well-secured triangulations exist, and are still daily making, from Sicily to Lapony, and from Brest and Ireland to Turkey and Petersburg.

12. Having thus rendered account of the faithful exertions and works of my assistants, it would be improper for me to omit mentioning how painful it is for me to see those of my assistants who are connected with the army or navy deprived of that additional remuneration which was stipulated for them at the beginning of the work, (and which the so much increased personal expenditure and labor, by their assistance in the coast survey, deserve,) by the application to them of a law of Congress of last winter, which I cannot conceive ever having been intended to apply to the case in which they are, by the extra expenses unavoidable in the constant traveling life which they have to lead; and, particularly, it can never have been intended by it to load an officer from one department with a heavy responsibility for accountability upon funds under another department, which has, in common order of things, no control over him. If this difficulty cannot be overcome otherwise, I would like to suggest the proposition of a special law to that effect.

13. The increase of compensation granted to the civil chiefs of secondary parties, on account of the unavoidable increase of their expenses in these situations, has been very gratifying to me as well as them. I consider it an unavoidable and proper act of justice, so much the more, as even with that none of the assistants in general are paid as high as they would be for similar works if in the employment of private companies of citizens.

14. In respect to myself, I do not like to do more than simply to state here the facts, that the allowance of \$1,500, made to me for the personal expenses which unavoidably fall upon me in the coast survey, is entirely insufficient, as I have already in the beginning stated it would likely prove (letter of 12th August, 1832, printed document, page 87). This amount does but scantily cover the half of the difference between the life of a steady home and that which I have to lead in that work, which is, of course, what is to be compensated by this allowance. It is, besides, well known that the compensation of a chief engineer of a railroad or canal is generally rated and paid at \$6,000 per annum, and that many come much higher, though the requisite acquirements, labor, and responsibility are by no means equal to what are required in the coast survey. That I have made great pecuniary sacrifices in this work, since as early as 1811, is well enough known to many persons. I may therefore also hope that this subject will receive a more adequate consideration.

15. The Fourth Auditor's refusal to admit in the accounts of the accounting officer the whole of the expenses of certain operations, unavoidably necessary for the work, has laid great impediments in the way of the work. An officer in that situation cannot possibly have a just idea of the propriety of any operation in this work. In fact, none but the director of such a work is possessed of the data indispensable to assess a proper judgment upon the necessary operations, and proper manner of performing them. By the measures of the Auditor, that officer would become the sole and full director of the work, which is entirely inadmissible; if the main direction of the work is entrusted to me, the minor consequences, and all the details of arrangement, must be understood as equally entrusted to me. I have, of course, by that, been obliged to refrain from taking in proper time a variety of measures beneficial to the work, and fully within the limits of the stipulations of the contract under which I work for the coast survey; the loss produced by the delay of the work has been very great, I might say upwards of \$10,000, under the fallacious appearance of trifling economy. I hope that also this difficulty will be remedied, by the Department maintaining the exact observance of the contract with me, and, if needed for better information, ordering the impartial investigation which I have so long claimed, in order that the Department may be furnished with more accurate data to assess a just judgment.

16. I am sorry to be obliged to repeat here again that the larger instrument, with which the main triangulation is to be continued, has not yet arrived from London. I have lately again taken measures to press its forwarding, by means of our chargé d'affaires in London: I hope there will be no doubt of its arrival before the opening of the next campaign, when I shall make the most diligent and constant use of it; it is eminently calculated to accelerate the work, by its superior arrangements and accuracy. However, even if it had been here, I could not have ventured to go in the field with it last summer, on account of the insufficiency of the appropriation to bear the expenses, after what had been applied for the expenditures of the two vessels employed in the soundings, as it would have caused the *stopping of the whole work* for want of means.

17. My situation, and the state of the two works, of the coast survey and the construction of the weights and measures, standards, which are equally under my charge, according to my contract with the government, have been considerably complicated by the separation of the coast survey from the Treasury Department. Both works are equally in the interest of commerce, and have no reference to the navy. The accurate survey of the coast is made with the view to protect the property afloat on vessels from shipwreck, and the regulation of the weights and measures, by establishing accurate standards, is to regulate the distributive justice in all commercial intercourse. The knowledge and a part of the means to be employed in the two works are the same; so much so, that when I procured the instruments for the coast survey, I procured equally the standards, and part of the means which are now employed, and indispensable for the weights and measures. The reunion of the works in the Treasury Department would be a real advantage to both works.

18. With respect to the appropriation which it will be proper to propose to the session of Congress now opening, I am enabled to give more detailed information from the data which experience has furnished than it was possible to give last year, and to which may be attributed the insufficiency of the last year's appropriation. For the most advantageous and economical advancement of the work, it is very desirable and necessary to avoid it this year, on account of the great detriment which would accrue to the work from it. The following are the results which are presented by the different items:

1. The expenses of each party of secondary triangulation have proved to be about \$4,100 per annum; three parties have been annually engaged, and an equal number it is necessary to employ next year; their amount will, therefore, be.....	\$12,300 00
2. The annual expenses of every topographical party have been at the rate of \$4,000; the next year it will be necessary, for the best advantage of the work, to have five parties, amounting to.....	20,000 00
3. By the amount drawn from the last year's appropriation by the navy agent in New York, it appears that the two vessels have cost, during the time they have been so employed, \$16,124.33; at which rate the same two vessels must be rated for next year.....	20,000 00
4. The main triangulation, according to the experience in 1833, and the nature of the work and necessary persons and means to be employed, must be rated at.....	22,000 00
Instruments, telescopes, reflecting instruments, drawing implements of all kinds, books and other similar articles ordered and to be paid this year, and such as are still to be ordered, or constructed under my direction.....	6,900 00
Field equipments, tents, stands, signals, and similar objects, to be procured or repaired, &c.	3,000 00
Before the next appropriation will likely be made, there will probably be expenses incurred, to be covered by it, to the amount of.....	4,000 00
Total.....	<u>\$87,300 00</u>

19. The paper which I handed in last winter had for its object to show the regular appropriation which it would be most advantageous to make annually, for the proper advantages, and, as to the quantity of result, most economical prosecution of the work, which I estimated at \$60,000 annually, unless it should be found proper, in the greater extension of the work, to make a proportionate increase.

20. The appropriation, which was only \$30,000, was still very much reduced by loading it with the item of the vessels, which had never before been taken into consideration, because it had always been intended to lay this expense upon the general naval appropriation. The deficit therefrom resulting is

evidently the cause of the increased amount proposed above, and so are the expenses of the vessels now to be taken into account.

F. R. HASSLER.

NEW YORK, *November 22, 1835.*

24TH CONGRESS.]

No. 586.

[1ST SESSION.]

ON CLAIM OF LIEUTENANT SHUBRICK, OF THE NAVY, FOR EXTRA PAY WHILE ACTING AS "FLAG CAPTAIN" IN THE SQUADRON ON THE PACIFIC OCEAN, IN 1831 TO 1834.

COMMUNICATED TO THE SENATE DECEMBER 28, 1835.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom was referred the petition of Irvine Shubrick, reported:

That Lieutenant Shubrick acted, from the 1st August, 1831, to the 21st May, 1834, as first lieutenant of the frigate *Potomac*, under the command of Commodore John Downes, who was, during that period, the commanding officer of the squadron in the Pacific ocean. There was no flag captain at that time in the squadron, but the duties of that officer were performed, under the orders of Commodore Downes, by Lieutenant Shubrick. He did not receive a regular appointment, Commodore Downes not having authority to give the appointment without the sanction of the Secretary of the Navy; but he performed the duties under circumstances which subjected him to additional responsibility and expense; and the committee are of opinion that he is entitled to the relief provided for in the bill.

24TH CONGRESS.]

No. 587.

[1ST SESSION.]

NAVAL REGISTER FOR 1836.

COMMUNICATED TO THE SENATE JANUARY 6, 1836.

NAVY DEPARTMENT, *January 6, 1836.*

SIR: I have the honor to transmit, herewith, for the use of the members of the Senate, sixty copies of the Naval Register for the year 1836.

I am, very respectfully, sir, your obedient servant,

The PRESIDENT of the *United States Senate.*

M. DICKERSON.

Naval register for 1836.

List of vessels attached to the several foreign stations, and the officers belonging to each vessel.

MEDITERRANEAN.

Commodore J. T. Elliott, commanding.

Ship of the line Delaware:

Captain—John B. Nicolson.

Lieutenants—Thomas Wyman, John S. Chauncey, A. E. Downes, John H. Marshall, Edward M. Vail, Andrew H. Foot, Junius J. Boyle, Robert B. Hitchcock.

Surgeon—William Turk.

Assistant surgeons—Robert M. Baltzer, Lewis Wolfley, N. C. Barrabino.

Purser—Francis A. Thornton.

Chaplain—George Jones.

Passed midshipmen—James S. Palmer, Simon B. Bissell, Robert E. Johnson, Ferdinand Piper.

Midshipmen—Charles A. Auzé, James F. Armstrong, George Colvocoressis, Henry Eld, jr., Charles R. Howard, Wm. Edgar Le Roy, Peter U. Murphey, John S. Neville, Carlisle P. Patterson, Ferdinand Pepin, James Riddle, jr., John B. Randolph, Samuel Smith, Richard Wainwright, Maxwell Woodhull, Wm. Anderson Wayne.

Boatswain—Thomas Ring.

Gunner—Asa Curtis.

Sailmaker—James Davis.

Marine officers:

Captain—John Harris.

Lieutenants—Wm. E. Stark, William Lang.

Frigate Constitution:

Com.—Jesse D. Elliott.

Lieutenants—William Boerum, George F. Pearson, Frederick A. Neville, John Colhoun, James M. Watson.

Surgeon—Thomas J. Boyd, fleet surgeon.

Assistant surgeons—Robert Woodworth, Victor L. Godon.

Purser—John N. Hambleton.

Acting masters—Passed Midshipman Henry A. Steele, Passed Midshipman Henry Darcantel.

Passed midshipmen—Percival Drayton, Bushrod W. Hunter, Wm. T. Muse, Charles Steedman, Wm. S. Ringgold, J. W. Revere, Edward Middleton, Montgomery Lewis, Charles C. Barton, James W. Cook.

Midshipmen—Geo. W. Randolph, Geo. T. Sinclair, Charles Hunter, William Ronckendorff, Francis S. Haggerty, John N. Maffit, Charles E. Fleming, Edward C. Anderson, Eugene E. Rodgers, A. H. Jenkins.

Boatswain—Robert Whitaker.

Gunner—Thomas Ryley.

Acting sailmaker—N. C. L'Hommedieu.

Carpenter—Francis Sagee.

Marine officer:

Lieutenant—J. L. C. Hardy.

Frigate Potomac:

Captain—John J. Nicholson.

Lieutenants—Jos. B. Hull, Jacob Crowninshield, R. A. Jones, H. Pinkney, R. W. Jones, Owen Burns.

Surgeon—Robert J. Dodd.

Assistant surgeons—Hugh Morson, Robert T. Barry.

Purser—Garrett R. Barry.

Passed midshipmen—L. G. Keith, acting master; John C. Carter, acting master; George Minor, Wm. C. Griffin, Jos. F. Green, Benj. More Dove, John B. Marchand, A. M. Penneck, H. C. Flagg.

Midshipmen—Eugene Boyle, Thomas M. Brasher, John W. Bryce, James M. Bankhead, R. W. Bowland, Joseph N. Barney, Henry L. Chipman, Jesse Elliott Duncan, Wm. H. Macomb, Matthew C. Perry, Wm. Reynolds, A. H. Wells, R. S. Wey, Isaac K. You.

Acting boatswain—Theodore Fernald.

Gunner—Wm. B. Brown.

Carpenter—Wm. L. Shuttleworth.

Sailmaker—Wm. Ward.

Marine officers:

Captain—Ward Marston.

Lieutenant—Jabez C. Rich.

Sloop John Adams:

Master commandant—Silas H. Stringham.

Lieutenants—Wm. H. Gardner, C. Ringgold, Wm. F. Lynch, Isaac S. Sterett, C. W. Chauncey, John A. Davis.

Surgeon—B. R. Tinslar.

Passed assistant surgeon—Lewis B. Hunter.

Purser—D. McF. Thornton.

Passed midshipmen—J. M. Gilliss, Wm. S. Young, Overton Carr, Jas. M. Lockert, James E. Brown.

Midshipmen—Simon F. Blunt, Johnston B. Carter, John J. Guthrie, M. C. Marine, William C. Bolton, S. Porter, Wm. S. Smith.

Gunner—David Taggart.

Schooner Shark:

Lieutenant commanding—Ebenezer Ridgeway.

Lieutenants—A. A. Harwood, Benjamin I. Totten, Thos. W. Brent.

Passed assistant surgeon—Daniel Egbert.
 Purser—D. Fauntleroy.
 Passed midshipmen—Chas. Heywood, acting master; Harry P. T. Wood, Geo. D. Selden.
 Midshipmen—Frederick A. Bacon, Henry P. Robertson, Chas. Wager.
 Gunner—Alexander Russell.
 Sailmaker—George Thomas.

WEST INDIA SQUADRON.

Frigate Constellation:

Commodore A. J. Dallas, commanding.
 Lieutenants—Edmund Byrne, John L. Ball, Grey Skipwith, Stephen Johnston, Gurden C. Ashton,
 Chas. H. A. H. Kennedy, George M. Bache.
 Surgeon—Leonard Osborne, fleet surgeon.
 Assistant surgeons—Samuel C. Lawrason, Wm. W. Valk.
 Purser—John De Bree.
 Passed midshipmen—Raph. Semmes, acting master; William Chandler, John F. Borden, James K.
 Bowie, Roger Perry.
 Midshipmen—John W. Taylor, Samuel A. Turner, Stephen Dod, Lewis C. Sartori, William Pope,
 William B. Whiting, James M. Frailey, John O. Wilson, A. S. Baldwin, John W. D. Ford, John S. Booth,
 E. T. Shubrick, James A. Doyle, William B. Beverly, Wm. May, James H. Strong, Parry W. Humphreys,
 William S. Williamson, Fras. P. Hoban, Richard H. Lowndes, George Wickham.
 Boatswain—Charles Matthews.
 Acting gunner—Samuel G. City.
 Acting carpenter—John O. Butler.
 Sailmaker—Benjamin Crow.
 Marine officer:
 Lieutenant—Nathaniel S. Waldron.

Sloop St. Louis:

Master commandant—Lawrence Rousseau.
 Lieutenants—N. C. Lawrence, James H. Ward, Henry H. Bell.
 Surgeon—Samuel W. Ruff.
 Assistant surgeon—Geo. W. Peete.
 Purser—F. B. Stockton.
 Passed midshipmen—Samuel Swartwout, acting master; Richard Forrest.
 Midshipmen—William M. E. Adams, B. S. Gantt, George W. Harrison, Edmund Lanier, James
 McCormick, Wilson R. McKinney, Jennings F. Marast, Thaddeus K. Perlee, J. H. H. Sands.
 Boatswain—Charles Woodland.
 Gunner—Charles Wade.
 Carpenter—Richard D. Berry.
 Sailmaker—Thomas J. Boyce.

Sloop Vandalia:

Master commandant—Thomas T. Webb.
 Lieutenants—Wm. B. Lyne, Wm. McBlair, Ezra T. Doughty.
 Surgeon—Wm. Plumstead.
 Assistant surgeon—Charles A. Hassler.
 Purser—James Brooks.
 Passed midshipmen—S. C. Rowan, acting master; Wm. M. Walker.
 Midshipmen—Francis Alexander, Isaac N. Brown, Edwin A. Drake, Lafayette Maynard, Louis E.
 Musson, James W. E. Reid, Roger N. Stembel, Mayo C. Watkins.
 Acting boatswain—John Mills.
 Gunner—John M. Green.
 Carpenter—Joseph Cox.
 Sailmaker—Madison Wheeden.

Sloop Warren:

Master commandant—Wm. V. Taylor.
 Lieutenants—Samuel F. Dupont; Fitz Allen Deas, under orders to this ship; Eben. Farrand, Charles
 H. McBlair, Samuel E. Munn, Gabriel G. Williamson.
 Surgeon—John F. Brooke.
 Passed assistant surgeon—Jones W. Plummer.
 Purser—Andrew J. Watson.
 Passed midshipmen—Jas. F. Miller, acting master; Daniel B. Ridgely, Wm. S. Swann.
 Midshipmen—Levi Lincoln, jr., R. S. Trapier, John Mooney, Ben. F. B. Hunter, Edward Donaldson,
 Washington Reid, H. H. Lewis, P. C. Van Wyck, A. Murray, John G. Tod.
 Boatswain—William Waters.
 Gunner—Thomas Robinson.
 Carpenter—William Peterson.
 Sailmaker—J. G. Gallagher.

Schooner Grampus:

NORE.—The repairs of this vessel not being completed, her officers are not yet detailed.

PACIFIC SQUADRON.

Commodore Alexander S. Wadsworth, commanding.

Frigate Brandywine:

Captain—David Deacon.
 Lieutenants—William Inman, H. H. Hobbs, Henry Bruce, G. J. Van Brunt.
 Fleet surgeon—A. B. Cooke.
 Assistant surgeon—J. Frederick Sickels.
 Purser—Joseph H. Terry.
 Passed midshipmen—Samuel F. Hazard, acting master; Robert Handy, Edward M. Yard, Wm. B. Ludlow, Luther Stoddart, John J. White.
 Midshipmen—Washington A. Bartlett, Francis Lowry, Benj. R. Nichols, Joseph Norvell, James L. Parker, Samuel Pearce, John Smith Patterson, Charles H. Piper, Charles Robinson, James Withers Read, Robert B. Riell, Charles R. Smith, Cornelius Vanalstine.
 Acting boatswain—John Ball.
 Acting gunner—Daniel James.
 Carpenter—Charles Bordman.
 Sailmaker—James R. Childs.

Marine officers:

Captain—Charles C. Tupper.
 Lieutenant—George W. Robbins.

Sloop Vincennes:

Master commandant—John H. Aulick.
 Lieutenants—John A. Carr, Theodore Bailey, Robert L. Browning, John S. Missroon, Jos. Lanman
 Surgeon—Augustus A. Adee.
 Assistant surgeon—J. C. Palmer.
 Purser—Edward T. Dunn.
 Passed midshipmen—Samuel P. Lee, acting lieutenant; Theodore P. Green, acting master.
 Midshipmen—Wm. A. Jones, A. G. Clary, Wm. A. Parker, John C. Henry, John Carroll, John Hall, George Butterfield, Hunn Gansevoort, James L. Hannegan, Washington Gwathmey, James S. Biddle, C. R. P. Rodgers, James S. Ridgely.
 Boatswain—John Morris.
 Gunner—Charles Cobb.
 Carpenter—Henry P. Leslie.
 Sailmaker—Henry Bacon.

Marine officer:

Lieutenant—A. H. Gillespie.

Sloop Fairfield: [Returned to the United States since the Register was put to press.]

Master commandant—E. A. F. Valette.
 Lieutenants—James P. Wilson, Henry W. Morris, Samuel Lockwood, John W. Turk.
 Assistant surgeons—A. G. Gambrell, acting surgeon; M. G. De Laney.
 Purser—John A. Bates.
 Chaplain—Thomas R. Lambert.
 Passed midshipmen—Edward L. Handy, acting master; Wm. C. Spencer.
 Midshipmen—James D. Morrison, John M. Mason, John H. Sherburne, Strong B. Thompson, Alexander R. Rose, Henry Waddell, Charles Sperry.
 Gunner—Lewis Parker.
 Acting carpenter—Wm. Hatch.
 Acting sailmaker—John Burdine.

Marine officer:

Brevet captain—A. N. Brevoort.

Schooner Boxer:

Lieutenant commanding—Hugh N. Page.
 Lieutenants—Charles H. Jackson, Peter Turner, H. M. Houston.
 Passed assistant surgeon—Thomas L. Smith.
 Passed midshipmen—Cicero Price, acting master; A. W. Prevost.
 Midshipmen—William L. Blanton, Callender St. G. Noland, Benj. T. Wilson.

Schooner Dolphin:

Lieutenant commanding—Charles H. Bell.
 Lieutenant—John W. Turk (returned in the Fairfield and is on leave).
 Assistant surgeon—H. S. Reynolds (returned on leave).
 Passed midshipmen—G. A. Prentiss, acting lieutenant; Chas. Green, acting master.
 Midshipmen—Latham B. Avery, George W. Doty, Daniel D. Henrie, Charles H. Piper (transferred from Brandywine.)

COAST OF BRAZIL.

Commodore James Renshaw, commanding.

Sloop Erie:

Commodore—James Renshaw.
 Lieutenants—John Pope, Henry Eagle, James H. Rowan.
 Fleet surgeon—Chas. Chase.
 Assistant surgeon—Ninian Pinkney.
 Purser—William A. Bloodgood.
 Chaplain—Addison Searle.
 Passed midshipmen—Alfred Taylor, acting lieutenant; John R. Goldsborough, acting master; John R. Tucker.

Midshipmen—Samuel J. Shipley, Fras. Winslow, Henry A. Wise, George Wells, Nathan Barnes, Jno. L. Worden.

Boatswain—Edward Crocker.
Acting gunner—William Phillips.
Carpenter—David Marples.
Sailmaker—Nathaniel B. Peed.

Marine officer:

Lieutenant—Jacob Zeelin.

Sloop Ontario:

Master commandant—William D. Salter.
Lieutenants—John W. West, Law. Pennington, A. H. Marbury.
Surgeon—George W. Codwise.
Assistant surgeon—Daniel S. Green.
Purser—E. J. Cahoone.

Passed midshipman—Alexander Gibson, acting master.
Midshipmen—Joseph P. Sanford, Robert Burts, William M. Wallace, Benjamin F. Anderson, Reed Worden, Robert L. Browning, James C. Williamson, Wm. H. Wallace.

Boatswain—James Springer.
Acting gunner—John Martin.
Carpenter—Alonzo Jones.
Sailmaker—John Heckle.

EAST INDIES.

Commodore E. P. Kennedy, commanding.

Sloop Peacock:

Commodore—E. P. Kennedy.
Lieutenants—C. K. Stribling, George N. Hollins, William Green, Charles C. Turner, Murray Mason.
Fleet surgeon—Wm. S. W. Ruschenberger.
Assistant surgeon—David Harlan.
Acting purser—Chas. H. Goldsborough.
Passed midshipmen—Syl. Wm. Godon, acting master; John Weems, Wm. Rogers Taylor, William Liegh, B. S. B. Darlington, John Contee, Geo. W. Chapman, Wm. S. Drayton, Charles Richardson, Edw'd S. Hutter, Samuel B. Lee, Louis McLane.

Boatswain—John Knight.
Gunner—Archibald S. Lewis.
Acting sailmaker—James Furguson.
Professor of mathematics—John D. Mendenhall.

Schooner Enterprise:

Lieutenant commanding—Archibald S. Campbell.
Lieutenant—Richard L. Page.
Assistant surgeon—William F. McClenahan.
Acting purser—Richard R. Waldron.
Passed midshipmen—John C. Sharpe, acting lieutenant; Thomas R. Rootes, acting master; Hendrick Norvell.
Midshipmen—James J. Forbes, William Ross Gardner, Wm. G. Benham, Henry Cadwallader.

24TH CONGRESS.]

No. 588.

[1st Session.

ON CLAIM OF JOHN RODGERS, AS SENIOR CAPTAIN OR COMMANDING OFFICER OF THE NAVY, FOR EIGHT RATIONS PER DIEM FOR THE TIME HE HAS BEEN A COMMISSIONER OF THE NAVY, SINCE THE SIXTH OF OCTOBER, 1821.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 6, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of John Rodgers, senior captain of the navy of the United States, reported:

That the petitioner, in addition to his salary of three thousand five hundred dollars per annum, as a member of the Board of Navy Commissioners, claims to be allowed, as the senior captain, "the commanding officer of the navy," eight rations per diem during the whole time that he has been a Commissioner of the Navy, since the 6th of October, 1821, at which date he became senior officer of the navy.

This claim is founded upon the act of February 15, 1799, fixing the pay of the captains and commanders of ships and vessels-of-war of the United States, the 2d section of which provides that "the pay of captains, commanding ships of thirty-two guns and upwards, be one hundred dollars per month and eight rations per day;" and the 3d section of which farther provides that "whenever any officer as aforesaid shall be employed in the command of a squadron on separate service, the allowance of rations to such commanding officer shall be doubled during the continuance of such command, and no longer, except in the case of the commanding officer of the navy, whose allowance, while in service, shall always be at the rate of sixteen rations per day."

It is not considered necessary, for the examination of the merits of this claim, to inquire whether

the mere fact of an officer being the oldest captain in the navy shall make him commanding officer of the navy; or whether the meaning of the word "service," in the act just quoted, was designed to extend beyond service at sea; the committee being of opinion that the words of the act of February 7, 1815, creating the Board of Navy Commissioners, are positive against any additional allowance whatever to the officers composing that board. By the first section of this act "the President is authorized, by and with the advice and consent of the Senate, to appoint three officers of the navy, whose rank shall not be below a post captain, who shall constitute a Board of Commissioners for the navy of the United States;" and in the 3d section it is enacted that "each Commissioner shall be entitled to receive in compensation for his services three thousand five hundred dollars per annum, in lieu of wages, rations, and other emoluments as naval officers." The construction of this law by the accounting officers of the Treasury, by whom this claim has been rejected, is similar to that of the committee; they have no doubt of its correctness, and therefore submit the following resolution:

Resolved, That the Committee on Naval Affairs be discharged from the further consideration of the petition of Commodore John Rodgers, and that it lie on the table.

24TH CONGRESS.]

No. 589.

[1ST SESSION.]

ON THE EXPEDIENCY OF DEEPENING THE BAR OF PENSACOLA BAY, AND OF CONSTRUCTING A DRY DOCK AND MARINE RAILWAY FOR REPAIR OF VESSELS-OF-WAR AT THE NAVY YARD, PENSACOLA.

COMMUNICATED TO THE SENATE JANUARY 18, 1836.

Mr. SOUTHWARD, from the Committee on Naval Affairs, to whom were referred two resolutions of the Senate, instructing them to inquire into the expediency of making an appropriation to deepen the bar of Pensacola Bay, in Florida, and for the construction of a dry dock, or marine railway, for the repair of vessels-of-war at the Navy yard at Pensacola, reported:

That, after giving the whole subject the consideration which its importance demands, in reference to the interests of the country and the expenditure proposed, the committee have concluded to recommend both objects; and they are accordingly provided for in a bill herewith submitted.

The Bay of Pensacola was, after careful examination, selected, in the year 1824, as the best position for a navy yard in the Gulf of Mexico. It was intended for a naval depot and marine arsenal, and for a rendezvous for the vessels-of-war employed in the West Indies and on the coasts of Louisiana and Florida. On the 3d of March, 1827, upon the recommendation of the Navy Department, a provision was made for the necessary examination and inquiries to ascertain the practicability and expediency of erecting there a marine railway for the repair of sloops-of-war and other vessels of an inferior class; and authority was given to construct it, if it should appear to the President of the United States that it would be useful, and could be constructed at a reasonable expense. The object of that provision was to make this important station a yard of repairs for the public ships employed in those seas, without the inconvenience, expense, and delays of sending them many hundred miles to the northern navy yards.

It was then believed that this would be both economical and expedient in time of peace; and it was foreseen that, in time of war, a reliance on the northern navy yards alone would not only be an injury to the active service, by withdrawing from it those who were employed in the vessels intended to be repaired, but that many cases might occur in which ships would be so much injured by storms, or dismantled in battle, as to render that resource for relief impracticable, and that we might be forced to abandon them altogether, or encounter, in their return around the Capes of Florida, a most dangerous navigation, and an exposure to an enemy who might occupy some part of the West India Islands.

The execution of that part of the general act for the gradual improvement of the navy was left to the discretion of the President, and the necessary examination and inquiries were instituted, but the provision was subsequently permitted to expire before the work was constructed.

While the committee express their regret that the object of this law was not accomplished, they are of opinion that sound policy and the importance of that station demand that ample provision should now be made for the best and most efficient means for the repairs, protection and sustenance of our vessels-of-war in that quarter.

The great object in the establishment of the Navy yard at Pensacola was to protect the commerce of the Mississippi and West Indies. The whole region of country from the Alleghany mountains to the Gulf of Mexico, and from the Rocky mountains to New Orleans, is deeply interested in the maintenance of a sufficient naval establishment at that place, and the intimate connection of every portion of the Union precludes the possibility of an adverse interest.

The exports of the Mississippi alone now amount to about sixty-five millions of dollars; and, judging from the past, it may, in a few years, be equal to one-half of the whole exports of the United States. This commerce, both of export and import, must pass near the outlet of Pensacola Bay in its transit to and from Europe, the West Indies, the Spanish main, and the Atlantic cities. Its protection and defence must depend on a naval establishment in or near the Gulf of Mexico, and the committee do not doubt that Pensacola is the proper position for such an establishment, and that it ought to be aided by a sufficient auxiliary at Key West, both as a depot for provisions, and as a rendezvous and place of retreat from and annoyance to an enemy in the West Indies. Pensacola must be the place of construction and repairs. The position of Key West eminently fits it for the other objects. The country around, and connected with the former place, abounds with valuable timber, and almost every species of supply, and with facilities for their transportation to the navy yard, through the bays, sounds, and rivers connected with it.

The committee would further remark that, in conformity with the opinion of the Navy Department, reservations of public lands were made, under the provisions of an act of Congress of 3d March, 1827,

directing such reservations of timber, suitable for naval purposes and constructions. To cut and transport this material to a Navy yard at Pensacola is less expensive than to send it to a northern navy yard, to be used for repairs and constructions; and it is not perceived that any very satisfactory reason can be assigned for disregarding these advantages of the former and relying entirely upon the latter, at least so far as the repairs of our vessels employed in the West Indies and Gulf of Mexico are to be provided for.

The bar of Pensacola is represented to be sharp and hard, and with an expenditure small, when compared with the magnitude of the interests involved, may be deepened so as to admit vessels of the largest class.

From the nature of the naval service, and the navigation of those seas, it will not always be desirable to employ ships of the largest class in the West Indies and Gulf of Mexico, but they may and probably will be required there, on occasions in which the honor and interests of the nation will be deeply concerned, and when their passage across the bar may be indispensable. Should the experiment of deepening the bar even prove unsuccessful, the importance of the object will justify fully the expenditure proposed. The depth of water is now sufficient to admit sloops-of-war and frigates. These classes of vessels are best adapted to service in that quarter; and if the navy yard be well fitted for the construction and repair of these classes alone, the national arm will be strengthened, and the commerce of the western States and the valley of the Mississippi better preserved and protected. When our present system of seaboard defence on the Atlantic coast shall be completed, an enemy will not be likely to assail that frontier. With whatever nation it may be our fortune to be in conflict, the principal theatre of the contest will most probably be in or near the Gulf of Mexico, and the object of attack the commerce of the Mississippi. Every principle of prudence demands that ample preparation be made to meet such attack most successfully. It has already been much too long delayed.

The committee annex to this report, and as a part thereof, a reference to some public documents on the subject of the defences and importance of Pensacola Bay and Key West, by officers of the engineer corps and of the navy, which will more fully explain and justify the appropriation proposed in the bill.

They also annex [documents which were presented to the committee by the delegate from the Territory, with the request that they might be submitted to the consideration of the Senate.

Reports on the bar at Pensacola.

UNITED STATES NAVY YARD, *Pensacola, August 22, 1833.*

Sir: It affords me great pleasure, in compliance with your order to examine and report upon the practicability of deepening the bar at the entrance of the harbor of Pensacola, and also to give, as far as practicable with the limited means at my command, the character of the bottom to be removed, to be able to speak in such terms of a point so important to the interest of the south and west of our country as will, I hope, induce you to recommend its being put on trial. As a preliminary step to this report, I had an examination of the bar and the nature of the bottom. The bar itself does not exceed in extent over 1,000 yards; the bottom, as far as could be ascertained, was composed of a pure white sand, very compact and firm. My next object was to ascertain if, since the discovery of the harbor and first survey of the bar, any material change had taken place in the depth or courses necessary to pass over it in the greatest quantity of water; and if so, at what periods and under what circumstances. This has necessarily led me into the examination of many works treating on the topography, &c., of the country, as also to call upon some of the most respectable and talented inhabitants of the city of Pensacola for any information in relation to this object, whether traditional or otherwise. It would appear from these researches that, in the year 1709, (although there is no doubt but that a survey and examination was had previous, and that the harbor was then called the harbor Siquenza,) a French officer, by name Mons. de Jaucourt, addressed a report on the very point in question to the minister of the French marine. The report I have no means of coming at. The next notice I find is contained in "Postlethwait's Dictionary of Trade and Commerce," under the head Mississippi, and states as follows: "As the harbor of Pensacola will appear to be a considerable acquisition to Britain, it may be of some use to give the following account of it, from F. Laval, royal professor of mathematics, and master of the Marine academy at Toulon, who was sent to Louisiana on purpose to make observations, 1719, and had the accounts of the officers who took Pensacola at that time, and surveyed the place. The road of Pensacola is the only good port there for *large ships*, and Ship Island for small ones, where vessels that draw from 13 to 14 feet water may ride in safety under the island in fifteen feet, and a good holding ground, as well as in the other ports, which are all only open roads, exposed to the south and from west to east.

"Pensacola is in the north latitude 30 deg. 25 min., and is the *only* road in the Bay of Mexico in which ships can be safe from all winds. It is landlocked on every side, and will hold a great number of ships, which have a very good anchorage in it, in a good holding ground. You will find not less than 21 feet on the bar which is at the entrance into the road, provided you keep in the deepest part of the channel.

"Before a ship enters the harbor, she should bring the fort of Pensacola to bear between north and south three-quarters east, and keep that course till she is west, or west one-quarter south, from the fort on the Island of St. Rosa, that is, till the fort bears east one-quarter north; then she must bear away a little to the land on the west side, keeping about midway between that and the island, to avoid a bank on this last, which runs out to some distance west-northwest from the point of the island.

"In 1719, Pensacola was taken by Mr. Champmerlin, in the Hercules man-of-war of 64 guns, but carried only 57, in company with the Mars, pierced for 60 guns, but had only 54, and the Wilton, pierced for 54 guns, but carried only 50, with two frigates of 36 and 20 guns.

"The admiral was on board the Hercules, which drew 21 feet of water, and there were but 22 feet into the harbor, so that they despaired of carrying in this ship. But an old Canadian, named Grimean, a man of experience, who was perfectly acquainted with the coast, boasted of being able to do it, and succeeded, for which he was the next year honored with letters of noblesse.' In the foregoing account from Mons. Laval, the measurement is French, consequently the minimum depth of the bar, in the ratio of seven eells of Paris to nine yards of English, must be 22 feet 9 inches; and the 22 feet mentioned as being on the bar, equal to $23\frac{1}{2}$ feet, or nearly 24 feet English." Of the unchangeable nature of the bar there is a chain of proof from the earliest data—those of Mons. de Jaucourt to those of Mons. Laval: from the sail-

ing directions of the latter to those of Goult, and from thence to the present day, or the latest official surveys of our own government, by Col. Kearney, of the topographical corps of engineers. In all these surveys and examinations, very little if any variation will be found, either in the courses or depth of water; and the period embraced is about a century and a quarter.

From the foregoing information and detail, and from my own observation during a period of some years, I am induced to believe that the bar at the entrance of Pensacola harbor is a permanent bank of sand, not subject to be influenced by the winds, the waves, or the currents of the ocean; nor is there any deposit from any of the waters emptying into the bay.

Having come to this conclusion, I see no difficulty in deepening the bar to almost any extent that may be desirable, but to the depth of seven feet nothing can be more practicable.

The difficulties that have been overcome at Nantucket are much greater than any that offer themselves here. That the bar will remain at the depth excavated, I infer from the want, heretofore, of any action, either by winds or currents, on its depth or course. The more difficult part of the call made on me still remains to be complied with. The Department are aware that my duties have not led me to the study of the power of the steam engine, as now understood and applied, and of course will receive with great indulgence any remark that may be made by me.

Captain Chase, of the corps of engineers, (to whom is entrusted the general superintendence of all fortifications being erected on the shore of the Gulf of Mexico,) made a report in relation to the deepening of the bar at Pensacola, entitled "Memoir and Estimate on the Improvement of the Pensacola Bar." He states (going into detail) that a sum not exceeding \$106,690 would excavate 1,385 yards long by 390 wide, adding to the present depth on the bar three feet throughout its whole extent. But it is desirable that an additional three feet should be excavated; the sum of \$106,690 must be increased \$40,000, making the amount \$146,690, and giving a depth of from 29½ to 30 feet water. In the estimate as made by Capt. Chase, the power of the steam dredging engine is calculated as being competent to the excavation of 50 cubic yards the hour. I fear that an engine, the cost of which should not exceed \$10,000, would lack the power given to it by Captain Chase. The bar is so firm and compact, that an attempt made by me to examine, at the distance of four feet below the surface, failed by the twisting off of the auger, although the shank was an inch and a half in diameter.

In the power of the engine, and the cost of the vessel, which Captain Chase put down at \$6,000, I differ with him, but in all other points of his report I am of his opinion. I therefore take the liberty of enclosing it to you. The vessel would in all probability cost from \$8,000 to \$10,000.

I need scarcely add, that I should be most happy to give my attention to this object, in connection with my other duties here. Captain Chase and myself would cheerfully unite our exertions to accomplish an object of so much importance to the country, and one of us could always be present.

I am at present and have been making observations upon the effect of the caisson upon the bottom as it sinks. When placed in the position it now is, there was but 14 feet water; the bottom hard sand, of nearly the same firmness as that composing the bar; since which it has been sunk five feet in the same position, and has washed away the bottom 5 feet, leaving at present 19, feet where originally there was but 14.

I have the honor to be, sir, very respectfully, your obedient servant,

A. J. DALLAS.

To the Hon. LEVI WOODBURY, *Secretary of the Navy, Washington.*

WAR DEPARTMENT, *January 18, 1836.*

SIR: I have the honor to submit a report of the chief engineer, prepared in obedience to the resolution of the Senate of the 12th inst., calling for information on the subject of deepening the bar at Pensacola Bay. I agree with the chief engineer in the opinion he has expressed of the "utility and practicability of this work."

Very respectfully, your most obedient servant,

LEW. CASS.

Hon. M. VAN BUREN, *President of the Senate.*

ENGINEER DEPARTMENT, *Washington, January 14, 1836.*

SIR: In compliance with a resolution of the Senate of the United States, of the 12th inst., "directing the Secretary of War to communicate to the Senate the report of the engineers on the subject of deepening the bar at Pensacola Bay, with the opinion of the Department as to its utility and practicability," which you have referred to this Department, I have the honor to hand you a copy of the report, estimate and drawing, from Captain William H. Chase, of the corps of engineers, relating to this subject. Concurring fully with the views therein represented, both as to the practicability and utility of the operation, and believing that it is the best plan for effecting the object in view, with the greatest economy and prospect of success, it is respectfully submitted, without further remark.

I remain, very respectfully, sir, your obedient servant,

G. GRATIOT.

The Hon. LEWIS CASS, *Secretary of War.*

Memoir and estimate on the improvement of the bar of Pensacola.

The bar at the entrance of the harbor of Pensacola is the only impediment to its well-being as a naval depot. This impediment may be removed, and, in proportion to its importance, at a very small expense.

It is unnecessary, in this place, to dwell on the importance of Pensacola as a naval depot, in conjunction with the defence of the Gulf of Mexico maritime frontier. It is sufficient to know that it is the only harbor on the gulf, within the limits of the United States, at which a great naval arsenal can be established; and it is satisfactory to know that such an arsenal has not only been commenced, but that it is too intimately connected with the great western and southwestern interests to fear the opposition which personal or sectional views may give rise to.

If the importance, then, of this harbor is felt and appreciated, any proposition for its improvement must be interesting. The following data have, therefore, been collected, and are now respectfully submitted to the Engineer department, to be added to the information which it may already possess on this subject.

By comparing the oldest charts with those of the present day, we do not find any alteration of the position of the bar.

The excellent chart of the survey of the Gulf of Mexico, executed by the British in 1763, exhibits the same soundings as were found by Colonel Kearney, in his critical survey of the harbor in 1822.

The depth of water on any part of the bar does not appear to have increased or decreased since it first began to be known to navigators; and we have, therefore, strong grounds for our belief that an increased depth of water, obtained by artificial means, would remain without aggression.

The largest ships-of-war in our service do not draw over twenty-four feet of water; it is, therefore, proposed to obtain twenty-seven and a half feet of water at low tide. This, however, may be increased *ad libitum*. The capacity of the improved dredging machine is sufficient to the task; and we have only to glance at similar improvements which are being made at Nantucket, and which are recommended for Ocracoke shoals, to show that perseverance and a judicious application of the proper means will secure the results desired.

The improvement of the bars or shoals at Nantucket and Ocracoke have in view the removal of obstacles more difficult to surmount than are presented at the bar of Pensacola; yet the operations at Nantucket are reported as very successful. The military engineer in charge of that improvement states that the channel already excavated does not fill up, but, on the contrary, it perceptibly increases in its dimensions.

The vicinity of the public works at St. Rosa's Island would afford many facilities, by reason of the wharves, storehouses, (the casemates of the fort,) and other organized means necessary to the operations.

The superintendence of the operations would be cheerfully undertaken by the commanding engineer, by which a saving of expense would be exhibited on this score. In short, the manifest advantages that would accrue to the operations would alone induce their prosecution simultaneously with the public defences, even if other inducements were wanting for their speedy commencement and completion.

The depth of water at the pinch of the bar is $21\frac{1}{2}$ feet at low tides. From the pinch it gradually deepens seaward to $27\frac{1}{2}$ feet, to a distance of 600 yards; and towards the harbor it deepens to 32 feet in a distance of 785 yards.

The whole distance is 1,385 yards, as is indicated on the accompanying chart by the parallelogram A, B, C, D. It being proposed to obtain a depth of $27\frac{1}{2}$ feet, the greatest depth to be excavated is six feet, and the least depth 0, the average depth is, of course, three feet. It is proposed to excavate a channel 130 yards wide in the first instance, which is sufficiently wide for our largest vessels to pass through, with a fair wind, in safety; a steam tow-vessel would bring them into port, if the wind were adverse.

It would be well to increase the width to 260 yards, or even 390 yards, after the first section of 130 yards shall have been accomplished.

The first section of 130 yards \times 1,385 yards in length \times 1 deep = 180,050.

The second section of 260 yards \times 1,385 yards in length \times 1 deep = 360,100.

The third section of 390 yards \times 1,385 yards in length \times 1 deep = 546,150.

ESTIMATE.

Cost of a steam dredging engine.....	\$10,000	
Cost of a vessel of 100 tons.....	6,000	
Cost of six receiving lighters, at \$500 each.....	3,000	
Cost of a steam tow-vessel.....	5,000	
Contingencies of boats, &c.....	1,000	
		\$25,000
Cost of apparatus.....		\$25,000
Pay of superintendent of steam engine.....	\$1,000	
Pay of three men, at \$15 per month.....	540	
Pay of six men for lighters.....	1,080	
Pay of captain of tow-vessel.....	480	
Pay of assistant steam engineer.....	360	
Pay of three men, at \$15 per month.....	540	
Pay of four men for all work, at \$15 per month.....	720	
Subsistence of seventeen persons, at \$8 per month, one year.....	1,622	
Fuel, 500 cords for dredging machine, at \$3 per cord.....	1,500	
Fuel, 150 cords for tow-vessel.....	450	
		\$8,302
Repairs and contingencies.....	1,698	
		10,000
This would be the annual cost of one engine.....		\$35,000

From observations upon the weather for one year, it is supposed that the machine could be worked 120 days between the 1st of April and 30th of September, or two-thirds of the time; and 60 days from the 1st of October to the 31st of March, or one-third of the time, making 180 days per annum.

The capacity of the machine is fixed at 50 cubic yards per hour. We fix the working hours per day at ten, which gives 1,800 hours per year, and 90,000 cubic yards. 90,000 cubic yards would cost, the first year, \$35,000, or 38.888 cents per cubic yard.

The machine being on hand, the second year its repairs would cost, say..... \$5,000
Its management..... 10,000

90,000 cubic yards would cost, the second year..... \$15,000
or 17.44 cents per cubic yard.

It has been shown that 180,000 yards must be excavated to secure a channel 27½ feet deep and 130 yards wide; now, 180,000 cubic yards, by the above estimate, would cost as follows:

90,000 cubic yards the first year.....	\$35,000 00
90,000 cubic yards the second year.....	15,000 00
<hr/>	<hr/>
180,000	\$50,000 00
Which is at the rate of 27.777 cents per cubic yard.	
We will suppose the work to be performed in one year by two machines. One machine and appendages, its management, &c., will cost.....	
	35,000 00
<hr/>	<hr/>
Two machines, as above, will cost.....	\$70,000 00
But as one tow-vessel would be sufficient to attend upon two machines, we will deduct the cost of one tow-vessel.....	
	\$5,000 00
Expenses of labor, fuel, &c., for the same.....	2,310 00
	<hr/>
	7,310 00
<hr/>	<hr/>
The cost, then, of 180,000 cubic yards will be.....	\$62,690 00

Which is 34.82 cents per cubic yard.

The advantages resulting from the use of two machines would be: 1st. The opening of a channel in one year of sufficient dimensions to admit ships of the line.

2d. If it were advisable to increase the width of the channel to 260 yards, or double that width, the operations of the same could be performed the second year at a reduced expense. The two machines being on hand, the expenditure in excavating 180,000 cubic yards more would be as follows:

Pay of operatives and contingencies.....	\$10,000 00
Repairs and contingencies.....	10,000 00
<hr/>	<hr/>
Cost of additional 180,000 cubic yards.....	\$20,000 00

Or 11.11 cents per cubic yard.

The cost, then, of a channel way 1,385 yards × 1 yard × 130 = 180,000, the operation being performed in one year, would be.....	\$62,690 00
The cost of a similar section in the second year would be.....	20,000 00
	<hr/>
	\$86,690 00

Three hundred and sixty thousand yards excavation, exhibiting a channel 1,385 yards long, nine yards deep, and 260 yards wide, would be, and could be performed for the sum of \$86,690.

To arrive at the cost of making the channel 390 yards wide, we have only to add to.....	\$86,690 00
The cost of excavating 180,000 cubic yards, on the terms stated for the second section....	20,000 00
	<hr/>
	\$106,690 00

Recapitulation.

Cost of excavating a channel-way over the bar of Pensacola, exhibiting a depth of 27½ feet water in low tides, of the several dimensions stated as follows:

	Yards.	Yards.	Deep.	Cub. y'ds.	Cost.
First year's operation.....	130 ×	1,385 ×	1 =	180,000 =	\$62,690 00
Second year's operation.....	130 ×	1,385 ×	1 =	180,000 =	20,000 00
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Third year's operation.....	260 ×	1,385 ×	1 =	360,000 =	\$86,690 00
	130 ×	1,385 ×	1 =	180,000 =	20,000 00
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
	390 ×	1,385 ×	1 =	540,000 =	\$106,690 00

All of which is respectfully submitted.

WM. H. CHASE, *Captain Engineers.*

St. ROSA ISLAND, December 6, 1829.

[Here follows, in the original, a drawing of the harbor of Pensacola.]

Report of board of engineers of the United States.

Thus situated, as Pensacola Bay is, with respect to the country on either hand, and the immense regions behind, its rare properties as a harbor become of inappreciable value. Some of these properties we will enumerate: 1st. It is accessible at low water to the largest class of sloops-of-war and small frigates, and, as the bar is narrow, may perhaps be made to admit still larger vessels. 2d. Its bar is near the coast, and the channel over it is straight and easily hit. 3d. It is perfectly land-locked, and has a very capacious roadstead. 4th. It has excellent positions for repairing, building, and launching vessels, and for docks and dock yards, in healthy situations; 5th. It has abundance of good water for the supply of vessels; and 6th. It is perfectly defensible.

As these and other properties, in conjunction with its situation as respects the coast and the interior, have induced the government to fix upon it as a naval station, and a place of rendezvous and repairs,

we shall, for the future, consider it in that character, both in its relation to the commerce of the gulf, and its own proper defences.

Although a naval station nearer the extremity of East Florida might possibly enable our vessels-of-war the better to watch over our commerce in the Florida stream, still no deep harbor exists to the south of Pensacola in which the circumstance of an entire separation from all relief and supplies does not greatly outweigh this advantage, if, indeed, it be more than imaginary.

It is, however, far from certain that the Florida stream is always to be the channel of communication from the gulf to the Atlantic. The great embarrassments and losses to which we must be exposed while that continues to be the course of our gulf trade, so long at least as we have not the mastery on the ocean, and, in fact, so long as the Island of Cuba is in possession of another power, to say nothing of the natural dangers of that navigation, have directed the public attention seriously to the project of opening a shorter and safe passage through the head of the Florida peninsula. No obstacle, not insuperable, it is presumed, will prevent the execution of this grand design; and, considered in reference to such an outlet, Pensacola is most happily situated.

NAVY DEPARTMENT, *February 12, 1835.*

Sir: In answer to the call of the Committee on Naval Affairs of the Senate for such information as may be in the possession of this Department as to the expediency of deepening the bar of Pensacola Bay, I send the enclosed copy of a report from the Board of Navy Commissioners on the subject.

As the committee ask an expression of my views as to this measure, I have no hesitation in stating it as my opinion, that the importance of having a naval station on Pensacola Bay, to which vessels of the largest size might be admitted, is so great, both as respects our navy and our commerce, that an appropriation for deepening the bar, which now obstructs the entry of large vessels into the bay, would be highly expedient.

The bar is composed of sand, very compact and hard, and therefore difficult to be removed; but this circumstance affords a strong evidence that, should the bar be deepened, the artificial channel would not soon be obstructed; and a dredging engine, to be driven by the force of steam, fully competent to the removal of the compact sand of this bar, could be constructed for ten or twelve thousand dollars.

It is but justice to state, however, that my opinion is founded entirely upon information contained in our documents, and more especially upon the letter of Captain Dallas, of the 22d August, 1833, and the memoir and estimate on the Pensacola bar, by Captain Will. H. Chase, of the 16th of December, 1829, to be found in the Senate documents for 1833-'34, vol. 1, No. 1, and papers 252, 253, 254, 255, 256, and 257.

I have the honor to be, very respectfully, your obedient servant,

M. DICKERSON.

The Hon. SAMUEL L. SOUTHWARD, *Chairman of the Naval Committee, Senate of the United States.*

NAVY COMMISSIONERS' OFFICE, *January 23, 1835.*

Sir: The Board of Navy Commissioners have the honor to acknowledge the receipt of your letter, enclosing a resolution of the House of Representatives upon the expediency of making an appropriation for deepening the harbor of Pensacola, and, in compliance with your directions, respectfully submit the following report.

It appears, from various concurrent testimony, that the bar at the entrance of the harbor of Pensacola has varied little, if any, in its form or elevation since the first known examination was made of it, forming an exception in these particulars to most, if not all, of the other sand bars at the mouths of our other harbors or rivers.

It also appears, from the reports transmitted to Congress by the Secretary of War, February, 5, 1830, and of Captain A. J. Dallas, transmitted with the preceding by the Secretary of the Navy at the last session of Congress, that this permanency in the form and elevation of the bar is considered as forming strong grounds for believing that an increased depth, obtained by artificial means, would be permanent.

The board feel delicacy in dissenting from the opinions of those who, from their superior opportunities for personal examination, or from whose former employment, would seem to be best qualified to judge in this case; they, however, respectfully suggest a few remarks for consideration.

It will no doubt be admitted that the bar owed its origin to the action of the water, as agitated by winds or currents, and that it has apparently assumed the form best calculated to prevent further changes from those causes. If this is the case, the question presents itself, whether a change to be made by other causes may not tend to disturb the equilibrium which seems now to be established, and lead to results different from those which are desired and anticipated.

That something of the kind may be apprehended, seems to be possible, by the effects produced near the navy yard, by sinking a caisson for a wharf, as mentioned in the concluding paragraph of the report of Captain Dallas. He there states that the bottom is of hard sand, of nearly the same firmness as that composing the bar: when placed in the position it now is, there was but fourteen feet water, since which it has been sunk five feet in the same position, and has washed away the bottom five feet, leaving nineteen feet where originally there was but fourteen. From this statement, it appears that a slight cause had produced a very considerable change, and in a soil represented to be nearly similar to that of the bar. It is evident that the sand thus removed must necessarily be deposited at some other point, and to that extent produce a shoal.

The bar, in its present state, allows the entrance and departure of frigates, and vessels of lower classes, at high water; and the aid of a steam vessel would greatly facilitate their ingress and egress.

It is undoubtedly desirable to obtain a sufficient depth of water upon the bar for the free admission of our larger vessels, if it can be effected at any reasonable expense, and be brought within the protection of the defences of the harbor.

From the information which the board possess at this time, they do not feel competent to express a

positive opinion upon the expediency of now making the attempt; but if, from other information, it should be determined upon, they would respectfully recommend that great care be taken not to hazard the advantages which the bar possesses in the present depth of water upon it.

I have the honor to be, &c.,

JOHN RODGERS.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

Roberts' account of the first discovery and natural history of Florida, published at London, 1763.

The road of Pensacola is one of the best in all the Gulf of Mexico, in which vessels can lie in safety against every kind of wind. The bottom, which is sandy, mixed, in many places, with ooze, is excellent for anchorage: the sea is never agitated here, because the land surrounds it on every side. It is capable of containing a great number of ships, as may be judged from its extent, and by the soundings which the figures in the plan exhibit in feet, a measure more exact than if measured by fathoms.

The tides are irregular here as well as upon all the rest of this coast. All that hath been remarked is, that within the space of twenty-four hours, the tide ebbs out of the harbor from eighteen to nineteen hours, and is from five to six hours flowing back again; and the greatest difference that has been found between high and low water is about three feet; on certain days less; at other times without increase or diminution, although the currents are changing daily, but with no regularity—the winds, in all probability, being in some measure the cause of this variety. The depth of water over the bar, at the entrance of the road, in the middle of the channel, is never less than twenty-one feet.

A memoir of the legislative council of Florida to the President of the United States.

Another prominent advantage in favor of Pensacola, which gives it elevated claims on the patronage of the government, is, that it is distinguished for the salubrity of its atmosphere and mildness of climate; it is a situation where her troops may always calculate upon enjoying good health, and where it is represented that breadstuffs and other provisions continue almost as long in a perfect state of preservation as in most of the northern parts of the United States.

The occupation of Pensacola, with the necessary fortifications, is calculated to afford a more complete command over the commerce of the Gulf of Mexico than any other position which could be selected on the southern coast; with this peculiar advantage, the United States would exclude the shipping of an enemy, probably from the only point in Florida in which they could anchor with safety, owing to the violence of the West India gales. Your memorialists are of the opinion that there is no other harbor, save that of Havana, in which they could ride with security during a storm. But the benefits arising from the selection of Pensacola, as a naval station, are not entirely of a negative character; we should not only be enabled to exclude the hostile armaments of foreign nations, but our own vessels could be protected from capture and disaster. The harbor of Pensacola will always be a place of secure retreat, a station from which expeditions may be fitted out without interruption, and from which the West India commerce of an enemy might receive the most successful annoyance. Were New Orleans assailed, Pensacola would be competent to afford co-operation for its defence, both by land and water, which could not fail to excite in the enemy the most fearful apprehensions. By our vigorous and well-directed efforts, her commerce would be cut off, her detachments captured, and, in the end, her surrender and retreat accomplished. The security of this place, then, is believed by your memorialists to be inseparably connected with the prosperity and defence of New Orleans and the contiguous States.

EDMUND LAW,

President of the Legislative Council.

NAVY COMMISSIONERS' OFFICE, *February 16, 1828.*

Sir: In reply to your letter of this day, the Commissioners of the Navy have to observe that, from the best information in their possession, there are twenty-one feet of water on the bar at Pensacola, and seventeen on that of St. Joseph; that nothing has occurred to induce them to believe that any other place can be found on the Gulf of Mexico, for a naval establishment, combining the same advantages as Pensacola.

I am, very respectfully, sir, your obedient servant,

JOHN RODGERS.

Hon. Jos. M. WHITE, *Congress.*

Extract from a letter of Commodore Ridgely, commander of the West India squadron, stationed at Pensacola.

The incalculable advantages that would accrue to an enemy, capable of taking and holding Pensacola, and making it a rendezvous for a blockading squadron stationed off the mouths of the Mississippi, will make obvious, at the first glance, the great necessity of erecting fortifications sufficiently strong to deprive them of these advantages. The force of the batteries, and the manner of constructing them, is matter for the Engineer department, and I am not prepared on that question to give an opinion. The salubrity of Pensacola is as good as any portion of the globe I have been in.

General Andrew Jackson, President of the United States:

Sir: Pursuant to your request made to me last evening, relative to the practicability of constructing a dry dock at the Pensacola Navy yard, I beg leave most respectfully to suggest, for your consideration, a plan which presents, in my view of it, an easy way of accomplishing this important work. I am strengthened in my opinion relative to the construction of a dry dock in this way, by the concurrence of Colonel Baldwin, to whom I explained my views on this subject in the year 1829, when he made his visit to that yard.

My long residence at the Pensacola Navy yard enabled me to make many observations and comparisons between the situation of the navy yard for this purpose and some others in the Bay of Pensacola, and in doing so I came to the conclusion that the site at Navy cove was preferable for a dry dock to that at the navy yard, and for the following reasons: first, the tide does not run so rapid; secondly, the harbor is less exposed to the action of the wind, and thirdly, the expense of constructing a dock at the latter place would be much less than at the navy yard.

There is also another site above the city of Pensacola, which has been highly approved of for the purpose of erecting a dry dock.

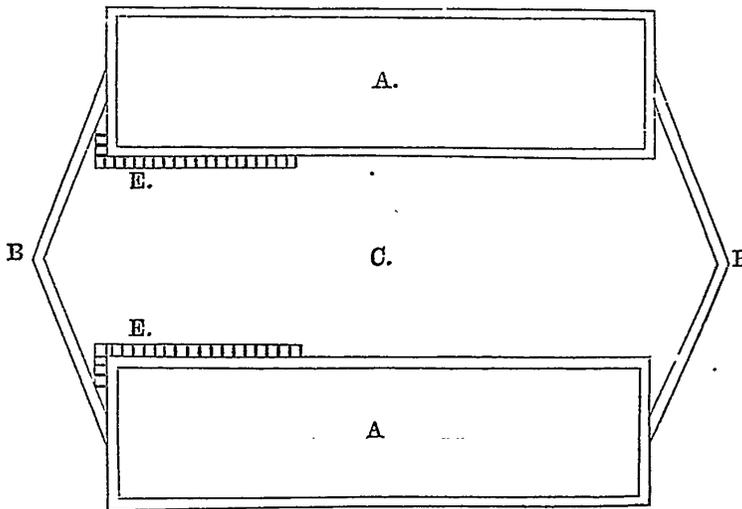

I do not consider that there are any serious objections to placing the dock at a few miles' distance from the navy yard, as the transportation of ships is soon effected, and the arrangements for the crews and materials could be made at as moderate an expense where the dock is located as at the yard itself.

I have long enjoyed the friendship of Commodores Barron, Elliot, Dallas, and others, and beg leave to refer you to those gentlemen for their opinions of my conduct during the time I have been in the public service, now nearly thirty years.

Most respectfully, I have the honor to be, sir, your obedient servant,

CHARLES D. BRODIE.

In explanation of the method of constructing a dry dock, I have submitted for your inspection the accompanying diagram. By constructing two large caissons of sufficient length to form the sides of a dry dock of wood work, to be placed in the Bay of Pensacola, and to be sunk with masonry, forming a parallelogram, and placed as far apart as would be sufficient to receive the masonry of structure similar to the one erected at the Gosport Navy yard; then, at the ends of this wood work, two sections to be placed so as to close the ends, which, when done and the water pumped out, will leave the bottom of the bay exposed to view. The piling of the interior of the work on the inner margin or sides of the wooden structure to be of grooved piles, to prevent the water from coming in, also to give permanency and to prevent the sides from collapsing. When eight or ten feet of the wood work on the caissons are run up, strong beams are to be thrown across and continued every seven feet in height which will connect the two caissons and keep them firm and secure, and form the sides of the dock, as represented in the diagram.

References.

- A, A. Caissons forming the sides of the dock.
- B, B. Sections at each end of the caissons to keep out the water of the space C, where the masonry of the dock is to be placed.
- E, E. Grooved piles driven on the inside of the caissons in the space C, to keep the water out, which are to be driven all around.

WASHINGTON, January 14, 1836.

DEAR SIR: In fulfillment of the promise made you yesterday, I have now the honor of giving you my views on the subject of deepening the bar at the entrance of the harbor of Pensacola, and of constructing a dry dock at the navy yard at that place. The sands forming the bar are not shifting, I am convinced, of which I think the following proof irresistible. Formerly the buoy placed in the deepest water upon the bar was secured by a chain attached to a condemned iron gun, either a nine or twelve pounder; when this was put down I know not, but at all events before the command of that station devolved upon me; during the last summer of my command, the chain was worn out and the buoy drifted

ashore, not far from the mouth of the Perdido. Before it was replaced I thought it necessary to mark as nearly as possible its former position, which was readily found after a short search; the gun above mentioned was discovered lying upon the bar unimbedded by the sand and without any accumulation of sand about it. I have been repeatedly informed, and from different sources, that there was then nearly the same depth of water upon the bar as when the first surveys were made by the Spaniards, which goes to prove, that if there is an accumulation of sand upon the bar, it is so very gradual that after the bar shall be once deepened it will require but little labor and expense each year, or perhaps some four or five years, to keep it so forever. As to the expense which would attend the removal of the sand from the bar to a depth sufficient to admit ships of the line at all times into the harbor of Pensacola, I am not now prepared to make an estimate; but I think, with a steamboat of from eighty to a hundred horse power, it might be effected at an expense of \$100,000 or less, in one season, and when completed there would be secured to the government the best harbor (Newport perhaps excepted) along the whole line of our extensive maritime frontier; one, too, protected at its entrance against any floating force which could be sent against it.

I consider a dry dock at the Navy yard at Pensacola as indispensable. Whenever engaged in a war with either of the great maritime powers of Europe, the theatre of which must ever be along our own coast and in the West Indies, Pensacola must ever, for that portion of our force stationed in the West Indies and Gulf of Mexico, be the harbor to which resort must be had for repairs and for supplies. The deeping the bar and the construction of a dry dock might be simultaneously in progress. There appears to me no obstacle in the way of constructing a dry dock, except in the danger of a collapse of the sand in excavating; this I should suppose could be obviated by extending the area of excavation. It will afford me pleasure to answer any interrogatories you may put to me on the above subjects.

I have the honor to be, sir, your obedient servant,

M. T. WOOLSEY.

The Hon. JOSEPH WHITE, *Delegate from Florida, in Congress.*

UNITED STATES NAVY YARD, *Pensacola, December 20, 1835.*

MY DEAR CAPTAIN: I have had the pleasure to receive your favor under date of the 10th instant, and reply to its contents with great diffidence from the want of language to express an opinion on the utility and importance of the subject.

There can be no individual, I am convinced, at all acquainted with our southern seaboard, and whose views are alike liberal to all sections of our Union, and who, aware of the advantages and practicability of the construction, possessing as it does all the necessary materials for building, who would venture an opinion in opposition to the location of a dry dock in the harbor of Pensacola; it is the only one south of the Chesapeake at present known to our government, or rather, used as a depot for our vessels-of-war, where frigates, sloops-of-war, and corvettes ingress and egress without difficulty.

The bar or entrance making between the north end of Black Beard, and the south end of St. Catharine's Islands, on the coast of Georgia, I believe to be a better one, and in other respects not inferior to Pensacola. I mean by this, the possession by the government of live oak, the facility for obtaining all other timber suitable for ship building, the ease with which, and the little expense necessary for fortifying it, together with the great security and safety of the anchorage; but Pensacola, already selected as a rendezvous for our West India squadron, and large appropriations of money expended in fortifying the harbor and in the improvement of the navy yard, the necessity, too, of having a depot for our ships in the gulf or vicinity of the West India Islands, where, in case of war with England, Spain, or which is now more probable, with France, much of the active operations of our citizens would be carried on, together with the impossibility, in my opinion, of effectually fortifying any of the Florida keys, give to Pensacola a preference which I presume must have its weight.

This bar has never, I believe, (at least within our recollection,) altered its depth or varied its channel; the largest sized sloops-of-war can always enter, and frigates of the greatest draught at high water, and by constructing the latter with a less draught, they could enter at half tides with a smooth sea; and that they would be equally as safe, sail as fast, and be in every respect as efficient, is satisfactorily proven by the Macedonian frigate, drawing two feet less than our ships of the same class, and possessing the qualities of fast sailing and a good sea vessel in an eminent degree.

I have just remarked that this bar has not altered its depth within our recollection; it is not, therefore, to be presumed that it will do without the application of artificial means; but if it should, that it must deepen, I think is beyond doubt from the circumstance of the two Islands of St. Rosa and Foster's approximating each other by the making up of land, necessarily contracting the channel, increasing the velocity of the current, and consequently having a tendency to deepen it.

If the West India squadron be considered as necessary, (and let others think as they may on the subject, in my humble opinion it is second to none other in utility and importance. I have been a long time in the navy, and have never witnessed more activity displayed, or more essential services rendered to the country or its commerce, than when cruising along the West India Islands;) if the valuable property annually flowing down our western waters to New Orleans, and from thence finding an outlet to different portions of the globe, through the gulf; if the extensive trade constantly passing in and out of the bay be considered as deserving protection, then must it be evident that the ships composing this squadron, and intended as a protection to our gulf trade, should have a rendezvous where they could be repaired and refitted with every facility, and where they would derive all the advantages which other cruisers would possess by entering one of our northern ports; if these, then, are facts worthy of consideration, it only remains to designate the spot; and, in my opinion, there is none so suitable as the harbor of Pensacola, for the various reasons already assigned.

It is supposed there are three sites admirably calculated for the location of a dry dock in this harbor: one at this navy yard, one at Five-fathom hole, above Pensacola, the other at Navy cove; this last, from all the information I can obtain on the subject, would be the most suitable, but the selection should be made by persons well qualified for the purpose, possessing experience in the construction of so important a work.

These remarks are submitted, as I before observed, with great diffidence; but should I be so fortu-

nate as in the slightest degree to aid in a work of so much importance to the country, the southern and western section of it particularly, and the navy in general, I shall feel, as an officer, gratified and benefited, in increasing the popularity and interest of the service by extending its usefulness, and rendering its services more conspicuous.

I am, my dear captain, most sincerely and truly yours,

JAS. M. McINTOSH.

[24TH CONGRESS.]

No. 590.

[1ST SESSION.]

MEMORIAL OF CERTAIN FIRST CLERKS OF COMMANDANTS AT NAVY YARDS FOR AN INCREASE OF THEIR SALARIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1836.

To the honorable the Senate and House of Representatives of the United States of America, in Congress assembled:

We, the undersigned, your memorialists, first clerks to commanders of navy yards in and belonging to the United States, beg leave to request the attention of your honorable bodies to a subject of deep interest to your petitioners.

At the last session of Congress an act was passed, entitled "*An act to regulate the pay of the navy of the United States,*" in which act the grade or office of your memorialists was included; but while the pay of almost every other class of officers embraced therein, when on duty, was increased almost *fifty per cent.*, no increase was made to that of a greater portion of your petitioners.

It is a duty which we owe to ourselves, humbly and respectfully to state that our situations are confidential and responsible ones, and require, in addition to a good education, a thorough knowledge of public affairs, as far as they are connected with the branch of the national service to which we are attached.

In banks and other public institutions, and also in merchants' counting-houses of any celebrity, persons occupying situations, somewhat similar to those filled by your memorialists, receive good and generous salaries, ranging from twelve hundred to two thousand dollars per annum, with a prospective preferment, which, when the individual is worthy, is generally realized.

In the navy, too, of our great competitor for maritime power, the grade of your memorialists stands in the line of promotion; insomuch, at least, as no appointment is made to the grade of *purser* but that which is taken from the list of secretaries or clerks of commanders of fleets, squadrons, or dock yards, who have served faithfully and honorably for a certain term of years. In the navy of the United States, however, no such stimulus is extended to your memorialists, and consequently we have no other resource than to lay before you a statement of the hardships under which we labor, and pray your honorable bodies for relief.

We have very arduous and responsible duties to perform, requiring the utmost industry and attention at our hands. Our whole time (frequently not excepting Sabbaths and nights) is devoted to the public service, and we therefore humbly conceive that an adequate or proportionate compensation is not allowed us.

Your memorialists, actuated by the same principles and impulses which govern mankind generally, desire to educate and rear our children in a respectable and proper manner, which, with the strictest economy, we cannot do on our present salary. The nature of our duties requiring us to reside in cities, where a great proportion of the most essential necessities of life are very expensive, prohibits us from a participation in a very great advantage enjoyed by officers in other grades in the navy, who, after two or three years, uninterrupted service, can obtain a leave of absence, and remove, upon a respectable salary, to a more economical section of country than we are obliged to inhabit.

It would be a needless labor on the part of your memorialists to enumerate to your honorable bodies every point of inequality between our situations and that of other grades in the navy, for we feel well assured that, when the subject comes before you for consideration, the multiplied and responsible nature of our duties will be fully weighed, and that you will grant to us such additional compensation as to your wisdom may seem to be right and proper.

And your memorialists, as in duty bound, will ever pray.

HENRY J. WILLETT,

First Clerk to Commandant Navy Yard, New York.

HENRY S. CRABBE,

First Clerk to Commandant Navy Yard, Philadelphia.

SAMUEL WOODWORTH,

First Clerk to Commandant Navy Yard, Boston.

SAMPL B. BROWNE,

First Clerk to Commandant Navy Yard, Gosport.

[1ST SESSION.]

ON THE CLAIMS OF THE WIDOWS, CHILDREN AND OTHER RELATIVES OF THE OFFICERS AND CREW OF THE UNITED STATES SCHOONER WILD CAT, WHICH VESSEL FOUNDERED AT SEA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 19, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the memorial in behalf of the widows, children and other relatives of the officers and crew of the United States schooner Wild Cat, reported:

That the schooner Wild Cat, one of the vessels composing the squadron under the command of Commodore David Porter on the West India station, in the year 1824, for the suppression of piracy, sailed from the Havana on the 27th August of that year, and was supposed to have foundered at sea in a very heavy gale which occurred immediately after, as her arm chest, with small arms, was picked up on Florida reef, and afterwards obtained by Commodore Porter. A bill for the relief of the widows, children and other relatives of the officers and crew of this vessel was reported by the Committee on Naval Affairs, in May, 1830, since which time the claim appears to have been overlooked, though it has been renewedly brought before the committee.

The case of this schooner appears to be similar to those of the sloop-of-war Hornet and the schooner Sylph, for which relief was afforded by acts of Congress, in 1830 and 1833 and as the committee concur in the policy which occasioned the passage of those acts, a bill of a like description is herewith reported.

24TH CONGRESS.]

No. 592.

[1ST SESSION.]

ON THE CLAIM OF A LIEUTENANT IN THE NAVY, WHO WAS DISMISSED AND AFTERWARDS RESTORED, FOR PAY DURING THE INTERVAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 19, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of Charles H. Duryee, a lieutenant in the navy of the United States, reported:

That the memorialist, on the 30th of March, 1830, then being a passed midshipman in the navy, was dismissed from the service; to which he was again restored on the second day of February, 1833, upon condition that he should not claim the pay accruing during the time that had intervened from the date of his dismissal until his restoration. He now applies to Congress to be allowed the sum of \$1,361.20, to which he would have been entitled if he had not been dismissed from the service.

The only reason which is offered in support of this claim is, that two other officers, who were dismissed at the same time with the memorialist, for being implicated in the same transaction, have been allowed their arrearages. It is not perceived that the fact of a discrimination having been made by the Executive between this case and the others which are referred to, gives any claim to the consideration of Congress; on the contrary, it is to be presumed that the discrimination would not have been made without good cause. During the interval in which the petitioner had ceased to be an officer of the navy, no public services could be required or were performed by him; his reinstatement in the service was an act of favor; his dismissal is not pretended to have been without sufficient cause; and there does not seem to be sufficient ground for the allowance of this claim. The following resolution is therefore reported:

Resolved, That the prayer of the petition ought not to be granted, and that it lie on the table.

24TH CONGRESS.]

No. 593.

[1ST SESSION.]

ON CLAIMS FOR INCREASE OF PENSIONS GRANTED FROM PRIVATEER PENSION FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1836.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Mary Fish and Catharine C. McMurray, reported:

That the petitioners, who have been long in the receipt of pensions out of the privateer pension fund, pray for an increase of pension, upon the ground that their late husbands acted as surgeons of the private armed vessels in which they lost their lives, and that the allowance of eight dollars per month, which they have heretofore received, is not sufficient, according to the rank in which they acted.

The committee are not of opinion that a rule under which the pensions charged upon the fund have been so long apportioned, should be now altered, after an acquiescence of more than twenty years. The fund has been for sometime on the decrease and will soon be entirely exhausted, and the petitioners, with all others who have received its benefits, must be content to share them while it lasts, in the same proportion as heretofore.

The committee, therefore, ask to be discharged from the further consideration of the said petition.

24TH CONGRESS.]

No. 594.

[1ST SESSION.

ON THE EXPEDIENCY OF EXEMPTING CAPTAIN WOOLSEY, OF THE NAVY, FROM THE OPERATIONS OF THE LAW REQUIRING THE ENTIRE PAY OF AN OFFICER OF THE NAVY TO BE APPLIED TO THE PAYMENT OF A DEBT TO THE GOVERNMENT, AND DIRECTING THAT ONLY ONE-THIRD OF HIS PAY BE SO APPLIED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of Melancthon Taylor Woolsey, a captain in the navy of the United States, reported:

That the petitioner was ordered to the command of the naval station on Lake Ontario, in the year 1808, in which station he remained until relieved by Commodore Chauncey in 1812. During the war, he served under that officer, and, at the close of it, he again resumed the command of the station, and continued in it until the year 1822, a period of between thirteen and fourteen years. During this time, he superintended the building of a number of vessels, and was charged with the disbursement of large sums of money, without having his accounts adjusted by the Fourth Auditor until the 13th of September, 1822, when he was found to be indebted to the United States in the sum of \$36,341.72.

In pursuance of a provision in the annual appropriation acts from 1822 to 1828, and the act of January 25, 1828, to prevent defalcations on the part of disbursing agents of the government, the pay of Captain Woolsey has been retained from the time of the settlement of his accounts, and the balance reported against him was thereby reduced to the sum of \$17,059.48, on the 30th of September last. During a period of more than thirteen years, Captain Woolsey has thus continued in service, reducing the amount of his debts without uttering a complaint, and contriving, by a wonderful exertion of frugality and good management, to support a numerous family upon the amount received by him for his rations. In this quiet, patient, uncomplaining course he might have continued, had not the act passed at the last session of the twenty-third Congress, regulating the pay of the officers of the navy, deprived him of the pittance upon which his family had subsisted. This act was intended for the benefit of the officers of the navy; but it is only productive of extreme hardship to Captain Woolsey; for instead of pay, rations, and emoluments, it provided a fixed annual compensation, the whole of which is retained from him; and the consequence is, as he states in his petition, "after a faithful service of nearly thirty-six years, past the meridian of life, surrounded by a young, growing, and helpless family, destitute of the means to support or educate them, he throws himself upon his country for relief."

From the inquiries instituted by the committee, they are satisfied that Captain Woolsey is a meritorious officer and a worthy man, and that his indebtedness is attributable to his ignorance of accounts, and negligence in the manner of keeping them. However deserving of reprehension this negligence may be, it is rendered less inexcusable, when the situation of the frontier, and the nature of the service, when he took charge of the naval station on Lake Ontario, is considered. In a country which was then almost a wilderness, he had in charge the purchase of the materials, and the building and equipping the brig Oneida, of eighteen guns, and two gun boats, and the disbursement of all the expenditures which, under such circumstances, and so far from the seaboard, must have been attended with a great many incidental expenses, requiring a correspondent number of vouchers. He was frequently afloat in boats, and on the road, as he states, attending to the transportation of the military and other equipments of the vessels-of-war on the lake, when it was difficult to take the proper vouchers, and equally difficult to preserve them, or to make the proper entries. Under these circumstances, an officer, whose business was to wield the sword rather than to hold the pen, might naturally be expected to fall in arrear; especially when, through the unpardonable negligence of the accounting officers of the Treasury, his accounts were suffered to remain unadjusted for more than thirteen years, without any backwardness on his part; for it is allowed by the Fourth Auditor that Captain Woolsey rendered his accounts regularly, and that he is not aware that there is any ground for assuming that the delay in the settling of his accounts was in consequence of any delay on his part, or that he ever failed to render his accounts when required to do so.

The committee have cautiously restrained their sympathy, which would otherwise have been strongly excited, and they have only sought to extend that relief to Captain Woolsey which was compatible with the pecuniary interest of the United States. If the prayer of the petition be rejected, the petitioner will be obliged to resign his commission, the only chance of recovering the balance of the debt would be destroyed, and the services of an officer of high standing in the navy would be lost. To avoid these results, it is proposed that one-third part only of the pay which may accrue to Captain Woolsey shall be retained, and that the remaining two-thirds shall be received by him for his subsistence. The amount of pay retained prior to the passage of the act of 1835 was twelve hundred dollars per annum; one-third part of the pay of the commander of a squadron would be \$1,333.33, and of the captain of a single ship would be \$1,166.60, the mean of which would be \$1,250, a sum greater than the amount formerly retained. By adopting this proposition, therefore, the debt would be discharged sooner than under the former law. The only objections to be brought against it are: 1st. The impolicy of disturbing the operation of a salutary law; but it is believed that it is in fact complying with the spirit of that law, which, in its operation, did not leave the debtor destitute of the means of subsistence: and 2d. The apprehension that this may be cited as a precedent; but this apprehension need not disturb the most scrupulous, for a similar instance will hardly occur; and if there should be such a case, the same relief ought to be afforded, if any regard be had to the interest of the United States.

24TH CONGRESS.]

No. 595.

[1ST SESSION.

ON THE CLAIMS OF THE SURVIVORS AND LEGAL REPRESENTATIVES OF THE OFFICERS AND CREW OF THE KETCH INTREPID, COMMANDED BY CAPTAIN STEPHEN DECATUR, AND OTHERS, FOR REMUNERATION FOR THE DESTRUCTION OF THE FRIGATE PHILADELPHIA, AT TRIPOLI, IN 1804; AND RECOMMENDING THE DISTRIBUTION OF \$100,000 AMONGST THEM IN THE PROPORTION STATED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of the legal representatives of Edward Preble, James Lawrence, Joseph Bainbridge, and Thomas Macdonough, in behalf of themselves and others, the survivors and legal representatives of the officers and crew of the ketch Intrepid, under the command of Captain Stephen Decatur, at the time of the destruction of the frigate Philadelphia, in the harbor of Tripoli, on the night of the 16th of February, 1804, reported:

That the subject of awarding a recompense to the officers and crew of the ketch Intrepid, for the gallantry of the daring exploit in which they were so successfully engaged, has been under the consideration of every Congress since the year 1824. Every committee to which it has been referred has made a favorable report; and the House of Representatives, under all the changes to which it is liable, has appeared to be invariably impressed with the justice and merit of the claim. The obstacle which has hitherto prevented a satisfactory decision has been a difference of opinion upon the mode of apportioning the reward to which it has always been conceded that the participants in that achievement were entitled. The want of success of their predecessors shall not restrain the committee from using their endeavors to frame a bill which may find acceptance with a majority of the House.

It would be superfluous to offer a detailed statement of the destruction of the frigate Philadelphia. Every fact connected with this bold attempt is too well known to the nation to need recapitulation. It is sufficient to say, that no deed of adventurous daring or successful enterprise in our naval annals, teeming as they do with brilliant exploits, deserves more exalted praise or more ample reward; and yet it stands alone in being denied the meed which an admiring and grateful country, in every other instance, has been eager to bestow.

The statement annexed to this report will show that, not only when vessels were destroyed, but even when they were recaptured, Congress has not hesitated to decree a large pecuniary reward; and, when we consider the lapse of time between the action and the reward, in the present instance, the sums which have been appropriated are proportionably greater than that of which it is the purpose of the committee to urge the grant, and which is the same heretofore recommended. In providing for the distribution, it has been deemed advisable to follow neither the bill reported at the second session of the 19th Congress, which was framed in conformity with the prize act, nor the bill of the last Congress, which was founded upon an ingenious but arbitrary allotment. The distribution recommended by the committee is founded upon the relative proportion of the pay of the officers and seamen of the navy, according to the pay bill adopted at the last session of Congress. This is considered to be as equitable and reasonable a mode as can be devised, and its adoption will remove the objection of the great inequality in favor of the commanding officer, which was made to the bill reported to the last Congress, while it avoids too great an increase in the value of the shares in the lower classes of distribution, arising from the small number of persons to be found in them, which was the objection made to adopting the provisions of the prize act. The tabular statement annexed to this report will explain the operation of the principle adopted for the distribution, in conformity to which a bill is reported, and will furnish the means of instituting a comparison between the several plans of apportionment.

List of vessels destroyed, recaptured, or restored, with the amounts allowed by acts of Congress for the same.

[1ST SESSION.]

ON THE CLAIM OF CAPTAIN VOORHIES, OF THE NAVY, FOR EXPENSES INCURRED IN TRANSPORTING AN AMERICAN EMBASSADOR AND CONSULS, IN THE SHIP UNDER HIS COMMAND, TO DIFFERENT PORTS IN THE MEDITERRANEAN, IN 1831 AND 1832.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 27, 1836.

MR. GRANTLAND, from the Committee on Naval Affairs, to whom was referred the memorial of Philip F. Voorhies, reported:

That, according to the petitioner's statement, he was, in the years 1831 and 1832, commanding the United States ship *John Adams*, in the Mediterranean, part of the time under the command of Commodore Biddle, and part under that of Commodore Patterson; that, in May, 1832, in pursuance of an order from Commodore Biddle, he carried Mr. McCauley, American consul, with his family, from Marseilles to his consulate at Tripoli, and brought from that place Mr. Ridgeway, who had been officiating there as consul, with his family, to Mahon; that, in June, 1832, under an order from the same commodore, he carried Mr. Carr, the consul for Morocco, from the port of Mahon to Tangier. The petitioner further states that, in the course of the same year, he received an order from Commodore Patterson to carry the Tripolitan ambassador and his secretary from Malta to Tripoli; that he believes this order was given in consequence of an expectation that the said ambassador would be serviceable to the American interests at Tripoli, in arranging some difficulties that had occurred there between our consul, Mr. McCauley, and the Bashaw, as our flag had been hauled down, and it was apprehended there might be a serious altercation; but by enlisting the good feelings of the ambassador, the misunderstanding between the Bashaw and our agent was settled.

The petitioner avers that considerable additional expense is always unavoidably incurred on such occasions, as the provisions and comforts to be furnished constitute no part of the government stores, and have to be supplied most generally from the means of the officer who commands the ship; and that he did expend several hundred dollars of his own funds in transporting the consuls before mentioned, and the Tripolitan ambassador, to their places of destination. He further states that no allowance is ever made by the Navy Department for such expenses, and that notice is generally given of that fact in the orders, to save the officer as much loss in the execution of his duty as possible; but that the pride of station, a respect for the public functionary, and a reliance upon the justice of the government, induce an expenditure of private funds for whatever is reasonably necessary for such a duty. The petitioner alleges that his expenditures for carrying Mr. McCauley and family to Tripoli were about \$200; those for bringing back Mr. Ridgeway \$200 more; that his "costs for port stores, provisions and supplies," for

* By the British order in council, the first lieutenant receives a larger portion than the other lieutenants.

† The pilot is not mentioned by name in the British order in council; he is assimilated to the quartermasters.

‡ The corporal of marines' share is increased beyond what his pay would entitle him to, in the same proportion that the share of the private of marines is increased.

§ The share of the marines would be less than that of seamen, according to their pay, but it was considered that it was better that they should share alike.

conveying the Tripolitan ambassador and his secretary home, from Malta, were about \$500; and that the expense incurred in carrying our consul, Mr. Carr, from Mahon to Tangier, was about \$200; the whole sum claimed by the petitioner, as expended by him in the public service, amounting to \$1,100. No account of the money actually expended by him is furnished by the petitioner.

The orders from Commodore Biddle, for carrying Mr. McCauley to Tripoli, for bringing away Mr. Ridgeway, and for conveying Mr. Carr to Tangier, accompany the petitioner's memorial. The order of Commodore Patterson, for taking the Tripolitan ambassador and his secretary from Malta to Tripoli, is *not* among the petitioner's vouchers; but there is a certificate from Lieut. Ridgway, of the navy, which states that this service was performed by the petitioner, and under an order from Commodore Patterson.

Your committee believe that acts have passed heretofore, giving relief in cases similar to this; and they think it but reasonable that expenses actually and necessarily incurred by the commander of a public ship, under such circumstances, (but nothing more than will cover his actual expenditure,) should be allowed him. Without any means of determining, with accuracy, what really were or ought to have been the petitioner's expenditures in the several cases before stated, the committee are of opinion that the bill herewith reported for his relief is in accordance with the principles of justice.

[24TH CONGRESS.]

No. 597.

[1ST SESSION.]

STATEMENT OF THE CONDITION AND OPERATIONS OF THE NAVY AND PRIVATEER PENSION FUNDS, WITH LISTS OF THE INVALID, WIDOW AND PRIVATEER PENSIONERS IN 1835.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1836.

NAVY DEPARTMENT, *January 23, 1836.*

SIR: In compliance with the 3d section of the act of Congress of the 10th of July, 1832, I enclose a statement, marked A, showing the names of the invalid pensioners, the commencement of their pensions, the sum allowed to each, and the law under which each pension has been granted; and, also, a similar statement, marked B, respecting widow pensioners.

These statements include the names of all whose deaths have not been made known to the Department, and probably contain the names of some who are dead. It was deemed proper, however, to present all the possibly existing charges against the pension fund.

In the examination and inquiries necessary to furnish the statements, the deaths of several have been ascertained which were not stated in my last report; and, therefore, the number of invalid and widow pensioners, with the maximum annual charge on their account, is less than was estimated in the report.

The income of the navy and privateer pension funds arises from the interest and dividends on stocks, an account of which was communicated to Congress with the late annual report M, 1, and N. All, except the bank stocks, bear an interest of five per cent. per annum. The amount of interest and dividend received the last year is contained in the statement enclosed, and marked D, and disbursements in paper M, which accompanied the late annual report.

The income the present year cannot be accurately estimated, until Congress shall have made some disposition of the United States Bank stock belonging to the fund.

With one exception, in the case of *Mary Cheever*, the pensions are payable semi-annually, on the 1st of July and 1st of January. The interest on some of the stock is due quarter-yearly, but enough does not accrue from this source to meet the semi-annual payments, and, therefore, frequent sales of stocks have been necessary in order that the pensioners might receive their pittance at the proper time, and to pay pension accounts settled in the offices of the Fourth Auditor and Second Comptroller. The fund has sustained no loss by this practice, as all sums, from whatever source, and not required to be immediately disbursed, are vested in United States Bank stock at par, as directed by the 2d section of the act of the 10th of July, 1832.

The premium on the subsequent sale of this stock is, therefore, so much gained to the fund. Under this arrangement, on the 7th December last, United States Bank stock, to the nominal value of thirty thousand dollars, was sold at an advance of 12½ per cent. to meet pensions on the 1st instant and settled accounts. But soon as the interest and dividend due at that date can be made available at the Department, the amount will be vested in the United States Bank stock, at par, as above. Though frequent sales are made, the aggregate of stocks owned by the fund is by this process increased. This explanation, with the accompanying statements, will, it is believed, give all the information required respecting the condition of the navy pension fund.

The statement marked E contains the names of the invalid pensioners payable out of the privateer pension fund.

Some whose names are on this list may be dead, but as their deaths are not known at the Department, they are presumed to be still a charge upon the fund.

The annual amount required to pay them is \$2,862. The nominal value of the stock owned by the fund at this date is \$5,367.05. It will be seen, therefore, that this class of pensioners can be paid but a few years longer, unless Congress should, at the proper time, make provision for their relief.

The receipts the last year for interest on the stock of the fund are stated on paper F, herewith enclosed, and the expenditure in paper N, which accompanied the late annual report of this Department.

The act of Congress of the 22d of April, 1800, respecting invalid navy pensions, limits the allowance to one-half of the monthly pay the individual received at the time he was injured. On the list now presented it will be noticed that under that act some are relieved whose pension is more than half-pay.

The papers filed in these cases do not state why so large pension was granted. In every such instance, however, it is believed the commissioners of the navy pension fund acted by authority of the 7th section of the act of 16th April, 1816, which empowered them, under certain circumstances, to increase the allowance to any amount not exceeding full monthly pay.

Some of the invalid pensions were granted to have effect from the date of the injury; some from the date of the applicant's discharge from the navy; some from the date of the letter asking to be placed on the pension roll; and others from the date when the proof in their cases was completed.

In so great a variety of cases there must have been many different degrees of merit, and, therefore, no positive rule as to commencement of pension could afford just compensation to all. This is presumed to be the reason why pensions have been allowed to commence as above stated; and agreeably to the opinion of the Attorney General as to the meaning of the 6th section of the act of 26th March, 1804, the commissioners of the navy pension fund were authorized to direct the pension to commence either from or after the date of injury, according to their sound discretion, governed by the merits and peculiar circumstances of each case.

It has been the practice, of late years, to allow invalid pensions to have effect from the date of discharge from the navy, or from the date of the proof, and in cases in which the applicants are not satisfied with such decision, they are referred to Congress for relief.

It will be observed that in many instances widows of officers of the same grade are not allowed the same rates of pension. This is caused by the different rates of pay allowed to such officers heretofore, and by the laws of Congress, which limit the widow's pension to half the monthly pay to which her husband was entitled at the time of his death.

These explanations are made to reconcile what would otherwise seem to be inconsistent in the navy pension system, and to put Congress in possession of all the facts.

I have the honor to be, very respectfully, &c.,

M. DICKERSON.

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

[1ST SESSION.]

APPLICATION OF THE MAYOR AND CITY COUNCIL OF BALTIMORE, MARYLAND, FOR THE ESTABLISHMENT OF A NAVY YARD IN THAT CITY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 2, 1836.

Resolved, by the mayor and city council of Baltimore, that the representatives in Congress from the fourth congressional district, and the two senators of Maryland, be requested to use their best exertions to procure the establishment of a navy yard in the city of Baltimore.

Resolved, That the mayor be requested to communicate a copy of the above resolution to each of the senators and representatives of the State of Maryland in Congress.

HENRY MYERS, *President 1st Branch.*
F. LUCAS, JR., *President 2d Branch.*

Approved 30th January, 1836.

S. SMITH, *Mayor.*

I certify that the foregoing is a true copy of the original resolutions, as passed both branches [L. s.] of the city council of Baltimore.

JESSE HUNT, *Register.*

MAYOR'S OFFICE, *Baltimore, February 1, 1836.*

SIR: Agreeably to the order of the city council, I have the honor to hand you a certain resolution relative to a navy yard to be located in their city,

And am, with respect, your obedient servant,

S. SMITH, *Mayor.*

[1ST SESSION.]

ON CLAIM OF CAPTAIN PARKER, OF THE NAVY, FOR EXPENSES INCURRED IN CARRYING A BEARER OF DISPATCHES TO THE MEDITERRANEAN IN THE VESSEL UNDER HIS COMMAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1836.

Mr. ASH, from the Committee on Naval Affairs, to whom was referred the petition of F. A. Parker, reported:

That, in August, 1828, F. A. Parker, captain United States navy, commanded the Fairfield sloop-of-war, and whilst in command was ordered by the Secretary of the Navy to carry Mr. Edward Wyer, (bearer of dispatches to the commodore of the squadron,) to the Mediterranean. The order of the Secretary was peremptory, and left no choice to the said commander but to obey; in pursuance of said order, Captain F. A. Parker received Mr. Wyer on board his vessel, and conveyed him to the destination prescribed by the Secretary of the Navy; and that Captain Parker furnished Mr. Wyer on the voyage with his boarding, and other matters usual in such cases, for which he never received one cent from Mr. Wyer or any other person. That Captain Parker is justly entitled to be paid his actual expenses, incurred in taking out Mr. Wyer; and we are of opinion that the sum of two hundred dollars would cover said expense, and that a bill for that amount should be reported to the House. All of which is respectfully submitted.

[1ST SESSION.]

ON THE EXPEDIENCY OF ESTABLISHING A NAVAL DEPOT AND DRY DOCK AT CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1836.

NAVY DEPARTMENT, *January 30, 1836.*

Sir: In answer to your letter of the 18th instant, upon the subject of establishing a naval depot and dry dock at Charleston, South Carolina, I have the honor to state that all the facts necessary for forming a correct decision upon this subject are contained in a printed report, referred to in your letter, of the Committee on Naval Affairs of the House of Representatives, of the 24th of June, 1834.

In that report, the advantages of making Charleston harbor a naval depot are put in a strong point of view, and objections made to the measure successfully obviated.

I have no additional facts to communicate to you; but, as you ask my views and opinions upon the subject, I do not hesitate to express them.

I agree entirely with the Naval Committee, in the above report, in the reasonings and facts stated by them, and in the conclusion to which they come, "that the establishment of a navy yard at Charleston, for the construction of smaller vessels-of-war, would be expedient and desirable, as it would conduce to the public good."

I think further, that this should be a place for the repair of vessels; for which, at this time, a dry dock is considered an indispensable requisite.

Ships returning from cruises generally require repairs, which makes it necessary to put them into dry dock. For this reason they are generally directed to return to the ports in which our dry docks are, and there their crews are paid off and discharged.

A dry dock, in which sloops-of-war may be raised with perfect safety, can be constructed for about \$125,000, and, in the course of a single year, I have no doubt the public interest would be essentially promoted by the construction of such a dry dock at Charleston.

I am, with great respect, your obedient servant,

M. DICKERSON.

The Hon. H. L. PINCKNEY.

[1ST SESSION.]

ON CLAIM OF CAPT. JOHN M. GAMBLE, OF THE MARINE CORPS, FOR REMUNERATION FOR DISBURSEMENTS MADE WHILE IN COMMAND OF A POST, AND FOR RATIONS FURNISHED TO SEAMEN, MARINES AND PRISONERS OF WAR, IN 1813,-'14. .

COMMUNICATED TO THE SENATE FEBRUARY 4, 1836.

Mr. ROBBINS, from the Committee on Naval Affairs, to whom was referred the memorial of John M. Gamble, reported:

John M. Gamble claims \$20 per month for certain disbursements made and other staff duties performed, from 30th April, 1817, to 31st December, 1822, while in command of a post in the marine corps.

The committee find that these alleged disbursements were made, and that these alleged staff duties were performed by the said Gamble; they also find that \$20 per month, in compensation therefor, would be the proper allowance, and report the same accordingly.

The said Gamble also claims twenty-five cents for each ration furnished by him for seventeen seamen and four marines, together with six prisoners of war under his command, when left by Commodore Porter in charge of prizes in the Pacific ocean during the years 1813 and 1814.

The committee find that these services were performed as alleged by the said Gamble; and they further find that the commutation of twenty-five cents per ration is the usual and proper allowance therefor, and report the same accordingly.

The said Gamble also claims a further allowance for house rent, which claim is disallowed by the committee; and they report thereon accordingly.

[1ST SESSION.

ON CLAIM OF A MIDSHIPMAN IN THE NAVY FOR SERVICES PERFORMED, BY VERBAL ORDER OF HIS COMMANDING OFFICER, AS ACTING LIEUTENANT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 9, 1836.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Charles W. Pickering, reported:

The petitioner, a midshipman in the navy of the United States, on board the United States ship Falmouth, under the command of Capt. Gregory, performed, by a verbal order of his commander, the duties of a lieutenant from the 14th May to the 5th October, 1833. On his return home, he claimed the pay and emoluments of a lieutenant during that period, which was denied by the Department, upon the ground that the regulations of the navy required "the *written* acting appointment of the commander, corroborated by entries made at the same time on the pay and muster rolls," to entitle him to the payment. The petitioner had produced the certificate of Capt. Gregory, that he acted as lieutenant and performed his duties as such, and a further certificate, dated 29th December, 1835, corroborates the first, and states the reason why the formalities required had not been complied with. The case resolves itself into one where duties have been assigned and services rendered, entitling the party to the pay provided by the regulation, and therefore warranting the action of Congress in his behalf. The committee report a bill for that purpose.

TREASURY DEPARTMENT, *Fourth Auditor's Office, Feb. 8, 1834.*

Sir: I have received your letter of the 4th instant, enclosing the certificate of Capt. Francis H. Gregory, stating that you "performed the duties of a lieutenant on board the United States ship Falmouth, under his command, from the 14th May, 1833, to the 5th October, 1833, inclusive;" also an account for the difference of pay between a midshipman and a lieutenant, for the same period, amounting to \$255.49. By the regulations of the Secretary of the Navy, adopted the 10th March, 1830, (see Red Book, page 24, sec 2,) it is necessary that you produce "the *written* acting appointment of your commander, corroborated by entries made at the same time on the pay and muster rolls," to entitle you to the pay of a lieutenant.

I am, sir, respectfully, your obedient servant,

AMOS KENDALL.

Midshipman CHARLES W. PICKERING, *U. S. Ship Falmouth, New York.*

NEW HAVEN, *December 29, 1835.*

This is to certify, that Midshipman Charles W. Pickering, while serving on board the United States ship Falmouth, upon the Pacific station, performed the duties of a lieutenant from the 14th May to the 5th October, inclusive, by my verbal order. As it was considered but a temporary arrangement, growing out of the necessities of the moment, Mr. Pickering was not placed upon the muster roll as acting lieutenant. He performed his duties efficiently and faithfully; and I have always considered him as entitled to the notice of the Navy Department in consequence thereof.

FRANCIS H. GREGORY, *Master Commandant U. S. Navy.*

No. 603.

[1ST SESSION.

ON CLAIM OF A LIEUTENANT IN THE NAVY FOR COMPENSATION FOR EXTRA SERVICES, UNDER ORDERS OF HIS COMMANDING OFFICER, IN SURVEYING THE PUBLIC STORES AT THE NAVY YARD AT WASHINGTON.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 10, 1836.

Mr. ASH, from the Committee on Naval Affairs, to whom was referred the memorial of Lieutenant William P. Piercey, of the navy of the United States, reported:

That by order of Commodore Tingey, in the years 1827 and 1828, Lieutenant William P. Piercey was ordered on a survey of the public stores in the Navy yard at Washington; that, by the same order, two other lieutenants were associated with him, but were soon after detached on other duties; that Lieutenant Piercey performed the duties assigned to him with ability and fidelity, and to the entire satisfaction of the commanding officer; that in the year 1832 Lieutenant Piercey was again ordered to the performance of a similar duty, which he also performed in a like satisfactory manner; that Lieutenant Piercey, at the time the surveys respectively were made, resided in the vicinity of the Navy yard, at Washington; that your committee agree in opinion with the Navy Department, that Lieutenant Piercey should have been allowed chamber money, but not anything beyond it; that they cannot perceive that Lieutenant Piercey incurred any extraordinary responsibility, and no extraordinary expenses are alleged to have been attendant upon the performance of those duties; and, in the opinion of your committee, Commodore Tingey was justified by law, and the practice under it, in issuing the orders referred to.

Your committee are therefore of the opinion that Lieutenant Piercey is not entitled to extra pay for the services alluded to, being such as his commission necessarily imposed upon him the performance.

Your committee, therefore, respectfully report, that the claim of Lieutenant Piercey, set forth in his memorial and accompanying papers, be disallowed, and your committee discharged from the further consideration of the subject. All which is respectfully submitted.

[24TH CONGRESS.]

No. 604.

[1ST SESSION.]

ON CLAIM OF CAPTAIN WOOLSEY, OF THE NAVY, TO BE ALLOWED TO RETAIN A PORTION OF HIS PAY, AND TO APPLY THE RESIDUE TO THE LIQUIDATION OF A BALANCE DUE BY HIM TO THE UNITED STATES ON HIS ACCOUNT FOR DISBURSEMENTS.

COMMUNICATED TO THE SENATE FEBRUARY 11, 1836.

Mr. SOUTHWARD, from the Committee on Naval Affairs, to whom was referred the petition of Melancthon Taylor Woolsey, a captain in the navy of the United States, reported:

That the petitioner was ordered to the command of the navy station on Lake Ontario, in the year 1808, in which situation he remained until relieved by Commodore Chauncey, in 1812. During the war, he served under that officer, and, at the close of it, he again resumed the command of the station, and continued in it until the year 1822, a period of between thirteen and fourteen years. During this time he superintended the building of a number of vessels, and was charged with the disbursement of large sums of money, without having his accounts adjusted by the Fourth Auditor until the 13th of September, 1822, when he was found to be indebted to the United States in the sum of \$36,341.72.

In pursuance of a provision in the annual appropriation acts from 1822 to 1828, and the act of January 25, 1828, to prevent defalcations on the part of disbursing agents of the government, the pay of Captain Woolsey has been retained from the time of the settlement of his accounts, and the balance reported against him was thereby reduced to the sum of \$17,059.48, on the 30th of September last. During a period of more than thirteen years, Captain Woolsey has thus continued in service, reducing the amount of his debts, without uttering a complaint, and contriving, by a wonderful exertion of frugality and good management, to support a numerous family upon the amount received by him for his rations. In this quiet, patient, uncomplaining course he might have continued, had not the act, passed at the last session of the twenty-third Congress, regulating the pay of the officers of the navy, deprived him of the pittance upon which his family had subsisted. This act was intended for the benefit of the officers of the navy, but it is only productive of extreme hardship to Captain Woolsey; for, instead of pay, rations, and emoluments, it provided a fixed annual compensation, the whole of which is retained from him; and the consequence is, as he states in his petition, "after a faithful service of nearly thirty-six years, past the meridian of life, surrounded by a young, growing, and helpless family, destitute of the means to support or educate them, he throws himself upon his country for relief."

From the inquiries instituted by the committee, they are satisfied that Captain Woolsey is a meritorious officer and a worthy man, and that his indebtedness is attributable to his ignorance of accounts, and negligence in the manner of keeping them. However deserving of reprehension this negligence may be, it is rendered less inexcusable when the situation of the frontier, and the nature of the service when he took charge of the naval station on Lake Ontario, is considered. In a country which was then almost a wilderness, he had in charge the purchase of the materials and the building and equipping the brig Oneida, of eighteen guns, and two gunboats, and the disbursement of all the expenditures, which, under such circumstances, and so far from the seaboard, must have been attended with a great many incidental expenses, requiring a correspondent number of vouchers. He was frequently afloat in boats, and on the road, as he states, attending to the transportation of the military and other equipments of the vessels-of-war on the lake, when it was difficult to take the proper vouchers, and equally difficult to preserve them, or to make the proper entries. Under these circumstances, an officer, whose business was to wield the sword rather than to hold the pen, might naturally be expected to fall in arrear; especially when, through the unpardonable negligence of the accounting officers of the Treasury, his accounts were suffered to remain unadjusted for more than thirteen years, without any backwardness on his part; for it is allowed by the Fourth Auditor that Captain Woolsey rendered his accounts regularly, and that he is not aware that there is any ground for assuming that the delay in the settling of his accounts was in consequence of any delay on his part, or that he ever failed to render his accounts when required to do so.

The committee have cautiously restrained their sympathy, which would otherwise have been strongly excited, and they have only sought to extend that relief to Captain Woolsey which was compatible with the pecuniary interest of the United States. If the prayer of the petition be rejected, the petitioner will be obliged to resign his commission, the only chance of recovering the balance of the debt would be destroyed, and the services of an officer of high standing in the navy would be lost. To avoid these results, it is proposed that one-third part only of the pay which may accrue to Captain Woolsey shall be retained, and that the remaining two-thirds shall be received by him for his subsistence. The amount of pay retained prior to the passage of the act of 1835 was twelve hundred dollars per annum; one-third part of the pay of the commander of a squadron would be \$1,333.33, and of the captain of a single ship would be \$1,166.66, the mean of which would be \$1,250, a sum greater than the amount formerly retained. By adopting this proposition, therefore, the debt would be discharged sooner than under the former law. The only objections to be brought against it are: 1st. The impolicy of disturbing the operation of a salutary law; but it is believed that it is in fact complying with the spirit of that law, which, in its operation, did not leave the debtor destitute of the means of subsistence: and, 2d. The apprehension that this may be cited as a precedent; but this apprehension need not disturb the most scrupulous, for a similar instance will hardly occur; and if there should be such a case, the same relief ought to be afforded, if any regard be had to the interest of the United States.

To the honorable the Senate and House of Representatives, in Congress assembled:

The petition of Melancthon Taylor Woolsey, a captain in the navy of the United States, respectfully represents: That, in the year 1821 or 1822, he had a settlement of his accounts at the Fourth Auditor's office, which accounts had been kept open for nearly thirteen years, when a balance of about \$37,000 was struck against him; which, by stoppage from his pay, has been reduced to less than \$17,000. His indebtedness to the government was caused by disbursing large sums of money for services rendered the government before, during, and a few years subsequent to the late war with Great Britain, frequently afloat in boats, and on the road, while attending to the transportation of the military and other equipments of the vessels-of-war on Lake Ontario, when it was impracticable to take the proper vouchers, and partly from the loss of vouchers when taken: Since the settlement of his accounts, as stated above, and until the approval by the President, of the law allowing increased pay to officers of the navy, embracing a period of thirteen years, your petitioner subsisted a large and helpless family upon his rations alone,* and since that time, without a cent received from the government.

Had a frequent settlement of accounts been demanded of your petitioner, from the time he was ordered to superintend the building of the United States brig Oneida, on Lake Ontario, and two gun-boats on Lake Champlain, in 1808, as is the present practice of the government, he would not now be under the necessity of petitioning for relief. Your petitioner is confident that a much greater amount than the balance now standing against him has been disbursed by him on account of the government.

The inhabitants of the northern frontier of the State of New York, who witnessed the services of your petitioner there, and who have been intimately acquainted with him for a period of about sixteen years, have borne honorable testimony to the exemplary character of your petitioner, in a document addressed to the delegation of the State of New York in Congress, which is now on file in the Navy Department, and a copy in the possession of an honorable gentleman of the present delegation.

The case of your petitioner is precisely similar to that of Governor Tompkins, who found relief at the hands of the government.

Your petitioner does not deem it essential to state his services, or to claim exemption on account of them; it may not, however, be improper here to state that his paternal grandfather, Melancthon T. Woolsey, fell a sacrifice in his country's service, at the head of a battalion, in September, 1758. His only son, Melancthon L. Woolsey, the father of your petitioner, served with credit through the whole of the revolutionary war, in which he expended the whole of a handsome patrimony.

The case of your petitioner is an extremely hard one. After a faithful service of nearly thirty-six years, he finds himself past the meridian of life, surrounded by a young, growing, and helpless family, destitute of the means to support or to educate them. Under which circumstances, he throws himself upon his country for relief. And your petitioner, as in duty bound, will ever pray, &c.

MEL. T. WOOLSEY.

WASHINGTON, January 21, 1836.

NAVY DEPARTMENT, December 3, 1831.

SIR: I have received yours of the 27th instant, and regret that it is not in my power, officially, to offer any advice on the subject.

The control of the debt is now devolved on another department, and with that department, or with Congress, must be concluded any future arrangement as to its discharge.

Your situation is certainly entitled to much sympathy, and your appeal to the proper authorities for relief will doubtless meet with full consideration.

Respectfully, yours,

LEVI WOODBURY.

Capt. M. T. WOOLSEY.

NAVY DEPARTMENT, August 23, 1833.

SIR: Your communications of the 10th ultimo, numbered 10 and 11, have been received.

The vigilance which you have displayed in watching over the interests of our citizens, and extending to them protection in the prosecution of their lawful pursuits, meets the approbation of the Department; and it is not doubted but continued exertions will be used to give such direction to the force under your command, as will render it most efficient, and best calculated to discharge the important trusts committed to you as commander of one of our squadrons.

On the 20th instant, orders were directed to you to send home, in the first public vessel returning to the United States, all midshipmen entitled to examination.

I am, respectfully, sir, your obedient servant,

JOHN BOYLE, *Acting Secretary of the Navy.*

Com. M. T. WOOLSEY, *commanding U. S. Squadron, Coast of Brazil.*

NAVY DEPARTMENT, January 14, 1834.

SIR: Your dispatches of the 26th and 29th of October, and 9th of November last, with the papers therein referred to, have been received.

* Together with his own manual and hard labor.

In reply, I have to express to you the strongest approbation of the President and myself of your conduct in guarding the rights and property of our fellow-citizens at Buenos Ayres, and in your intercourse with the officers of that government.

I am, respectfully, sir, your obedient servant,
 Commodore M. T. WOOLSEY, *commanding United States Squadron, Coast of Brazil.*

LEVI WOODBURY.

NAVY DEPARTMENT, *February 5, 1834.*

SIR: Your dispatch of the 15th of November last, No. 20, has been duly received, with the duplicates of No. 19, of the 9th of that month.

I am happy to hear that order is again restored at Buenos Ayres.

The President, as well as myself, highly approve of the conduct of yourself and Master Commandant McKeever.

I am, respectfully, sir, your obedient servant,
 Commodore M. T. WOOLSEY, *commanding United States Squadron, Coast of Brazil.*

LEVI WOODBURY.

WASHINGTON, *January 20, 1836.*

SIR: I have had the pleasure of receiving your letter of this day's date, and with great cheerfulness answer your several interrogatories, to wit: I state, in the first place, that, for the long period which I have known you, (say more than thirty years,) your general conduct and character have been those of a correct gentleman, and a zealous, good officer; and that during the time you served under my command on Lake Ontario, you were frequently selected by me to execute important services, and, I have pleasure in adding, that you performed the duty with zeal and ability, and to my satisfaction. I will say further, that, so far as ever came to my knowledge, your habits were perfectly correct; and I never heard that you indulged in the vice of gambling, or were extravagant in your living. On the contrary, you appeared to have much method and economy in all your domestic arrangements; and it was a matter of great surprise to me to learn that, on the settlement of your accounts, so large a balance was found to be against you.

Sincerely hoping that you may soon be relieved from your present unpleasant situation,

I am, my dear sir, with great regard, your faithful, humble servant,

ISAAC CHAUNCEY.

Commodore M. T. WOOLSEY, *United States Navy, Washington.*

WASHINGTON CITY, *January 26, 1836.*

To the Committee on Naval Affairs of the House of Representatives:

GENTLEMEN: My acquaintance with Commodore Woolsey commenced at Sackett's Harbor, in the spring or latter part of the winter of 1813, (say about the 1st of March.) He was active and industrious, and chivalric in all his performance of duty. If a partisan corps was detached from the fleets, Commodore Woolsey was selected. If extraordinary service was required, he was usually selected. On board his brig-of-war, the Oneida, my regiment was embarked, and afterwards to Niagara, previous to the attack. The whole of that campaign, and the next, I was acquainted with the general character of the service he was upon, and I am firmly persuaded that no officer could perform the duties required at his hands without losing baggage and vouchers.

I was also a witness to his manner of life, and the course of his conduct. He had no expensive habits; he ran no career of dissipation. He was always too much engaged in his career of public duty, to attend to such pursuits; and I should feel a perfect confidence that, if any officer of the fleet lived within his pay, Commodore Woolsey must have done it.

E. W. RIPLEY, *formerly a Brevet Major General in the United States Service.*

The undersigned, inhabitants residing on the northern frontier of the State of New York, at and within the vicinity of the military station of Sackett's Harbor, were intimately acquainted with Captain Woolsey, of the United States navy, many of us during the whole period of his long command and service upon that station, and can bear testimony to his zeal and devotion to the cause of his country, his bravery and gallantry as an officer, and his deportment as a gentleman. His early command and enterprise on this frontier, and his important services during the late war, have become identified with the history of this part of the country. We recur to them with pride; we cherish his name with parental fondness, and take the most lively interest in his future welfare.

It is with pain that we learn that this meritorious officer, with a large and helpless family, and an aged parent, dependent upon him, is now literally starving in the service of his country, without pay, subsistence, or emoluments of any kind; that his whole pay and rations are stopped in consequence of his indebtedness to the government; and this, after he has surrendered all his property. His case is one of greater and more peculiar hardship than the undersigned have ever witnessed. The balance reported against him it is utterly impossible for him ever to pay; and if he should live beyond the ordinary life of man, and remain in the service, the stoppage of his whole pay would not liquidate it. The consequence is, that he must be driven from the service, after having spent the vigor of his life in it, or be relieved.

If his indebtedness to government was the effect of crime, dishonesty, or wasteful extravagance, his situation would not so much excite our sympathy; but we know that such is not the case. We have known him long and intimately, and we know him to be strictly honest and honorable; always vigilant and attentive to his duty, he made the interests of the government paramount to all personal considerations. Had he been more selfish, and less zealous in the cause of his country, he might have been the richer, but government would have been by so much the poorer than by now canceling the balance struck against him.

Seldom has a naval officer had so many, so variable, and complex duties to perform. He was ordered to the command of the lake station in the year 1808, and there built the brig Oneida, mounting eighteen guns, our first vessel of war on Lake Ontario, and two gunboats on Lake Champlain. He had charge of purchasing all the material, the building and equipping of these vessels, and the disbursement of all the expenditures. This part of the country was then almost a wilderness. The building and equipping the brig under such circumstances, so far from the seaboard, must have been attended with a great many incidental expenses, requiring a correspondent number of vouchers. After equipping this vessel she was manned, and Captain Woolsey remained in command, enforcing the non-intercourse and restrictive laws, until the declaration of the late war, when his command became of great importance and responsibility. The enemy had a superior naval force upon the lake, and upon him devolved the responsibility of protecting Sackett's Harbor from their incursions. In addition to the brig Oneida, he armed and equipped the schooner Julia. He captured the Lord Nelson, a British armed schooner, which he annexed to his squadron. Shortly after this the whole British squadron, consisting of the Royal George and four other armed vessels, having a great superiority of guns and force, made an attack upon Sackett's Harbor with the intention of destroying our fleet and the town. At that time the town was entirely destitute of any works of defence. On that occasion Captain Woolsey placed his squadron in the best position for defence. He went on shore, took the command of some volunteer militia, erected a fort and battery from which he opened upon the enemy such a well-directed and destructive fire that they made a precipitate retreat, suffering much damage.

The town and fleet were saved from destruction by his judicious and intrepid conduct, aided by the brave and noble exertions of the volunteers and his officers and men. Soon after this, government came to the determination of building a large fleet at Sackett's Harbor. Immense quantities of materials and munitions of war for this purpose were forwarded from New York, and Captain Woolsey being still in command, and also performing the duties of navy agent, had charge of receiving the property, and settling and paying the accounts for transportation, until relieved from the command by Commodore Chauncey, in October or November, 1812. During the residue of the war he served under Commodore Chauncey, and was one of his most active and efficient officers. Commodore Chauncey will bear testimony to his merits as one of the most valuable officers in our service.

After the war, the command of the station again devolved on Captain Woolsey. He was left in command of about 200 men, and had the charge of dismantling the large fleet, and taking care of and securing a great amount of naval stores and property which had accumulated on that station. A very large quantity of timber which had been got out for the building of other vessels he collected, piled up, and secured. He built two large ship houses over two ships of the line, which were left upon the stocks, and necessarily performed many other services in the preservation of the public property, which must have required the disbursement of large sums of money and the accumulation of many accounts.

From the year 1808, when we find him building vessels-of-war in almost a wilderness, and the pioneer of the great military operations which have subsequently distinguished this frontier, until the year 1821 or 1822, a period of about thirteen years, we understand he had no settlement of his accounts with the government. Previous to, and during the first year of the war, his disbursements of public money and number of vouchers must have been very great.

We understand that he believes that during the war he lost or mislaid many of his vouchers, and that since the settlement he has discovered vouchers to a considerable amount, which have subsequently been passed to his credit. We can well conceive that, during the confusion which prevailed at Sackett's Harbor during the late war, many vouchers and papers would in all probability be lost, and others, in the bustle that prevailed at that theatre of war, might be omitted to be taken.

We understand that on the settlement of his accounts a balance of about \$37,000 was struck against him, and that since that period about \$13,000 have been stopped from his pay: that he cannot be justly indebted to government in any such amount we fully believe. Whether the error exists in making erroneous charges against him, or whether he has not received all the credits to which he is entitled, we cannot pretend to know; but we believe that an error in the accounts somewhere exists. We know him to be incapable of fraud, and believe that he has lived within the limits of his pay.

Relief must be afforded him, or a valuable officer must be driven from the service for no other crime than inability to pay an alleged balance reported against him on accounts of more than twenty years' standing. This is making debt a crime, and inflicting as a punishment one of the severest penalties that can be visited upon an officer.

We will further add, that we make and subscribe this statement without the solicitation of Captain Woolsey. We have learned his distressed situation, and we know him as a brave and worthy officer who has done his duty; one in whom our country can rely in times of peril. We know him as one of the sons of this State, to whom we owe a debt of gratitude for services rendered, and it becomes us to save him and his family from ruin. We commit this paper to the delegation of this State in Congress, requesting them to give it such direction, either to the President or to Congress, as they shall deem expedient, and request them to render their exertions to the procurement of relief to Captain Woolsey.

NOTE BY M. T. W.—The foregoing was sent to Washington in the spring of 1831 or 1832, and too late to be acted upon by Congress before its adjournment. I found it in the hands of the member from Jefferson county, who gave it to me, supposing it might be of service to me. I handed it to the Secretary of the Navy, who put it on file in his office.

A part of the history in the foregoing statement is incorrect. When the British squadron, under the command of Commodore Earl, (a provincial officer,) consisting of the Royal George, of twenty, the Earl of Moira, of eighteen, (both ships,) the brig Duke of Gloucester, of ten, the schooner Prince Regent, of ten, and the schooner Seneca, of one gun, made their attack, I had only the brig Oneida, of eighteen guns, under my command; the armanent of the Lord Nelson, a merchant schooner, and not, as stated, a "British armed vessel," captured for a breach of the non-intercourse law, before the war was in progress.

No fort or battery was erected after the appearance of the British squadron. I had constructed Fort Tompkins previously, to mount nine carronades, of twenty-four pounds, in embrasures, (half the armament of the Oneida,) and a long thirty-two pounder on a cavalier in the centre of the work. This gun was mounted the evening before the enemy appeared, and by which they were routed.

This fort and Fort Volunteer cost the government not one cent, except a few materials for platforms, &c.

State of New York, Onondaga County, ss:

I, Warren Green, of the town of Salina, in the county of Onondaga and State of New York, being duly sworn, do depose and say: That I was attached to the United States navy in the capacity of captain's clerk, under the command of Captain M. T. Woolsey, on Lake Ontario, and was stationed at Sackett's Harbor from the declaration of war, in the year 1812, until after the attack on that place by the enemy under the command of General Prevost, and the consequent evacuation of the town by its inhabitants and the burning of the Navy barracks on Navy Point (so called.) And this deponent further says, that the books, accounts, vouchers, and public documents, containing the evidences of disbursements made by Captain M. T. Woolsey for and on account of the government, were kept by this deponent, under his supervision, in a small office or wooden building in said village; and further, that on one occasion the danger was considered so evident and near, the said papers were removed in a hurried manner, two or three miles out of the village, and that the family occupying the premises were under the necessity of removing temporarily into a barn, and the above-mentioned papers, &c., were removed with them and their effects, principally by females, (the male members of the family being then attached to and engaged in the service,) to an adjoining stable or hovel, (that being the most secure place which could be obtained,) and were left in an exposed and disordered situation; and further, this deponent says that said papers were sent to Watertown, a distance of ten or twelve miles, and deposited in the store of one David M. Lewis; and further, that afterwards this deponent assisted and was employed in searching for many important documents which were missing, and which were not afterwards recovered, to this deponent's knowledge or belief, and that many of those which were finally recovered were in a disordered and mutilated state. And this deponent further says, that both such missing papers and such papers as were finally recovered in such mutilated state as aforesaid, contained, as far as this deponent can recollect and as he believes, important evidences in relation to said Woolsey's disbursement for and on account of the United States Government. And further this deponent saith not.

WARREN GREEN.

Subscribed and sworn before me, this 21st day of January, A. D. 1836.

THOMAS G. ALVORD, *Commissioner of Deeds.*

Onondaga County, Clerk's Office, ss:

I do certify that, at the date of the certificate of proof or acknowledgment to which this is subjoined, the said Thomas G. Alvord, Esquire, was a commissioner of deeds, &c., in and for said county, and duly authorized to take the same; and further, that I am well acquainted with the handwriting of

the said commissioner, and verily believe that the signature to the said certificate of proof or acknowledgment is genuine.

In testimony whereof, I have hereunto set my hand, and affixed the seal of the court of common pleas of said county, this 22d day of January, eighteen hundred and thirty-six.

C. YOUNGLOVE, *Deputy Clerk*,
In the absence of A. EDWARDS, *Clerk*.

24TH CONGRESS.]

No. 605.

[1ST SESSION.]

STATEMENT OF BREVET LIEUTENANT COLONEL FREEMAN, OF THE MARINE CORPS, COMPLAINING OF THE OPERATION OF THE REGULATIONS FOR THE NAVY, UNDER THE LAW OF 1834, WHICH SUBJECTS THE MARINES TO THE OFFICERS OF THE NAVY, INSTEAD OF THEIR OWN OFFICERS, AND WITH A GENERAL STATEMENT OF THE LAWS AND REGULATIONS RELATING TO THE MARINE CORPS.

COMMUNICATED TO THE SENATE FEBRUARY 15, 1836.

To the Honorable the Senate and House of Representatives of the United States:

The undersigned memorialist, in behalf of the interests of the service, and what is due to the military rank and character of the senior officers of the United States marine corps, prays respectfully to represent:

That the fourteenth section of the regulations of the navy, for the government of marines in navy yards, (authorized to be applied only by the act of Congress of June, 1834, for the organization of the marine corps,) has been carried into effect, for the first time, in the month of December, 1835, and instructions and orders predicated thereon seem to be construed, and have been applied, to humiliate and degrade the military character and services of the marine corps, as well as the official duties of the *field rank* which Congress, by the above act, saw proper to *create* in the corps.

Attention is respectfully asked, therefore, to the fact, that the law, by its provisions, has intended to vest *one officer*, the colonel commandant, with the immediate military command, detail, and direction of the corps, when serving in the United States, and not attached to sea service, as the records and orders of the Navy Department will fully show. Contrary to all that, however, the colonel commandant has now no appropriate military duty, authority, or command whatever in the corps!

Also, to the lieutenant colonels and majors, having a military rank assimilated with captains in the navy under five years, and commanding separate divisions or detachments of the marines stationed at navy yards for the general purposes of the service, and occupying a portion of the *public grounds*, which for more than a quarter of a century have been appropriated for the quarters of the officers and men, parade ground for drill and instruction, preparatory for sea or other detached service, considered heretofore, as it should be, distinct, and unconnected with the naval command of the yard, which, in all its detail of duties, is a *civil establishment*, for construction and preparation, and not a military command or post, for offence or defence, and having no analogy to their service at sea. Yet, under the law, &c., referred to, a lieutenant colonel in the marine corps is deprived of all trust or command pertaining to his rank, and the naval commandant of the yard, whether of superior rank or not, is authorized to control and dispose of the services of the officers and privates of the marine command as he pleases, and to *punish*, at *his will*, to the extent of a *dozen lashes* with a *cat-o'-nine-tails*, a private in the marine corps, for any trivial offence, as *his discretion* or *caprice* may direct!—when *that* punishment is prohibited by *law* in every other military corps in the service, excepting for the high crime of desertion, and then to be inflicted by the sentence of a general court-martial.

It is believed impossible that such marked degradation and loss of standing to a corps of officers and men, who have served their country on every sea and shore, and on whom malignity itself is defied to point one single blot on its fair fame and faithful services, can be known, and the law remain unrepealed which has thus divested the corps of its military character, by an *amalgamation* with the navy, and under navy officers, when serving in the United States.

This appeal is respectfully, but confidently, made to the Congress of the United States, trusting to their justice in protecting every branch of the public service, the weak as well as the strong, with the cherished hope that the accumulated wrongs and grievances by which the marine corps is now borne down may be corrected.

The orders and instructions referred to, in December, 1835, are annexed, in paper marked A. Paper marked B has been carefully arranged and compiled, to explain the peculiar causes leading to the evils referred to.

Asking but justice, this representation, with the accompanying explanations, are respectfully submitted, by

WM. H. FREEMAN, *Brevet Lieut. Colonel and Major U. S. Marine Corps.*

WASHINGTON CITY, *February 15, 1836.*

A.

WASHINGTON CITY, *December 7, 1835.*

Sir: Until it shall be otherwise ordered, number fourteen of the regulations for the government of the United States navy yards, adopted on the 17th day of September, 1817, shall be observed at all the navy yards; which regulation is in these words:

"The guard of marines detached for the protection of the yards shall, while doing duty in the yard, be subject to the orders of the commandant, and receive from him their instructions as to the duties they are to perform therein; and all persons enlisted into the service of the United States, and doing duty under the orders of the commandant of the yard, shall, for every offence, be subject to the act for the better government of the navy of the United States, and punished in the same manner as if the offence had been committed at sea."

I am, very respectfully, &c.,

ANDREW JACKSON.

Col. A. HENDERSON, *commanding U. S. Marine Corps, Head-Quarters.*

[Circular.]

HEAD-QUARTERS OF THE MARINE CORPS, *Washington, December 7, 1835.*

SIR: I have received from the President an order, of which the enclosed is a copy, and I transmit it to you for your government.

I am, respectfully, &c.,

ARCH. HENDERSON, *Colonel Commandant.*

To Lieut. Col. W. H. FREEMAN, *commanding Marines, Boston, Massachusetts.*

NAVY DEPARTMENT, *December 11, 1835.*

SIR: Under the order of the President, of the 7th instant, respecting the marine guard, it is considered that, until it shall be otherwise ordered, all orders and other communications, between the colonel commandant and staff of the marine corps and the officers of that corps who are or may be stationed in the navy yards, are to be sent, unsealed, to the commandant of the yard at which the marine officer may be stationed. The commanding marine officers, stationed at navy yards, may suspend from duty the marine officers under their command, and confine the non-commissioned officers and privates, if their offences should require it; but they are to furnish the commandant of the yard with a statement of their offences, within twenty-four hours, for his information and further orders. They will also make daily report, to the commandant of the yard, of the number and state of the detachment or guard under their command; and generally upon all subjects which relate to their duties in the navy yard.

They will also make such reports in relation to the pay, clothing, or subsistence of the men under their command, to the colonel commandant or staff of the corps, as he may require, or which may be necessary to enable him and the staff to perform their duties; and duplicates of such reports, made to the commandant of the yard, as the colonel commandant may direct.

The enclosed copy of a letter of this day's date, to the commandants of the navy yards, will make you further acquainted with the powers to be exercised and duties to be performed by them, in relation to the marines.

I am, respectfully, &c.,

MAHLON DICKERSON.

Col. A. HENDERSON, *commanding U. S. Marine Corps, Head-Quarters.*

A, No. 1.

NAVY DEPARTMENT, *December 11, 1835.*

SIR: Enclosed is a copy of a letter this day written to the colonel commandant of the marine corps, from which you will learn the views of this Department in relation to the channels of official correspondence between the colonel commandant and staff, and officers of the marine corps which are or may be stationed in the navy yards; to the authority which the commanding marine officer may exercise over those of their corps under their command, and the reports which they are to make to the commandants of the yards.

When marine officers or privates shall be reported to you by their commanding officer for misconduct, and you shall, after consultation with such commanding officer, consider judicial proceedings to be necessary, you will cause the officer complained of to be furnished with a copy of the complaint or report, and forward to this Department the original, with such explanations as the officer may choose to make, and such remarks of your own as may best enable the Department to decide what further proceedings to adopt. Trivial offences committed by non-commissioned officers and privates may be punished by the marine officers, with your sanction, according to the provisions and under the restrictions of the law.

You will consider it your duty to transmit the orders which may be transmitted by the colonel commandant to the officers to whom they may be addressed, unless, in your opinion, the public interest should require their detention; but, in any such case, you will give immediate notice of the fact to this Department, and to the colonel commandant, with your reasons for detaining the same. You will also forward all official communications to the colonel commandant and the staff, from the marine officers stationed in the navy yard under your command; but, if you think it necessary, you will forward duplicates to this Department, with your observations upon them.

Until more extended and definite instructions or regulations can be prepared, you will limit your supervision of the marines, in the yard under your command, to those objects and occasions which are necessary to the proper performance of your duties and the security of the public interests.

I am, respectfully, your obedient servant,

M. DICKERSON.

HEAD-QUARTERS OF THE MARINE CORPS, *Washington, December 15, 1835.*

SIR: I transmit to you, through the Navy Department, for your observance, the accompanying documents.

I am, respectfully, your obedient servant,

ARCH. HENDERSON, *Colonel Commandant.*

To Lieut. Col. W. H. FREEMAN, *commanding Marines, Boston Massachusetts.*

B.

With the brief memorial, and the orders and instructions attached thereto, may not the time be a proper one to present, as concisely as possible, a history of the corps of marines, the laws under which it was established and organized, the duties assigned to it, the regulations made for its government, in connection with the navy in 1801, the orders containing those regulations, and a general view of all that has materially affected its interests as a distinct and peculiar arm of the military service, and the application of the act of 30th June, 1834; when, it is humbly believed, there will be found other and more important cause for legislative enactments than what have yet been embraced or contained in a pay bill recently reported in the Senate of the United States.

Although well known, it may be repeated, that, by a law passed in 1798, this corps was first created, in *addition to the military establishment of the United States*, to consist of one major, four captains, &c., and, like the British marines of that day, required to take the same oath, and to be subject to the same rules and articles of war as are prescribed for the military establishment of the United States, and the rules and regulations for the government of the navy, &c., according to the nature of the service in which they should be employed.

And, to complete its military organization, an adjutant, paymaster, and quartermaster, &c., were provided for on shore, and the major, or commandant of the corps, authorized by the law to appoint them from the line of subalterns, &c., with the same extra pay as allowed by law to officers acting in the same capacity in the infantry.

The authority thus vested solely in the commandant of the corps is believed to remain *unrepealed* and *unimpaired* by any other law, down to the *present time*.

The marine corps was thus, in 1798, made a distinct military establishment, and detachments or guards were, by law, required to be made from it, in lieu of the respective quotas of marines which had been established or authorized for the frigates, &c., in the service of the United States.

The corps was also made liable, by that law, to do duty in the forts or garrisons of the United States, or any other duty on shore, and to be formed into as many companies or detachments as the President, at his discretion, should direct.

Again: On the 22d of April, 1800, another law passed, creating the office of lieutenant colonel commandant, "*to command the corps of marines*," and abolishing the office of major in the corps.

The records of the Navy Department will show that, about the 19th of August, 1801, circumstances existed which caused the following orders to be issued, in form of a circular, viz:

"Marines, before they are attached to a ship, are under the command of the lieutenant colonel commandant of the marine corps; but after they are so attached, the command of the lieutenant colonel commandant over them ceases, and from that moment the marines, officers as well as privates, are under the command of the captain, or commanding officer of such ship,"

That not being sufficiently full to meet the cases that might arise in fixing a marine guard at the Navy yard in this city, (Washington,) the following rules were prescribed:

"This guard will be considered as a detachment from the barracks on special duty, and, under the immediate commanding officer, will be on the same establishment as to rations, fuel, &c., as the troops at barracks, and will be subject to the orders of the lieutenant colonel commandant, as to relieving the guard, or any part thereof.

"The captain commandant of the yard will point out to the officer commanding the guard the property to be protected, who will, consequently, furnish the number of sentinels competent to give that protection, in default of which, the commandant will communicate the neglect or omission to the lieutenant colonel commandant, who is required immediately to investigate the cause of complaint.

"The commanding officer of the guard can issue no order operating against or interfering with the established rules and regulations of the yard, but he is to conform, with his guard, to every order issued, or to be issued, for the better government of the yard.

"You cannot, under these regulations, order upon other duty the guard stationed at the navy yard for the protection of the public property therein deposited; but, as the commanding officer of naval forces at New York, you can make requisitions upon the officer commanding this guard for such detachments of marines as may be required for service on board the vessels under your command, and such officer is bound to comply with your requisitions, as far as may be in his power. Particular instructions, corresponding with this regulation, will be forwarded by the lieutenant colonel commandant to the officer commanding the marine guard at New York; and if commissioned officers should, in your opinion, be necessary for each detachment so required, you will make application for them to this Department.

"R. SMITH."

The foregoing was enclosed to Captain Isaac Chauncey, or the commanding officer at New York, under date, Navy Department, March 14, 1808, in answer to two letters from him, dated 21st of January and 11th of February previous. And, again: the following letter, enclosing all the foregoing orders and regulations, was addressed to Captain Isaac Hull, commanding United States Navy yard, Charlestown, Massachusetts, under date February 22, 1816:

"SIR: I have received your letter of the 13th instant, upon the subject of the marines stationed at the Navy yard, Charlestown, under your command.

"It appears that this subject has long been agitated, and, from time to time, regulated by special

orders from the Navy Department, but still remains unsettled as to the extent of command upon shore duty over marines, who, by law, are subject only to the orders of the commandant of that corps, when not attached to the United States ships-of-war.

"Subjects of this nature, arising out of any defect or inadequate definition in the acts of Congress, have been usually submitted to the Attorney General of the United States.

"This course will be taken so soon as his attendance upon the Supreme Court will permit his attention to be called to it.

"In the meantime you will consider the enclosed order, (the above regulations of 1801, and March, 1808,) copied from the records of the Department, as binding, and which has been considered in force since the time it was issued.

"B. W. CROWNINSHIELD."

It is presumed, if the opinion of the Attorney General was had in the above case, that it affirmed the previous instructions of the Department, for it was about three months before Captain Hull made known the above order on the subject.

It may now be resumed that, after the act of Congress in 1800 creating the office of lieutenant colonel commandant to "*command the corps*" when serving in the United States, two other acts passed for augmenting the corps, and other purposes; one in 1809, the other in April, 1814. Both these acts have reference to the same rules and regulations for the government of the corps in 1798.

The 2d section of the act of 1814 provides that the adjutant and inspector, paymaster and quartermaster, may be taken either from the line of captains or subalterns, and that they should, respectively, receive \$30 per month, in addition to their pay in the line, in full of all emoluments.

The 3d section authorizes the conferring of brevet rank in the marine corps, providing also that, when commanding separate stations or detachments, they should be entitled to and receive the same pay and emoluments which officers of the same grade are allowed by law.

In March, 1817, another law was passed to fix the peace establishment of the marine corps. That, however, went only to the diminution of its numbers, and in no way changed any of the previous enactments, regulations, or orders relative to the authority vested in the commandant, or its government in connection with naval service.

But, in a system or code of regulations drawn up at the Navy Department for the government of the navy, the 14th section declared that the guard of marines detached for the protection of the yard should, while doing duty in the yard, be subject to the orders of the commandant of the yard, and that all persons enlisted in the marine corps should, on such service, be subject to the same rules and punishment (by the cat-o'-nine-tails) as prescribed by the regulation of the navy at sea.

That section was declared to be illegal, however, by the Attorney General of the United States, and repugnant to the law which made the corps a part of the military establishment of the United States, to be governed by its own commandant when serving on shore, and that section was rendered inoperative upon the marine corps until December, 1835, when it was ordered to be enforced by the President of the United States, in accordance with the act of Congress for the better organization of the marine corps, passed on the 30th June, 1834, and the orders and instructions followed which are brought to notice by the present memorial.

In 1819, on the promotion of Lieutenant Colonel Gale as commandant of the corps, a question was made as to the appointment of the staff, whether by himself or not; and a decision of the Navy Department was then had sustaining his authority to appoint under the law.

Down to that time, therefore, the several laws and regulations of the Navy Department appear to have been duly regarded; the power and authority of the commandant of the corps to appoint and remove the staff fully sustained—construing the law of '98, and those subsequent, to make the lieutenant colonel commandant, the staff, and all detachments serving on shore, subject to the rules and articles of war, under the immediate military command, detail, and direction of the commandant; and all guards or detachments serving on board ships to be subject to the rules and regulations of the navy, and under the orders of the captain of the ship, excepting that they were exempt from being required to go aloft.

The distinct character and military organization of the marine corps was then well understood, and appears to have required no alteration or improvement, as may be seen in a report from the Navy Commissioners of January 17, 1821, to the Secretary of the Navy, in which they say, as to any new organization of the marine corps which would promote economy without injuring its efficiency, they do not feel competent to form a satisfactory opinion, as it appears to them properly a military question, and they have never turned their attention to subjects of that nature.

The Secretary of the Navy (Judge Thompson) also says, in a report to Congress dated 2d December, 1822, "that a peace establishment having been fixed by the act of Congress of 3d March, 1817, (near six years previous, so that the law had been well tested,) and no material alteration being deemed necessary, no other plan was proposed to be adopted on that point."

The pay and allowances to the officers, and extra compensation to the staff, were made agreeably to the laws for the marine corps on the subject, with the exception of one additional ration allowed to the second lieutenants of marines, to put them on an equality as to rations with the lieutenants of the army, from 1816.

In 1825-'6-'7, courts of inquiry and courts-martial were required to be held on some of the senior officers of the corps, including the lieutenant colonel commandant, between whom and one of his staff, the then paymaster of the corps, differences existed, in relation to official duties, calling for the exercise of the President's authority to order a court of inquiry, and causing also the office of the said paymaster to be removed from the head-quarters of the marine corps, where it had been fixed for thirty years, under the controlling direction and superintendence of the commandant of the corps, to an attic room in the Navy Department.

The controlling power of the commandant over the officers of his military staff being thus interrupted, the established laws and regulations for the corps were relaxed in their application, and a strong foundation was made for all that has followed, derogating from the best standing and military organization the corps could possess.

The utility of the corps was a common subject of attack, as connected in its relations to the navy. Every odium was attempted to be excited against the office of the commandant and the brevet field rank which had been conferred on some of the senior officers for meritorious services during the war, by

anonymous publications in newspapers and gazettes, written, as understood, in the office of the Commissioners of the Navy.

In the beginning of 1828, the official duties and legal authority of the lieutenant colonel commandant were brought in conflict with the views and purposes of the Navy Department, under the following circumstances:

About the month of January, the commandant of the corps deemed it proper to require of the paymaster, an officer and office whose duties he was bound to direct and superintend, a statement of balances, that had been transferred to him with the books of his predecessor in the office, against the officers of the corps, in November, 1821, amounting to about \$50,000, and to know how they had been liquidated, and how settled and accounted for by him.

His answer not being satisfactory, as to the faithful discharge of his duty to the United States on that subject, further explanations were required; finally leading to an order from the commandant to close his accounts as paymaster, and that in due time he would be removed from that office and assigned to other duties in the corps.

A copy of the correspondence and statement of the facts were furnished to the Secretary of the Navy, and the following correspondence had on the subject:

NAVY DEPARTMENT, *January 28, 1828.*

SIR: I have received your letter of the 19th inst., enclosing a correspondence between yourself and paymaster. I have also received from Captain — (the P. M.) a copy of the same correspondence. Before any decision in the case is made by the Department, it becomes necessary to understand the source from which the power to remove this officer, and compel him to account to you, is derived.

I have therefore to request that you inform me on what grounds you suppose the authority is vested in you, and that you do not exercise it until the will of the President on the subject be communicated from this Department.

SAMUEL L. SOUTHARD.

To Col. HENDERSON, *Commandant, &c.*

HEAD-QUARTERS OF THE MARINE CORPS, *Washington, February 1, 1828.*

SIR: I have the honor to acknowledge the receipt of your letter, dated the 28th ultimo, requesting me to inform you on what grounds I supposed authority is invested in me to remove Captain* — from the duty of paymaster, and to compel him to render an account to me of certain transactions under that appointment.

In answer, I have the honor to inform you that, as Captain — derived his appointment to perform the duty of paymaster from me, I conceive that he not only held his office under me at the period of his appointment, but necessarily is in continuation of this office, from day to day, under that appointment.

The authority to appoint, virtually possesses the power to revoke, unless restrained by the law which gives the power of appointment.

This general principle, incident to all appointments, is peculiarly applicable to the appointment of the staff officers in the marine corps. Captain — is an officer commissioned by government, and my authority cannot affect that commission; but the duty to be assigned to him under that commission appertains to my office as commandant. He holds no commission as paymaster, similar to army appointments, but acts in performance of a particular duty, to which any officer in the marine corps may, by law, be assigned by me; and such duty can only be performed by some one of those officers.

The appointment of the duties of paymaster may be considered the same as an appointment to any other duty or service under my command, and liable to the variations which attend other departments of service.

The original law, or act of Congress, for establishing and organizing a marine corps, dated 11th July, 1798, authorizes the major or commandant of the corps to appoint the staff officers, and that power, granted by said act, has never, to my knowledge, been revoked or repealed; the various subsequent acts are evidently only additional, operating either to augment or diminish the numbers of the corps, and in nowise to detract from the powers vested in the commandant under the law above named.

The act of Congress of the 16th of April, 1814, which declares the adjutant and inspector, paymaster, and quartermaster, may be taken either from the line of captains or lieutenants, does not vary the power of appointment granted to the commandant by the first law; on the contrary, the subject-matter being then under legislative consideration, when the mode of appointment was known and practiced, as at present, and there being no alteration then made as respects the appointment, said act must be considered as an affirmance of the power under the first law.

The compensation to said staff appointments was then altered and increased to \$30 per month each, in addition to their pay in the line; but the manner and authority for making the appointments was left undisturbed.

The Constitution of the United States authorizes Congress, by law, to vest the appointments of such inferior officers as they think proper, in the heads of departments, a reference to which, it is presumed, was had in vesting in the commandant of the marine corps the appointment of the staff of the corps.

The last act which fixes the peace establishment of the marine corps, dated 3d March, 1817, declares that it shall consist of certain officers, and that one adjutant and inspector, one paymaster, and one quartermaster, be taken from those officers, but is silent as to who shall appoint them; of course it is to be understood that they are to be taken as provided by the first act on that subject.

As the staff officers must be taken from the captains and lieutenants, who can so well judge of the fitness of those appointments as the commandant? He knows the other duties of service required to be performed by these captains and lieutenants, and from which they ought to be relieved, and the military routine to be observed in the corps. Thus it may be apprehended that the competency of the commandant to make those appointments, and to determine the duration of them, caused the power of appointment to be first vested in him, and to remain unaltered by the last act. If such power was intended to be revoked by said act, the same would have been done in clear and explicit terms, and not left to any strained implication.

* The name of the paymaster is omitted.

The power, by the 3d section of the said act, in the President, to appoint officers, authorized by said act, it is apprehended, is limited to such officers as hold commissions, and are enumerated in said act, which, in its own nature, refers to, and is founded on, the previous acts for establishing the marine corps. No new commissions were issued under said act, but the corps remained in operation under the pre-existing provisions. This circumstance shows the sense which, at the time, was entertained of said law, and of its being in the character of an additional act, containing no new provisions, except for the diminution of numbers. The same subject was formerly under the deliberation of your predecessor.

It appears that, in December, 1806, Colonel Wharton (then commandant) removed an officer from the paymaster's office, without any alleged misconduct or abuse on the part of that officer, who appealed to the honorable Mr. Smith, Secretary of the Navy, when Colonel Wharton repeated, in his letter to the Secretary, that he had no specific allegation to make, but that, as it was a power vested in himself to appoint and remove his staff, he could not continue in his staff an officer who was personally unfriendly. The revocation of that appointment was sustained by the Department, and Colonel Wharton appointed a Lieutenant Greenleaf to succeed to the office of paymaster, on the 1st July, 1807.

Mr. Crowninshield and Judge Thompson also decided that the power of appointment was vested in the commandant, and under the order of Judge Thompson, of date —, 1819, on file in my office, Colonel Gale appointed his staff, including the former paymaster, Lieutenant Desha.

It may be observed that, if the last-mentioned law, in 1817, varied the appointment of the paymaster, the President, who had the law immediately before him, would assuredly have made the appointments of staff officers, including the paymaster, according to the provisions of that law.

It is also very certain that, if such appointment belongs to the President, and not to the commandant, then Lieutenant Howle, the adjutant and inspector, Captain Kuhn, the paymaster, or Lieutenant Weed, the quartermaster, are neither of them properly the staff officers, and it would be my duty, in such case, to revoke their appointments, erroneously made by me.

As respects my authority to call Captain — to account concerning the particular subject referred to in my communication to him, I must observe that, until lately, it was deemed requisite to submit to me as commandant of the corps, for my approbation, all requisitions from the paymaster on the Treasury of the United States, which would seem to imply that, having assented to the receipt of the money, I might well have a right to inquire whether public money, obtained under my sanction, had been lawfully appropriated; but the duty especially devolved on me to ascertain whether the balance of \$48,000, charged by the former paymaster, (Lieutenant Desha,) against the officers of the corps, and committed for collection to Captain — in November, 1821, as his successor in that office, had been duly stopped and accounted for. On making this inquiry of Captain —, he rendered to me a statement and account, from which it appeared that an item of near \$10,000 remained charged against one officer, when, by the same account, I observed that two sums, amounting to more than \$1,000, had been paid by him to the said officer, in June, 1823, for omitted credits in his favor, in 1819, with the former paymaster, (Lieutenant Desha,) which sums ought not certainly to have been paid, but deducted from the debit against the officer. Lieutenant Desha was credited at the Department for those two accounts, and had paid far beyond the amount in his advances to this officer, which was well known to Captain —.

It was also understood by me, I believe, admitted, that a very large sum had been allowed this officer for claims settled with him under the law for equitable settlements without vouchers, which, in itself, limits such allowance to a credit only against outstanding balances; and further, without such limitation, it was the duty of Captain — to stop from him, as he did from other officers, for the above debits against them.

The amount received from Captain — purports the credit to Lieutenant Desha, when, in fact, the above amount of balance against the officers did not belong to Lieutenant Desha, or his estate, but to Captain —, as his successor in office, or to the Treasury of the United States, where the accounts of deceased officers are required to be settled; and the United States might, if necessary, have commenced suits against those officers, for payment or adjustment of those balances. By a subsequent communication from Captain —, he informed me that the letters of credit to Lieutenant Desha, mentioned in his account, were actually accounted for by him to the United States. I required from Captain — the particular times, or dates, when the balances were stopped, so as to ascertain whether the same were accounted for in due time.

Captain —, in the above account, states that a suspension of the debit against this officer was made by authority of the Fourth Auditor, in September, 1825. It is evident that, from 1821 to 1825 the ordinary pay, &c., of that officer would go far to diminish his balance, exclusive of the equitable claims allowed him; and, I think it hardly possible for any auditing officer of the United States Treasury so far to have contravened the law as to prevent stoppage for an uncontroverted debit. The above suspense, mentioned in the said account of Captain — to be by order of the Fourth Auditor, in September, 1825, is supposed to be still in operation, so as to enable the officer to receive his pay from that period to this; more especially (such order of suspense appears very singular) as it must have been known at the Treasury that the claims of said officer, under the act for equitable settlement, had been fully adjusted, and even paid to him, and when it was the duty of the paymaster, who had knowledge of the subject from his official intervention, to remonstrate against it.

Conceiving it my duty to call on the paymaster for such order or authority from the Auditor, he declined to afford me such evidence, but referred me to the Fourth Auditor for it, when it was his duty to have procured and possessed, from the Fourth Auditor, a written order on the subject.

It may be remarked, that the power and duty of the paymaster to make stoppages do not depend on any act of Congress, but, as successor in office, was bound to take the same notice of advances made by his predecessor as if made by himself.

I have thus fully explained to you my views and reasons for the authority exercised by me in relation to Captain —, which, I trust, will meet your approbation; and, as you were pleased to intimate that the subject would be submitted to the consideration of the President, I hope this may accompany the communication.

ARCH'D HENDERSON, *Lieutenant Colonel Commandant.*

The Hon. SAM'L L. SOUTHARD, *Secretary of the Navy.*

The just ends of the commandant, and his clear powers and duties, thus set forth, were first submitted by him to legal examination, of the highest respectability; and, after waiting two months for an

answer from the Department on the subject, it was again brought to notice, on the 4th of April, in the following extract from a communication from the commandant, of that date:

"I would, therefore, respectfully call your attention to my communication of the 1st February, in answer to your inquiries of 28th January preceding, as to the grounds of my authority for appointing and removing, &c., the staff officers of the marine corps; and, in compliance with your request, have waited to know the President's decision on such contested authority.

"A thorough and advised conviction that the authority to appoint and remove is, by law as well as precedent and long established usage, vested in my office only, as commandant of the corps, I must request, as early as convenient, to know the President's decision on the subject. It cannot comport with the public interest, or the respect due to my authority as commandant of the corps, to pass unnoticed the very presuming, insubordinate, and objectionable conduct of Captain — towards me, as made known to you in my former communications, and to continue in the staff one so personally hostile as he is."

Under date the 9th April the following answer was returned from the Navy Department:

"SIR: In answer to your letter of the 4th April, I have to inform you that the President of the United States has considered the question relating to the paymaster, quartermasters, and adjutant and inspector of the marine corps, and decided that it is his duty, at a proper time, to make nominations of persons to the Senate to fill those offices. This determination will place those officers on the same grounds, as to appointment, with those of the same grades in the army.

"SAMPL L. SOUTHARD."

Thus, therefore, was the authority vested in the commandant of the corps to appoint and remove his staff, under the act of Congress creating and establishing the corps as a distinct military body, in 1798, and the invariable exercise of it for thirty years, disregarded; and the officers then in those offices, the adjutant and inspector, quartermaster, and the paymaster, were nominated by the President to the Senate, about the 28th May, 1828, three or four days only before Congress adjourned; accompanied, it is understood, by a suggestion of there being some doubts on the legality of the appointments, whether by the commandant of the corps or not, with an opinion of the Attorney General, leading to the conclusion that he did not possess it; and they were confirmed by the Senate, and commissioned accordingly.

It was then, and is now, firmly believed that the Senate would not have sanctioned the nominations had they examined particularly the law on the subject, and known the causes and grounds on which they were made.

Contrary to the general law and usage of the British, and our own military service, which expressly provides that staff officers, holding rank in the line, shall be subject to perform temporary duty in the line, or on courts-martial, at the discretion of the commanding officer; and against the first principle of military discipline, (subordination,) one of those officers (the paymaster) was sustained by the Navy Department in appealing from an order, thereby denying the authority of the commandant of the corps to detail him as a member of a general court-martial, soon after ordered, for the trial of an officer in this city.

The effect, by construction, was not only to diminish their duties, (not subject to any in the line) and to destroy the military authority and respect due to the commandant of the corps, but to advance the pay and emoluments of those officers to more than double what was authorized by law in 1814, when the corps was three times as large, and without any higher or additional staff officers.

One of them, a lieutenant only, who entered the service in 1817, and never performed any duty at sea, appeared on the estimates to Congress the following session, 1828-9, as a quartermaster of the marine corps, at \$60 per month, allowances and emoluments, amounting, in all his receipts, it was said, to more than \$3,000 per annum, which was thus allowed, notwithstanding the compensation fixed by law would not exceed half that sum.

To continue the course and views of the Navy Department as clear and concise as possible, with regard to the marine corps, extracts are carefully made from the annual reports of the Secretary of the Navy since 1822, and the one dated December 4th, 1827, will show how far the courts of inquiry, before referred to, were probably the principal, if not the only cause or grounds of the recommendation to make the corps subject at all times to the naval regulations and officers.

In the report of the Secretary of the Navy to Congress in 1823, no allusion was made to the corps; in 1824, reference was only made to the estimates of the marine corps, and the explanatory statements added; from which time, and on which grounds, it is believed the established and legal pay of the officers of the staff, by the law of 1814, was departed from, for the *first time*, by introduction of desired allowances into the estimates for appropriations of Congress.

In the report of 1825, no mention is made of the corps; and in that of 1826, a general reference is had to former reports, showing the evils under which the marine corps and naval service labored, which could only be relieved by legislative interference, and, to the views and opinions before expressed, adding "that the marine corps and the service still continued to feel, sensibly, the necessity of a remedy for some of the inconveniences then suggested."

No special consideration appears, however, in the reports, suggestions, &c., alluded to, respecting the marine corps. But in the report of December 4th, 1827, it is noticed as follows:

"The condition of the marine corps urgently demands that it should be again presented for consideration. It was 'established and organized' in 1798, and consisted of 720 men, besides officers. The design of Congress, in creating it, was to furnish a proper guard for the navy yards, and for ships at sea. This design points out the extent and organization it should possess. It should be numerous enough to afford a sufficient guard for each yard, and each ship in commission. It ought to be, also, so far incorporated into the navy as to render the government of the two consistent and uniform. In both these respects it needs amendment."

"The statement 'G,' annexed, (omitted here) shows the proper number for a guard at each yard and each ship in commission, in the opinion of the commandant of the corps, amounting; in all, to — effective men. The corps now consists of 750 men, besides commissioned and non-commissioned officers, being thirty more than when it was first established, although the service to be performed is much more extensive. It is apparent that this number of men cannot furnish the required guards; our vessels are,

therefore, often without the requisite number, and a very insufficient protection is afforded to the public property. Watchmen have, during the past year, been hired at several of the navy yards, to aid the marines, which unavoidably creates confusion and insecurity." (Why were they hired, then? Solely to supplant and break down the organized establishment of the marine corps.) "It would be better to have guards composed altogether of one description of persons, either marines or watchmen. The nature of the duties performed by the corps, both on land and on water, is such, that great danger results from their being insufficiently discharged. The public interest would, therefore, be promoted by augmentation in its numbers, or by withdrawing it altogether, either from the navy yards or from the ships, and trusting to other means for protection, which would be regarded as a hazardous experiment."

"There is still greater defect in the organization (government is probably meant) than in the numbers of the corps. By the law of 1798 it is governed by the same rules and articles of war as are prescribed for the military establishment of the United States, and by the rules and regulations of the navy, according to the nature of the service on which they shall be employed."

"By the construction uniformly given to this law, the corps is subject to the navy regulations at sea, and the army regulations when on land. The same officers and men are at one moment under one system of rules and discipline, at the next another." "Their compensation is governed by one law at sea, by another on land. The nature of their connection with the navy is unsettled and subject to constant disputation; when the laws are to be enforced, in the punishment of an officer, neither the War nor the Navy Department can, in many cases, act without the interference of the other." "It is not necessary to detail the consequences which follow."

"It is, perhaps, matter of surprise that confusion, disorder, and violation of duty, have not existed to an extent which might jeopardize the existence of the corps, (not from the inadequacy of the laws and regulations on the subject, but the unfortunate inattention to, and misapplication of them). The following amendments are respectfully suggested as the proper remedy:

"1. That the corps be increased in the number of privates, and that the number and grade of the officers correspond with those which have been established in the army.

"2. That it be placed entirely under the laws and regulations for the government of the navy.

"3. That accommodations be afforded them out of, but adjoining the navy yards, so that details can be sent under proper arrangements by the officer commanding them into the yard, and while there, be entirely subject to the control and order of the commandant.

"4. That a sufficient guard, for the sole purpose of guarding the property at Portsmouth, Philadelphia, Washington, and Pensacola, be assigned to those places, and the remainder be divided between the stations at Boston, New York, and Norfolk, where they can be properly drilled and prepared for sea service, and from which our vessels can obtain the necessary guards when fitting for sea.

"5. That the commandant and staff of the corps remain at this place, as the most convenient for communication both with the Department and with the corps, and for the prompt settlement of their accounts.

"If these suggestions should be adopted, it is believed that the marine corps would be much more efficient and less expensive to the public. The two first of these provisions would require legal enactments—the others might be effected by regulations."

In the next annual report to Congress, no reference was made to the marine corps.

On the changes being made in the head of the Navy Department and the Fourth Auditor's office, in 1829, *erroneous impressions* were created, and hastily taken in regard to the marine corps, particularly as to the pay and allowances of the officers, without understanding and discriminating between what were in conformity to the laws on the subject, and what were against law and without good authority to sustain them. Great injustice was done at the time by withholding from the officers that which was legally due; and a joint resolution was finally passed by Congress, restoring to them, respectively and without discrimination, all that had thus been withheld; and the provisions in the appropriation bill of 1831 reaffirmed them, until changed by law, as will be seen stated hereafter in the annual report of the Navy Department, December 3, 1831.

The following extract is made from the President's message in 1829: "I would recommend that the marine corps be merged in the artillery or infantry, as the best mode of curing the many defects in its organization. But little exceeding in numbers any of the regiments of infantry, that corps has, besides its lieutenant-colonel commandant, five lieutenant colonels by brevet, who receive the full pay and emoluments of their brevet rank, without rendering proportionate service. Details for the marine service could as well be made from the artillery or infantry, there being no peculiar training requisite for it."

The profound respect due to the high authority last quoted, precludes other answer than to ask if the act of Congress establishing the corps in 1798 did not fully confide to the President of the United States authority to organize the corps in such manner, and to order it to do duty in the forts or garrisons of the United States, or any other duty on shore, as the President at his discretion should direct. The only imperative requirement in that act is in the 3d section, which says, "the detachments of the corps of marines, hereby authorized, shall be made in lieu of the respective quotas of marines which have been established or authorized for the frigates," &c.

Is it not probable, also, that the public interest, the convenience and good of the service, were known and consulted in the distinct and peculiar organization of the marine corps in 1798, and that the laws for its government, brevet rank, and pay, were made and adopted accordingly?

In the winter of 1830, a call was made by the Senate of the United States on the Secretary of the Navy, to obtain the opinions of the post captains of the navy, then in Washington, on the subject of dispensing with the marine corps and military guards, as a component part of naval equipment; also, as to its government, organization, and substituting seamen, &c., to do their duties at sea, &c.

The opinions of several posts captains were thus obtained, and those of junior officers in the navy were also added, as volunteers in favor of dispensing with marines altogether.

But their views and opinions all passed, like other futile ephemera, except one or two, marked by their intelligence and enlightened testimony to the extent of its services, as will be seen in the only one at hand, and here copied.

“Opinion of Commodore Charles Stewart, in relation to the marine corps of the United States.

WASHINGTON, March 8, 1830.

SIR: I had the honor to receive your letter of the 3d instant, covering a resolution of the Senate of the United States, relative to the marine corps, requiring information on the following points:

“First. ‘Whether it is necessary that marines should compose part of the military force of a ship-of-war?’

“To this I answer, that I do consider them proper and necessary to constitute a part of the crew of a ship-of-war.

“Second. ‘Whether marines may not usefully be dispensed with, and a portion of the seamen be instructed in the use of small arms, and perform all the duties which may be required of marines in battle or on ordinary service?’

“To this I answer that, for the mere purposes of battle, perhaps the seamen might be instructed, in a limited degree, in the use of small arms.

“Third. ‘Whether seamen are not now instructed and practiced in the use of small arms?’

“To this I answer, that a portion of the crew (other than the marines) are now, and always have been, instructed and practiced in the use of small arms; but that instruction and practice are very limited, as they necessarily must be.

“Fourth. ‘Whether the petty officers and seamen who have been in service, but from age, or slight disabilities, are rendered unfit for the actual duties of their calling on ship-board, can be usefully and safely employed as guards at the navy stations, in lieu of marines?’

“To this I answer, I think not; but as I have never had any command or control over a navy yard or station, I cannot speak to this question from actual experience.

“The foregoing answers would seem to comprise all the honorable the Senate of the United States require on that subject; and it would not have been proper to go further, were it not for that part of their third question requiring also any general information in elucidation of the subject of the resolution, ‘whether marines can, or cannot, be beneficially dispensed with on board our public ships-of-war?’ Under this clause I would beg leave to remark, that the marines are the only portion of the crew of a ship-of-war that is wholly military, and the only part that could be rendered such by the nature of the service, as well as the nature of those comprising the other classes. If, then, it is at all desirable or useful to have a portion of the force of a ship-of-war wholly and completely military, that portion must be composed of a regularly organized infantry, for this reason, that sea officers, from their employments and occupations in ships-of-war, differ materially from military officers, because the ideas and general habits of sailors unfit them, in a great measure, for infantry soldiers; and because the limited space in a ship-of-war would not admit of their training; and their general duty and employment would be too much deranged and interfered with. In order to ascertain the necessity and utility of having a portion of the crew of a ship-of-war organized as infantry, it will be necessary to inquire into the objects and duties of such a corps.

“The first object is to instill into them those sound military principles—obedience, subordination, and respect—that they may be entitled to confidence in discharge of their duties as sentinels to watch over your magazines, spirit-room, storerooms, gangways, galleys, and look-outs; to preserve order and prevent interruption to cooking duties, and to guard your prisoners of war, who sometimes outnumber the crew. In port, they constitute the deck-guard, and at sea they are (or at least a large portion of them) always near their arms. Thus they prevent surprise from without, and check mutiny within. In the ordinary duties at sea, the marine watch perform the same duties on deck which would be required of any other body of men, except going aloft; consequently, their usefulness and force, as men, are not lost; for there must be some men kept on deck, in reefing and furling, to haul the rigging and manage the cordage for those who are aloft. In battle, when the ship is engaged on both sides, or when otherwise necessary, they can be distributed among the carriage-guns for working the artillery. Should any operations wholly military be required of them on shore, they would be more efficient and competent to its performance. Should the combined efforts of seamen and marines be required for the surprise of posts, or the escalade of a fortress, the marines, as a supporting column of regular infantry, would form a disciplined body, whereon to rest the security of the other classes who are appointed to make the grand effort, and would yield them a steady column and military support in case of failure, when they would constitute the reserve, and cover the retreat and embarkation of the seamen.

“The latter are a class of men whose onset and first efforts are tremendous and formidable, but, if resisted and discomfited, they break into a hundred groups, which cannot be rallied, and they become a mere mob, who, without a body of regulars to sustain them, must fall a sacrifice. Seamen have a particular aversion to the infantry drill, and, generally speaking, can be brought to little more in that art than to load and fire. That strict subordination and obedience to orders, and the pride of feeling, intuitive in a regular soldier, cannot be attained by a seaman. Hence, the entire confidence of the officers, for the performance of the ordinary duties on posts, cannot be yielded them. Frequent punishments would ensue for neglect and irregularity, and disgust to the service would follow. But, sir, there is another evil in attempting to make marines of sailors—the scarcity of seamen; and ordinary seamen would embarrass more and more the manning of our ships-of-war, if those who act as marines are substituted from the other classes. To take them from landsmen, no advantage would be gained, as regards the increased nautical efficiency of our ships, but much would be lost with respect to the military portion; we should have the men, without the seaman’s or soldier’s profession. In the above observations, I have referred to the possibility of mutiny in our national ships-of-war. That mutiny has occurred in our navy, there is no doubt. One instance took place on board the *Constitution*, in the Bay of Leghorn, in the year 1807. By the formidable appearance of a column of marine bayonets, supported by nearly a hundred gallant officers armed, it was not only suppressed, but twenty of the ringleaders were secured, and sent home in the ship, ironed, for punishment; but the government deemed it most advisable not to punish them, *as they were right, and the commander was wrong.* It appeared that the period for which the men had engaged had expired. This practice, of keeping the ships-of-war absent beyond the period for which their crews are engaged, is becoming a fruitful source of mutiny. Commanders, anxious to execute all the orders of the government in sending them abroad, lose sight of their obligations to obey the law, thereby rendering themselves liable to encounter death at sea, in the shape of mutiny, and civil prosecution on shore, for

detaining their men beyond the period for which they are engaged. Their paramount duty is to return to the United States and discharge their crews, after they have faithfully performed their part of the contract; that the government should as faithfully perform theirs, by returning them to their country and homes, and not suffer them to be discharged penniless in distant seas, to encounter starvation, or to beg, or become pirates.

"Very many persons are under the impression that most of the mutinies in the British navy originate in their practice of impressment; but I believe there is scarcely an instance of the kind on record. Their mutinies originate in oppression, and not in impressment. I also believe there is no case where the marines, as a body, participated in the mutinies of the seamen. If we refer to the very serious mutiny of the channel fleet, at the Nore, in 1797, I think we will find (I speak from impressions on the memory only) that nothing was stated by the mutineers as a grievance for redress, on the part of the impressed men, except that sentence of death for desertion, committed by an impressed man, was urged on the King as too severe a punishment, and those who volunteered for the service, and took the bounty, insisted on being discharged every seven years. About the same period, a bloody mutiny took place on board the British frigate, the *Hermione*, on the West India station. This mutiny originated in the oppression and tyranny of the commander on that occasion. All the officers (except a master's mate) encountered death. Captain Pigot, the commander of that ship, was of such a tyrannical and intemperate disposition as to wholly disqualify him for the command of men. If mutinies have not more frequently occurred in our ships-of-war, it has been owing to the mildness of our commanders, the good feelings of the seamen towards their officers, and the support afforded the latter by a steady column of bayonets. There are some who will say that marines are useless except for idle parade. But even form and parade, in a military system, are perhaps more essential, in aid of the preservation of discipline amongst republican citizens, than with the subjects of a king.

"The whole business of life may be considered a little more than bent, so far as the desire of distinction goes, towards appearances. Men are at best but grown-up children, 'pleased with a rattle, tickled with a straw.' Take from military service its distinguishing trappings, the possible 'pomp and circumstance of war,' the probable vote of thanks of the national legislature, and what will then be left them to aid their patriotism in calling forth the whole energies of the man, to support them in the perils of the battle and the ocean, the deprivations of their home and its comforts?

"If we refer to the past services of the marine corps, they will be found to be among the most distinguished. Whether you take them at the charge of the bayonet, in unison with the seamen wielding the sabre and the pike, boarding the gunboats off Tripoli, in their various actions on the ocean, or in their efforts with the seamen under Barney in resisting the advance of the British columns to your capital, you will find they have ever sustained a high reputation for discipline, conduct and courage. Under these circumstances, I am decidedly of opinion that the *marines* cannot be beneficially dispensed with in our national ships-of-war.

"I have the honor to be, with great respect, sir, your most obedient servant,

"CHARLES STEWART.

"The Hon. JOHN BRANCH, *Secretary of the Navy.*"

The report of the Secretary of the Navy, in December, 1830, was silent, however, respecting the marine corps; but that made in December, 1831, with its appendage from the Commissioners of the Navy, is so designedly set forth to be adverse to the military establishment and organization of the corps, with regard to *expense*, rank of the officers, &c., as compared with the rank of colonel and four majors, which officers Congress have since created by the act of 30th June, 1834, that particular attention is called to it.

The views which it indicates, with regard to the colonel commandant of the marine corps and the staff officers, are now in a way of being carried out under the *power* given by the second section of the act of 30th June, 1834, which changes the law and regulations established in 1798 for the government and discipline of the naval service; the effect of which will be more duly noticed. The report says: "The discontinuance of the marine corps, or its transfer entirely either to the army or to the navy, has been the subject of former communications from this Department.

"In its present fluctuating condition, without any imputation on the character of its officers, frequent difficulties in relation to pay and allowances, trials, and orders, are necessarily happening; and part of which proceeded to such an extent as to require a special resolution of Congress in 1830, and a particular provision in the appropriation bill of 1831.* But, by placing this establishment, as in former years has been proposed, wholly under navy discipline and laws, most of these difficulties might, in my opinion, be obviated, all the present benefits of it to the service retained, its increase in numbers rendered unnecessary, its old associations preserved, and much greater economy, harmony, and energy infused into its operations, without derogating at all from the respectability of the corps. Should the system recommended in the document annexed (G, number 12) be fully adopted, the saving is estimated at over forty thousand dollars annually. But, in that event, the officers not needed should in justice be transferred to the army, and the saving to the government would then fall short of that amount.

"In its hospital and staff departments alone, a change of less extent, as to officers, would save to the public more than \$10,000 annually, and a portion of the expensive call for new barracks would be rendered unnecessary. The appropriation at the last session for those in Philadelphia was so expressed that the officers of the Treasury did not feel authorized to allow the expenditure."

"[Document G, No. 12.]

"*Estimates, &c., as proposed to be charged. Copy of a letter from the Secretary of the Navy to the Board of Navy Commissioners.*

"NAVY DEPARTMENT, October 6, 1831.

"I submit, for your inspection, copies of the estimates from the paymasters and quartermasters of the marine corps for the year 1832, and take the opportunity to inquire what amount of expense would be saved annually if the marine corps was incorporated with the navy, and subject always to navy discipline and laws. With your reply, please to return the estimates."

* Pay and allowances unjustly stopped in 1829, as before stated.

Extract as above, October 10, 1831.

"In making the estimates concerning the difference of expense caused by incorporating the marine corps more fully into the navy, you may consider that, in such an event, the hospital establishment for the corps will not be separate; that forage, &c., will become unnecessary, and that three separate commands or stations, on shore, will probably prove sufficient for the accommodation and wants of the service."

"NAVY COMMISSIONERS' OFFICE, October 25, 1831.

"SIR: The accompanying paper, marked A, (omitted here,) based upon the principles laid down in your letters of the 6th and 10th instant, is respectfully submitted, in the hope that it contains the information which you have been pleased to call for.

"If the marine corps were fully incorporated into the navy, and subjected always to its discipline and laws, without being charged with any functions other than such as have a direct relation to the navy, then the existing laws organizing it as a distinct corps; liable to do duty either on shore or on board ships, would require such modifications as would adapt it exclusively to such service.

"Its duties on shore would be confined to the navy yards, and would there be performed under the superintending direction of the senior officer in command; of whose command it would form a component part, precisely as do detachments on board ships form part of the crew of such ships, and there act as may be required of them by the commanders of such ships.

"Such an organization would preclude the necessity of investing any individual with the general command of the corps; and the staff essential to it, when viewed strictly as a military body, would become unnecessary, since all its functions would be performed by officers having similar duties to perform at this time in the navy.

"Its clothing might be procured as is the clothing of seamen and ordinary seamen; its rations might be procured and distributed as the rations of other branches of a ship's crew; (they always have been, *on board ships*;) its arms might be procured as are now the arms of the navy generally; it would be paid, as are now the seamen and others, by pursers.

"For its drill and preparations for service, the officers of the respective detachments would be as competent as are now the officers of ships to their appropriate commands.

"Such considerations have guided the Commissioners in preparing the information now submitted.

"With, &c.,

"JOHN RODGERS.

"Hon. LEVI WOODBURY, *Secretary of the Navy*."

After this, in March, 1832, a compilation was made from the various *orders, circulars, regulations, and decisions*, found dispersed over the records and files of the Navy Department, and published by the Secretary of the Navy; not including, however, those of 1801, 1808, and 1816, which so distinctly point out and direct the relative duties of commandants of navy yards, and commanding officers of marines on shore, which thus appear to have been overlooked, or *intentionally* omitted, in that compilation.

To some of the views contained in the report of the Secretary of the Navy, in 1827, it may be observed, that the ends of justice ought hardly to be sacrificed, from the inconvenience that might sometimes occur, when ordering courts of inquiry, &c., on any senior officer of the corps, by having to apply to the War Department for *military officers* to compose such courts, as wisely provided for by the rules and articles of war.

Ought not officers of the United States marine corps to be lawfully entitled to a fair trial by officers conversant with the detail of their military profession, when accused of offences against military rules and conduct, under the articles of war, rather than to put naval officers on such courts, and in the absence too of any law and regulations in the naval service applicable to military offences? The law of 1834, however, is a barrier to justice on that head.

Few military men can admit the competency of naval courts and officers to try offences charged on them, more than naval officers would be willing for army or marine officers to try professional misconduct charged on them.

It was observed, also, in that report, that there was an inconsistency in the compound character of discipline, &c., making the marines at one moment liable to one system of discipline under military law, and, the next, to another system under naval law.

Such, however, was not the fact, as the law then was, because naval law and discipline governed the marines when attached to a ship in commission, and, of course, continued for periods of one to three or more years. And it was only when unattached to sea service, occupied in military instructions and drill, and furnishing the requisite guards for sentinels in navy yards, that the rules and articles of war could be applied.

The diversity of law and discipline, therefore, on that subject, comported well with the diversity of character which necessarily pertained to their duties.

If it was intended by the law of 1834 to place only the guards specially detailed for a tour of duty within the navy yards, which lasts but for a day, under naval discipline and officers, then that law has created the very compound character of discipline and liability which was thus pointed out for correction.

It may not be generally known, but the fact is now stated, that the marine barracks are either out of the navy yards, or occupying a portion of the public grounds appropriated to their use, on which barracks have been erected, with their appurtenances, between twenty and thirty years, and separated from the other part of the public grounds by lines and enclosures so distinct that no seaman or marine passes those limits, except on duty and with a warrant or non-commissioned officer, without the mutual knowledge and consent of the naval commandant of the yard and of the marine officer commanding such separate division or detachment of the marine corps.

Attention is particularly invited to the last act of Congress, respecting the marine corps, of 1834, which changes so totally the military character and standing of the corps, by subjecting it to naval regulations and discipline. Can all the biased reports and views on the subject have been known and considered with the caution their tendency should create? as, for instance, that of the Secretary of the Navy, of December, 1831, with the *fitting* answer of the Commissioners of the Navy annexed to it—so opposite to the creation of the additional field rank in the corps, and which is now degraded in its trusts and

official duties, under the operation of naval laws and regulations that were not *required* by any recommendation of the Executive, the present head of the Navy Department, or of the colonel commandant of the corps, as is fully shown by the facts of the orders and regulations, dated the 7th and 11th December, 1835, (near eighteen months after the laws authorizing them passed,) containing the first instructions from the Navy Department of the construction to be given to the law in its application to the corps of marines.

Is there to be no confidence or trust reposed in the offices of the colonel commandant, and the other field rank which Congress bestowed on the senior officers of the corps by the above act? Although the law prohibits their commanding a ship or navy yard, yet it surely cannot be expected of them to submit to the control of any *sea officers*, junior to themselves, on the free soil of their country.

May it now be respectfully marked for inquiry, whether it will not be prejudicial to the public interests, and destructive to its military utility, thus to place the corps, when on shore, under the rules and regulations for the government of the navy, the same as at sea; and whether it must not have the effect to destroy the true and high military character it is desirable such a corps should possess?

Would it not be better to repeal so much of the act of 1834 as relates to the government and discipline of the corps, and thus leave for the President of the United States, only, to remedy (through whichever department he may direct) any manifest defects in the details of the corps, by regulations adapted to its military character, and to the rules and articles of war, when serving on shore, rather than it should remain entirely under the rules and regulations for the government of the navy; and the privates of the corps liable to the degrading punishment of the *cat-o'-nine-tails*, under the immediate orders of navy officers, as is *now inflicted* on them, without any hesitation, by *order of some of the commandants* at navy yards?

Formerly that punishment was sometimes necessarily inflicted on them at sea, but never when serving on shore.

What advantage can the public expect to derive from this change? There was never one instance adduced of damage or loss to the public property and interest when committed to detachments of marines, under marine officers. - And if any neglect or violation should occur, would it be more efficiently corrected under naval than military law and officers?

By necessity, it was required that marines should be under naval regulations and command, when serving at sea; but when on shore, the marine corps ought to be, as it was, distinct as possible from the naval service. Such distinction in discipline and command creates the high military feeling that constitutes the salutary check against mutiny and irregularities incident to sea life, which would be greatly diminished, if not lost, by unity under navy regulations on shore.

It is a general principle in all establishments, that no change should be made without some manifest or unavoidable necessity. The experience of the British service, from which ours was first modeled, as well as our own, for near forty years, under that model, can be adduced to prove the competency of the old law on that subject.

The British marines, when not borne as part of a ship's complement, are never subject to their naval regulations and discipline; but, in our service, it has been urged as a reason why marines on shore should be under naval regulations and officers, the same as at sea, that the commandants of the yards were responsible for the public property within the yards, and that consequently they ought not only to have authority to require of the commanding marine officer to furnish such guards or sentinels, to be placed as they should direct, for its protection, within the limits of their commands, but, also, (as they now have,) the power to interfere with marine officers of rank equal to their own, and with military duties and details which the commandants of yards, it is presumed, know but little about.

It is obvious, however, that their responsibility is only *official*, and they could not thus be liable for what was lost or damaged, through the inefficiency of guards or sentinels, under their own proper officers, when their vigilance and attention are the means furnished by the government for its protection.

Their duties on board ships, commanding specific guards only, are necessarily limited, and at all times subservient to the commander of the ship, without any incentive or hope of promotion in the naval service, as have the officers of the navy. But when assigned to the more appropriate military duties incident to their establishment contiguous to navy yards, it cannot necessarily be required to make them subject to naval regulations and officers.

Their location at those points is for general purposes of service, furnishing sentinels as required, agreeably to the mode pointed out by the orders of the Navy Department in 1801, 1808, and 1816, to drill and discipline recruits preparatory for sea service, having charge also of their military clothing, equipments, and supplies; all of which should be totally unconnected with the local duties of the commandant of the yard, and under the sole direction of the commandant of the corps, to which office, and through whom only, all the military details and discipline of the corps should be committed, and the general views or directions of the President communicated, through whichever head of department he may select.

Concerning the pay and emoluments of the officers of the corps, it is observed, that in 1833 a law passed to apply the provisions of an act of 3d March, 1827, giving one additional ration to captains and subalterns in the army (making four rations respectively per day,) and ten dollars per month extra pay to an officer in command of a company, for the responsibility of the clothing, arms, &c., to the officers of the marine corps.

In the application of that law to the marine officers, plain as the intention seemed, the construction was to give to the first lieutenants of the corps, who had long before received four rations per day, (one more than a captain, from 1816,) another ration, making five per day; and the captains in the corps, commanding separate divisions or detachments of the marines, sometimes more than equal to the strength of two or three companies in the army, and having all the responsibilities, &c., have not the benefit of the ten dollars per month, therefore, because their commands are not organized and designated as companies; although the term company or detachment is technical and synonymous, in the act of 1798, for the organization, &c. To have this properly applied, seems to have been wholly overlooked in the bill respecting the pay in 1834, and in the one now before the Senate for regulating it in the future.

Has not also another manifest act of injustice been done to the brevet officers of the corps, who, by a law in 1814, were entitled to receive, when in command of a separate station or detachment, the pay and emoluments of such rank, by a construction of the act of 30th June, 1834, to deprive them of that pay? It was only when in command of a separate station that they could receive it, and it then amounted, to a lieutenant colonel by brevet, including full commutation for all allowances and emoluments, to no

more than \$2,250 per annum, which is now reduced to the pay of the grade below, amounting to no more than \$1,670 per annum.

From the honorable chairman of the committee which reported the bill to the Senate, it is known they had no such intention. But the following extract from a printed sheet, entitled "Explanations to bill No. 90, reported in the Senate on the 6th February, 1834," &c., and distributed for information, gives the present contrary construction on that point, viz: "The four majors provided for in the bill will add nothing to the *expense*, as the five senior captains of the marine corps are brevet lieutenant colonels, and receive the full pay and emoluments of their brevet rank; therefore, these officers will receive *only the pay and emoluments of majors.*"

These *explanations* were concluded by addressing the statement to the *Naval Committee*, and that the author had been in the navy as midshipman and marine officer eighteen years, &c.

He is believed to have been the only one in the corps *benefited by the bill*, having an office established by it, to which he was appointed, and has obtained one grade of promotion by other provisions in the bill.

With these explanations of facts, may not the officers of the marine corps confidently look to Congress for protection and redress? Much more seems to be required than is provided for by the bill now before the Senate to regulate the pay.

The commandant and field officers of the corps are more solicitous to be restored to the protection and operation of the known laws and regulations for this arm of the military service, than for any or all pecuniary considerations. They cannot ask less, however, than to have restored to them the full pay and allowances as received previous to the act of 30th June, 1834.

The liabilities and frequent changes in location of the officers of the military branches of the public service, unlike those in the civil departments, must plainly show that pay and fixed emoluments and allowances, adapted to service and location, are much more equitable and just *than any stated salary.*

In this, every intelligent and experienced officer in the service, whether of army or navy, will fully concur.

In the marine corps may be instanced the great difference in cost of fuel, house rent, &c., between Boston or New York, and this city, Norfolk, or Pensacola. The long and severe winters of the former, together with more than double cost of the article of fuel, cause three times as much expense to procure it in the former as in the latter places.

It may be here remarked, however, that the pay of the field rank has not been increased or augmented since it was first established, more than thirty years ago, while the captains, and lieutenants particularly, have had theirs considerably increased.

It may be pardoned the suggestion, therefore, that an increase to all the officers in the line, based on their pay and allowances previous to 1834, and giving to each grade, respectively, an addition of about twenty-five per cent. on their pay proper when serving in the United States, and not attached to sea service, ought to be satisfactory; and will thus, including pay, rations, servants, forage, and fuel, as computed, amount per year as follows, viz:

To colonel, \$— and double rations as commandant of corps	\$2,919 00
To lieut. colonel, \$2,077 if in command of a station	2,436 00
To major, \$1,896.....	2,256 00
To captain, \$1,171.....	1,459 00
To first lieutenant, \$916	1,204 00
To second lieutenant, \$850.....	1,138 00

A table could readily be made to show distinctly what every item was in 1834, and what it would be under such a change. This system of pay, &c., should be continued on shore, whether increased or not.

But when detached on sea service, from the day an officer is borne on a ship's books until he is detached therefrom, let all allowances and pay cease, and give them salaries corresponding somewhat to their assimilated rank, and their relative expenses in the naval service.

To the commissioned staff officers \$— per annum, in addition to their pay and allowances in the line, in full of all emoluments for any staff duty they may perform.

To one assistant quartermaster, (being already appointed,) \$— per annum, as above.

No other assistant quartermaster or staff officers are required in the corps; all those duties can be well performed under the immediate direction of the officers commanding divisions or posts, and they should be held strictly responsible for the faithful discharge of such duties as pertain to their office and commands.

A question may be made as to officers of the staff holding commissions in the line of the corps. With respect to the adjutant, there would seem to be no ground of objection; but if they are all thus held and continued in the line, and the staff appointments require to be regulated, it should be distinctly known in whom the authority is vested to appoint and remove—whether by the commandant or not; and should be limited not to exceed four years' duration, to prevent any undue influence, and to cause them to share equally on detachments for sea service, or other less desirable duties in the corps.

It is suggested, also, whether the military efficiency of the service would not be better promoted by continuing to employ selected and faithful non-commissioned officers and privates as clerks to the commandant and officers of the staff, who would, on emergency, add to the effective strength of the corps, than to make them civil appointments, and thus exempt from a knowledge or performance of any military duty.

These remarks on facts, and the suggestions presented, are respectfully offered as the result of some experience in the service, during the war of 1812, at sea, under the command of Commodores Bainbridge and Stewart, and since then, with some of the most experienced officers of the navy, in command of different stations or detachments of the corps on shore; and no hesitation is had in calling on all and every one to say if a single instance of collision or difficulty has ever occurred in the discharge of our relative duties at naval stations, under the former laws and regulations for the government of the marine corps; and to point, if they can, to one single defect in the organized establishment of the United States marine corps, which was long tested, through the same principles and rules of government, in connection with the navy, as the British royal marines; or to any variation from the present result of the experience of that naval service, but in this one point—*admirals*, in the British service, hold *nominal, sinecure rank* in that corps, of the highest military grade; in our service, post captains or officers of the navy have, as yet, by law, no such place or rank.

24TH CONGRESS.]

No. 606.

[1st Session.]

ON CLAIM OF A MIDSHIPMAN IN THE NAVY FOR COMPENSATION FOR SERVICES AS ACTING LIEUTENANT, UNDER ORDERS OF HIS COMMANDING OFFICER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 19, 1836.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Spencer C. Gist, reported:

That the petitioner, a midshipman in the navy, on board the United States ship *Guerriere*, Captain Thompson, in the Pacific ocean, was appointed an acting lieutenant on the 26th November, 1829, and continued to serve in that capacity until the 28th December, 1831.

The rules and regulations of the navy, made in 1818, under authority of law, prescribe that, "on foreign stations, a commander may, when absolutely necessary, give acting appointments, to fill the vacancies which may be occasioned by death or other circumstances;" and officers thus appointed to execute the duties of a higher grade have, by the regulations and usage of the navy, received the corresponding pay and emoluments.

On his return to the United States in 1832, Mr. Gist claimed the difference between the pay and emoluments of a lieutenant and those of a midshipman, between the 26th November, 1829, and the 11th December, 1830, after which date he was acting sailingmaster; and the difference between the pay and emoluments of a sailingmaster and lieutenant, from 11th December, 1830, to the 28th December, 1831.

His claim was allowed up to the 10th March, 1830, but disallowed as to the residue, in consequence of a rule adopted by the Secretary of the Navy on that day, which, after recognizing the power of appointment by the captain under the rule of 1818, is as follows: (Red Book of 1832, page 24.)

"2. The difference of pay and rations between the grades of midshipman and lieutenant during the period of *acting as such* is regulated by the rank appearing from the commission, warrants or appointments received by the claimants from the Department, or by the written acting appointments from their commanders, corroborated by entries made at the same time on the pay and muster roll."

The necessity of the appointment by Captain Thompson in November, 1829, has been recognized by the Navy Department, by the allowance of increased pay from that day until the 10th March, 1830, the date of the new rule adopted by Mr. Secretary Branch. The allowance of that amount is endorsed on the Fourth Auditor's letter, in the following words: "Allow, up to date of rule in March, 1830, the pay of the grade in which he acted, as not a complement of lieutenants on board; after that the rule must govern."
"W."

The certificates of Commodore Thompson, Captain John Smith and Captain Edward B. Babbitt proved the performance of the duties of lieutenant by Mr. Gist during the period for which he claims the pay, and the necessity is acknowledged by the Secretary of the Navy.

The compensation for services necessary and actually performed has been refused allowance in consequence of a rule not existing at the time the appointment was made, unknown to the commander of the squadron on a foreign station many thousand miles distant, and when it is stated in the letter of the Fourth Auditor to the Secretary, dated 6th January, 1832, "that being in the Pacific ocean, neither Commodore Thompson nor Mr. Gist could possibly have received information of the regulation until some months afterwards, and it is not known that they received it before the arrival of the latter in the United States." It may be further properly remarked, that the regulations containing the rule of 10th March, 1830, were not printed and published, and officially communicated, until March, 1832, after the performance of the services, and after the return of Mr. Gist to the United States.

The case is clearly entitled to the relief prayed for, and a bill is reported accordingly.

COMMITTEE ON NAVAL AFFAIRS, *Washington, February 15, 1836.*

SIR: I wish to obtain a copy of an account rendered by Midshipman Spencer C. Gist for services as an acting lieutenant on board the United States ship *Guerriere*, Captain Thompson, in the years 1829, 1830 and 1831, rendered to the Department, and allowed in part by the Secretary of the Navy or the Fourth Auditor, on the 7th January, 1832, with a copy of the order of allowance; and also a copy of the certificate of Captain Thompson, stating the appointment and service of Mr. Gist as an acting lieutenant on board that ship.

I wish also to be informed whether a non-compliance on the part of Captain Thompson with the rule of 10th March, 1830, (Red Book, page 24,) was the sole cause why the whole account of Mr. Gist was not allowed.

I am, very respectfully, your obedient servant,
J. C. PICKETT, Esq., *Fourth Auditor, Navy Department.*

JAMES PARKER.

TREASURY DEPARTMENT, *Fourth Auditor's Office, Feb. 17, 1836.*

SIR: In compliance with the request contained in your letter of the 15th instant, I have the honor to transmit to you, herewith, a copy of an account stated at this office for Midshipman Spencer C. Gist, on the 7th January, 1832, for services as an acting lieutenant on board the United States ship *Guerriere*, Capt. Charles C. B. Thompson, commander, in the years 1829 and 1830; together with copies of all the papers filed therewith, numbered 1 to 4, inclusively. Neither the statement of his account, nor the certificate of Master Commandant Joseph Smith, nor that of Lieutenant Commandant Edward B. Babbitt,

referred to in his letter No. 1, are on file with the settlement made at this office; having, it is supposed, been withdrawn by him, as they embraced a period beyond that to which he was allowed by the Secretary of the Navy. Mr. Gist being present at the settlement, leads to this supposition.

It would appear from the Fourth Auditor's letter to the Secretary of the Navy, and the Secretary's endorsement thereon, (No. 3,) that the non-compliance on the part of Capt. Thompson with the rule of the 10th March, 1830, was the only cause why the whole amount of Mr. Gist's claim was not allowed.

I also send you a copy of Mr. Gist's letter, addressed to me on the 15th June, 1835, (No. 5,) with a copy of his account enclosed therein (No. 6,) for the difference of pay between a midshipman and a lieutenant, and between an acting master and a lieutenant, subsequent to the 10th of March, 1830, and a copy of my answer to him, (No. 7.)

I have the honor to be, very respectfully, sir, your obedient servant,

J. C. PICKETT.

HON. JAMES PARKER, *House of Representatives, Washington.*

No. 1.

WASHINGTON, *January 4, 1832.*

I have the honor to enclose to you the certificates of Commodore Thompson, Master Commandant Joseph Smith, and Lieutenant Commandant Edward B. Babbitt, that I performed the duty of lieutenant on board the frigate *Guerriere* from the 26th November, 1829, to the 28th December, 1831, for which extra service I respectfully request I may receive the difference of pay. I herewith enclose my account on the Navy Department.

Respectfully, your obedient servant,

S. C. GIST.

N. B.—At the time I was directed to perform the duty of lieutenant, there were not a sufficient number of lieutenants to perform the ordinary duty of the ship on duty, two being sick.

Respectfully, &c.,

S. C. GIST.

A. KENDALL, Esq., *Fourth Auditor Treasury Department.*

No. 2.

Mr. Spencer C. Gist, although a midshipman, performed the duties of lieutenant with much cleverness on board the *Guerriere* from the 26th of November, 1829, till the 11th December, 1830, when he was made acting master, and has continued since the latter period to fulfill the duties of both stations with great intelligence, tact, and ability.

CHS. C. B. THOMPSON.

NORFOLK, *December 22, 1831.*

On the letter of Mr. Gist, of which the within is a copy, is the following endorsement made by the Secretary of the Navy:

"Will the Fourth Auditor please to state his decision, and the grounds of it, and then the Secretary will decide the appeal.

"W."

No. 3.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 6, 1832.*

SIR: In the case of S. C. Gist, who claims the difference of pay between a lieutenant and midshipman from the 26th of November, 1829, to the 11th of December, 1830, and difference of pay between sailingmaster and lieutenant from the 11th of December, 1830, to the 28th of January, 1831, I have the honor to state that no decision has been given by me on the case, because, according to the instructions and practice of your predecessor, it requires a previous act of the Secretary of the Navy to enable me to act on so much of it as precedes his regulation of the 10th of March, 1830. It was required by him, previous to that time, that all cases of this nature should be submitted to him for his decision upon each case, according to its peculiar circumstances. His regulation was prospective, leaving all cases up to that date on the same footing as before.

So much of the claim as accrued subsequent to the date of that regulation may be considered as rejected by me, because the claimant produces no written acting appointment from his commanding officer. It is true that, being in the Pacific ocean, neither Commodore Thompson nor Mr. Gist could possibly have received information of the regulation until some months afterwards, and it is not known that they received it before the arrival of the latter in the United States. But unless there be a dispensation of its requisitions in this case by the Secretary of the Navy, the allowance claimed cannot be made to Mr. Gist. That portion of the claim, therefore, which accrued subsequent to the regulation, is as much dependent on the decision of the Secretary as the preceding part.

I have only to add that the number of lieutenants on board the *Guerriere*, from the 26th of November, 1829, to the 30th of June, 1830, was four, after which to the 28th of January, 1831, it was five, all of which appears by the muster rolls in this office.

Very respectfully, your obedient servant,

AMOS KENDALL.

HON. LEVI WOODBURY, *Secretary of the Navy.*

The letter, of which the foregoing is a copy, was returned by the Secretary of the Navy to the Fourth Auditor with the following endorsement:

“Allow, up to date of rule in March, 1830, the pay of the grade in which he acted, as not a complement of lieutenants on board; after that, the rule must govern.

“W.”

No. 4.

SEVIERVILLE, *Tenn.*, June 15, 1835.

United States, Navy Department,

To Spencer C. Gist, *Dr.*

For difference of pay between midshipman and lieutenant, from the 10th of March, 1830, to the 11th of December, 1830.....	\$483 29
For difference of pay between sailingmaster and lieutenant, from the 11th of December, 1830, to the 28th of December, 1831	316 59
	\$804 88

The above is a true statement of my account. For evidence in behalf of said account, I respectfully refer you to the certificate of Charles C. B. Thompson, Esq., deceased, filed in the Navy Department, in January, 1832.

Respectfully, &c.;

SPENCER C. GIST, *Passed Midshipman U. S. N.*

U. S. FRIGATE GUERRIERE, *Callao Roads*, January 10, 1831.

To whom it may concern:

I take great pleasure in recommending Acting Master Spencer C. Gist as a worthy man and most excellent officer.

He has performed the duty of a lieutenant on board this ship since November 26, 1829, to my entire satisfaction. He possesses talents peculiarly fitting a navy officer. He is perfectly conversant with the common rules and practice of navigation, and, with his usual attention and industry, I am well assured he will acquit himself honorably in the road to promotion.

JOHN SMITH, *Captain of the U. S. Frigate Guerriere.*

U. S. FRIGATE GUERRIERE, *Norfolk*, December 28, 1831.

Acting Sailingmaster Spencer C. Gist has performed the duties of a lieutenant, under my command, on board of this ship, from the 13th of January to the 28th of December, 1831, (inclusive,) with ability and attention. His deportment as an officer and gentleman has been correct, and met the approbation of his superior officers.

EDWARD B. BABBITT.

No. 607.

[1ST SESSION.

ON CLAIM OF A “HEAD COOPER” IN THE NAVY YARD AT WASHINGTON, FOR PAY DURING A PERIOD OF SUSPENSION OF WORK IN SAID NAVY YARD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 19, 1836.

Mr. PHILIP C. FULLER, from the Committee on Claims, to whom was referred the memorial of Thomas Murray, reported:

Under an act of Congress, passed March 27, 1804, authorizing the appointment of certain officers in the Navy yard at Washington, the petitioner was appointed by the Secretary of the Navy, on the 12th of April, 1804, head cooper of that Navy yard. He continued to act in that capacity till the 30th of September, 1814, on which day Lieutenant Haraden, of the Navy yard, issued an order declaring that the Secretary of the Navy had given directions to Commodore Tingey, that the duties of all the salary officers and mechanics attached to that establishment should cease on said 30th September, 1814. This order was given because, in consequence of the destruction of materials, &c., a few days before by the enemy, no employment remained for such salary officers and mechanics. On the 8th of February, 1816, the petitioner was directed by Commodore Tingey to resume his station as head cooper, under his former salary of one thousand dollars a year. The petitioner asks pay, at that rate, from said 30th of September, 1814, to said 8th of February, 1816, amounting, according to his account stated, to \$1,348.41.

The committee think he is not entitled to it: Because, there can be no doubt of the power of the Secretary of the Navy to discharge an officer performing service of the character in question, whenever such services had ceased to be necessary or useful to the public interest; and because, if the order of 30th of September, 1814, did not, as is contended by the petitioner, amount to a discharge, but to a suspension merely, it is abundantly evident that this modified character was given to the transaction from good feeling to the persons so suspended or discharged, and from a willingness to restore them to their respective places, as the petitioner was restored, so soon as the public interest would allow that to be done.

If the petitioner had chosen to consider and treat this as a discharge, and abandoned the service entirely, there is no pretence that he could have been prevented by the government from so doing; that

he did not do so, furnishes evidence that he considered the chance of renewed employment as of some value; and the committee do not think it just or equitable that the kindness and forbearance of the government should be made matter of charge upon its treasury. They recommend the following resolution:
Resolved, That the prayer of the petitioner ought not to be granted.

No. 608.

[1ST SESSION.

ON CLAIM FOR BOUNTY ON PRISONERS TAKEN BY THE PRIVATEERS NEPTUNE AND FOX, ON LAKE ONTARIO, IN 1812.

COMMUNICATED TO THE SENATE FEBRUARY 23, 1836.

Mr. TALLMADGE, from the Committee on Naval Affairs, to whom was referred the petition of Marinus W. Gilbert, reported:

That the said Gilbert, and others for whom he was agent and is now assignee, did, on the 13th day of July, 1813, agreeably to the provisions of the act of the 26th of June, 1812, relative to privateers, take out two several commissions, the one for the privateer Neptune, commanded by Samuel Dixon, the other for the Fox, commanded by Jehial Dimmick, to cruise on Lake Ontario; and in proof of this are adduced the following documents, viz: 1st. The original agreement of the parties concerned; and, 2d. The bonds required by law, duly certified by the collector as copies of originals on file. Besides these, as evidence of a strict compliance with the law, a verified copy of the journal of both privateers, which, it seems, cruised together, is also furnished, together with certificates from Major General Morgan Lewis, stating "that Mr. Gilbert, previously to his fitting out the expedition, consulted Commodore Chauncey and myself on its propriety, and that it met our entire approbation."

During the cruise, which commenced on the 14th, and ended on the 27th of July, 1813, it appears that the said privateers captured, on the 19th of the same month, in the most gallant manner, his Majesty's gunboat Spitfire, fifteen bateaux, a quantity of munitions of war, and sixty-nine prisoners; for the latter of which are produced, pursuant to the law of June, 1813, the receipts of John R. Bell, acting assistant inspector general at Sackett's Harbor, dated the 22d July and 1st August, 1813.

By an act of Congress approved August 2d, 1813, a bounty of twenty-five dollars was allowed on each prisoner taken by a private armed vessel of the United States, and delivered to an authorized agent.

By an act of March 19th, 1814, a bounty of one hundred dollars was allowed on each prisoner, in lieu of the twenty-five dollars given by the former act.

These prisoners, it will be perceived, were captured a few days previous to the act of 1813, and therefore come within neither act; but the committee have found many cases where Congress have, by special act, allowed a bounty on prisoners where it could not be claimed under either of the before-mentioned laws; and in most instances the allowance has been of the highest sum. The capture made by the Neptune and Fox was one of the most brilliant affairs to which privateering gave rise during the late war. The newspapers of the day teemed with it, and the example which it afforded could not have failed to be useful and important to the nation. The only doubt which the committee have entertained is, whether the petitioner should be allowed the bounty of twenty-five dollars or one hundred dollars. They have concluded to recommend the former sum, and report a bill accordingly.

No. 609.

[1ST SESSION.

ON CLAIM OF THE REPRESENTATIVE OF COMMODORE JOHN PAUL JONES, COMMANDER OF THE FRIGATE BON HOMME RICHARD, OF THE NAVY OF THE REVOLUTION, FOR HIS SHARE OF PRIZE MONEY ON THREE PRIZE VESSELS AND CARGOES SENT INTO BERGEN, IN NORWAY, AND DELIVERED UP BY THE DANISH GOVERNMENT TO THE ENEMY. -

COMMUNICATED TO THE SENATE FEBRUARY 24, 1836.

To the Senate of the United States:

The Secretary of State, to whom was referred, by a resolution of the Senate of the first instant, the petition of Janette Taylor, niece of John Paul Jones, deceased, praying payment of certain prize money which accrued to the deceased during the revolutionary war, respectfully reports:

That it appears from a printed report of the Committee on Claims of the House of Representatives, made at the first session of the ninth Congress, upon a claim of Peter Landais, who was captain of the ship Alliance, belonging to the squadron commanded by John Paul Jones, mentioned in the said petition, which claim was, in like manner, founded upon the capture of the prizes alluded to in the said petition, and their subsequent surrender by the Danish government to that of Great Britain, that a report upon the subject was made to the House of Representatives by the Secretary of State at the same session.

That as no record of the said report is to be found in the Department, the books in which the reports of that year and of several years immediately prior and subsequent thereto were entered having been, as it is supposed, destroyed at the burning of the building occupied by the Department during the last war with Great Britain, the Senate is respectfully referred, for a statement of the proceedings in relation

to the subject, which had occurred previously to that period, to the copy of the said report, and of the accompanying documents, obtained from the records of the House of Representatives.

That careful search has been made, from the period at which the said report was presented to the present time, and that no correspondence with the Danish government, or other documents relating to the subject of the said petition, have been found upon the files or records of the Department, except a note addressed, on the 14th of December, 1812, by Mr. Monroe, then Secretary of State, to Mr. Pedersen, the Danish chargé d'affaires in this country, and his reply, dated on the 19th of the same month, of which note a copy is herewith transmitted.

With this statement of the facts of the case, so far as they are within the knowledge of the Department, the petition referred to the Secretary of State for his report thereon is respectfully returned.

JOHN FORSYTH.

DEPARTMENT OF STATE, *February 23, 1836.*

DEPARTMENT OF STATE, *December 31, 1805.*

The Secretary of State, to whom, by a resolution of the House of Representatives of the 16th instant, the memorial of Peter Landais was referred, has examined the same, and thereupon makes the following report:

That it appears from the documents hereunto annexed that the Alliance, a frigate belonging to the United States, while she was cruising, in concert with several other armed vessels under the command of the Chevalier Jones, in the year 1779, captured three British vessels, and sent them as prizes into Bergen, in Norway.

That at the time of the said capture the frigate Alliance was under the command of the memorialist.

That the distribution of the prize money which might accrue from the success of the cruise was regulated by the commander of the squadron in the agreement, a copy of which is enclosed.

That on the arrival of the prizes at Bergen, where they were consigned to the French consul, they were seized by order of his Majesty the King of Denmark, and restored to the original British proprietors, on the ground, as appears, that as Denmark did not acknowledge the independence of the United States, the captures were to be considered illegal.

That the sentiments of Congress have been expressed upon the subject in their resolution of the 25th October, 1787, of which a copy is annexed; but, notwithstanding the application for compensation, made in pursuance thereof, and an antecedent demand by Dr. Franklin, then the minister of the United States at Paris, nothing has been accorded by Denmark as a satisfaction for the injury sustained. Extracts of Dr. Franklin's correspondence upon the subject are annexed.

It would be superfluous to add any remarks to evince the illegality of this interposition in the war between the United States and Great Britain; for, were it admissible that it should be considered, in the view of Denmark, as merely a civil war, the restoration of the prizes to the other party in the war would still be unauthorized, and the right of the United States to compensation consequently remains valid.

All which is respectfully submitted.

JAMES MADISON.

[Received the 2d January, 1806, and referred to committee of the whole house.]

Extracts of letters from Doctor B. Franklin, written in the years 1779 and 1780, the then minister of the United States to the court of France, to the President of Congress.

Passy, *October 17, 1779.*

We have just heard from Norway that two of the most valuable prizes taken by the Alliance, Captain Landais, in the squadron of Commodore Jones, are safe arrived at Bergen, to wit: The ship from London to Quebec, laden with naval stores, and that from Liverpool to New York and Jamaica. They were letters of marque, of twenty-two guns and eighty-four men each. I wish we may get them to America. The squadron itself is gone into Holland, with the two prize men-of-war, where they are all refitting. Great damage has been done to the English coal trade, and four hundred prisoners have been taken, which will more than redeem the rest of our people from their captivity in England, if we can get them safe from Holland to France; but I suppose the English will endeavor to intercept us, and recover their ships, if possible.

In my last I gave some account of the success of our little squadron under Commodore Jones. Three of their prizes, sent into Bergen, in Norway, were, at the instance of the British minister, seized by order of the court of Denmark, and delivered up to him. I have, with the approbation of the minister here, drawn up and sent to that court a memorial reclaiming those prizes. It went through the hands of the French minister residing there, who has delivered it; but I have yet no answer. I understand from the French consul at Bergen that the prizes remain still in that port, and it is said there is some hope that the order may be reversed. But this is doubtful; and I suppose the Congress will immediately consider this important affair, and give me such instructions upon it as they may judge proper. With this I send a copy of the memorial.

The memorial.

Passy, *near Paris, December 22, 1779.*

Sir: I have received a letter from M. de Cheraulx, consul of France at Bergen, in Norway, acquainting me that two ships, to wit, the Betsey and the Union, prizes taken from the English, on their coasts, by Captain Landais, commander of the frigate Alliance, appertaining to the United States of America, which prizes having met with bad weather at sea, that had damaged their rigging and occasioned leaks, and

being weakly manned, had taken shelter in the supposed neutral port of Bergen, in order to repair their damages, procure an additional number of sailors, and the necessary refreshments; that they were in said port, enjoying, as they conceived, the common rights of hospitality established and practiced by civilized nations, and the care of the above said consul, when, on the 23th of October last, the said ships, with their cargoes and papers, were suddenly seized by officers of his Majesty the King of Denmark, to whom the said port belongs, the American officers and seamen turned out of their possession, and the whole delivered to the English consul.

M. de Cheraulx has also sent me the following, as a translation of his Majesty's order, by whom the above proceedings are said to be authorized:

"The English minister having insisted on the restitution of two vessels which had been taken by the American privateer called the Alliance, commanded by Captain Landais, and which were brought into Bergen, viz: the Betsy, of Liverpool, and the Union, of London, his Majesty has granted this demand on this account, because he has not, as yet, acknowledged the independence of the colonies associated against England, and because that these vessels, for this reason, cannot be considered as good and lawful prize; therefore, the said two ships shall be immediately liberated and allowed to depart with their cargoes."

By a subsequent letter from the same consul, I am informed that a third prize belonging to the United States, to wit, the Charming Polly, which arrived at Bergen after the others, has also been seized and delivered up in the same manner, and that all the people of the three vessels, after being thus stripped of their property, (for every one of them had an interest in the prizes) were turned on shore to shift for themselves, without money, in a strange place, no provision being made for their subsistence or for sending them back to their own country.

Permit me, sir, to observe, on this occasion, that the United States of America have no war but with the English; they have never done any injury to other nations, particularly none to the Danish nation. On the contrary, they are in some degree its benefactors, as they have opened a trade of which the English made a monopoly, and of which the Danes may now have their share, and, by dividing the British empire, have made it less dangerous to its neighbors.

They conceived that every nation whom they had not offended was, by the rights of humanity, their friend; they confided in the hospitality of Denmark, and thought themselves and their property safe when under the roof of his Danish Majesty; but they find themselves stripped of that property, and the same given up to their enemies, on this principle only, that no acknowledgment had yet been formally made by Denmark of the independence of the United States; which is to say, that there is no obligation of justice towards any nation with whom a treaty promising the same has not been previously made. This was indeed the doctrine of ancient barbarians—a doctrine long since exploded, and which it would not be for the honor of the present age to revive; and it is hoped that Denmark will not, by supporting and persisting in this decision, obtained of his Majesty apparently by surprise, be the first modern nation that shall attempt to revive it.

The United States, oppressed by, and in war with, one of the most powerful nations in Europe, may well be supposed incapable, in their present infant state, of exacting justice from other nations not disposed to grant it; but it is in human nature that injuries, as well as benefits, received in times of weakness and distress, national as well as personal, make deep and lasting impressions; and those ministers are wise who look into futurity and quench the first spark of misunderstanding between two nations, which, neglected, may in time grow into a flame; all the consequences whereof no human prudence can foresee, which may produce much mischief to both, and cannot possibly produce any good to either.

I beg leave, through your excellency, to submit these considerations to the wisdom and justice of his Danish Majesty, whom I infinitely respect, and who, I hope, will reconsider and repeal the order above recited; and that if the prizes, which I hereby reclaim in behalf of the United States of America, are not actually gone to England, they may be stopped and re-delivered to M. de Cheraulx, the consul of France at Bergen, in whose care they before were, with liberty to depart for America when the season shall permit. But if they should already be gone for England, I must then claim from his Majesty's equity the value of the said three prizes, which is estimated at fifty thousand pounds sterling, but which may be regulated by the best information that can by any means be obtained.

With the greatest respect, &c.,

B. FRANKLIN.

Count BERNSTORF, *Minister of Foreign Affairs in Denmark.*

Passy, *May 31, 1780.*

With my last, I sent a copy of my memorial to the court of Denmark. I have since received an answer from the minister of that court for foreign affairs, a copy of which I enclose. It referred me to the Danish minister here, with whom I have had a conference on the subject. He was full of the professions of the good will of his court to the United States, and would excuse the delivery of our prizes to the English, as done in conformity to treaties which it was necessary to observe. He had not the treaty to show me, and I have not been able to find such a treaty on inquiry. After my memorial, our people left at Bergen were treated with the greatest kindness. By an order from court, their expenses during the winter they had been detained there were all paid, necessaries furnished to them for their voyage to Dunkirk, and a passage thither found for them, all at the King's expense. I have not dropped the application for restitution, but shall continue to push it, not without some hopes of success. I wish, however, to receive instructions relating to it, and I think a letter from Congress to that court might forward the business; for I believe they are sensible they have done wrong, and are apprehensive of the inconveniences that may follow.

Answer to the memorial.

COPENHAGEN, *March 8, 1780.*

Sir: Were you a person less known and respected, I should have been quite at a loss on the subject of your letter, which I have had the honor of receiving from you, but which did not come to hand until the 31st of January.

I should have considered it as a measure calculated to place us under new embarrassment, as painful as the first; but there is no risk with such a sage as you are, sir, generally respected by that universe which you have enlightened, and known for that prevailing love for truth which characterizes the well-informed man and the true philosopher. These are the titles which will transmit your name to the remotest posterity, and in which I am particularly interested, at the time when the situation of affairs imposes on me the necessity of divesting myself, in writing to you, of every public character, and only to aspire at appearing to you, what I truly am, the passionate friend of peace, truth and merit. This mode of thinking not only decides my personal sentiments with respect to you, but also those I have respecting the unfortunate affair which you have thought fit to mention to me, and which, from its commencement, has given me the utmost pain. You will readily agree with me, sir, in granting that there are perplexing situations in which it is impossible to avoid displeasing one party. You are too equitable not to enter into ours. There would be no consolation in such cases, nor would the persons who have led them into them ever be forgiven, were it not that opportunities sometimes presented themselves of being heard, and preventing in future such embarrassments.

The Baron de Blome will speak to you in confidence, and with the utmost freedom on this subject; and if my wishes can be accomplished, I shall be recompensed for all my pains, and there will only remain the agreeable recollection of having had the satisfaction of assuring you, from under my hand, of that superior and perfect esteem with which I have the honor of being

Sir, &c.,

R. BERNSTORF.

Agreement between Messrs. Paul Jones, captain of the Bon Homme Richard, Pierre Landais, captain of the Alliance, Dennis Nicholas Cottineau, captain of the Pallas, Joseph Varage, captain of the Stag, Philip Nicholas Ricot, captain of the Vengeance, composing a squadron that shall be commanded by the oldest officer in the highest grade, and so in succession, in case of death or retreat.

None of the said commanders, whilst they are not separated from the said squadron by order of the minister, shall act but by virtue of the brevet which they shall have obtained from the United States of America, and it is agreed that the flag of the United States shall be displayed.

The division of prizes to the superior officers and crews of the said squadron shall be made agreeably to the American laws; but it is agreed that the proportion of the whole, coming to each vessel in the squadron, shall be regulated by the minister of the marine department of France and the minister plenipotentiary of the United States of America.

A copy of the American laws shall be annexed to the present agreement, after having been certified by the commander of the Bon Homme Richard; but as the said laws cannot foresee nor determine as to what may concern the vessels and subjects of other nations, it is expressly agreed that whatever may be contrary to them shall be regulated by the minister of the French marine and the minister plenipotentiary of the United States of America.

It is likewise agreed, that the orders given by the minister of the French marine and the minister plenipotentiary of the United States of America shall be executed.

Considering the necessity there is of preserving the interest of each individual, the prizes that shall be taken shall be remitted to the order of Monsieur Le Ray de Chaumont, honorary intendant of the royal hotel of invalids, who has furnished the expenses of the armament of the squadron.

It has been agreed that M. Le Ray de Chaumont be requested not to give up the part of the prizes coming to all the crews and to each individual of said squadron, but to their order, and to be responsible for the same in his own and proper name.

Whereas, the said squadron has been formed for the purpose of injuring the common enemies of France and America, it has been agreed that such armed vessels, whether French or American, may be associated therewith, as by common consent shall be found suitable for that purpose, and that they shall have such proportion of the prizes which shall be taken as the laws of their respective countries allow them.

In case of the death of the before-mentioned commanders of vessels, he shall be replaced agreeably to the order of the tariff, with liberty, however, for the successor to choose whether he will remain on board of his own vessel, and give up to the next in order the command of the vacant ship.

It has, moreover, been agreed that the commander of the Stag shall be excepted from the last article of this present agreement, because, in case of a disaster to M. de Varage, he shall be replaced by his second in command, and so on by the other officers of his cutter, the Stag.

J. P. JONES.
P. LANDAIS.
DE COTTINEAU.
VARAGE.
R. PICOT.

LE RAY DE CHAUMONT.

Extract from the foreign Journals of Congress, October 25, 1787.

On motion of Mr. H. Lee, seconded by Mr. Carrington,

Resolved, That the minister of the United States at the court of Versailles be, and he is hereby, authorized and instructed to represent to his Danish Majesty that the United States continue to be very sensibly affected by the circumstance of his Majesty's having caused a number of their prizes to be delivered to Great Britain during the late war, and the more so, as no part of their conduct had forfeited their claim to those rights of hospitality which civilized nations extend to each other; that not only a sense of the justice due to the individuals interested in those prizes, but also an earnest desire that no subject of discontent may check the cultivation and progress of that friendship which they wish may subsist and increase between the two countries, prompt the United States to remind his Majesty of the trans-

action in question, and they flatter themselves that his Majesty will concur with them in thinking that, as restitution of the prizes is not practicable, it is reasonable and just that he should render, and that they should accept, a compensation equivalent to the value of them.

That the said minister be further authorized and instructed finally to settle and conclude the demand of the United States against his Danish Majesty, on account of the prizes aforesaid, by such composition and on such terms as may be the best in his power to obtain; and that he be directed to retain in his hands all the money so recovered till the further order of Congress. That the said minister be, and he is hereby authorized, in case he shall think it proper, to dispatch the Chevalier J. P. Jones, or any other agent, to the court of Denmark, with such powers and instructions relative to the above-mentioned negotiation as in his judgment may be most conducive to the successful issue thereof.

Provided, That the ultimate conclusion of the business be not made by the agent without the previous approbation of the said minister.

That the person employed shall, for his agency in the business aforesaid, be allowed five per cent. for all expenses and demands whatever, on that account.

Ordered, That the Board of Treasury transmit to the minister of the United States, at the court of Versailles, all the necessary documents relative to the prizes delivered up by Denmark.

DEPARTMENT OF STATE, *Philadelphia, January 4, 1798.*

SIR: In your letter of the 18th ultimo, you set forth that you, while commanding the American frigate Alliance, in 1777, took and sent into Bergen, in Norway, three English vessels as prizes; that these were afterwards delivered up to the English by the government of Denmark; that Dr. Franklin claimed, as an indemnification from the government of Denmark, the sum of fifty thousand pounds sterling; and that you have been informed that the Congress of the United States empowered some agent again to claim that indemnity.

Upon this statement you desire an official answer, "whether the government of Denmark has ever paid the said indemnity, or any part whatsoever of it, to any United States agent or agents?"

I have now the honor to inform you that I have caused an examination to be made in this office, from whence it appears that the subject of the claim above mentioned was resumed by the Congress of the United States, and that an agent was sent to Denmark to pursue it; but it does not appear that the indemnity demanded, or any part thereof, has ever been paid to any agent or agents of the United States.

I am, sir, your obedient servant,

TIMOTHY PICKERING.

To Captain LANDAIS.

DEPARTMENT OF STATE, *Philadelphia, January 17, 1798.*

SIR: I have the honor to inform you, in answer to your letter of the 7th instant, that the three English vessels captured by the frigate Alliance, under your command, in the year 1779, and carried into the port of Bergen, in Norway, were, by order of his Danish Majesty, delivered up to the English; that in December, of the same year, Dr. Franklin, the minister of the United States at Paris, demanded compensation to the amount of fifty thousand pounds sterling, at which the three prizes were estimated, in case they were not in a situation to be restored to the captors; that at subsequent periods the claim was renewed on the part of the United States, and the Chevalier John Paul Jones appointed their agent, in subordination to their minister at Paris, Mr. Jefferson; that the Chevalier went to Copenhagen, and in March, 1788, repeated the claim of compensation, and that the Danish minister answered, that the affair would be referred to the Baron de Blome, the Danish minister, to be negotiated between him and Mr. Jefferson, at Paris.

The Chevalier Jones went immediately into the service of Russia, and here the business appears ever since to have rested.

I am, sir, your obedient servant,

TIMOTHY PICKERING.

To Captain PETER LANDAIS.

DEPARTMENT OF STATE, *December 14, 1812.*

SIR: It is perhaps known to you that, in the year 1779, the United States frigate Alliance, Captain Landais, took three prizes, which were carried into the port of Bergen, in Norway, and were afterwards delivered up to the captured upon the demand of the British minister at your court, on the ground that the King of Denmark "had not yet acknowledged the independence of the colonies associated against England."

The legal claimants have never ceased to expect from the government of Denmark the payment of the value of these prizes, which was computed at fifty thousand pounds sterling, including the cargoes of the three captured vessels, viz: of the ships Betsey, Union and Charming Polly.

Some of these claimants have lately heard that your government has directed the payment of that money to them. I shall be glad to know of you whether such an order has been issued, and in case it has, in what mode it will be executed. This government takes much interest in obtaining for the parties a sum which is believed to be justly due to them; and I should be happy in being able to confirm to them the report of the favorable disposition of your government in that respect, which has reached them.

Should no step have been already taken, I have to request that you will have the goodness to bring the claim before your Sovereign, and to obtain his decision on it.

I have the honor to be, &c.,

JAMES MONROE.

To PETER PEDERSEN, Esq.

PHILADELPHIA, *December 19, 1812.*

SIR: I have had the honor to receive your letter of the 15th, and observe that a report had reached you of my government having directed the payment of the money claimed on account of three prizes which, in the year 1779, were carried into the port of Bergen, in Norway, but afterwards delivered up to the captured, upon the demand of the British minister, on the ground that the King of Denmark had not yet acknowledged the independence of the then colonies associated against England.

In reply to your queries relating to this subject, I beg leave to observe that my government, although perfectly ready at the time to enter into a friendly negotiation on the above-mentioned claim, has never admitted it as a fair and legal one; and it has, for many years, already considered it as a superannuated and abandoned affair.

When, in the year 1806, Captain Landais petitioned Congress for relief, and the above claim, in consequence thereof, was reported upon, and exhibited to Congress, I considered it my duty to protest against it, as will be seen by reference to my letter, addressed to the then Secretary of State, dated February 17, 1806, particularly so, as it appeared to me that the renovation of that ancient pretended claim upon my government then had, and I fear ever since has had, the unfortunate effect of retarding the favorable final decision of two acknowledged very fair claims upon the Government of the United States for the Danish vessels, the Mercator and the Henrick, although these have not the most distant connection with the above-mentioned, and therefore in equity ought not, and I hope will not, much longer thereby be affected.

In having the honor of submitting to you these observations, I must, however, acknowledge that I am without any late information from my government. You will in the meantime perceive, sir, that the verification of the rumor above alluded to is not very probable; and although I regret extremely that the Government of the United States at this time should desire this claim to be renewed and examined into, I shall, in compliance with your request, avail myself of the first opportunity of submitting to my government a copy of your letter, accompanied with such observations as the occasion may require.

I have the honor to be, &c.,

P. PEDERSEN.

To the Hon. JAMES MONROE, Esq., *Secretary of State of the United States.*

24TH CONGRESS.]

No. 610.

[1ST SESSION.]

ON CLAIM OF A LIEUTENANT OF MARINES FOR CHAMBER MONEY DURING THE PERIOD OF HIS ARREST.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1836.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the petition of Landon N. Carter, a lieutenant of the marine corps, reported:

That the petitioner being in service on board the United States ship *Guerriere*, Commodore Thompson, in the Pacific ocean, was in November, 1829, put under arrest upon charges exhibited against him by his commanding officer of a serious nature, and was sent to the United States, where he arrived in the year 1830, and on the 23d March, 1830, he was directed by the Navy Department to consider himself under arrest, and informed that a court-martial for his trial would be ordered as early as the attendance of the necessary witnesses could be procured.

No restraint was imposed upon Lieutenant Carter, and he was left at liberty to go where he pleased, as if waiting orders, and in this situation remained until February, 1832, when, upon an acknowledgment by Lieutenant Carter of the truth of the charges against him, and concessions to Captain Thompson for the improper conduct of the petitioner towards that officer, Captain Thompson agreed that the charges might be withdrawn, and Lieutenant Carter was in consequence released from arrest, and during this period he received full pay and rations, servant hire and fuel.

Lieutenant Carter claimed, in addition to his pay and allowances as above stated, for chamber money during the period he was under arrest, at the rate of two dollars per week, one hundred and ninety dollars, which has been refused; and he now petitions for that allowance by Congress. The letters annexed to and made part of this report, marked A, B, C, contain the reasons of the Department for refusing the allowance, and the committee, upon a full consideration of all the circumstances of this case, are of opinion that the petitioner is not entitled to the allowance he asks for.

A.

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 2, 1835.*

SIR: Upon the letter of Lieutenant L. N. Carter, dated November, 1834, by you referred to me, and the claim therein advanced, I have the honor to report as follows, viz: It appears that Lieutenant Carter arrived in the United States under arrest, early in ———, 1830, and on the 23d of March, of that year, he received an order from the Secretary of the Navy, to the following effect, viz:

"You will consider yourself under arrest upon the charges and specifications preferred against you in November last by Charles C. B. Thompson, Esq., captain in the navy of the United States, and a court-martial for your trial shall be ordered as early as the attendance of the necessary witnesses can be procured."

In this condition Lieutenant Carter remained until about the 1st of February, 1832, when Captain Thompson withdrew his charges, and Lieutenant Carter was released from arrest. During this period he received full pay and rations, servant hire and fuel.

Lieutenant Carter then presented an account for a per diem allowance of one dollar and fifty cents per day during this time, which was rejected at this office, and at his request referred to the Secretary of the Navy on the 13th of February, 1832. He based that claim on precedents referred to, and the resolution of Congress which he now quotes in support of his present charge. In a short report to the Secretary I expressed the opinion that the resolution did not apply to the case; but remarked the precedents referred to by him are clearly in his favor. The Secretary then requested a detailed report upon the precedents referred to, which led to a more thorough investigation of the particulars attending the several cases. On the 14th of February, another report was made by me containing the detailed information required.

The general result of this investigation was that, in the cases where a per diem had been allowed, the officer had been *compelled* by his orders to remain at *some particular place*, where no quarters had been prepared for him; and it further appeared that, after examining and allowing several claims of this description in 1826, and expressing the opinion that the allowance ought to be for chamber money, the Secretary forthwith adopted a regulation to the following effect, viz: "When an officer is subjected to expense by being compelled to remain where there are no quarters, the allowance hereafter will be for chamber money only, at two dollars per week." Upon this state of the case the Secretary of the Navy decided that Lieutenant Carter was not entitled to per diem, and referred his account back to the Treasury, to be adjusted according to the regulations. He has since presented a claim for chamber money, which has been decided to be inadmissible under the regulation, because he was not "*compelled to remain where there are no quarters*," having during the whole time been at liberty to go where he pleased within the United States, as fully as if he had been on leave of absence.

It is upon this decision that he appeals to you, and requests a special allowance, relying upon a precedent set in the case of Lieutenant Hall, decided in the year 1823. Whether Lieutenant Hall was in precisely the same circumstances or not, the papers filed in this office do not enable me to ascertain. That information it is presumed can be had from the records or files of the Navy Department, or, if not, from the adjutant or commandant of the marine corps.

It requires little argument, in my opinion, to show that the resolution of Congress, relied on by Lieutenant Carter, is not applicable to the case. He at first relied upon it to support a per diem charge, referring to precedents which occurred before the regulation of 1826. It being made obvious that the usage indicated by those allowances was superseded by that regulation, he abandons that position, and now claims a *weekly* allowance under a single precedent of much earlier date. It would seem that the regulation of 1826 must be considered as superseding *all* precedents or usages of prior date, whether for a per diem or weekly allowance, and accordingly such allowances have not since been made, as far as is known or believed, except in conformity to the regulations. The officers of the marine corps were not, therefore, prior to April, 1829, in receipt of any allowances of that sort, other than that provided for in the regulation of 1826, and consequently none other was confirmed to them by the resolution of Congress. It would be a strained construction of the resolution to say that, because an officer of the marine corps had received a special allowance fifty or a dozen years ago, a like allowance must be made to every officer hereafter under like circumstances; and the construction would seem still more extravagant, if the whole subject had been regulated many years ago, and all accounts had been since settled under that regulation. Such a mode of reasoning would revive every exploded practice in relation to allowances, however ancient, and lead to consequences the evils of which cannot be foreseen. It appears to me that the just and safe construction of the resolution, and the only one consistent with its object and language, was that it applied only to the *regular* allowances, of which the officers of the corps were in receipt prior to the first of April, 1829, which had been suspended, and had no reference to special allowances, depending on the circumstances of the case, and which, since, as before, rest wholly upon the view the Secretary of the Navy may take of those circumstances.

Of this character is the claim of Lieutenant Carter. Not being a regular allowance, nor admissible under the regulation of 1826, it is not one of those allowances embraced in the resolution; and whether it shall be allowed or not, depends upon the views entertained by the Secretary of the Navy as to the justice of the claim.

Lieutenant Carter's letter is herewith returned.

Very respectfully, your obedient servant,

HON. MAHLON DICKERSON, *Secretary of the Navy.*

AMOS KENDALL.

JANUARY 6, 1835.

Under the state of the case, as presented by the Fourth Auditor in the preceding report, it is my opinion that Lieutenant Carter's claim cannot be allowed.

M. DICKERSON.

B.

NAVY DEPARTMENT, *February 23, 1836.*

SIR: In answer to yours of the 5th instant, inquiring whether Lieutenant Carter, during the time he was under arrest, had the power "to avail himself of the use of the Marine barracks for quarters at Norfolk, or any other station where marines are stationed; and if not, whether such deprivation was, or was not, owing to his being under arrest?" I have to state that, as he returned from sea subject to the regulations of naval service, he could not report himself to the commandant of the Marine corps for duty, and quarters would not be assigned to him at the Marine barracks as a matter of course. He reported to the Navy Department, and might have been confined to the Marine barracks at Washington, or elsewhere, in which case quarters would have been assigned him; and had he chosen to confine himself to some of the

marine barracks, he would, no doubt, upon his own request, have been accommodated with quarters; but he was permitted to go at large as an indulgence to himself, and went where he pleased in the United States, precisely as if he had been on leave of absence; and received his pay and allowances as if on leave of absence, for nearly two years.

To show you the view which the late Secretary of the Navy took of this subject, I enclose a letter from Lieut. Carter, of the 5th of March, 1832.

I send you also a copy of the charges against Lieut. Carter, which were withdrawn until a satisfactory apology was made, a copy of which I send to you.

The copy of the report of the Fourth Auditor, of the 2d January, 1835, is herewith returned.

I am, very respectfully, sir, your obedient servant,

M. DICKERSON.

The Hon. JAMES PARKER, *of the Naval Committee of the House of Representatives.*

C.

NAVY DEPARTMENT, *March 5, 1825.*

SIR: In relation to your last account for a weekly allowance, instead of barracks, I have examined the decision of the Fourth Auditor of the Treasury, and your letter appealing therefrom, together with the other facts, and the regulation applicable to the case.

Since the date of that regulation in November, 1826, I am not able to find that the allowance claimed has ever been made in a case like yours. I have ascertained, also, that under similar circumstances such an allowance would not probably be made to an officer in the army, according to its usages and regulations; nor can I see any sound principle for the allowance in a case in which the officer was not compelled to incur expenses and reside in some particular place where no quarters existed, but was left to reside, and did in fact reside, wherever he found it most pleasant or convenient.

I am, respectfully, your obedient servant,

LEVI WOODBURY.

Lieut. LANDON N. CARTER, *U. S. Marine Corps, Washington.*

[24TH CONGRESS.]

No. 611.

[1ST SESSION.]

ON CLAIM OF A PURSER IN THE NAVY FOR COMMISSIONS FOR NEGOTIATING, IN FOREIGN PORTS, BILLS DRAWN ON THE NAVY DEPARTMENT, AND FOR REIMBURSEMENT OF PAYMENTS MADE TO SEAMEN, BY ORDER OF HIS COMMANDING OFFICER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 3, 1836.

Mr. GRANTLAND, from the Committee on Naval Affairs, to whom was referred the memorial of Dudley Walker, reported:

That while purser of the United States ship Peacock, from August, 1826, to December, 1827, the petitioner acted, according to his statement, as navy agent for that vessel, in the Pacific ocean, in the absence of any such officer; and that, while at Callao, he negotiated and drew bills upon the Navy Department, at various times, amounting in all to \$17,210.20, as appears by the certificate of the Fourth Auditor. The petitioner avers that this duty did not appertain to his office of purser, but was undertaken as an extra service, with the expectation that the same allowance would be made to him as to others; and that a bill having passed at the last session of Congress, allowing Purser Buchanan 2½ per centum on the amount of bills negotiated and drawn by him, while purser of the Dolphin, under similar circumstances, the petitioner asks a like allowance in his case.

The petitioner further states that, while purser of the St. Louis, the commander of that vessel was obliged to ship men wherever they could be had on the coast of the Pacific; these men were generally indebted in small sums on shore, which the commander ordered the petitioner to pay, and that, before their service on board ship had amounted to as much as had been advanced, some of them deserted; that, from this cause, advances, made under the authority of the commander, to the amount of \$158.52, have been suspended in the settlement of his accounts by the Fourth Auditor as overpayments; and that relief can be afforded only by Congress. The petitioner's statement, as regards the shipping of men on the coast of the Pacific, who were generally in debt in small sums on shore, and of an order having been given to the purser, by the commander, to pay off such small debts, is fully confirmed by the certificate of that officer.

Your committee, on inquiry, find that an allowance to Purser Buchanan, for negotiating and drawing bills, was not made at the last session of Congress, as stated in the petitioner's memorial. A bill for that purpose appears to have passed the Senate, but did not become a law, not having passed the House of Representatives.

Believing, as the committee do, that the negotiating and drawing bills on the Navy Department being a part of the purser's duty, when required by his commander, they do not deem it necessary to recommend any allowance for such service.

The committee consider Purser Walker justly entitled to the sum overpaid by him, under orders of his commander, to the seamen who deserted, amounting to \$158.52, and they report a bill in his favor for that sum.

24TH CONGRESS.]

No. 612.

[1ST SESSION.

ON THE EXPEDIENCY OF CONSTRUCTING A DRY DOCK AT THE NAVY YARD, AND DEEPENING THE CHANNEL OVER THE BAR AT THE MOUTH OF THE HARBOR OF PENSACOLA, FLORIDA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 7, 1836.

NAVY DEPARTMENT, *February 12, 1836.*

SIR: In answer to your letter requesting my views as to the expediency of constructing a dry dock, and of deepening the channel over the bar at Pensacola, and requesting any information in this Department necessary to a correct decision on this subject, I have the honor to state that the Secretary of the Navy, in his report of the 30th of November, 1833, brought this subject before Congress, by recommending the continuance of Pensacola as a naval station, and submitting a report from Captain Dallas, on the means and expense of deepening a channel through that bar, and a memoir and estimate on the improvement of that bar by Captain W. H. Chase, of the engineer corps (to be found in the 1st volume of Executive Documents of the House of Representatives, 1st session, 23d Congress, No. 1, page 263.) Captain Chase calculated the expense of adding three feet to the depth of the channel over the bar at \$106,690. The various items of expense are given in detail in his estimate. Captain Dallas, however, is of opinion that the channel over the bar should be made six feet lower than at present, and adds \$40,000 to the estimate of Captain Chase, making the whole expense amount to \$146,690 for deepening the channel six feet, and giving a depth of water over the bar of from 29½ to 30 feet, which will be amply sufficient for our vessels of the largest class.

These gentlemen are very capable of making the observations and estimates which they have submitted, and there is no reason to doubt the accuracy of their calculations; and I have no hesitation in expressing my opinion, that the great importance of Pensacola as a naval station would justify the expenditure of the sum estimated for the object stated.

Annexed to my last annual report will be found estimates for buildings of different kinds at the Pensacola Navy yard, to the amount of \$64,000.

For building a powder magazine near the yard \$17,000.

In addition to which there is the following estimates for Pensacola:

For wharves and appendages.....	\$150,000
Hydraulic dock.....	125,000
	<u>\$275,000</u>

Making the whole of the estimate for Pensacola for the year 1836, \$356,000.

If to this we add \$146,960, deemed necessary, as before stated, for deepening the bar, it will amount in the whole to \$502,690.

It is believed for this sum the harbor of Pensacola may be rendered a safe and commodious station for the purposes of our navy, and a convenient place for building and repairing our vessels-of-war.

The construction of a dry dock, such as we have at Norfolk and at Boston, and such as it is proposed to build at New York, and which would cost nearly a million of dollars, cannot be considered as necessary at Pensacola until the channel over the bar shall be deepened, even if it should be deemed expedient to build a fourth dry dock upon the largest scale. In the meantime, a hydraulic dry dock, such as is now in successful operation at New York, and which it is believed may be constructed in the course of a year, and at the expense mentioned in the estimate, would be highly useful, as this kind of dry dock answers perfectly well for all vessels under the size of frigates.

The estimate of \$150,000 for wharves and appendages, is made without the knowledge necessary for an accurate detailed statement of the items of expense.

It is hoped that in the course of a few months a careful examination may be had of this station by competent officers, whose report upon the same will afford all the information wanted; but it is confidently believed that the full amount estimated will be required for the objects stated.

I am not aware that there is any information in this Department upon the subject of your letter, which has not been communicated to the House of Representatives.

I am, with great respect, your obedient servant,

M. DICKERSON

Hon. LEONARD JARVIS, *Chairman Committee Naval Affairs, H. R.*

WASHINGTON, *February 18, 1836.*

SIR: In answer to the inquiries contained in your note of the 17th inst. I have to state:

1. While employed on the examination of the coast of Louisiana, in parts of the years 1830 and 1831, I had occasion to visit Pensacola several times.

2. The Bay of Pensacola, as a harbor for men-of-war, is not surpassed by any in our country, (not even Naraganset Bay;) it is completely land-locked, and of course sheltered from all winds. The Pensacola yard is as well adapted for a building yard as any on our coast, there can be but little doubt, from its proximity to large quantities of live oak and other ship timber. I speak from actual observation. In the year 1831 I made a report to the honorable the Secretary of the Navy, giving him an exact statement of the quantity of live oak I had examined west of the Mississippi. I allowed 30 cubic feet to the tree, and I reported sufficient to build 80 ships of the line.

3. As to the practicability of building a dry dock in Pensacola Bay, in my opinion there can be no doubt of it, if the plan proposed by Mr. Brodie, or one similar, be adopted. Some such plan will have to

be adopted, as it will be almost impossible to excavate to a sufficient depth in the sand. I should recommend Navy cove as the place best adapted for such a structure, as there is little or no current, and it is sheltered from the prevailing winds.

4. It is my humble opinion that neither a marine railway or hydraulic dock would last over three years, with every attention and care, as the worm in Pensacola Bay destroys all wood used for such purposes in a very short time.

It will give me much pleasure to answer any further inquiries.

I am, sir, your obedient servant,

THOS. R. GEDNEY.

To the Hon. JOSEPH M. WHITE, *House of Representatives.*

Extract from an official report of the Navy Department.

The average draft of water for ships of the line, of the first class, is about 26 feet; of the second class, 25 feet.

Frigates, of the first class, 22 feet 6 inches; of the second class, 21 feet.

Sloops-of-war, of the first class, 17 feet; of the second class, 16 feet 6 inches.

Schooners, 13 feet.

The draft of the hulls, without masts, spars, or rigging, is:

For ships of the line, of the first class, 19 feet 8 inches; of the second class, 18 feet 6 inches.

Frigates, of the first class, 17 feet; of the second class, 16 feet 6 inches.

Sloops-of-war, first class, 14 feet; of the second class, 13 feet.

Schooners, 9 feet.

Extract from a letter from the commodore to Joseph M. White, dated—

JANUARY 20, 1836.

Having always considered Pensacola as destined to be one of our most important naval stations, I shall cheerfully promote the improvements in the navy yard at that place, so far as may be consistent with my official duties.

24TH CONGRESS.]

No. 613.

[1ST SESSION.]

ON THE EXPEDIENCY OF PROVIDING FOR THE CONSTRUCTION OF A DRY DOCK OR MARINE RAILWAY AT THE NAVY YARD, AND DEEPENING THE BAR AT THE MOUTH OF THE PENSACOLA BAY, FLORIDA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 8, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, instructed by a resolution of the House to inquire into the expediency of constructing a dry dock at or near the Navy yard at Pensacola, Florida; and of deepening the bar, as recommended in the report of Captain Chase, of the Engineer department, so as to admit vessels-of-war of the largest class, reported:

That the bar at the mouth of Pensacola Bay is the only impediment to its being an important naval depot; and its removal, at a moderate expense, is considered practicable by Captain Dallas, of the navy, and Captain Chase, of the corps of engineers, whose reports are annexed to the report of the Secretary of the Navy, communicated to Congress by the President at the opening of the 23d Congress. It appears, by these reports, that there are twenty-one and a half feet of water upon the bar at low water, and it is proposed by Captain Chase to deepen it to twenty-seven and a half feet; but Captain Dallas is in favor of increasing the depth to twenty-nine and a half or thirty feet; and, upon his knowledge of the draft of vessels-of-war, and of the depth of water required for them, the committee is disposed to place the most reliance. The expense is estimated by Captain Dallas, at \$146,690—and by Captain Chase, at \$106,690; but it is believed that the estimate of Captain Dallas is not so great as it ought to be, from the data which he himself furnishes.

The expense of excavating six feet, is estimated by Captain Chase to be, exclusive of cost of apparatus	\$81,690 00
Add three feet, recommended by Captain Dallas.....	40,845 00
	\$122,535 00
But Captain Dallas considers that Captain Chase has underrated the cost of the vessel to be employed, from two to four thousand dollars, of which the average is	3,000 00
	\$125,535 00
Add cost of apparatus.....	25,000 00
	\$150,535 00

But Captain Dallas also has his fears that an engine, of which the cost would not exceed \$10,000, would not be of sufficient power; because the bar is so firm and compact that, in an attempt to examine it, at the distance of four feet below the surface, the auger was twisted off, although the shank was an inch and a half in diameter. It would not, therefore, be prudent to estimate the expense at less than \$155,000 or \$160,000.

Captain Chase recommends the employment of two machines, and estimates the cost for the first year at \$62,690. But, aware of the fallaciousness of estimates, it is considered expedient by the committee to add twenty per cent.; and they, therefore, recommend an appropriation of \$75,000, which, they trust, will be found sufficient to make the experiment in a full and satisfactory manner.

If the experiment should meet with success, it is presumed that the expediency of constructing a dry dock would not be questioned; but until the practicability of this improvement in the harbor is established, it is the opinion of the committee that it would not be advisable to commence a construction which would involve the expenditure of at least one million of dollars.

It is believed that vessels of a draft of water adapted to the depth of water on the bar might be repaired with greater economy by the use of an inclined plane, or marine railway, or of a hydraulic dock; both of which are in useful operation in the merchant yards at New York. The cost of the former would be \$77,682, according to the estimate of Colonel Baldwin, which may be found in the Executive Documents of the first session of the twenty-first Congress, volume 4, document No. 101. It was not deemed expedient by Mr. Branch, who was at that time Secretary of the Navy, to cause the work to be executed, "in consequence of the great difficulties and heavy expense attendant upon its construction." It is not considered, however, by the committee, that difficulties which may be overcome, and a construction which may be completed for less than \$80,000, ought to prevent the prosecution of this work. The cost of a hydraulic dock, according to the best information, would be \$125,000. The Peacock, sloop-of-war, was taken up on a dock of this description at an unfavorable time, and the cost was \$480. It would probably have cost to heave her out, at that time, \$2,500. Several hundred vessels have been taken up on the hydraulic dock at New York, and it is stated that this has been done without danger to them; but, in heaving out, the vessels are always more or less injured by straining.

The committee have, therefore, come to the determination of recommending the construction of a marine railway, or a hydraulic dock; leaving it discretionary with the Executive to adopt whichever may be deemed most expedient, upon a more accurate and careful examination than it would be in the power of the committee to give; and for this purpose, as well as for attempting to remove the bar, they report a bill.

24TH CONGRESS.]

No. 614.

[1ST SESSION.]

ON CLAIM OF THE REPRESENTATIVE OF CAPTAIN CHARLES C. B. THOMPSON, LATE OF THE NAVY, FOR THE REVISION AND ALLOWANCE OF SUNDRY ITEMS IN HIS ACCOUNT, THAT WERE REJECTED BY THE FOURTH AUDITOR.

COMMUNICATED TO THE SENATE MARCH 10, 1836.

Mr. BLACK, from the Committee on Naval Affairs, to whom was referred the petition of the representative of Captain Charles C. B. Thompson, late of the navy, deceased, reported:

That the petitioner requests to be discharged from several items charged to Captain Thompson, in the settlement of his accounts, and the accounts of Purser Joseph Wilson. The several charges are enumerated in the annexed paper, marked 1, 2, 3, 4, 5, 6, 7, and 8, with the reasons of their disallowance, or, in other words, the reasons for the several amounts specified being debited to Captain Thompson. The committee will briefly refer to each item, in numerical order:

Item 1. The committee are of opinion that this charge was properly rejected, for the reasons stated by the Fourth Auditor.

Item 2. This charge was properly rejected.

Item 3. So much of this charge has been allowed by the Navy Department as was thought reasonable. For negotiating the bills of amount specified, 1 per cent., instead of $2\frac{1}{2}$ per cent., was allowed. The committee cannot say that 1 per cent. was not a reasonable compensation for this extra service.

Item 4. It appears that this amount was actually paid by Captain Thompson, on account of the several officers and seamen mentioned in the charge; he receives no pecuniary benefit for the transaction whatever. The several officers and seamen of the crew of the *Guerriere* were taken to the baths of Coquina, by the advice of the fleet surgeon, for the restoration of their health. The account of their expenses was settled by Purser Wilson, on the order of Captain Thompson. So if this charge be allowed to stand, he will be rendered liable for money laid out for others. It will be seen that the certificate of the fleet surgeon is not altogether formal, and the Navy Department, acting under an imperious necessity of exacting the strictest compliance with its regulations in every particular, properly rejected this charge.

The certificate of Dr. Osborn, the fleet surgeon, shows:

1. That he advised the removal of these officers and men to the baths.
2. That this removal was necessary to the re-establishment of their health; and,
3. That the amount was necessarily expended, although the voucher for this claim is not precisely formal, so as to authorize the allowance of it by the Department. Yet Captain Thompson being dead, and it being now impossible to supply the deficiency, and as sufficient does appear to show it an equitable claim, the committee are disposed to pass this item to the credit of his account.

Item 5. This charge was properly made to the account of Captain Thompson.

Item 6. The same remark applies to this.

Item 7. The same remark.

Item 8. The certificate of the fleet surgeon, with respect to these expenditures, does not appear to be formal. The committee find, by a subsequent certificate of Dr. Osborn, that Dr. Kidston was called into consultation on his recommendation, and they find that on such consultation it was strongly advised that Captain Thompson should change his residence from the ship to the shore. It also appears from the certificates that his complaint was diarrhœa, which had become chronic. All who know anything of this distressing complaint understand how much recovery depends upon change of scene, of air, gentle exercise, and proper diet. The committee have no doubt, from all the facts, that the residence of Captain Thompson at Lima was in consequence and in pursuance of the advice of the ship surgeon and Dr. Kidston, the consulting physician. The rule of the Navy Department, to deduct in such cases one-half pay, when the expenses amount to more than half pay, appears to be founded in justice. Captain Thompson not having specified the time of his abode on shore, the committee have no means of ascertaining what sum should be deducted; they have therefore thought it proper to direct this charge to be settled by the Department, in order that the time may be ascertained as nearly as may be, and the deduction made.

They therefore report a bill, allowing a credit for the amount of the 4th item, and directing the 8th to be settled on equitable principles.

List of vouchers and charges not allowed in the account of the late Commodore Charles C. B. Thompson, while in command of the United States squadron in the Pacific ocean, in the years 1829, 1830, and 1831; showing, also, the sums charged to him in the settlement of Joseph Wilson and Philo White's accounts, and the reasons for such disallowances and charges.

1. Expenses incurred in conformity with the annexed order to receive on board, and afford Andrew Armstrong, Esq., navy agent, a passage to Valparaiso and Lima, in 1829; one-third of the Guerriere's cabin having been appropriated, and subsistence furnished to that gentleman about five months, \$500.

The above item is suspended on the ground that, although ordered to receive Mr. Armstrong on board, yet the government have uniformly refused to pay for the subsistence of any of its ministers or agents, considering it the duty of the minister or agent to provide for himself.

2. Expenses incurred for medical attendance, medicines, and nursing, when confined four months by severe illness, contracted by exposure in the public service, after my late arrival on the coast, and in the United States, \$150.00.

As Commodore Thompson was on leave of absence during the time for which this allowance is claimed, it is expressly prohibited by the regulations of the Navy Department.

3. Commission $2\frac{1}{2}$ per cent. for drawing and negotiating bills of exchange, amounting to \$57,116.75, on the Navy Department, between the 25th October, 1830, and 12th February, 1831, \$1,427.90.

By a letter of the Secretary of the Navy, dated 9th November, 1826, a part of the above commission is disallowed. The letter says: "No percentage or premium will hereafter be allowed to officers of any grade, making drafts upon the Department, unless they are too remote from the residence of any navy agent to procure the money." As there was no navy agent in the Pacific ocean, during the time covered by this charge, the Secretary allowed Commodore Thompson one per cent. on the above, amounting to \$571.16. This is believed to be the only case in which any commission has been allowed to a commodore for several years, and this was made because it appeared that the bills had been negotiated without expense to the government.

4. To this sum paid by Joseph Wilson, purser, to Charles Dobson, for horse, carriage hire, and other expenses incurred on a journey to the baths of Coquina, one hundred and ninety-six miles from Valparaiso, by the following officers and men of the United States frigate Guerriere: Commodore Thompson, Captain Joseph Smith, Lieutenant Joseph B. Hull, Sailingmaster William W. Hunter; seamen, William Raymond, William Muile, and John Tucker; boatswain's yeoman, Charles H. Hunt; and private, William Philips, \$1,090.06.

Certified as follows, by the fleet surgeon:

VALPARAISO, March 14, 1830.

I certify that this amount, ten hundred and ninety dollars and six cents, has been, in my opinion, necessarily expended for the above-named officers and men, on said journey, for the benefit of their health, and that the expense was incurred by my advice.

L. OSBORNE, Surgeon of the Fleet.

JOSEPH SMITH.

Approved.

CHARLES C. B. THOMPSON, Commodore, &c.

In the settlement of Purser Wilson's account, the above sum has been charged to Commodore Thompson, by order of the Secretary of the Navy; the certificate of the surgeon being deemed insufficient to justify the allowance, or any part of it, according to the existing rules of the Navy Department.

5. To this sum, paid by Joseph Wilson to Andrew Armstrong, for commission at five per cent. on \$204, the amount of passage money of Lieutenant Humphreys, and Midshipmen Holcomb and Renshaw, from Valparaiso to Callao, \$10.20.

The above was referred to the Secretary of the Navy, who directed it to be charged to Commodore Thompson, (who approved and ordered Purser Wilson to pay it to Mr. Armstrong,) on the ground that he transcended his powers in allowing commission on a bill that ought to have been paid by the purser without commission.

6. This sum, paid Commodore Thompson for cabin furniture, \$17.

In settling Purser Wilson's account, it was found that he had paid that amount more than the commodore was entitled to. It has, therefore, been charged to him.

7. This sum, paid Commodore Thompson for rations, \$54.

The preceding remark applies in this case.

8. This sum, paid by Philo White, purser and special agent, in the Pacific ocean, at sundry times in the year 1831, to F. F. Franciosi, secretary to Commodore Thompson, by order of the latter, for expenses incurred by himself and secretary, for rent of lodgings, board, and necessary attendance while on shore at Lima, for the re-establishment of his health, and for the medical services of Dr. Kidston, \$955.

The above amount has been charged to Commodore Thompson, because he has failed to produce a certificate from the surgeon of the fleet that his residence at Lima was necessary for the benefit of his health, and that the sum paid Dr. Kidston, for medical services, was for consultation, &c. (See Navy Regulations, 8th April, 1828.)

Had the surgeon's certificate been produced, the excess of his expenses over and above one-half his pay and rations, during the time he was at sick quarters, would have been allowed.

[1ST SESSION.]

MEMORIAL OF THE CITY COUNCIL AND CHAMBER OF COMMERCE, OF CHARLESTON, SOUTH CAROLINA, FOR THE ESTABLISHMENT OF A NAVAL DEPOT AND NAVY YARD AT THAT PLACE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 14, 1836.

To the honorable the speaker and members of the House of Representatives in Congress assembled:

The memorial of the city council of Charleston, and the chamber of commerce of Charleston, respectfully sheweth:

That your memorialists would address your honorable body on the proposed Navy yard at Charleston. Aware of the advantages held out for the establishment of a navy yard in the harbor of Charleston, they would refer more particularly to the scientific and practical information afforded in the report of the Committee on Naval Affairs, presented to the House of Representatives on 24th June, 1834.

Your memorialists (the chamber of commerce) having some time since transmitted to Congress their memorial on this subject, accompanied with certificates from several of the merchants and mechanics of Charleston, and which memorial is now on file among the records of Congress, would, however, briefly advert to the abundance of materials in Charleston necessary for the supply and refitting of vessels; to the number of shipwrights and other mechanics resident there; to the localities of its position, between the south coast of Florida and the Capes of Virginia; to the extent of the population in Charleston, affording ample protection for such a depot; to the number of shipping arriving in this port, whence seamen may with facility be obtained for the manning of vessels; all of which circumstances, in the opinion of nautical men, render Charleston an advantageous site for a navy yard for the construction of sloop-of-war and smaller vessels of the navy.

Your memorialists pray that your honorable body would pass an act for the establishment of a navy yard in the harbor of Charleston, upon such site as may be selected by order of the President of the United States.

*And your memorialists will ever pray.

EDWARD NORTH, *Intendant*.

By the intendent:

WILLIAM ROACH, *Clerk of Council*.

DAVID ALEXANDER, *President Charleston Chamber of Commerce*.

R. HERIOT, *Secretary Chamber of Commerce*.

No. 616.

[1ST SESSION.]

ON THE AMOUNT AND CONDITION OF THE NAVAL PENSION FUND, AND THE EXPEDIENCY OF MAKING ALTERATIONS IN THE NAVAL PENSION SYSTEM AS TO THE NATURE AND EXTENT OF THE ALLOWANCES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, having had the condition of the navy pension fund under consideration, reported:

That the capital of the navy pension fund on the 1st November, 1835, was \$1,160,262.28, and that the income derived from it the last year amounted to \$66,083.36; the pensions which are charged upon the fund amount to \$54,083. So that there appears to be at present an excess of income, above expenditures, of \$12,000.36. But as nearly two-thirds of the fund consists in stock of the Bank of the United States, yielding a dividend of seven per cent., which, upon reinvestment, cannot be expected to produce more than $4\frac{1}{2}$ per cent., the income which will in future accrue will be barely sufficient to meet the payments to which it is liable.

A heavy charge has been made upon the fund within the last two years, in consequence of the act of June 30, 1834, by which the widows of all officers, seamen, and marines, who had died in the naval

service since the 1st day of January, 1824, or who may die in said service *by reason of disease contracted*, or of casualties, by drowning or otherwise, or of injuries received, while in the line of their duty, became entitled to a pension, to commence from the passage of that act. The number of widows upon the pension list, under all the other acts by which pensions have been allowed, is fifty-six; the number under the act above mentioned, is eighty; and the sum required to pay the pensions to which they are entitled, is \$20,031—a sum which is equal to two-thirds of the whole amount of widows' pensions, and to nearly two-fifths of the whole amount of navy pensions.

It will be perceived that, by the act of 1834, a pension is allowed to the widow of every person who may die in the naval service by reason of *disease contracted while in his line of duty*; a phrase than which nothing can be more vague or more liable to abuse, and which is nearly tantamount to authorizing a pension to be granted to the widow of every person who may die in the naval service. To such an extension of the pension system, the committee are decidedly opposed. They consider it incompatible with the character of our government to suffer the allowance of pensions without any reference to services performed, or perils incurred, or hardships encountered; and they also consider it to be partial, invidious, and unjust to create a distinction between those who may be called to serve their country on the water, and those whose services are equally meritorious upon the land. Long and faithful service in the army, or in any civil department of the government, gives no title to a pension; much less ought pensions to be granted when not even this claim can be adduced. It is, therefore, recommended that the benefits of the navy pension fund be limited to the officers, seamen, and marines who are disabled, and to the widows of those who have died, or who may die, of wounds received in battle, or of casualties occurring in the line of their duty. Beyond this, the extension of the pension system is considered to be impolitic and pernicious. Doubts having been entertained respecting the amount to which, under the existing laws, a pensioner might be entitled, it has been thought expedient to limit the amount which any person may be entitled to receive, as a pension, to six hundred dollars per annum.

The alterations proposed to be made in the pension system are as follows:

1. To give a pension for life, or during widowhood, to the widows of officers, seamen, and marines in the naval service, who may be killed, or who may die of wounds received in battle.
2. To prevent, in future, the allowance of pensions to the widows of those who may have died of disease.
3. To establish the maximum of pensions charged upon the navy pension fund to six hundred dollars per annum.

For the accomplishment of these objects, the committee report a bill.

24TH CONGRESS.]

No. 617.

[1ST SESSION.]

ON THE CLAIM OF A SERGEANT IN THE MARINE CORPS, PERFORMING THE DUTIES OF CLERK, FOR THE EXTRA PAY OF FIFTEEN CENTS PER DAY ALLOWED BY THE ACT OF MARCH 2, 1819.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of John S. Devlin, praying that a law may be passed extending to him the benefits of the act of March 2, 1819, allowing 15 cents per diem to non-commissioned officers and soldiers while employed on fatigue duty, having had the same under consideration, reported:

That John S. Devlin is a sergeant in the marine corps, who has been detailed, since December 15, 1823, to perform the duty of clerk in the quartermaster's department of said corps. For this extra duty he was first allowed fifteen cents per day, and at subsequent periods, without any change of duties, his extra pay has been increased, so that, according to his own statement, he is now receiving an extra allowance of \$354 per annum. But instead of being satisfied with this increase of pay, he first applies to the accounting officers of the Treasury for an additional allowance of fifteen cents per diem from 15th December, 1823, to 31st March, 1835, amounting in all to \$618.75; and upon the rejection of his claim by these officers, he now petitions Congress to pass a law extending to him the benefits of an act passed March 2, 1819, by which it is provided that "whenever it shall be found expedient to employ the army at work on fortifications, in surveys, in cutting roads, and other constant labor of not less than ten days, the non-commissioned officers, musicians, and privates, so employed, shall be allowed fifteen cents and an extra gill of spirits or whiskey each per day, while so employed," and to authorize the accounting officers of the Treasury Department to pay him whatever arrearages might be found due to him under the act thus passed for his special benefit, which would give him arrearages of pay, up to the 31st day of the present month, \$673.65, besides 140 gallons, 1 quart, and 3 gills of whiskey.

The only reason offered by Sergeant Devlin for this most extraordinary request is, that the Attorney General has decided that sergeants of the army, acting as clerks and receiving extra pay as clerks, were also entitled to the extra pay provided by the act above recited. From this opinion of the Attorney General the committee are compelled to dissent: they consider it at variance with the letter and spirit of the law, and they feel no disposition to give it their sanction by extending its benefits to the petitioner. They therefore recommend the following resolution:

Resolved, That the prayer of the petition ought not to be granted.

No. 618.

[1ST SESSION.

ON THE CLAIM OF A PURSER'S CLERK OR STEWARD AT THE NAVY YARD, NEW YORK,
FOR AN ADDITIONAL ALLOWANCE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the bill from the Senate, (No. 74,) for the relief of A. D. Ostrander, with his petition, &c., reported:

That no report of the Committee on Naval Affairs of the Senate (by which the said bill was presented to that body) has been made to show the reasons of the Senate in passing the bill. From the papers accompanying said bill, it appears that the petitioner was employed as purser's clerk or steward at the Navy yard, New York, and for his services prior to 30th of April, 1825, he was paid the sum of \$32.50 per month, \$390 per annum. After that period his pay was allowed at \$500 per annum, which sum he received until 30th September, 1829. The payment of this amount was then stopped by the Fourth Auditor, as the regulations of the navy allowed only \$18 per month and one ration to persons acting in this capacity, equal to \$307.25. Mr. Ostrander appears to have insisted on the salary previously paid him, and his claim was, in August, 1830, referred to the Secretary of the Navy, and the following is a copy of the reference and decision:

"Respectfully referred to the Secretary of the Navy. If the allowance claimed was ever made by the Secretary of the Navy I have been unable to find any record of the fact, and therefore cut down the allowance to that of a steward.

"In other respects Mr. Ostrander states the case fairly.

A. K."

"August 7, 1830. The decision of the Auditor is in my opinion correct; I am therefore not disposed to disturb it.

JNO. B."

Mr. Ostrander was in consequence allowed and paid, from the 30th of September, 1829, the sum of \$307.25 per annum, until 30th of April, 1831, when, after several ineffectual applications to obtain the amount formerly paid him, he relinquished his station. He now asks the difference between the sum \$500 per annum from the 30th of September, 1829, to the 30th of April, 1831 \$791 66
And the amount actually received by him under the regulation..... 483 45

Or..... \$308 21

The compensation of the officer in question is fixed by the Secretary of the Navy. If he had received more than was due according to the regulations of the Department, there was no reason that this amount should be continued after notice to the contrary. He received after 1829 the pay estimated by the Department and appropriated by Congress for the office which he held. He knew the pay he was to receive, and it would be unsafe as a precedent to allow more on the ground that the estimates were not high enough.

The committee therefore recommend that the bill be rejected.

No. 619.

[1ST SESSION.

A STATEMENT OF THE SEVERAL NAVAL HOSPITALS AND LANDS, SUMS REQUIRED TO
COMPLETE THEM, AND THE SOURCE AND MANNER OF COLLECTING THE NAVAL
HOSPITAL FUND.

COMMUNICATED TO THE SENATE MARCH 21, 1836.

NAVY DEPARTMENT, *March 18, 1836.*

SIR: In answer to the resolution of the Senate, of the 16th ultimo, I have the honor to state that the amount to the credit of the navy hospital fund, at that date on the books of the Treasury, was \$66,242.57.

As the fund is accumulated by a deduction of twenty cents a month from the pay of each person employed in the navy, and as the number of persons estimated to be employed this year is 7,189, the sum that will accrue to the fund during this year may be estimated at \$17,253.60. It will be seen, therefore, that the "annual average" sums that will thus accrue will depend upon the number of persons to be employed in the navy.

It is deemed proper to state, also, that this deduction will not be passed to the credit of the fund, on the books of this Department and of the Treasury, until the pay accounts shall have been settled in the offices of the Fourth Auditor and Second Comptroller, and, therefore, the "annual receipts for the fund" will vary according to the progress which shall be made in the settlement of such accounts.

The enclosed letter from the Board of Navy Commissioners, dated the 16th instant, will furnish the other points of information called for by the resolution.

I have the honor to be, very respectfully, your obedient, humble servant,

M. DICKERSON.

Hon. MARTIN VAN BUREN, *President United States Senate.*

NAVY COMMISSIONERS' OFFICE, *March 16, 1836.*

Sir: In compliance with your instructions of the 17th ultimo, the Board of Navy Commissioners have the honor to report that the *number* of naval hospital establishments is *four*, besides the Naval asylum, which is also used as an hospital for the Philadelphia station.

Of these, *one* is situated at *Chelsea*, near the Navy yard, Boston, Massachusetts. The ground belonging to it, including a considerable extent of salt marsh, but not including flats, dry at low water, measures 115 acres. The present building is 70 by 62 feet, having a basement, two principal stories, and attic rooms.

The amount necessary to complete the building and its necessary appendages, to graduate the grounds about it, to enclose a space for the convalescent and for other necessary purposes, completing the wharf for landing, and repairing house for surgeon, is established at.....	\$19,380 00
Of which there was estimated in 1836	10,000 00
	<hr/>
Balance which would still be required.....	\$9,380 00
	<hr/>

If the whole sum of \$19,380 were appropriated this year, the whole of the improvements could be completed in 1837.

At *Brooklyn*, near the Navy yard, New York, an hospital building, 100 by 48 feet, has been erected, having a basement, two stories, and attics. The ground belonging to it comprises 20½ acres of upland, 1¼ acres of salt marsh, and about 12½ acres of sedge.

It is estimated that the amount necessary to complete the building, to build the necessary enclosures, to graduate the grounds, to repair a house for the residence of the surgeon, and to construct a wharf as a landing from the river, will be \$34,500, of which there was estimated for 1836 the sum of \$16,500, leaving \$18,000 still deficient. Should Congress deem it advisable to appropriate the whole sum, the works might be completed in 1837.

The Naval asylum near Philadelphia had attached to it, originally, about 25½ acres of land; this has been divided and diminished by Sutherland avenue, which has been opened on its west side, between the building and the river Schuylkill.

To complete the building, build the necessary brick walls upon the adjoining streets, to enclose it, prepare a burying ground, graduate the grounds, plant trees, make drains, and other necessary work upon the building and appendages, is estimated at.....	\$30,000 00
Of which the estimate for 1836 embraced	8,900 00
	<hr/>
Leaving to be provided hereafter	\$21,100 00
	<hr/>

All of which might be expended in the present and next year, should Congress think proper to appropriate the whole amount.

The hospital at Norfolk is the largest which has been built, but one of the wings has not been entirely completed. The grounds belonging to it comprise about 61 acres.

To complete the building, its enclosures and dependencies, to graduate the grounds, and build a wall to protect the northwest water front from the wash of the river, it is estimated that there will be required.....	\$15,000 00
Of this sum the estimates for 1836 embraced.....	10,010 00
	<hr/>
Leaving a deficiency of.....	\$4,990 00
	<hr/>

An appropriation for the whole amount could be advantageously expended during the present and next year.

At Pensacola an hospital has been erected, which, with a house for the surgeon, can be completed from the appropriations already made.

Representations have, however, been recently received, strongly recommending a brick enclosure and further extension of the hospital, in consequence of the liability of vessels to disease on the West India and Gulf stations, and of a small increase of force employed there.

Having reference to a probable extension of the naval establishments at Pensacola, and of the employment of our naval forces in that quarter, it may be advisable to make provision for another building, as well as for a brick enclosure for that and the one already built. The amount necessary for these purposes, and for those dependent upon them, is estimated at \$58,000, and the whole could probably be completed in 1837.

The hospital at this place is built on lands reserved for public uses, and no specific quantity has yet been set apart for the special use of the hospital.

As a recapitulation of the foregoing, it appears that the whole amount required to complete the present building is:

For the hospital near Chelsea, and its dependencies	\$19,380 00
For the hospital near Brooklyn	34,500 00
For the hospital near Philadelphia	30,000 00
For the hospital near Norfolk	15,000 00
For the hospital near Pensacola	58,000 00
	<hr/>
Total	\$156,880 00
	<hr/>

It is recommended, however, that every appropriation be made collectively for the several hospitals and their dependencies, as such arrangement would permit any possible surplus after completing one to be applied to a deficiency at another, should any occur, and which could not be done if the appropriations were made special for each.

The present building at Chelsea forms one wing; the original plan proposes a similar building for the other wing, and to be connected, when required, by a centre building 160 feet front by 35 feet deep. The cost of these additional buildings is estimated at \$117,500, including their furniture and appendages.

The present building at New York forms the proposed centre building, to be connected with two wings, when they may be required, each to be 48 feet by 130, forming a front of 196 feet. The cost of these wings and the necessary furniture for the sick and all appendages, is estimated at \$105,000.

It may be proper to remark that the hospital buildings at Boston and New York constitute but parts of more extensive plans which were prepared, that separate parts might be erected as the wants of the service might require, and, when finally completed, combine convenience of arrangement with extensive accommodations.

I have the honor to be, very respectfully, your obedient servant,

JNO. RODGERS.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

24TH CONGRESS.]

No. 620.

[1ST SESSION.

ON THE EXPEDIENCY OF AUTHORIZING AN EXPLORING EXPEDITION, BY VESSELS OF THE NAVY, TO THE PACIFIC OCEAN AND SOUTH SEAS.

COMMUNICATED TO THE SENATE MARCH 21, 1836.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom was referred a memorial from sundry citizens of Connecticut, interested in the whale fishery, praying that an exploring expedition be fitted out to the Pacific ocean and South seas, reported:

That the subject of this memorial, in the opinion of your committee, merits immediate attention, and the exercise of an enlightened liberality on the part of Congress. The whole of the facts and reasoning upon which this opinion is founded cannot be embraced within the ordinary limits of a report, and the committee, therefore, content themselves, in the discharge of their duty, by a reference to a few historical facts, and an allusion to some of the arguments which have satisfied their own minds that it is wise and expedient to provide, by law, for an exploring expedition to the Pacific ocean and South seas.

Such an expedition has been an object of solicitude with a large number of intelligent and enterprising citizens for many years past, and has been repeatedly urged upon the attention of Congress by petitions and memorials from those whose interests were most directly concerned—by resolutions and other expressions of opinion of legislative bodies and assemblies of citizens in several of the States—and by reports from the Navy Department and messages from the Executive of the United States.

Eight years since, this subject was examined by a committee of the House of Representatives, and specially referred to the consideration and attention of the Navy Department. That Department had looked with anxiety to our commerce in the Pacific, and required from our naval officers such reports respecting its extent and condition as might be a safe guide in discharging the obligation of the government to protect it. These reports confirmed the views which had been previously entertained, and prepared the Department to urge the measure upon the favorable consideration of Congress.

At the subsequent session renewed attention was paid to it, and a bill was proposed, but did not become a law. In consequence of its failure, two resolutions were passed by the House, declaring it expedient that one of the small public vessels be sent to the Pacific ocean and South seas, to examine the coasts, islands, harbors, shoals and reefs in those seas, and to ascertain their true situation and description; and requesting the President to send such a vessel, and afford such facilities as might be within the reach of the Navy Department, to attain the objects proposed, provided it could be done without prejudice to the general interest of the naval service, and without further appropriations during the year. Suitable attention was paid to the duty assigned by these resolutions, and what had been done communicated to Congress at the subsequent session, at which a bill passed one House of Congress to carry the object into execution, but was lost by causes which it is not now necessary to explain.

From that period until the last session, there was no important movement or action upon the subject. At that time a committee of the House, after full inquiry, made a report in favor of the expedition, which is worthy the attention of those who desire to form a well-advised opinion upon the measure proposed.*

The committee think it proper to annex to their report, as a part thereof, and for the better illustration of the subject, the several reports and other documents to which they refer.†

The duty of Congress to extend, secure and protect every portion of our commerce, has long since ceased to be matter for debate. There is but one opinion upon that point. This duty becomes more imperative, in proportion to the value of any particular portion, and the difficulties and dangers to which it is subjected.

No part of the commerce of this country is more important than that which is carried on in the Pacific ocean. It is large in amount. Not less than \$12,000,000 of capital are invested in and actively employed by one branch of the whale fishery alone; and in the whole trade there is, directly and indirectly, involved not less than fifty to seventy millions of property. In like manner, from 170,000 to 200,000 tons of our shipping, and from 9,000 to 12,000 of our seamen are employed, amounting to about one-tenth of the whole navigation of the Union. Its results are profitable. It is, to a great extent, not a mere exchange of commodities, but the creation of wealth, by labor, from the ocean. The fisheries alone produce, at this time, an annual income of from five to six millions of dollars; and it is not possible to look at Nantucket, New Bedford, New London, Sag Harbor, and a large number of other districts upon our northern coasts, without the deep conviction that it is an employment alike beneficial to the moral, political and commercial interests of our fellow-citizens.

It is a nursery for seamen for which no substitute can be found; eminently fitted to form precisely

* For this report and accompanying documents, see vol. 4 State Papers, Naval Affairs, doc. No. 578.

† For the other report and document referred to, see vol. 3 same class, doc. Nos. 363 and 387. See also doc. 370, pages 211, 212.

such men as the nation requires for times of trial and struggle. The voyages are long; every climate is encountered; every sea, calm or tempestuous, is traversed, and a discipline and subordination enforced, which create a class of men unsurpassed, if they are equaled, by any who have ever made the ocean their dwelling place. They are adventurous and persevering—hardened by toil and danger—bold, watchful and skillful. If the encouragement and protection of government should be extended to any portion of our citizens, these have claims which cannot be overlooked. It is to this view of the subject that the Committee on Naval Affairs have directed their most anxious attention.

The commerce of the Pacific may be greatly extended in all its departments. Of the rapidity of its growth there is abundant evidence in the records of the Departments of our government, and the theatre for its enlargement is most ample; but it requires aid and encouragement.

No part of our commerce is so much exposed to hazard and peril. That portion of the globe is less known; and the ocean more filled with dangers, than any other that our seamen visit. There are hundreds of islands, reefs, and shoals, unmarked upon any chart, and unknown to common navigators. Their location, situation, facilities for commerce, are yet to be explored and exhibited to the world. Many of those islands are inhabited by savages, who render access to them dangerous, and whom it is the duty of the government to conciliate. The loss of property and life in that region has been immense. The committee refer to the accompanying documents to illustrate some of the facts upon these points; and they do not hesitate to believe that an examination of them will satisfy the Senate of the policy and necessity of the measure which they propose.

But the committee have also been influenced by other considerations, connected with the duty which the government and the nation owe to its own character, and the common cause of all civilized nations—the extension of useful knowledge of the globe which we inhabit. Every other nation, which possesses either a commercial or military marine, has made contributions to this knowledge, which have benefited the rest of mankind, and given to themselves the most enviable of all kinds of national glory; and, by unanimous consent, those who are engaged in it are free from the perils of war, and receive, even from the hands of enemies, protection, countenance, support; a homage paid by Christian nations to science, knowledge, and civilization. It is, in truth, an employment of peace and humanity.

Enterprising, beyond all others, as our own citizens are, much as they have individually given to this cause, the nation and government have yet contributed nothing. The committee believe that this state of things should no longer exist, but that an effort should now be made on a scale commensurate with the value of the object; and they look to the Pacific ocean and South seas as the proper theatre for exertion. They are less known than other portions of the great deep; they are filled with more difficulties and dangers; greater and more splendid and profitable results may be anticipated there than elsewhere; and the theatre is peculiarly our own, from position and the course of human events. Christian and civilized Europe, in the spirit of discovery and enterprise, gave our continent to the world; we may repay them, in part, by a more accurate knowledge of the still unexplored regions of the southern hemisphere.

The committee recommend an expenditure which shall be entirely equal to the importance of the enterprise, and afford the best security for success, and for those practical results which shall be most honorable and useful. The expedition should be naval in its character; a portion of the means under the control of the Navy Department should be applied to it, and it should be fitted out and conducted under its auspices. The committee think it ought to consist of two vessels of about two hundred tons burden, for exploration; one, of about one hundred tons, as a tender; and a store or provision ship of competent dimensions; and these accompanied by a sloop-of-war, to afford protection, and secure peaceful and friendly relations with the inhabitants of the islands. The smaller vessels may either be purchased, or built of materials which are in our navy yards, and a large portion of the expense may be met by our naval means and facilities, without the slightest encroachment upon the interests of the service. It should be attended, also, by naval officers and citizens well qualified in the appropriate departments of science, to bring back the most accurate results of the examinations which may be made.

But the committee do not think it necessary or expedient to prescribe, in the law which may be passed, either the dimensions or the character of the vessels, or the number and qualifications of the persons who shall be employed; nor can they exhibit, by precise estimates, the exact sum which shall be expended. These are matters which must, to some extent, be left to the discretion of the Executive, who will carry the will of Congress into execution. If the amount which shall not be exceeded be fixed by the law, no possible evil can result. Every imaginable motive which can influence the preparation for, and prosecution of, the proposed enterprise, will be on the side of economy and efficiency.

The committee report a bill to authorize an expedition.

A BILL to provide for an exploring expedition.

Be it enacted, &c., That an exploring expedition to the Pacific ocean and South seas be, and the same is hereby, authorized and directed; and that the President of the United States be, and he is hereby, authorized to prepare and send out for that purpose a sloop of war, and to purchase or provide such other smaller vessels as may be necessary and proper to render the said expedition efficient and useful.

Section 2. *And be it further enacted,* That the use of so much of the appropriations for the support of the navy, and of the means and facilities under the control of the Navy Department, as may be necessary and proper for that object, be, and the same is hereby, authorized; and, in addition thereto, the sum of \$— be, and the same is hereby, appropriated out of any money in the Treasury not otherwise appropriated.

To the Hon. the Senate and House of Representatives in Congress assembled:

The memorial of the subscribers, citizens of New London, respectfully represents:

That, at different periods, for many years past, they have continued to represent to your honorable body the nature and extent of their commercial operations in carrying on the whale fishery. They have

set forth, in earnest language, the nature of the difficulties they have encountered; that, from the unavoidable extension of their voyages in pursuit of whale into seas but little known, their business has been rendered hazardous to the property of their merchants and dangerous to the lives of their mariners.

Your memorialists refrain from going into any computation of the amount of tonnage employed in the fisheries from the United States, nor do they deem it necessary to dwell on the nature and extent of their losses consequent upon the want of a more perfect knowledge of the seas into which their shipping has extended. These matters, as well as the objects to be effected by an expedition properly fitted out, and instructed "attentively to observe and circumstantially to describe every unusual appearance, and specially to measure everything measureable," within the pathway of our mariners, have been fully and fairly set forth in the able report of your Committee on Commerce, made during the last session of the twenty-third Congress, No. 94. (See State Papers, doc. 578.)

Such an expedition as is proposed in that report is, in the opinion of your memorialists, required by the best interest of our country; for it is an illiberal and short-sighted policy that regards the whale fishery as local in its bearing. The material used and labor employed in the construction of one hundred and forty thousand tons of shipping is no inconsiderable item in the navigation of this country, commercial as it is; nor is the supply of provisions for ten thousand men, the most hardy and effective of our seamen, whether employed in the pursuit of the leviathan of the deep or in defence of their country's rights, matters unworthy the special regard and protection of government.

Your memorialists would further represent, that many of the survivors of their lost vessels are now, no doubt, dragging out a miserable existence on some of the numerous islands in the Pacific, among which their adventurous pursuits had led them, and are still within the reach of aid, provided proper means were employed to seek them, and which can only be done by an expedition especially equipped for the purpose. Indeed, the advantages of commerce to science and national glory seem now to be sealed and sanctified by the calls of humanity and imperious duty. Your memorialists, therefore, indulge the earnest hope that their prayer in behalf of their partially protected commerce, carried on as it has been with varied success from a period coeval with the existence of our government, now that our resources can so well afford it, may be answered, without further delay, in the equipment of a suitable expedition.

And your memorialists, as in duty bound, will ever pray.

FEBRUARY, 1836.

State of New Jersey:

Resolved, by the House of Assembly, That we approve of the fitting out of an expedition to the South seas, by the national government, on a voyage of discovery and survey, believing that such expedition, if properly conducted, could scarcely fail in adding something to the general stock of national wealth and knowledge, and to the honor of our common country.

HOUSE OF ASSEMBLY, *March 2, 1836.*

I do hereby certify that the foregoing resolution was adopted by the House of Assembly of New Jersey this day.

JOS. C. POTTS, *Clerk pro tempore of the House of Assembly of New Jersey.*

MEMORIAL of the East India Marine Society of Salem, Massachusetts, praying that an expedition be fitted out by the government to make a voyage of discovery and survey to the South seas.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial of the subscribers, citizens of the United States, respectfully represents:

That the vivifying influence of unshackled and unobstructed commerce is, to our highly favored nation, what the healthful pulsation of the heart is to the human frame. It not only gives life and enjoyment to the immediate vibrations, but communicates the same, by a thousand mysterious channels, to the remotest extremity of the body politic. It is the fountain from which unfailing streams of revenue, our financial reservoir, is supplied with the means of national existence. To remove every obstacle which may impede or retard the healthful operation of this vital, is evidently the interest, and consequently the duty of the supreme legislature of the country.

Under such impressions, it is with no small degree of interest your memorialists perused an honorable expression of the legislature of Rhode Island, during its recent session, of which the following is a copy:

"State of Rhode Island and Providence Plantations, in general assembly, October session, A. D. 1834.

"Resolved, That in the opinion of this general assembly, the subject of the memorial of J. N. Reynolds and others, dated November, 1834, praying that provision may be made by law for a voyage of discovery and survey to the South seas, is highly important to our shipping and commercial interests, and is hereby recommended by said assembly to the favorable consideration of the Congress of the United States."

In favor of this memorial, that an expedition be fitted out under the sanction of government, the object of which shall be to examine the numerous places of traffic already opened by the enterprise of our citizens, and to open new channels for the extension of trade, by the examination of such groups of islands, in the great North and South Pacific ocean, as are imperfectly or entirely unknown; to ascertain their true positions on the charts, examine their harbors and capacities, open friendly intercourse with the natives, which may be the means of preventing the effusion of blood; in a word, there are so many ways in which such an expedition might be useful, if well conducted, to our extended and unprotected interests in those distant seas, that a minute specification of them seems unnecessary, as they must be obvious to every enlightened mind.

On this subject, many of your memorialists speak with a practical knowledge, for among them are those who were the first to display our national colors in our commerce to the eastern world; amongst

them are those who have been engaged in trade on coasts and among islands but little known; and they have felt, in losses and in painful solicitude, the want of the protection of their government, as well to point out the position of a dangerous reef as to defend them against the natives, who had seen nothing of our power to restrain them from unlawful attacks upon their vessels or their lives; among them are those who have visited the islands in the Pacific as well as those in the east, and have seen and felt the dangers our vessels are exposed to, for the want of such protection as an expedition fitted out for the express purpose alone can give.

Your memorialists refrain from going into any computation of the immense amount of tonnage and capital engaged, from the United States, in the whale fishery, all of which is more or less interested in such an expedition. Without attempting to designate the groups or islands most important to be examined, your memorialists would simply call the attention of your honorable body to one point, which may serve as an index to the rest. The Feejee or Beetee Islands—what is known of them? They were named, but not visited by Captain Cook, and consist of sixty or more in number. Where shall we find a chart of this group, pointing out its harbors? There are none to be found, for none exist. And yet, have we no trade there? We speak not for others, but for ourselves.

From this port the following vessels have been, or now are, employed in procuring beche le mer and shells at the Feejee Islands, in exchange for which eastern cargoes are brought into our country, and thus contributing no inconsiderable amount to our national revenue:

Ship Clay, brig Quill, have returned; brig Faun, lost at the islands; ships Glide, Niagara, also lost; and barque Peru greatly damaged, and in consequence condemned at Manilla; brig Spy damaged, but repaired again; brig Charles Daggett, barque Pallas, brig Edwin, ship Eliza, ship Emerald, ship Augustus, and brig Consul.

The Charles Daggett has recently returned, in consequence of having a portion of her crew massacred by the natives. The ship Oneo, of Nantucket, was lost on one of these islands, and her officers and crew, consisting of twenty-four in number, were all massacred in like manner, except one.

Thus, it must appear to your honorable body that the losses sustained at this single point, to say nothing of the value of human life, which is above all value, would not fall far short, if any, of the amount necessary to fit out an expedition for the better examination of such points in the Pacific ocean and South seas as require the attention of government.

Wherefore your memorialists beg leave to unite their prayer with that of the State of Rhode Island, praying that provision may be made by law for a voyage of discovery and survey to the South seas; and your memorialists, as in duty bound, will ever pray.

WM. FETTYPLACE, *President of Salem East India Marine Society.*

HALL OF THE EAST INDIA MARINE SOCIETY, November 22, 1834.

Members of the East India Marine Society.

W. Story, George Nichols, Gilbert G. Newhall, Joseph Ropes, Jesse Smith, John B. Osgood, Ephraim Emmerton, Samuel Rea, Charles Treadwell, Lewis Endicott, Philip P. Pinel, Nathaniel Kinsman, Allen Putnam, James B. Briggs, Henry Prince, James D. Gillis, Richard S. Roders, C. Saunders, N. L. Rogers, James King, Thomas West, Wm. D. Waters, Wm. Ashton, Charles F. Barstow, John W. Treadwell, Francis Coffin, M. Townsend, George Cleveland, D. L. Putnam, John Fisk Allen, H. G. Bridges, Hotten S. Breed, Emory Johnson, Joseph J. Kinsman, Joseph Beadle, John Bertram, Samuel Groce, Daniel Sage, James Silver, H. Tibbet, Samuel Varno, J. W. Rogers, Jonathan P. Saunders, Henry Prince, jr., Edward Orne, John Marshall, Daniel Bray, jr., John Prince, B. W. Crowninshield.

Islands, reefs, shoals, &c., not contained in the preceding report.

[For that report, see preceding doc. No. 578, vol. 4 State Papers.]

Curry's Island, by some, 28 deg. 25 min. north latitude, 178 deg. 20 min. west longitude; by others, 28 deg. 25 min. north latitude, 178 deg. 14 min. west longitude.

Tamulanes' Island, 36 deg. 49 min. north latitude.

Washington Island, 4 deg. 33 min. north latitude, 159 deg. 45 min. west longitude; by others, 4 deg. 40 min. north latitude, 160 deg. 40 min. west longitude.

Jane's Island, 16 deg. 6 min. north latitude, 173 deg. 12 min. west longitude.

Louisa Island, 16 min. 25 deg. north latitude, 145 deg. west longitude.

Caroline Island, 17 deg. north latitude, 145 deg. 5 min. west longitude.

Charles Island, 25 deg. 15 min. north latitude, 172 deg. 34 min. west longitude.

Island, 5 deg. north latitude, 160 deg. west longitude.

Island, 46 min. north latitude, 171 deg. 57 min. west longitude.

Island, 11 min. north latitude, 171 deg. 55 min. west longitude.

Island, 28 deg. 54 min. north latitude, 177 deg. 39 min. west longitude.

A rock, 11 deg. 6 min. north latitude, 154 deg. 20 min. west longitude.

A rock, 7 deg. 51 min. north latitude, 139 deg. 50 min. west longitude.

Reef, 17 deg. 12 min. north latitude, 156 deg. 12 min. west longitude.

Pollard's reef, 24 deg. 9 min. north latitude, 168 deg. 9 min. west longitude.

Reef, 1 deg. 14 min. north latitude, 179 deg. 18 min. west longitude.

Reef, 8 deg. 6 min. north latitude, 140 deg. west longitude.

Shoal, 1 deg. 44 min. north latitude, 170 deg. 30 min. west longitude.

Shoal, 25 deg. 36 min. north latitude, 151 deg. 28 min. west longitude.

Shoal, 26 deg. 5 min. north latitude, 177 deg. 56 min. west longitude.

Island, 21 deg. 29 min. north latitude, 131 deg. 28 min. west longitude.

Island, 13 min. north latitude, 171 deg. 45 min. west longitude.

Island, 49 min. north latitude, 171 deg. 40 min. west longitude.

Reef, 10 deg. 15 min. north latitude, 133 deg. 50 min. west longitude.

Sarah Ann's Island, 16 deg. 8 min. north latitude, 143 deg. 16 min. east longitude.

Worth's Isle, 8 deg. 48 min. north latitude, 151 deg. D. east longitude.

Copper Island, 26 deg. 6 min. north latitude, 131 deg. 48 min. east longitude.

- Paul's Island, 21 deg. 9 min. north latitude, 141 deg. 39 min. east longitude.
 Bassiosas Isle, 26 deg. 6 min. north latitude, 173 deg. 27 min. east longitude.
 Tuck's Island, 1 deg. 7 min. north latitude, 150 deg. D. east longitude.
 Whittington's Island, 6 deg. 48 min. north latitude, 159 deg. 48 min. east longitude.
 Ascension Island, 6 deg. 52 min. north latitude, 153 deg. 50 min. east longitude.
 North's Island, 8 deg. 48 min. north latitude, 150 deg. to 152 deg. D. east longitude.
 Granger's Isle, 13 deg. 53 min. north latitude, 144 deg. 14 min. east longitude.
 Halison's Isle, 19 deg. 39 min. north latitude, 166 deg. 50 min. east longitude.
 Genevieve Island, 17 min. north latitude, 176 deg. 56 min. east longitude.
 Mary's Islands, 9 deg. north latitude, 150 deg. east longitude.
 Elizabeth Islands, 7 deg. north latitude, 151 deg. east longitude.
 Emily Islands, 9 deg. 48 min. north latitude, 165 deg. 12 min. east longitude.
 Joanna Island, 17 deg. 6 min. north latitude, 163 deg. 33 min. east longitude.
 Susan's Island, 27 deg. 36 min. north latitude, 143 deg. east longitude.
 Island, 30 deg. 40 min. north latitude, 155 deg. east longitude.
 Island, 30 deg. north latitude, 137 deg. east longitude.
 Island, 29 deg. 33 min. north latitude, 137 deg. east longitude.
 Island, 30 deg. north latitude, 139 deg. east longitude.
 Island, 30 deg. 59 min. north latitude, 146 deg. 57 min. east longitude.
 Island, 29 deg. north latitude, 175 deg. 45 min. east longitude.
 Island, 26 deg. 6 min. north latitude, 131 deg. 48 min. east longitude.
 Island, 23 deg. 3 min. north latitude, 162 deg. 57 min. east longitude.
 Reef, 19 deg. 16 min. north latitude, 165 deg. 43 min. east longitude.
 Reef, 16 deg. 36 min. north latitude, 169 deg. 42 min. east longitude.
 Reef, 17 deg. 30 min. north latitude, 144 deg. 45 min. east longitude.
 Whytetuche Island, 18 deg. 52 min. south latitude, 159 deg. 42 min. west longitude.
 Watuoo Island, 21 deg. 1 min. south latitude, 158 deg. 15 min. west longitude.
 Chittorra Island, 22 deg. 30 min. south latitude, 151 deg. 30 min. west longitude.
 Jarvis Island, 30 min. south latitude, 172 deg. west longitude.
 Brind's Island, 3 deg. 14 min. south latitude, 172 deg. west longitude.
 Long Island, 17 deg. 56 min. south latitude, 140 deg. 16 min. west longitude.
 Claudius Island, 18 deg. 22 min. south latitude, 115 deg. 15 min. west longitude.
 Pystoza Island, 22 deg. 23 min. south latitude, 175 deg. 41 min. west longitude.
 Sarah Island, 1 deg. 5 min. south latitude, 158 deg. 54 min. west longitude.
 Island, 19 deg. 13 min. south latitude, 139 deg. west longitude.
 Helen Islands, from 3 deg. to 3 deg. 40 min. south latitude, and from 171 deg. 50 min. to 173 deg. 10 min. west longitude.
 Theodora Island, 5 deg. 32 min. south latitude, 173 deg. 34 min. west longitude.
 Group of islands, 17 deg. south latitude, 145 deg. 12 min. west longitude.
 Fanny Island, 1 deg. south latitude, 172 deg. west longitude.
 Julia Island, 1 deg. 30 min. south latitude, 171 deg. 10 min. west longitude.
 Island, 2 deg. 20 min. south latitude, 171 deg. 15 min. west longitude.
 Harper's Island, 2 deg. 40 min. south latitude, 172 deg. 35 min. west longitude.
 Brother's Island, 2 deg. 48 min. south latitude, 171 deg. 59 min. west longitude.
 Island, 6 deg. 36 min. south latitude, 163 deg. west longitude.
 Fletcher Island, 7 deg. 4 min. south latitude, 173 deg. 12 min. west longitude.
 Island, 15 deg. 40 min. south latitude, 144 deg. 50 min. west longitude.
 Wesley Island, 15 deg. 54 min. south latitude, 141 deg. 42 min. west longitude.
 Island, 16 deg. 8 min. south latitude, 145 deg. 12 min. west longitude.
 Island, 16 deg. 9 min. south latitude, 142 deg. 12 min. west longitude.
 Island, 17 deg. 28 min. south latitude, 140 deg. 56 min. west longitude.
 Anthon's group, 17 deg. 54 min. south latitude, 142 deg. west longitude.
 Island, 19 deg. 20 min. south latitude, 179 deg. 30 min. west longitude.
 Island, 21 deg. 10 min. south latitude, 149 deg. 50 min. west longitude.
 Island, 23 deg. 20 min. south latitude, 104 deg. 50 min. west longitude.
 Island, 10 deg. south latitude, 152 deg. 32 min. west longitude.
 Island, 16 deg. south latitude, 148 deg. 56 min. west longitude.
 Rock, 26 deg. 24 min. south latitude, 170 deg. 54 min. west longitude.
 Rock, 25 deg. 30 min. south latitude, 174 deg. 3 min. west longitude.
 Rock, (near Tapocalma, fifty miles south of Valparaiso; several vessels have been lost on it,) 33 deg. 51 min. south latitude, 71 deg. 28 min. west longitude.
 Reef, (dangerous,) 5 deg. 38 min. south latitude, 173 deg. 33 min. west longitude.
 Reef, 3 deg. 38 min. south latitude, 157 deg. 59 min. west longitude.
 Reef, 10 deg. 48 min. south latitude, 166 deg. 6 min. west longitude.
 New Bladone, 13 deg. 11 min. south latitude, 113 deg. 40 min. west longitude.
 Tencher's Isle, 1 deg. 33 min. south latitude, 150 deg. 40 min. east longitude.
 Roturia Isle, 12 deg. 29 min. south latitude, 177 deg. 10 min. east longitude.
 Island, 1 deg. south latitude, 171 deg. 10 min. east longitude.
 Rambler's reef, 22 deg. south latitude, 174 deg. 39 min. east longitude.
 Reef, 31 deg. 30 min. south latitude, 154 deg. east longitude.
 Island, 23 deg. 40 min. south latitude, 160 deg. 14 min. east longitude.
 Island, 11 deg. 29 min. south latitude, 165 deg. 25 min. west longitude.
 Island, 2 deg. 45 min. south latitude, 172 deg. 30 min. west longitude.
 Farmer's Island, 3 deg. south latitude, 170 deg. 45 min. west longitude.
 Arthur's Island, 3 deg. 40 min. south latitude, 176 deg. 15 min. west longitude.
 Solitary Island, 10 deg. 39 min. south latitude, 177 deg. west longitude.
 Savage Island, 19 deg. 5 min. south latitude, 169 deg. 50 min. west longitude.
 A rock, between Falkland Islands and the continent—about two hundred miles west of the former.
 Off shore whaling ground, from 103 deg. to 115 deg., in latitude from 3 deg. to 5 deg., 7 deg. south, and sometimes on the line, Captain Mitchell discovered a low island, well covered with timber. It was

not seen until the vessel was near, and had it been night, the chances are that the vessel would have been lost. There were no other islands in sight, and this one not on any chart. The island should bear the name of its discoverer, Mitchell.

Navigator's Islands. These islands are said to be eight in number, were discovered by Bougainville, and examined by Perouse in 1787, and may be said to extend from 14 deg. 9 min. to 18 deg. 57 min. south. The number of inhabitants is probably from forty to fifty thousand.

Captain Worth, of the Howard, informs us that, having visited most of the islands in the South Pacific, he considers the Island of Ottewhy as presenting advantages and facilities to whalers, superior to those of any other island in that ocean. It affords fruit, yams, poultry, swine, &c., in the greatest abundance, plenty of wood and excellent water. For a musket, the natives give thirteen hogs, or eight hundred to a thousand yams; and great quantities of fowls, cocoa nuts, bananas, &c., may be purchased for a few pipes, flints, and blue glass beads. The fruit is generally obtained at the northwest part of the island; but hogs, wood and water are procured from the north side. Sufficient supplies may be taken on board in the short space of four days; and no danger need be apprehended from the natives, provided the precaution be taken to keep the head chief on board as a hostage, day and night—a requisition very willingly complied with, when two or three of the natives and an interpreter are also allowed to remain. By pursuing this course in both his visits to this place, Captain Worth passed and repassed unarmed in his boats with perfect safety, and found the natives extremely civil, never attempting to steal from the boats on shore, nor while on board his ship. He thinks, however, without this precaution, they would not hesitate to seize a boat and crew, merely for the sake of two or three muskets, which article they seemed very anxious to obtain, though they never inquired for shot or ball. The white residents, (of which there are only two, who are chiefly engaged in agriculture,) informed Captain Worth that they made no other use of the muskets than to discharge them at their great feasts, considering those the best which made the loudest reports.

The chains of islands in Oceanica and the Pacific extend, in general, from southeast to northwest, and the groups often terminate with a large island, as Otaheite and Owyhee. This fact may facilitate discovery, and a knowledge of it add to the security of navigation, by avoiding the immense reefs which extend, no doubt, at a great distance from the point where the islands terminate.

Solomon Islands, seen by Byron in 1765, and supposed by him to be the Islands of Quiros, in the 17th century. They are exceedingly dangerous. Lie in 10 deg. 15 min. south, 169 deg. 28 min. west.

Admiralty Islands lie to the northwest of New Ireland; are numerous, extending from 1 deg. 28 min. south, to 5 deg. 20 min. south, and from 148 deg. 20 min. east, to 162 deg. 16 min. east. This group embraces the whole extent of New Britain.

New Guinea, that great link by which the Molucca Islands are connected on the one hand with New Holland, and with the Polynesian archipelago on the other. Of this extensive chain we know nothing except the line of coast, and, unfortunately, even of that but little. The length of this country cannot be much short of 1,200 miles, and from 15 to 360 in width. This country is called Papua, or the country of the Papoos, a name by which the inhabitants are known among the Malays. It is from these islands that birds of paradise are procured, of which there are known to be not less than twelve species.

St. David and Freewill Islands form the most natural transition from New Guinea to Polynesia, or Eastern Oceanica; and what is strange, these islands are inhabited by a race entirely different from the Papua, being of a copper color, and in language resembling the Sandwich Islands.

Leaving the Molucca sea, next come the Pelew Islands, called by the early navigators Palaos. The inhabitants are naturally an amiable, gay, and innocent people, of middling size, and by no means bad looking. They lie between 133 deg. and 136 deg. east, and from 6 deg. to 8 deg. north.

To the north of the Pelew Islands are those called Matetotes, Martyrs, Sagoadiah, &c.

The groups of St. Andrew, Pedeo, Warwick, &c., stretch off to the south, and are but imperfectly known.

Turning to the northeast from the Pelew Islands, we find the Marian group, consisting of near twenty in number. These islands are of ancient discovery, by Magellan, in 1621, and called by him Ladrones, but were, afterward, under Philip IV, changed to the present name in honor of Mary Ann, of Austria. They extend from 13 deg. to 22 deg. north, and from 145 deg. 35 min. to 148 deg. east.

To the north of Marian Islands are different groups, of which nothing is known except that they are volcanic.

What is known, even at this late day, of the Caroline Islands? Nothing, except that this archipelago lies between the Pescadores on the east, the Marian Islands on the north, and the Pelew Islands on the west. The group does not contain less than two hundred islands. The soil is fertile, but the country is subject to hurricanes.

Of the Mulgrave Islands, (from 0 deg. to 8 deg. south, and 171 deg. to 175 deg. east,) we know their name and position. This chain is connected with the Caroline group by the Pescadores; and probably with the other archipelagos of Polynesia by chains still unknown.

All the seas west from Navigator's Islands to Solomon's group are speckled with detached islands; some of them remarkably fertile and productive.

Feejee Islands, or archipelago, from 16 deg. 30 min. to 19 deg. 48 min. north, and from 175 deg. 5 min. to 179 deg. and 19 min. west.

Sailing eastward, we fall in with the hills and plains of the Friendly Islands. Allowing this cluster to extend as far as the Feejees in the west, the Cocoa and Traitor's Islands in the north, to Savage Island in the east, and to Pytstaert in the south, it will include more than one hundred islands.

The Society Islands have been the theme of more writing than some kingdoms of Europe. Who that has read and not admired the charms of Queen Oberia, and viewed in imagination the festivals of Potomare? The Otaheitans are better known to us than the inhabitants of Sardinia or of Corsica. Otaheite is indeed entitled to the appellation of Queen of the Pacific.

To the southwest and southeast of the Society Islands, a long chain of widely-separated islands extends, beginning with Palmerston, and ending with Easter Islands. To the northeast and east are Gloucester, St. Paul's, Conversion, Michall, and many others but little known.

In passing from Easter Island to the Marquesas, the whole ocean is sprinkled with small islands, low, sandy, and encircled with coral reefs; and here the navigation is exceedingly dangerous. At the north of these low islands we find the lofty Marquesas. These islands were discovered by Mandana, and lie from 7 deg. to 10 deg. south, and from 138 deg. 48 min. to 165 deg. 9 min. west. In sailing east from the Marquesas, no doubt important discoveries are to be made; perhaps Roggerwyer's would be redis-

covered; for these, bearing the name of their discoverer in 1722, must lie between the 9th and 12th parallels of south latitude. No complete account of Roggerwyer's voyage was ever published.

No. 622.

[1ST SESSION.]

ON THE EXPEDIENCY OF AUTHORIZING EXPERIMENTS, TO TEST THE EFFICACY OF URIAH BROWN'S SYSTEM OF DEFENCE FOR BAYS AND HARBORS, BY MEANS OF "IMPREGNABLE AND IRRESISTIBLE FIRE SHIPS."

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 24, 1836.

Mr. JARVIS, from the Committee on Naval Affairs; to whom was referred the memorial of Uriah Brown, relative to "a system of defence for the bays and harbors of the United States, by means of impregnable and irresistible fire ships, reported:

That they have examined carefully, and with much interest, the subject referred to their consideration. It appears that, during the late war with Great Britain, the inventive powers of Mr. Brown were directed to the construction of a steam vessel, which should be proof against cannon shot, and from which, by means of an ejecting apparatus of great power, there should be thrown upon the ships of the enemy a liquid fire, possessing the property of being nourished instead of being extinguished by the application of water. Several satisfactory experiments of the efficacy of the fire were made in the presence of a vast concourse of the citizens of Baltimore, and a model of the boat was examined by a number of eminent citizens, by officers of the army and navy, naval architects and civil engineers, by whom the project was recommended to the patronage of the citizens of Baltimore, as "presenting in all probability the means of insuring to their waters an absolute exemption from the hostile visits of the enemy's ships." A subscription was accordingly opened for the purpose of procuring the necessary

funds for the construction of one of these machines; a sum nearly sufficient was subscribed in Baltimore, and one would have been built if the return of peace had not, in the opinion of many of the subscribers, rendered the expenditure unnecessary.

The merits of this invention have heretofore occupied the attention of the House of Representatives and of this committee. On the 6th of December, 1814, the memorial of Uriah Brown was, by an order of the House of Representatives, referred to the Secretary of the Navy, who made a favorable report on the 23d of the same month.* On the 23d February, 1827, the Secretary of War transmitted to the House a report from the chief engineer, and another from General Bernard, both of which are favorable to the invention. On the 28th of March, 1828, the Committee on Naval Affairs having examined the system, recommended that experiments should be made to test its practical utility for harbor and coast defence, and reported a bill which did not receive the final action of the House. The same committee had the subject again under consideration during the last session of Congress, and were only prevented from making a favorable report by the advanced stage of the session.

The committee concur with their predecessors, and with the Engineer and Navy Departments, in the favorable opinions they have expressed with regard to this invention, and they earnestly recommend that the necessary experiments should be made for testing its practical utility. If the result should be successful, an economical and invaluable element in our system of coast defence would be acquired, which, though it would not supersede the necessity of ships and fortifications, would unite with them, rendering us perfectly secure from any hostile attack upon our shores. The sum required for the experiment, according to a detailed estimate, furnished by Mr. Brown, would be eight thousand dollars, of which rather more than six thousand dollars would be necessary for testing the security of the vessel against cannon shot, and the balance for testing the efficacy of the liquid fire; a sum utterly insignificant, when we consider the great national benefits which may be derived from its expenditure.

Your committee therefore report a bill, authorizing the President of the United States to cause experiments to be made, which shall test the practicability and utility of the fire ship, invented by Uriah Brown.

WASHINGTON, February 7, 1829.

SIR: In answer to your inquiries I would observe that I have carefully and minutely examined the model of a fire ship invented by Uriah Brown, Esq., for the purpose of sea-coast and harbor defence, and am perfectly satisfied of the following facts, viz:

1. That, in consequence of the inclination of the several planes composing this vessel, every shot striking upon any part of it, whether fired from a ship of the line or smaller vessel, will be reflected off without producing any injury.

2. That the vessel can be propelled by the power of steam with a velocity equal to that of our swiftest steamboats, and with as much certainty, her power consisting of two engines of one hundred horse power each.

3. That the inflammable liquid can be projected to a sufficient distance to ensure the destruction of any vessel attacked, without hazard to the fire ship or her crew; there is no doubt it can be projected at least three hundred feet, and most probably more than five hundred feet.

4. This vessel cannot be taken by the boats of an enemy's squadron, because the crew, the machinery, and the means of steering her are all below deck, and therefore getting possession of the deck does not give possession of the vessel. All these who would attempt to board her would either be destroyed by liquid fire, hot water from the boiler, or become prisoners themselves, instead of becoming masters of the vessel, at the option of the commander of the fire ship.

5. It is better calculated than our best steamboats to live in a rough sea, being two hundred feet in length, seventy-five feet in breadth, and of great strength, the sides being two feet thick, of solid oak timber, fastened by strong iron bolts.

6. It cannot be set on fire, as it is proposed to cover every part exposed with thick sheet iron.

7. Simple and efficient means are devised for ventilating it, and also for discovering the direction of, and measuring the distance from, the object to be attacked; while the observer himself is below deck and entirely safe from the enemy's fire.

8. That the inflammable liquid will instantly set on fire any combustible substance on which it strikes, is proved by repeated experiments made in Baltimore in 1814, in presence of the city authorities and thousands of the citizens.

9. The machinery, as well as the crew, are in my opinion better protected from the fire of an enemy in this vessel than in the steam vessel built in New York during the war, and which has met the decided approbation of the government. I have examined the model in company with a large number of gentlemen well qualified to judge, and I do not recollect one who, after such examination, did not express himself satisfied that it would answer every purpose proposed by the projector. With so much probability, then, in its favor, I would ask whether Congress would not be fully warranted in appropriating the small sum of eight thousand dollars, which is all the projector asks, to make such experiments as will remove all doubts on the subject? for should the opinions which have been formed of it be confirmed by such experiments, I presume there is no one who will deny that it would be the cheapest and most efficient means of harbor and sea-coast defence that has ever been devised in any age of the world. A single vessel, stationed in any one of our bays or harbors, would keep it entirely clear of an enemy's ships, or would raise a blockade should that be attempted.

I am, very respectfully, sir, your obedient servant,

A. PARTRIDGE.

Hon. JOHN C. WEEMS, *House of Representatives.*

* See American State Papers, Naval Affairs, vol. 3, No. 367.

WASHINGTON, *January 12, 1835.*

SIR: The House of Representatives having, by a resolution of the 2d instant, "instructed the Committee on Naval Affairs to inquire into the expediency of reporting a bill authorizing the President of the United States to cause such experiments to be made, by a board of engineers, to be by him selected, as shall test the practical utility of a fire ship, invented by Uriah Brown, for harbor and coast defence, and making the necessary appropriation for that purpose," I do myself the honor to lay before the committee sundry official reports and documents, in support of the invention, accompanied by a specification, drawings, and estimates of the cost of building, and the annual expense of maintaining in actual service, in time of war, a vessel upon the plan proposed. I have the honor, also, to submit to the committee a brief history of the invention, and the motives which have induced me, once more, to solicit the attention of my government to this interesting subject.

During the late war with Great Britain, apprehending serious consequences might result to us from the formidable maritime strength of the enemy, my attention was early directed to the subject of devising some new mode of warfare, by which I hoped that greater equality might be produced in the hostile power of belligerent nations, and the strong deprived of the means of longer committing wanton aggressions upon the legitimate rights of the feeble.

I had often indulged the belief that the long-lost secret of preparing the celebrated *Greek fire* might again be recovered; and that by its adaptation to a steam vessel, so constructed as to be invulnerable to cannon shot, an engine of war might be produced, possessing irresistible powers of annoyance, and defying any known means of assault.

Actuated by this conviction, and an anxious desire to benefit my native country, I immediately commenced a series of expensive and highly interesting experiments, having for their end the attainment of this important object.

In the course of these investigations, I had the satisfaction to meet with a success equaling my most sanguine expectations. The plan of a vessel was produced, in acknowledged accordance with the principles of nautical and military science, and admitted by all to be capable of resisting any attack from an enemy's squadron.

To test the efficient properties of the fire, experiments were made by me, upon an extensive scale, in the presence of thousands of the citizens of Baltimore, and such was the acknowledged conviction produced upon their minds, by the astonishing effects of this terrible agent of destruction, that all doubts of the complete practical success of the project were instantly dispelled—a large sum unhesitatingly subscribed to build the proposed vessel, and nothing but the near prospect of peace arrested the progress of the enterprise.

This proposed system of defence has undergone the most scrutinizing investigation, and its practicability and utility sustained by several enlightened theorists and practical engineers. It has, on former occasions, been the subject of the deliberate consideration of the Secretary of the Navy, the Secretary of War, and of the Committee on Naval Affairs of the House of Representatives, by each of whom it has been viewed as of national importance, and supported by their approving reports, as will be seen by a reference to the accompanying documents.

I cannot refrain from expressing to your honorable committee, that twenty years' mature reflection upon the subject has only tended to establish my conviction as to the following facts:

That, with such a gigantic arm of power, we could, at a comparatively trifling expense, effectually defend our extensive water frontier against the combined navies of Europe.

That it would afford the sure means of keeping our bays and harbors constantly open to the free egress and ingress of our commerce, and thereby furnish our navy a better opportunity of protecting our trade and defending our national honor on the high seas.

Finally, that it would be found the cheapest and most formidable means of sea-coast and harbor defence that has ever been devised in any age of the world; and that its moral influence upon our foreign relations could not fail in causing the most powerful nations to desire our friendship—the most unprincipled to respect our rights.

With such evidences of its utility and importance in our national defence, I respectfully solicit of your honorable committee, (not for my present benefit,) to turn your attention to this interesting subject, and take the measures necessary to bring my discovery to the test.

With the aid of eight thousand dollars—in the disbursement of which I desire no agency—I shall be able to test, by actual experiment, all the principles involved in the invention, and prove, by a public exhibition in the face of Congress and the country, the efficiency of my rediscovered *Greek fire* as an agent of destruction. I therefore respectfully solicit that a bill may be reported, appropriating eight thousand dollars, to be expended under the direction of such authority as you may be pleased to designate, in making the experiments as contemplated in the resolution. And I further solicit that the Secretary of the Navy be directed, in said act, in case the board of engineers, constituted for the purpose of superintending these experiments, shall be satisfied of the practicability of the plan, to cause a vessel to be built upon the principles suggested—proof against cannon shot—for the purpose of conveying this destructive fluid, and throwing it upon an approaching enemy. And, so confident am I of the practicability of my plan, that I am prepared to hazard my life in a vessel built according to my direction, in destroying, by fire, any combustible floating object, though protected by *any* force or number of guns.

Having given the highest evidence of my own confidence, which it is in the power of man to give, I fondly hope that the pittance necessary to put so important a matter to the test will at length be granted from an overflowing treasury, confident, as I am, that it will be the means of saving to our country millions of property and thousands of lives.

With sentiments of the highest consideration,

I have the honor to be, sir, your obedient servant,

URIAH BROWN.

Hon. C. P. WHITE, *Chairman of the Committee on Naval Affairs, H. R.*

P. S.—I shall be happy to be indulged with an opportunity of appearing before your committee, for the purpose of illustrating more fully the principles of my invention, whenever it may best suit their convenience, and of which they may be pleased to notify me. I will also furnish them a model of the vessel, should that be desired.

U. B.

Estimate of the expense of making such experiments, under a board of engineers, to be selected by the President of the United States, as shall test the correctness of the principles involved in a fire ship, invented by Uriah Brown, for harbor and coast defence.

1. For testing the security of the vessel against the effects of cannon shot:	
1,200 cubic feet best white oak timber, to construct a plane for a course of experiments in firing, at 25 cents.....	\$300 00
2,800 lbs. iron bolt, for securing the timbers of the above plane, at 5 cents.....	140 00
4,000 lbs. quarter inch rolled iron, for covering the above plane, at 12½ cents....	500 00
200 lbs. spikes, for the above plane.....	20 00
One cross-barred grating, for the above plane, weight 3,445 lbs., at 12½ cents..	443 12
1,650 lbs. powder, (150 rounds of cartridges,) at 25 cents.....	412 50
4,800 lbs. 32-pound balls, at 5 cents.....	240 00
Cost of labor, &c., in constructing the above plane, say.....	45 00
	\$2,100 62
Total cost of this part of the experiment.....	
2. For ascertaining the speed with which a vessel of the plan proposed can be propelled by steam, including the cost or charter of a vessel suitable for the purpose, condensing pumps, propelling wheel, and other necessary apparatus, with fuel, &c.	
	4,175 00
3. For the purpose of testing the efficiency of the rediscovered <i>Greek fire</i> :	
Cost of ejecting-engine, pipes, stop-cocks, &c., say.....	\$750 00
Ingredients for 1,000 gallons inflammable liquid, at 75 cents.....	750 00
	1,500 00
Total cost for this part of the experiment.....	1,500 00
For all other incidental and contingent expenses.....	224 38
	\$8,000 00

Respectfully submitted.

URIAH BROWN.

24TH CONGRESS.]

No. 623.

[1ST SESSION.

ON THE EXPEDIENCY OF ESTABLISHING A NAVY YARD AT BALTIMORE, MARYLAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 25, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the resolution of the mayor and city council of Baltimore, in favor of the establishment of a navy yard at that city, with instructions to inquire into the expediency of making such an establishment, reported:

That there are already two navy yards established within the Capes of the Chesapeake, viz: those of Washington and Norfolk, which are abundantly sufficient for all the purposes of the navy in this quarter, and the following resolution is therefore submitted.

Resolved, That it is inexpedient to establish a navy yard at Baltimore.

24TH CONGRESS.]

No. 624.

[1ST SESSION.

ON THE EXPEDIENCY OF INCREASING THE PAY OF THE WARRANT OFFICERS OF THE NAVY ON SHORE DUTY AT NAVY YARDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 26, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of the boatswains, gunners, carpenters, and sailmakers in the navy, asking for an increase of pay, reported:

That prior to the passage of the act of 3d March, 1835, the emoluments of these warrant officers, when on sea service, exclusive of one ration, were three hundred and thirty-one dollars and twenty-five cents; when attached to navy yards, where there are quarters provided, their compensation amounted to six hundred and fifty-one dollars and seventy-five cents; and in the yards where there were no quarters, to seven hundred and forty-one dollars and seventy-five cents. The whole number of these officers, according to the Navy Register, is eighty, of whom only eighteen received the highest amount of compensation.

By the act of March 3, 1835, the compensation of this class of officers was regulated as follows: at sea, in ships of the line, seven hundred and fifty dollars; in frigates, six hundred dollars; in sloops and small vessels, five hundred dollars; and on shore duty, five hundred dollars. The increase of the compensation, for sea service, was therefore from fifty-one to one hundred and twenty-six per cent., and the decrease, when attached to navy yards, was from twenty-three to thirty-three per cent. nearly.

The increase of the pay afloat is considered to have been liberal and sufficient, and there is no disposition on the part of the committee to recommend any farther augmentation of it; but in their opinion the pay of these officers, when attached to navy yards, is inadequate, and they cannot persuade themselves that it was the intention of the framers of the bill, which was passed at the last session, to make so large a reduction. Presuming that it must have been done through inadvertence, and believing that it would be difficult to procure officers competent to discharge the duties required at the yards for the present pay, they recommend that it should be increased from five hundred dollars to six hundred and fifty dollars, and for this purpose a bill is reported.

24TH CONGRESS.]

No. 625.

[1ST SESSION.]

ON THE CLAIM OF MICHAEL HOGAN, FOR COMMISSIONS ON DISBURSEMENTS AND NEGOTIATED BILLS, CLERK HIRE, OFFICE RENT, AND DAMAGES ON PROTESTED BILLS, WHILST ACTING AS AGENT FOR THE NAVY DEPARTMENT AT VALPARAISO, CHILI.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 29, 1836.

Mr. PARKER, from the Committee on Naval Affairs, to whom was referred the bill from the Senate (No. 31) entitled "An act for the relief of William Hogan, administrator of Michael Hogan, deceased," with the accompanying documents and report of the Committee on Naval Affairs, of the Senate, in support of said bill, reported:

That on the 11th November, 1820, Michael Hogan was "appointed, by the President of the United States, as their agent for commerce and seamen at Valparaiso, and all the ports on the coast of Chili in South America," and, being about to depart for that station, the Secretary of the Navy addressed to him the following letter, viz:

"NAVY DEPARTMENT, *November 24, 1820.*

"SIR: In the event of the United States ships-of-war visiting the ports of Chili, you are hereby authorized to act in behalf of this Department as agent for furnishing such supplies as the service may require; and for which your drafts upon this Department, in reimbursement, will be duly honored on presentation.

"I am, very respectfully, sir, your most obedient servant,

"SMITH THOMPSON.

"To MICHAEL HOGAN, Esq., *Agent of the United States at Valparaiso.*"

Under the authority of this letter, Mr. Hogan furnished supplies to the ships-of-war of the United States in the ports of Chili, and distributed, also, provisions and stores of various kinds forwarded to him from the United States for the use of vessels of the United States on that station, until the year 1830, when his further agency was terminated by the government.

No agreement, as to the remuneration to be allowed for his services, appears to have been made between the Navy Department and Mr. Hogan at the time the agency was created by the Secretary's letter of November 24, 1820. The first communication that appears to have passed between the parties on this subject is a letter to Mr. Hogan from the Secretary of the Navy, (C,) dated 16th November, 1822, in which, referring to the authority in the letter of the 24th November, 1820, he says: "as nothing was said in that letter in relation to the commission by which you were to be compensated for your trouble in negotiating bills and making disbursements, it is deemed proper now to inform you that upon all disbursements you will be allowed a commission of two and a half per centum."

The above letter was received by Mr. Hogan on the 24th April, 1823, and his reply, dated the 30th of that month, (D,) is a remonstrance against the rate of compensation mentioned in the Secretary's letter. Mr. Hogan says: "If my services were to be remunerated in the ratio that merchants acting for others here are, the compensation would be great; their charges for doing ill, what I conscientiously believe I do well, equal ten per cent.; and when you take into consideration, which I trust you will be pleased to do, the altered state of this country, from being cheap to being the dearest and most disagreeable, you will, I hope, be convinced that five per cent. is not too much; there never was one more faithfully earned." He adds, afterwards, "the accounts, which have been made up to the close of last quarter, are charged with five per cent. I hope, on reconsideration, you will be pleased to allow that charge to continue; my services here more than merit it, if they merit anything;" &c.

The account current of Mr. Hogan, above referred to, commencing in 1821, and dated 31st March, 1823, is the first account rendered by him after his arrival at Valparaiso, and in that account he charges five per cent. on the amount of his disbursements, and, also, "office hire," from 21st July, 1821, at \$600 per annum. The reimbursement of this account was made by bills drawn on this government by Mr. Hogan in part, and part by bills on St. Jago, Chili, handed over by Captain Stewart for collecting, on which one per cent is charged, and from the whole amount of credit, Mr. Hogan deducts two and a half per cent. as a commission for "drawing and negotiating bills."

The accounts of Mr. Hogan appear to have been rendered from time to time, afterwards making the same deduction of two and a half per cent. for the amount of bills drawn and negotiated, while on the part of the government the charge has been uniformly disallowed and rejected. The charge of "office hire" has also been continued and allowed up to 1827, to an amount, in the whole, of \$3,425, after which date it was not allowed. In subsequent accounts, a charge of "clerk hire," at \$1,000 per annum, was made by Mr. Hogan, which was also disallowed and rejected, and has been abandoned by him.

It is contended that, by the letter of authority of 24th November, 1820, Mr. Hogan was "constituted the mercantile agent and factor of the government, and, as such, was entitled to such percentage of commissions for services rendered as are established by the commercial usages of the place where they were rendered."

The committee do not consider Mr. Hogan as a regular navy agent under the authority of the act of the 3d March, 1809, but they do consider him as an agent of the Navy Department, for the purposes mentioned in the letter, under the authority of which he acted; and that his compensation was prescribed by the subsequent letter of November 16, 1822, and certainly limited by the amount of commission asked for by him in his answer of 30th April, 1823. The Secretary of the Navy tells him that "for his trouble in negotiating bills and making disbursements," he will be allowed a commission of two and a half per cent. "on all disbursements." Mr. Hogan, in answer, does not claim that he is acting as a mere merchant, and entitled to commission according to usage, but objects to the amount as insufficient, and claims an allowance of five per cent. This has been allowed to him, and an additional charge, for "office hire," during the greater part of his agency. It appears then, to the committee, that the two letters last referred to (the allowance of five per cent. having been accorded) constitute an agreement between the government and Mr. Hogan, fixing his compensation for his "trouble in negotiating bills and making disbursements," under the authority conferred upon him by the Navy Department, at a "commission of five per cent. upon all disbursements."

But the committee think it their duty further to remark, that they find, in the papers accompanying this claim, reasons to believe that Mr. Hogan could not have considered himself as acting in the capacity of a mere mercantile agent and factor. In his account, rendered the 31st of December, 1823, Mr. Hogan styles himself "navy agent." He charges "office hire" and "clerk hire;" items which never yet entered into the account of a commission merchant against his employer. These charges made by the agent, (himself a merchant,) in the early part of his agency, and continued for several years, seem to put a negative upon the idea that he considered himself as a mercantile agent, and not a special agent, and cannot be supposed to have been made under "misapprehension of the facts as to the origin and true character of his appointment."

The services required of Mr. Hogan appear to have been honestly and faithfully performed; and if the allowances made by the government were insufficient and inadequate to their value, a fair compensation ought to be made. The committee, upon an examination of this subject, find the amount received by Mr. Hogan, for commissions on disbursements made by him, on the invoice prices of all articles sent to him for distribution, on the sale of articles belonging to the United States, and on articles sold to pursers in the navy, and for other allowances, according to a statement made by the Fourth Auditor, in March, 1831, was..... \$48,123 82
To which may be added the allowance of "office hire"..... 3,425 00

\$51,548 82

If this amount were insufficient, there might be added an allowance made by a committee of the House of Representatives, and paid to Mr. Hogan, under the general appropriation bill of 2d March, 1833, as a salary for diplomatic services in Chili, from 18th September, 1821, to 26th March, 1824, and from 29th October, 1829, to 2d May, 1831, four years nine days, at \$4,500 per annum..... \$18,122 50

Forming an aggregate to the same individual of..... \$69,671 32
During a period of a little more than nine years.

Under all these circumstances, the committee are of opinion that the allowance of \$16,348.02, as a commission of 2½ per cent. for "drawing and negotiating bills," provided by the bill from the Senate, subject to a deduction of \$3,425, allowed by the Department for "office rent," ought not to be made.

The second allowance claimed by the petitioner is for interest on moneys advanced for the supplies to the Constellation and other vessels, in 1821, for five months, during which time he paid interest on part of the amount, and refrained from drawing bills in reimbursement, with a view to raise the rate of exchange, in which he states that he succeeded. This charge does not appear to have been made by Mr. Hogan at the time, but, from considerations stated in the report of the Committee on Naval Affairs of the Senate, its justice is not questioned. On the third item of claim, viz: the damages, interest, and charges of protest on certain bills drawn by the agent, Mr. Hogan, on the Navy Department, and dishonored and protested, the committee do not hesitate to express the opinion that, as to all such bills as the Department have paid subsequent to the protest thereof, (thereby acknowledging the right of the agent to draw,) the damages, interest, and other charges paid by Mr. Hogan ought to be allowed him. The precise amount to which he may be entitled on this head being unknown, the committee leave its adjustment to the Department, upon proper proofs to be adduced, and they report the bill from the Senate, with amendments corresponding with the views contained in this report.

C.

Navy Department, November 16, 1822.

Sir: By a letter from this Department, bearing date the 24th November, 1820, you were authorized, in the event of any of the United States ships-of-war visiting the ports of Chili, to act on behalf of this Department, as agent, for furnishing such supplies as the service might require.

As nothing was said in that letter in relation to the commission by which you were to be compensated for your trouble in negotiating bills and making disbursements, it is deemed proper now to inform you that, upon all disbursements, you will be allowed a commission of two and one-half per centum.

You will, therefore, charge the same in your accounts, commencing from your first transaction for account of this Department.

I am, respectfully, &c.,

SMITH THOMPSON.

MICHAEL HOGAN, Esq., Valparaiso, S. A.

D.

VALPARAISO, April 30, 1823.

Sir: On the 24th instant I was honored with your letter of the 16th November last, brought from Lima, and perceive, with regret, that you are pleased to order I must only charge $2\frac{1}{2}$ per cent. on disbursements, for my remuneration for my services to the Navy Department; this is the more painful, because the distance is so great there is no mode of convincing you of the difficulty and vexation I have had to encounter with this government, on account of the duties I have had to perform for the Department, until Commodore Stewart returns home, who might explain what little he knows of it. My whole time has really and truly been chiefly occupied for its benefit; and although the deplorable times that have passed have increased the expenses, easily accounted for by misfortunes: first, scarcity, approaching to famine; next, by the misrule of a people ignorant of their own interest, in the mal-administration of a government, so venal as to produce a revolution that overturned it; thirdly, the act of God, in an earthquake, that destroyed property for every one that had any, and produced scarcity and distress, raised prices of the articles of life, that will not readily lower.

Although we have suffered, in common with the squadrons of other nations, and private individuals, our loss has, in proportion, been less than any other, in consequence of the exertions made to prevent it. Nothing was, or ever will be, left undone by me to save and serve the Department, which has benefited, I hope, largely by the economy used in the care of its concerns here.

If my services were to be remunerated in the ratio that merchants acting for others here are, the compensation would be great; their charges for doing ill, what I conscientiously believe I do well, equal ten per cent.; and when you take into consideration, which I trust you will be pleased to do, the altered state of this country, from being cheap, to being the dearest and most disagreeable, you will, I hope, be convinced that five per cent. is not too much; there never was one more faithfully earned.

In fact, my dependence is upon it; the office of consul has only produced me, by fees, in nearly two years, nine hundred dollars; to expect commission from merchants is useless—the consul that will do his duty never will have any. I do mine fearlessly, even if I starve in consequence; it is rather an expense, than an advantage; much is expected from me in that capacity, particularly in this country, where there is no other housekeeping representative of any other nation; even this government expect that a good salary is attached to it.

I hope our own government will do something to regenerate that sinking but useful office, otherwise it must be abolished.

The accounts, which have been made up to the close of the last quarter, are charged with five per cent. I hope, on reconsideration, you will be pleased to allow that charge to continue; my services here more than merit it, if they merit anything; even my enemies, for some I have made by a just discharge of my duties, will allow that I deserve what I get. The impediments, from the numerous petty officers through which all business must pass, are so great, that the trouble is five times greater than in any other part of the globe. While two and a half per cent. may be applicable at Gibraltar, where reason rules, and where it is easier to do the business of a large squadron than of a frigate on this coast, five per cent. is but a moderate remuneration for one who will do his duty justly. Every article purchased must, that instant, be paid for; the people of the country know no other mode, therefore money must be ready if one means to preserve the honor of his government or his own credit; I have done both, and never suffered the smallest slight from the inferior officers of the government, too ready to impose, without resenting it at once.

The merchants are eternally bribing those fellows who are the most unfaithful to their government; I cannot expend public money in that way; if I could, I am principled against it, and would not do it for any one.

With perfect respect, I have the honor to be, sir, your very faithful and obedient servant,

MICHAEL HOGAN.

To the Hon. SMITH THOMPSON, *Secretary of the Navy.*

G.

A statement showing the allowances made by the United States to Michael Hogan, late navy agent at Valparaiso, from the 20th of September, 1821, the date of the first bill paid by him, to the 26th day of November, 1830, the day his agency terminated.

Five per centum commission on all disbursements made by him for the United States, viz:	
From 20th September, 1821, to 31st March, 1823, inclusive.....	\$5,121 53
From 1st April to 30th November, 1823, inclusive	4,922 99
From 1st to 31st December, 1823, inclusive	297 07
From 1st January to 31st December, 1824, inclusive	5,681 04
From 1st January to 31st December, 1825, inclusive.....	3,217 70
From 1st January to 31st December, 1826, inclusive.....	1,608 63
From 1st January to 31st March, 1827, inclusive.....	515 40
From 1st April, 1827, to 30th June, 1828, inclusive	1,957 68
From 1st July, 1828, to 31st December, 1829, inclusive.....	4,214 31
From 1st January to 31st March, 1830, inclusive.....	1,350 12
From 1st April to 30th September, 1830, inclusive	249 10
	\$29,135 57

Five per centum commissions on the invoice prices of all articles sent to him for distribution, viz:

On all shipments to him prior to 1st April, 1827	\$4,759 25
On slops left at Valparaiso by Jos. Watson, purser.....	30 40
On slops sent on shore at Valparaiso, by the United States ship Franklin, "to be returned to her when wanted;" had not room in the Franklin for them..	418 50

On invoice of the Brazilian.....	\$1,418 40	
On invoice of the Mandarin.....	733 40	
On invoice of the Herald.....	1,816 98	
On invoice of the Rasselas.....	1,247 78	
On invoice of the London.....	1,872 62	
On rope landed from the Vincennes.....	169 17	
On rope landed from brig Adeline.....	190 52	
On 22 inch cable received by the Herald for the Guerriere; (left in store at Valparaiso—not taken by the Guerriere).....	75 62	
On slop clothing landed from the Vincennes and Brandywine.....	197 62	
On invoice of brig Charles.....	353 25	
		\$13,233 51
One per centum commission "on bills drawn (on United States Navy Department) in favor of persons residing at Santiago, on which the expenses in collecting and bringing it to this town (Valparaiso) are chargeable".....		652 87
Five per centum commission on articles sold, belonging to the United States, viz:		
On flour sold at auction.....	\$41 95	
On slop clothing sold at auction.....	143 70	
On damaged flour sold at auction.....	1 70	
On beef and pork sold at auction.....	10 20	
On twenty barrels pork sold.....	18 00	
On beef sold to whale ship Lima.....	9 60	
On beef furnished Portia.....	14 00	
		244 15
For premium on hard dollars furnished for the use of the United States navy, viz:		
Five per centum premium on \$11,000 furnished the United States ship Franklin, "as explained in my letter to the Secretary of the Navy".....	\$550 00	
Nine per centum premium on 4,000 Spanish dollars furnished to W. M. Sands, purser, (Purser Cox and others certify that they were worth nine per cent.).....	360 00	
Seven and a half per cent. on 4,000 Spanish dollars furnished to W. M. Sands, purser.....	300 00	
Seven and a half per cent. on 300 hard dollars furnished to J. Edelin.....	22 50	
		1,232 50
For notarial fees while discharging the ships Potosi and Armina, and the brig Orion; 19 days, at \$3 per day.....		57 00
For protesting bill drawn by R. Gardner on E. Young, for \$8,000.....	\$30 00	
For protesting bill drawn by R. Gardner on R. J. Cleveland, for \$20,000.....	11 00	
		41 00
For collecting at Lima, Gardiner's, and Hall & Moreen's bills, amounting to \$28,795, at 2½ per cent.....		717 95
For changing gold ounces for making payments, from 1st October, 1821, to this day (31st March, 1826,) 5½ years—300 ounces, at 25 cents each.....		75 00
Five per cent commission on articles sold to the following persons, viz:		
To E. N. Cox, purser of the Brandywine.....	\$579 86	
To McKean Buchanan, purser of the Vincennes.....	78 42	
To E. Fitzgerald, purser of the Franklin.....	1,412 71	
To B. F. Bourne, purser of the Constellation.....	423 62	
To Jos. Wilson, purser of the Guerriere.....	189 66	
		2,684 27
Total.....		\$48,123 82

AMOS KENDALL.

TREASURY DEPARTMENT, *Fourth Auditor's Office, March 2, 1831.*

24TH CONGRESS.]

No. 626.

[1st Session.]

ON THE MEANS AND MEASURES NECESSARY FOR THE MILITARY AND NAVAL DEFENCES OF THE COUNTRY.

COMMUNICATED TO THE SENATE APRIL 8, 1836.

WASHINGTON, *April 8, 1836.**To the Senate:*

I transmit herewith reports from the Secretaries of the War and Navy Departments, to whom were referred the resolutions adopted by the Senate on the 18th of February last, requesting information of the probable amount of appropriations that would be necessary to place the land and naval defences of the country upon a proper footing of strength and respectability.

In respect to that branch of the subject which falls more particularly under the notice of the Secretary of War, and in the consideration of which he has arrived at conclusions differing from those contained in the report from the Engineer Bureau, I think it proper to add my concurrence in the views expressed by the Secretary.

ANDREW JACKSON.

NOTE.—For the documents from the Navy Department, communicated with this message, see American State Papers on Military Affairs, vol. 6, No. 671.

24TH CONGRESS.]

No. 627.

[1ST SESSION.]

ON THE CLAIM OF LOAMMI BALDWIN, AS ENGINEER AND SUPERINTENDENT OF CONSTRUCTION OF DRY DOCKS FOR THE NAVY.

COMMUNICATED TO THE SENATE APRIL 13, 1836.

Mr. SOUTHARD made the following report:

The Committee on Naval Affairs, to whom was referred the memorial of Loammi Baldwin, take leave to refer the Senate to the memorial, and the papers which accompany it,* for a brief and accurate statement of the facts and evidence in support of the claim, which justify the opinion that the claim is just; and report a bill for the relief of the petitioner.

24TH CONGRESS.]

No. 628.

[1ST SESSION.]

PROCEEDINGS OF CERTAIN OFFICERS OF THE NAVY AND MARINE CORPS, RECOMMENDING THE ESTABLISHMENT OF A NAVAL ACADEMY.

COMMUNICATED TO THE SENATE APRIL 23, 1836.

At a meeting of the commissioned and warrant officers of the United States ship Constitution, held on board, for the purpose of concerting measures to effect the establishment of a Naval academy, the following preamble and resolutions were unanimously agreed to:

Whereas, having ever felt the most ardent desire to prosecute successfully the profession to which we are devoted, to advance the interests of the navy, and to perpetuate the commercial prosperity of our common country, consigned in part to our safe keeping; and taught, by the experience of the past, that neither industry nor talent can spare the advantages offered by early education, earnestly desirous of the means of securing it, and deploring the inadequacy of the existing system to accomplish either the object of the government, or to meet our heartfelt wishes for professional instruction; and believing, as we do, that a respectful representation of the anxious hopes which the entire navy have ventured to indulge for so many years, and to the consummation of which they look with the deepest interest, will receive the consideration to which so excellent an object is entitled, and find, from liberal authorities, that indulgence which is ever acceded to generous aspiration and laudable exertions; we have therefore

1. *Resolved*, That we deem education to be of peculiar importance to the sea officer; and that, amid the progressive improvements in the arts and sciences, which distinguish the present age, the military marine would be most conspicuous, if guided in its advance by the lights of education.

2. *Resolved*, That we look to the establishment of a naval school as the only means of imparting to the officers of the navy that elementary instruction and scientific knowledge which, at the present day, has become almost indispensable to the military seaman.

3. *Resolved*, That, from circumstances arising in part from professional causes, the ship's schoolmasters can rarely, if ever, impart such elementary or scientific knowledge, or advance the education of the navy officer; and that were the office absolutely abolished, (of so little utility is it,) that no evil would arise therefrom.

4. *Resolved*, That, believing the expense incurred by government in providing ships' schoolmasters and professors of mathematics, for the benefit of the junior officers of the navy, (and from which little or no advantage is derived,) would liberally sustain a scientific institution, we should see, with pleasure, said funds directed to the establishment and support of a naval school.

5. *Resolved*, That copies of these proceedings be furnished to the Secretary of the Navy, with a request that he will lend his countenance and support to our undertaking.

6. *Resolved*, That we will, severally and collectively, use our most strenuous exertions to effect an object so dear to us, and which promises to confer so much dignity upon the navy, so much honor on our beloved country.

7. *Resolved*, That a committee of ten be appointed to take charge of the subject, and conduct it to its final disposition.

8. *Resolved*, That the Secretary of the Navy be requested to lay a copy of the foregoing resolutions before the President of the United States; and that a copy of them be sent to the chairman of the Committee on Naval Affairs in the Senate and in the House of Representatives.

J. B. MONTGOMERY, *Lieutenant*.

F. Ellery, Lieutenant; Isaac Brinckerhoff, Assistant Surgeon; Edward C. Rutledge, Lieutenant; G. F. Pearson, Lieutenant; James Ferguson, Master; Thomas Theo. Sloan, Lieutenant Marines; Levin Mynn Powell, Lieutenant; Thomas I. Boyd, Surgeon; James Everett, Chaplain; Henry Etting, Purser; Jos. L. C. Hardy, Lieutenant United States Marine Corps; Montgomery Lewis, Passed Midshipman; J. W. Revere, Passed Midshipman; Charles Crillon Barton, Passed Midshipman; James B. Lewis, Midshipman; R. Lloyd Tilghman, Midshipman; Jno. N. Maffit, Midshipman; Geo. T. Sinclair, Midshipman; Geo. W. Randolph, Midshipman; John F. Mercer, Passed Midshipman; Francis S. Haggerty, Midshipman; B. F. Shattuck, Midshipman; E. E. Rogers, Midshipman; Stephen D. Trenchard, Midshipman; A. Hubley Jenkins, Midshipman; W. T. Muse, Passed Mid-

* For the papers referred to, see American State Papers, Naval Affairs, No. 571

shipman; James F. Duncan, Passed Midshipman; Frederick Oakes, jr., Passed Midshipman; W. C. Nicholson, Lieutenant; F. A. Neville, Lieutenant; John M. Berrien, Passed Midshipman; Charles Steedman, Passed Midshipman; Jas. L. Henderson, Passed Midshipman; Francis P. Hoban, Midshipman; James W. Cooke, Passed Midshipman; William Radford, Passed Midshipman; Wm. Ronckendorff, Midshipman; Robert Woodworth, Assistant Surgeon.

The undersigned officers of the United States ship *Vandalia* concur entirely in the above preamble and resolutions.

Thomas T. Webb, Master Commandant; E. T. Doughty, Lieutenant; Isaac N. Brown, Midshipman; Thomas W. Cumming, Midshipman; Edwin A. Drake, Midshipman; William Plumstead, Surgeon; R. N. Stembel, Midshipman; E. Musson, Midshipman; Fayette Meynard, Midshipman; Francis Alexander, Midshipman; S. C. Rowan, Acting Master; M. C. Watkins, Midshipman; William M. Walker, Passed Midshipman; William Smith, Lieutenant; C. A. Hassler, Assistant Surgeon; James Brooks, Purser.

[1st Session.]

STATEMENT OF THE NAMES, THE PAY, AND ALL EMOLUMENTS AND ALLOWANCES PAID; THE ITEMS OF ALL ALLOWANCES; AND THE STATIONS AND SERVICES OF ALL THE OFFICERS OF THE NAVY IN 1833 AND 1834.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 23, 1836.

NAVY DEPARTMENT, *April 22, 1836.*

SIR: I have the honor, in compliance with the resolution of the House of Representatives, of the 17th of January, 1835, to send herewith the abstracts and statements therein required, as to the compensation, allowances of all kinds, and the stations, grades, and places and distances traveled to and from, by the officers of the navy enumerated.

After the passage of the act increasing the pay of officers of the navy, it was presumed the information would not be required, (as, from its various character, and the greater number of accounts, records, and returns to be carefully examined, it could not be prepared before the 3d of March, 1835, when that act was passed) and the examination, &c., was then discontinued; otherwise it would have been earlier furnished. Having, since the present session commenced, received a communication from the mover of the resolution, that the information was still desired, the report has been prepared with as much expedition as the necessary current duties of the Department would permit.

I have the honor to be, very respectfully, your obedient servant,

M. DICKERSON.

Hon. JAMES K. POLK, *Speaker of the House of Representatives, United States.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, January 28, 1836.*

SIR: I have the honor to transmit herewith a report, prepared in conformity with the resolution of the House of Representatives, of the 17th of January, 1835, upon the motion of the Hon. Mr. Mann, of New York; and it may be proper to state why it has been so long delayed. It was commenced soon after the resolution was communicated to this office, but after making some progress it was discovered that it could not be prepared before the end of the session, and was suspended for that reason; and after the passage of the act of the 3d of March last, regulating the pay of the navy, it was supposed to be no longer necessary, and was therefore abandoned.

I was not myself aware of the existence of the resolution, until Mr. Mann inquired for the report early in the present session, and stated that he wished it to be prepared. This has been done; and as much labor and research have been requisite, it could not have been finished in less time, without neglecting the current business of this office further than a due regard to the public interests would warrant.

Upon an inspection of the report, it will be perceived that there are some very striking inequalities in the pay of officers of the same rank. This will be explained by a reference to the nature of the service performed by them and the law regulating their pay.

I have the honor to be, very respectfully, your obedient servant,

J. C. PICKETT.

Hon. MAHLON DICKERSON, *Secretary of the Navy.*

General statement, showing the aggregate pay and emoluments, including all stated and special allowances actually paid and allowed to each commissioned officer, by name, of the navy of the United States, for the fiscal years ending September 30, 1833 and 1834.

Names.	Pay and rations for 1833.	Allowances of all kinds for 1833.	Aggregate for 1833.	Pay and rations for 1834.	Allowances of all kinds for 1834.	Aggregate for 1834.
CAPTAINS.

24TH CONGRESS.]

No. 630.

[1st Session.]

ON CLAIM OF THOMAS B. PARSONS, A SEAMAN IN THE NAVY, FOR ARREARS, AND INCREASE OF PENSION ON ACCOUNT OF PERSONAL INJURIES SUSTAINED BY EXTRAORDINARY EXERTIONS IN SAVING THE LIVES OF TWO OFFICERS AND FIVE SEAMEN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 27, 1836.

Mr. REED, from the Committee on Naval Affairs, to whom was referred the memorial of Thomas B. Parsons, reported:

The memorialist states that, in the autumn of 1807, he was mate of the ship Charles; that on the arrival of said ship at New Orleans the officers and crew were dismissed, on account of the embargo; that he entered into the service of the United States early in the year 1808, as a seaman, with a promise and understanding that he should have the office of quartermaster. He further states that he entered on board gunboat No. 11, and was transferred from boat to boat until he came on board boat No. 22, commanded by Sailingmaster Brown, Thomas Ap Catesby Jones acting as lieutenant. In July, 1808, said

gunboat No. 22 was fitted out to capture a smuggling vessel in the river Sabine. In crossing Grand Zena bar the boat grounded and filled with water. Thus situated, being in the most imminent danger, as the only means of escape, Sailingmaster Brown, and Parsons, the memorialist, attempted to swim to the shore, the distance being nearly two miles. Brown must have perished in the attempt but for the timely and efficient aid of Parsons; both arrived safely to the shore; after resting a few minutes, Parsons returned again to the boat and took Lieutenant Jones (who could not swim) upon his back, and bore him safely to the shore. Parsons then returned a second time to the boat and by his exertions got the boat and men, who were still holding upon it, to the shore. Thus Parsons, the memorialist, almost miraculously saved the lives of Brown, Jones, and five seamen. The truth of the facts stated in this report is fully proved by the certificate of Captain Thomas Ap Catesby Jones, then Lieutenant Jones, and one of the persons whose lives were saved.

In performing the extraordinary exploit above stated, Parsons ruptured himself severely, insomuch that he was dismissed from the service of the United States, as no longer capable of performing its duties.

At the time he was dismissed he asked for some assistance in a pension, but it was refused, because our pension law provided for those only who were wounded in battle.

Thus it appears that the memorialist lost his health and ability to support himself and family in the service of his country, and in saving the lives of his countrymen. That he voluntarily periled his life and sacrificed his health in the noblest and most *useful service* to his country, and yet so far from receiving any reward or remuneration, was dismissed *from the service* on account of the very deeds that gave him a just claim to their highest approbation and protection and aid.

Infirm and feeble as he was, he has struggled along and supported himself and family until May, 1835, when he became entirely unable to go to sea any longer. He then applied for a pension, and obtained one at the rate of six dollars per month, commencing in May, A. D. 1835.

Your committee know not which most to admire—that heroism and devotion which periled his own life and health in saving the lives of others; or that patient and unobtrusive merit which neither published his exploits or asked relief a second time (so long as he could support himself) on account of the evils he had suffered.

The case of the petitioner seems to the committee signally meritorious, and deserving the highest commendation of the government. Had he ruptured himself or been wounded in fighting the battles of his country, and destroying her enemies, thanks and a pension would have been awarded. Surely it is more glorious to save the lives of friends than to take the lives of enemies.

Your committee make the memorial of the petitioner and the certificate of Captain Jones a part of their report. They ask leave to report a bill for his relief.

To the honorable Senate and House of Representatives of the United States, in Congress assembled:

Thomas B. Parsons, of Portland, in the county of Cumberland, State of Maine, mariner, respectfully represents that, in the fall of the year 1806, in December, he arrived at the port of New Orleans as mate of the ship Charles, of Newburyport, Massachusetts; and shortly after his arrival the embargo was laid, in consequence of which the ship was hauled up and the crew discharged.

Your petitioner, early in the year 1808, entered the United States naval service under Lieutenant Commandant John Rush, on board gunboat No. 11, as quartermaster, or rather with the promise of being made quartermaster.

In a short time after your petitioner entered the service, Lieut. Leonard came on and took command, and we proceeded to Balize, and were there drafted to different gunboats, when your petitioner was assigned to gunboat No. 20, Lieut. John D. Henley, commander. Soon after this your petitioner was transferred to gunboat No. 22, commanded by Sailingmaster Brown, Midshipman Thomas Ap Catesby Jones, acting lieutenant, at which time said boat, No. 22, lay at Bayou Terra. In June, or first of July, 1808, an expedition was fitted out from said boat, No. 22, to take a smuggler said to be in the river Sabine. Sailingmaster Brown, Midshipman Jones, and six of the crew, including your petitioner, composed this expedition.

In crossing Grand Terra bar our boat filled with water and capsized, when Sailingmaster Brown attempted to swim on shore, but, his strength failing him, your petitioner went to his assistance, and by means of an oar and a boat's thwart got him to land. Your petitioner then stripped off his clothes and swam off to the boat again to the relief of Midshipman Jones, who was holding on to the bottom of the boat. As Midshipman Jones could not swim, your petitioner took him on his back and swam to shore with him; and as the current set strong along the shore your petitioner was obliged to swim, thus laden, a considerable distance before he could reach the land. After resting long enough to take breath, your petitioner again swam off to the boat, and got her, with the men remaining on her bottom, to the land, at a distance of about three miles from the place where she capsized. By this extraordinary exertion your petitioner was ruptured in the left side, but still endeavored to perform his duty.

Soon after the expedition of said boat No. 22 returned, Commandant David Porter, then a lieutenant, took command of the New Orleans station, and Lieutenant Douglas took command of said boat No. 22, when your petitioner was put on duty of quartermaster, having, as before stated, entered the service as a quartermaster at first, being unable, from his wound, longer to do duty as coxswain of the boat. But this rupture becoming very troublesome, and evidently affecting your petitioner's health, he was in November following discharged, on account of this disability.

By great care and prudence your petitioner so far recovered his health that, during the war of 1813, he again went to sea, as sailingmaster of the privateer Fox, and afterwards as sailingmaster of the privateer General Armstrong, and, after peace, as master of several merchant vessels, by which he was enabled to get a living without much bodily exertion. But his wound always troubled him, and for several years past has totally disabled him from doing any labor, or even from taking the responsibility of sailing or commanding a vessel, and he has been obliged to abandon the sea altogether.

While your petitioner was able to earn his bread he did not wish to trouble his government; but having expended what little he had laid up out of his former earnings, and knowing himself to be honestly and honorably entitled to aid from the navy pension fund, he applied, in May last, (1835,) to the Navy Department for a pension, when he was told that the rolls of these gunboats were destroyed, and there

was no evidence of the capacity in which he served, and he was put on the pension roll at the rate of six dollars per month, being the rate of an able seaman, and not that of a quartermaster; and what is more, he was informed that by a rule of the Navy Department his pension would only commence from the day of his application, and not from the time of his wound.

As your petitioner was justly entitled to a pension from the day of his injury; and was duly returned at the time of his discharge, as disabled while in the line of his duty; and as he is precluded from a pension from the time of his discharge by a regulation of the Department, (which regulation Congress has in several instances set aside,) he most respectfully (and his disability and wants compel him to say most earnestly) prays Congress to pass an act authorizing the Navy Department to pay to your petitioner a pension from the time of his discharge (November, 1808) to the 30th May, 1835, at which last day his present pension commenced. And your petitioner respectfully requests that he may be rated as a quartermaster, which was his rank, instead of an able seaman, as he is now rated.

For the truth of all your petitioner has here stated, he respectfully refers to Captain Thomas Ap Catesby Jones, who was the Midshipman Jones he saved from the capsized boat, who is, as your petitioner believes, the only person living of that expedition, save your petitioner, as well as to the evidence of his service and wound, now on file in the Navy Department. As your petitioner cannot long remain to burden his government, and as the pension fund has had the benefit of all interest on such sum as your petitioner would have drawn from it had he claimed it at the time of his wound, he anxiously hopes Congress will take the justice and equity of his case into consideration, and grant the prayer of his petition, and as in duty bound he will ever pray.

THOS. B. PARSONS.

Subscribed and sworn to before me.
CUMBERLAND, December 14, 1835.

JOHN ANDERSON, *Justice of the Peace.*

WASHINGTON, January 16, 1836.

This is to certify that I have carefully examined the within petition of Thomas B. Parsons, and that his narration of the boat expedition in the year 1808 is substantially true; and that, to the best of my knowledge and belief, the injury for which the said Parsons now prays relief was occasioned by his *extraordinary* and miraculously successful exertions in rescuing Sailingmaster Brown, (in the act of drowning,) and myself and others, from the *perilous* situation in which we were, as represented by the memorialist.

I also remember that the petitioner, Parsons, made application to the proper officers at New Orleans for a pension at the time he was discharged from the service of the United States, and that, to the best of my recollection, it was denied him *because* his injury was not received in *battle*; an *absurd notion entertained by some at that day.*

THOS. AP CATESBY JONES, *Captain U. S. Navy.*

FEBRUARY 17, 1836.

DEAR SIR: In answer to your inquiry, "How far was the boat from land when capsized, as represented by Thomas B. Parsons, whose memorial is now before the Committee on Naval Affairs?" I have the honor to state that, to the best of my belief, the distance must have been from one and a half to two miles.

THOS. AP CATESBY JONES, *Captain U. S. Navy.*

To the Hon. WILLIAM REID, &c.

24TH CONGRESS.]

No. 631.

[1ST SESSION.]

STATEMENT OF THE MAXIMUM AMOUNT THAT CAN BE BENEFICIALLY EXPENDED, PER ANNUM, FOR ORDNANCE, GRADUAL INCREASE, REPAIRS, NAVY YARDS AND DOCKS, AND OTHER HEADS OF EXPENDITURE FOR THE NAVY.

COMMUNICATED TO THE SENATE APRIL 28, 1836.

NAVY DEPARTMENT, April 27, 1836.

SIR: In answer to the resolution of the Senate of the 19th instant, requiring of this Department "to inform the Senate what is the maximum amount which can be beneficially expended, *annually*, towards completing the naval defences of the country; embracing, 1st, ordnance and ordnance stores; 2d, gradual increase of the navy, and collection of materials; 3d, repairs; 4th, navy yards and docks, and other incidental heads of expenditure; provided the appropriations for the expenditures be made at once for a series of years, to be drawn from the Treasury annually, as needed," I have the honor to state that the subject was referred to the Board of Navy Commissioners, whose report is herewith submitted.

In this report they present estimates of much larger amounts than those contained in their report of the 2d of March last, as the *maximum* which, in their opinion, might be beneficially expended, annually, towards completing the naval defences of the country, "without any limit in reference to the means."

It will be perceived that these estimates are based upon the supposition that our naval preparations

shall have no limit, except that imposed by a due regard to the public revenues, and by the probable condition of other maritime nations; and that the fixed, immovable fortifications of our country are to be kept within prescribed limits; and also upon the supposition that we shall erect six dry docks in addition to those already completed, to wit: one at Portsmouth, one at Boston, two at New York, one at Norfolk, and one at Pensacola.

Should it not be deemed expedient by Congress to increase our naval preparations to the extent contemplated by the Commissioners; or should the estimates for immovable fortifications, now submitted, be adopted; or should it not be deemed expedient to provide, at this time, for the construction of six dry docks, a corresponding reduction in the amount of the estimates of the Commissioners should be made.

It must also be observed, that the estimates of expenditures are made without regard to the effect they may have upon the commercial shipping interest of the country.

An expenditure of more than a million and a half of dollars annually, for the "gradual increase of the navy, and collection of materials," would, in my opinion, create such a demand for labor and materials as essentially to increase the expense of ship building, which could not fail to give foreign navigating interests an advantage over our own.

I thought it due to myself, in presenting the report of the Commissioners of the Navy Board, to make the foregoing observations.

I have the honor to be, very respectfully, your obedient servant,

MAHLON DICKERSON.

Hon. M. VAN BUREN, *President of the Senate*

NAVY COMMISSIONERS' OFFICE, *April 21, 1836.*

SIR: The Commissioners of the Navy have had the honor of receiving from your hands the resolution of the Senate of the 19th instant, with directions, given personally and by endorsement on the resolution, to report thereon.

The resolution requires that the Senate be informed "what is the *maximum* amount which can be *beneficially expended* annually towards completing the naval defences of the country; embracing, first, ordnance and ordnance stores; second, gradual increase of the navy, and collection of materials; third, repairs; fourth, navy yards and docks, and other incidental heads of expenditure; provided the appropriations for the expenditure be made at once, for a series of years, to be drawn from the Treasury annually, as needed."

In the report which the Commissioners had the honor of presenting to you on the 2d ultimo, it was proposed "that the force to be prepared, ready for use when circumstances may require it, shall consist of fifteen ships of the line, twenty-five frigates, twenty-five sloops-of-war, twenty-five steamers, and twenty-five smaller vessels; and that the frames and other timber, the copper, ordnance, tanks and chain cables shall also be prepared for ten ships of the line and ten frigates." It was further observed that "the force, to be ready for use, would employ thirty thousand seamen; the number assumed as that for which vessels ought to be prepared, for the *commencement* of a state of hostilities." In preparing that report, the board, unapprised of your views or those of the government upon the subject, looked to the then fiscal condition of the country, as exhibited in the Treasury reports, and thence drew the inferences expressed as to the sums which might, annually and conveniently, be applied towards completing our naval defences; confining their views to the supposed convenience of the Treasury, and indicating rather the *minimum* of the amount of money necessary to place the naval defences of the United States upon the footing of strength and respectability due to the security and welfare of the Union.

But the resolution of the Senate calls for the *maximum* amount which can be beneficially expended, *annually*, towards completing the naval defences of the country, without any limit in reference to the means. The question, thus presented, appears to be unfettered with any restriction, or any consideration, other than that which refers exclusively to the completion of the naval defences of the country.

Had the resolution given any intimation as to the amount of the naval force, or, in other words, as to the nature and extent of the force deemed necessary for the defence of the country, a satisfactory reply might more easily and with more certainty come within the professional ability of the board. Uninformed upon this material point as to the views of the honorable body by whom the resolution was passed, the board must of necessity express their own, to show the basis of their calculations upon the subject.

If it be the settled policy of our government to consider the navy as "our first and best fortification;" if it be determined that our naval preparations shall have no limit, except that imposed by a due regard to the public revenues, and by the probable condition of other maritime nations; if the fixed, immovable fortifications of our country are to be kept within prescribed limits, that the naval defences, deemed more important because more efficient, may be enlarged to an extent necessary to defend our coast, on the ocean, and guard it against invasion; the Commissioners would, with great deference, though with entire confidence in its correctness, express the opinion that an increase of naval preparations beyond that proposed in their letter of the 2d ultimo may become a measure of wise precaution in reference to the high interests thus committed to the protection of the navy, and the solemn duties and responsibilities imposed upon it. Our means of naval defence and annoyance should surely be such as, when exerted, against those possessed by other maritime nations with whom we may come in conflict, would fairly promise, if not secure, success.

Leaving, however, the nature and extent of our naval preparations to be decided by those with whom the decision rests, the Commissioners will suppose that fifteen ships of the line, twenty-five frigates, twenty-five sloops-of-war, twenty-five steamers, and twenty-five smaller vessels, with the frames and other timber, the copper, ordnance, tanks, and chain cables, for ten ships of the line and ten frigates, as a reserve force, may be considered as the amount of force which it may be the pleasure of Congress to provide; and upon this hypothesis they base the reply to the resolution which they have now the honor to submit, observing here that, if a greater force be adjudged expedient, the means necessary to provide it must be proportionately increased.

In the opinion of the board, every ship belonging to the navy should be kept in such a state of preparation that her full equipment and readiness for actual service, on any emergency, may be secured by the time a crew can be collected for her. The hulls of those not in service at sea should be frequently examined and kept in good condition; their armament, masts, spars, boats, tanks, chain cables, and imperishable stores of every description, should be procured, and carefully preserved in a state of readiness for immediate use; and there should be always kept on hand a full supply of *seasoned* timber, of all kinds used in the construction of ships-of-war, and a full supply of spare ready-made masts and spars, of sizes and dimensions adapted to each of the various classes of our ships.

Our navy yards should possess all the conveniences and facilities of building and repairing ships of every class, with the greatest *dispatch* and *economy*. They should possess ample means of seasoning and preserving timber, and of keeping in a state of perfect security and preservation, ready for immediate use, all the stores and munitions of every description essential in the equipment and armament of our ships. To place the yards in this condition, preparations involving large expenditures are indispensable. Dry docks, timber docks, seasoning sheds, building slips, launching ways, ship houses, storehouses, smitheries, workshops, wharves, &c., must be possessed to an extent proportionate to the number and size of our ships, and the quantity of materials to be kept on hand. We cannot, in a *state of peace*, secure the services of our ships as promptly as would be desirable, without these conveniences. In *war*, when time is all-important, when celerity of movement and vigorous action are alike in constant requisition, the want of them would paralyze every exertion, and be felt as a heavy national calamity. Suppose a squadron coming into port after a long cruise, or after a serious engagement at sea, or after encountering unusual storms; the ships composing it would require repairs, some of them probably very extensive; many might require docking, and they arrive at a port where there is but one dock; while one is in dock, the residue must wait and take their turn to be docked, and months, at least, may elapse before the squadron (possibly wanted for *immediate service*) can be repaired and put in a condition for further service. Golden opportunities of sustaining the honor of our flag and advancing the highest interests of our country may thus be lost.

But, without supposing a case, the present actual condition of our ships at New York may be cited as affording ample illustration of the value of these facilities and conveniences, and particularly in reference to docks. If we possessed them at that yard, the ships now there, particularly those of the line, which require extensive repairs, might be put in a condition for service in a much shorter space of time, more effectually, at *far less expense*, and without incurring any of the risks attending the process of heaving down.

With these considerations in view, the Commissioners would observe that, in their opinion, the sum of one million and eight hundred thousand dollars might be "beneficially expended" in procuring ordnance and ordnance stores; that the *maximum* amount which could be expended in the *first year*, from the date of an appropriation, would probably not exceed \$300,000, but in the second and subsequent years, at least \$500,000 might be beneficially expended in providing cannon, carronades, bombs, shot, bomb shells, muskets, pistols, cutlasses, boarding pikes, boarding axes, powder or the materials for making it, and all the other various articles necessary to the *armament of the ships*. That for "the increase of the navy and collection of materials," the sum of sixteen millions of dollars might be beneficially expended; that during the *first year* the expenditure for *timber* could not be very considerable. It might be contracted for in the course of a few months, but the trees should not be felled before the month of October next, and the contractors would not probably commence delivering the timber at the yards before April or May, 1837; and possibly such interruptions from Indian hostilities might arise in getting out the live oak as to postpone the operations of those engaged in that business for a still greater length of time. But the imperishable articles of copper, iron, and lead might be procured during the first year, and it may be observed, as an inducement to procure them now, that the prices now asked for such articles are as low as they have ever been known to be. This observation is grounded upon the latest contracts made for copper and iron.

Under all circumstances, the Commissioners believe that the sum of one million and a half of dollars might be judiciously expended "for the gradual increase of the navy, and collection of materials," during the *first year* after an appropriation, and that in the six subsequent years the residue of the \$16,000,000 (*viz.*: \$14,500,000) might be expended; making, in these years, an average expenditure of about \$2,417,000.

The probable inability to expend any considerable sum during the first year, for *timber*, is a circumstance not to be regretted, because we have not the means of seasoning and preserving it. The preparation of such means, which consist of timber docks and seasoning sheds, should precede the reception of timber. They may be prepared by the time the timber will be delivered; and when they shall be ready for the reception of the timber, the timber should be procured as early as may be practicable, in order to give it the longest time possible for seasoning, before it shall be actually used in the construction or repair of ships.

As to "repairs," the operations under this head would necessarily be protracted and limited, until we can have a sufficient number of dry docks, and other conveniences, for repairing ships-of-war. We have now only two dry docks—one at Norfolk and the other at Boston; so that only one vessel can be taken into dock at a time at either of those places; and at other yards, where we have ships of the line, it would probably be advisable rather to wait the construction of docks, before commencing any repairs which their bottoms may require. The Commissioners, however, believe that, under this head, nine hundred thousand to a million of dollars may be annually and judiciously expended.

Upon the subject of "navy yards, docks, and other incidental heads of expenditure," the board would respectfully observe, that the plans for improving the yards, adopted under the act of Congress of 1827, and approved by the President of the United States, contemplate expenditures to a large amount, the means of estimating which are not in the possession of the board. It is certain, however, that it will require a series of years to complete the improvements, and it is equally certain that the expense will unavoidably be very large. But, to confine our views at present to a portion of those improvements, say a dry dock at Portsmouth, an additional dry dock at Boston, two dry docks at New York, an additional dry dock at Norfolk, and a dry dock at Pensacola; with the number of timber docks, timber sheds, ship houses, slips, wharves, storehouses, &c., required for these and other yards, and adapted to the proposed force, and essential to keep it in a state of desirable preparation for service, one million and a half of dollars may be considered as the *maximum* amount which could be "beneficially expended" during the

first year; but for each succeeding year, two millions and a half may be expended, and very beneficially, until the necessary improvements shall be completed.

These views present the following results, showing the *maximum* which, in the opinion of the Navy Commissioners, might be beneficially expended, annually, for different series of years:

1. "Ordnance and ordnance stores," during the first year, \$600,000, and, during the second year, \$500,000; the third year, \$500,000, and the fourth year, \$500,000.

2. "Gradual increase of the navy, and collection of materials," during the first year, \$1,500,000, and each of the second, third, fourth, fifth, sixth, and seventh years, about \$2,417,000.

3. "Repairs," about \$1,000,000; say one million of dollars annually.

4. Navy yards and docks, and other incidental heads of expenditure, \$1,500,000, during the first year, and two millions and a half of dollars during the second year, and the like sum annually, till the necessary improvements be completed.

If an appropriation, adopting these views, were made, and the number and description of vessels recommended in our letter of the second ultimo were kept in commission, without diminution or increase, then the annual naval expenditure, exclusive of the expenditure under "gradual improvement," but including \$400,000 annually for the corps of marine, would be, for the first year, \$8,550,000; for the second, third, and fourth years, each, \$10,667,000; for the fifth, sixth, and seventh years, each, \$10,167,000; for subsequent years, each, \$7,750,000; until the improvements in the navy yards should be completed to the extent desirable and necessary.

All which is respectfully submitted.

The resolution of the senate is herewith returned.

JNO. RODGERS.

Hon. M. DICKERSON, *Secretary of the Navy.*

24TH CONGRESS.]

No. 632.

[1ST SESSION.]

ON THE IMPORTANCE AND FITNESS OF THE DRY TORTUGAS AS A HARBOR AND STATION FOR THE VESSELS OF THE NAVY.

COMMUNICATED TO THE SENATE MAY 2, 1836.

NAVY DEPARTMENT, *April 30, 1836.*

SIR: In answer to a resolution of the Senate, of the 14th instant, requesting the Secretary of the Navy to send to the Senate all the information in his possession relating to the Dry Tortugas, I have the honor to enclose an extract of a letter from Commodore Rodgers, dated 3d July, 1829, and a report of Lieutenants Gedney and Tatnall, of the 28th February, 1830.

I have no information upon which to ground an opinion as to the fitness of this place as a naval station, except what is contained in the extract of the letter and the report herewith submitted.

A further examination should take place, before a definite opinion upon this subject could be safely formed.

I have the honor to be, very respectfully, your obedient servant,

M. DICKERSON.

The Hon. the PRESIDENT of the Senate:

Extract of a letter from Commodore John Rodgers, dated—

WASHINGTON, *July 3, 1829.*

To the Secretary of the Navy:

I called at the Dry Tortugas, where I spent four days in the examination of its singular harbor; and this I was enabled to do effectually, by the assistance of Mr. Baldwin and Captain Turner, with the boats of the Erie.

The Tortugas, so called, consist of eleven small islands, or keys, encircled by an immense reef or bank, formed of coral, which breaks off the sea in every direction, and contains within its embrace an outer and inner harbor; the first of which, besides affording a safe anchorage at all seasons of the year, is sufficiently capacious to ride in security all the navies of Europe; but, what is most singular, there is within this harbor another, still more secure, which, in its character, may be said to be unique; uniting, as it does, sufficient depth of water for ships of the largest class to a narrow entrance, not more than 120 yards wide; ease of ingress and egress; and may be entered or departed from at all times, let the wind be from what point of the compass it may.

This singular harbor, when considered in reference to its geographical position and the defence of our southern coast, may justly be looked upon as the advance post of that portion of our southern and western maritime frontier; and in this light must strike every one as possessing peculiar advantages, lying, as it does, directly in the track of all vessels passing to and fro, not only between the Mississippi, but every part of West Florida having intercourse by sea with our eastern States, whilst at the same time there is no one spot on our whole line, from north to south, that presents the same facilities in communicating with the several ports in the Island of Cuba, as well as those in the Gulf of Mexico, even as far south as the Bay of Honduras, on the Spanish main.

These, however, are not all its advantages; for on referring to the chart, it will be seen that not only the commerce of Havana, and of the Island of Cuba generally, but even the homeward bound trade of Jamaica, would be subjected to its grasp, were its natural advantages to be aided by the erection of suitable works for the protection and convenience of a competent naval force.

With all these advantages, it must be confessed that nature has not supplied it with every essential necessary to the perfectibility of such an establishment, inasmuch as no fresh water or firewood of any consequence is to be found on either of the keys; water, however, might be supplied by the erection of cisterns, and wood from Key West and the eastern part of the peninsula of Florida, without much inconvenience or expense.

The base of the whole of these keys is formed of concrete rock, composed of coral and shells, giving to each a foundation of the most solid and permanent kind; seven of them are clothed with a rich grove of mangrove trees, of small size, and various shrubbery; but the other four contain little or no vegetable productions, although turtle and fish in the greatest abundance are to be met with everywhere. For a minute delineation of all that relates to these islands or keys, permit me to refer you to the accompanying charts.

NOTE.—For the report of Lieutenants Gedney and Tatnall, of the navy, dated the 28th of February, 1830, see American State Papers, Naval Affairs, vol. 3, No. 417.

24TH CONGRESS.]

No. 633.

[1ST SESSION.

CLAIM OF CAPTAIN DANIEL T. PATTERSON, OF THE NAVY, FOR COMPENSATION FOR EXPENSES INCURRED, IN COMMAND OF A SQUADRON, BY RECEIVING AND ENTER-TAINING THE AUTHORITIES OF FOREIGN GOVERNMENTS, IN THE MEDITERRANEAN SEA.

COMMUNICATED TO THE SENATE MAY 4, 1836.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled:

The memorial and petition of Daniel T. Patterson, a captain in the navy of the United States, respectfully sheweth: That your memorialist, then being a captain in the navy of the United States, was appointed to the command of the naval force of the United States in the Mediterranean sea, and that he assumed that command in the month of July, 1832; that he accepted said appointment, under the hope that the same allowances of pay, &c., would be extended to him as it had been the practice of the government to extend to those officers who had preceded him in the command of that important station. Such allowances, your memorialist was aware, under ordinary circumstances, were sufficient to meet the constant calls made upon the resources of the officer in command.

With this hope, your memorialist, anxious to discharge his obligations to the nation and the government, accepted the appointment, and entered upon the duties of that station.

Whilst performing the duties appertaining to him as commander of a squadron, he was exposed to incur expenses, on several occasions, without which they could not have been properly discharged. Of these expenses your memorialist begs leave to submit a schedule, for the consideration of your honorable bodies, and to solicit relief, as they were contracted unavoidably, and for the honor and advantage of the nation; and as allowances have been frequently made to officers in similar cases, your memorialist trusts that his petition will not be viewed as unreasonable. And your memorialist begs leave further to state, that peculiar circumstances, which may be supposed not to have been contemplated by your honorable bodies, have rendered his emoluments, during the period in which he was in command of the Mediterranean squadron, much less than those of an officer who preceded him for the same length of time.

Your memorialist asks the consideration of your honorable bodies to the facts set forth in the accompanying schedule, by which it will be seen that he received and entertained on board of his ship, and was presented, with his officers, to the heads of the governments of the various countries where the presence of the squadron was directed and required, either for the general protection of the commercial interests of his own government, or in furtherance of particular and important objects.

Under such circumstances, your memorialist believes it scarcely necessary to observe that such visits are frequently proffered, that they cannot well be refused, and that the expense incident thereto is not small; your memorialist may also be permitted to express the opinion that they are advantageous, and that the respect for our naval superiority, thus imposed upon the minds of men who arrange and conduct the affairs of nations, by displaying the efficiency of our equipments and the order and discipline of our crews, must be highly beneficial in preventing aggressions upon our commerce, and in securing immediate reparation for those committed. Such, indeed, would seem to have been the view taken by your honorable bodies, from the liberal appropriations which have been made to cover expenses incurred for these purposes by commanders of squadrons, and even of single ships.

Your memorialist further represents that, in compliance with the immemorial customs of oriental civility, he was obliged to make presents, not only to many of the high dignitaries of Turkey, Egypt, and Barbary, with whom he held intercourse, but also to their inferior officers and attendants. Some of these presents were costly, others were of less value; but their multiplication made the total amount formidable to the purse of a private individual. To have omitted such presents would have given offence, and to have alleged that he was prevented by the fundamental law of his country from receiving others in return, would have had no effect in diminishing the difficulty. The usage has been long established, and is universally complied with, in treating with governments in which the feelings of individuals have infinitely more weight than either justice or policy. A nation which presents a bold front can well afford to make such trifling concessions.

In addition to the expenses incurred by his intercourse with foreigners, your memorialist has further to state that it became necessary for him to transport an agent of our own government, with his family, to the place of his official residence, at a time when circumstances would have rendered his conveyance by a private vessel impolitic.

Such were the circumstances occasioning the expenses for which your memorialist now solicits relief. His receipts from the government, compared with those of his predecessors in the same command, will serve to show how little your memorialist could afford to bear them.

From the 1st of July, 1832, when your memorialist assumed the command of the Mediterranean squadron, until the 3d of March, 1835, when the new law, regulating the pay of persons engaged in the naval service, took effect, your memorialist received twelve hundred dollars annually, and sixteen rations per diem, which, at twenty-five cents each ration, made the whole amount to \$2,660 a year. This was the rate of pay of a captain in command of a squadron, as fixed by the early regulations for the navy; but two thousand dollars were annually allowed to such officers, in addition, down to 1826, in lieu of a percentage for drawing bills; and after the suppression of that allowance, the captains who successively commanded the Mediterranean squadron, between the years 1828 and 1832, received sums for diplomatic services, which rendered their receipts proportionably greater than those of your memorialist will be, should his petition be granted.

By the law of March 3d, 1835, your memorialist received at the rate of \$4,000 per annum while in command of the squadron; by the second section of that law he is precluded from all further allowances, either for drawing bills or for any extra service whatever, except mileage when traveling under orders. It would appear, from the terms of this act, that your honorable bodies had been aware of the inadequacy of the former stated pay, and, determining to preclude allowances in future, had supplied their place by an appropriate augmentation.

If this view be correct, your memorialist trusts that your honorable bodies will not render his case the only exception to a rule which has thus been formed upon principle, confining him to an allowance inferior to those heretofore made or hereafter to be made.

Your memorialist also begs leave to observe that, should his petition be granted, his whole receipts would even then be less than they would have been had his pay throughout the period of his command been regulated by the existing law.

DAN'L T. PATTERSON, *Captain U. S. Navy.*

WASHINGTON, D. C., May 3, 1836.

The United States,

To Commodore Daniel T. Patterson,

Dr.

To extra expenses officially and unavoidably incurred by him while commanding the United States naval force in the Mediterranean, in the years 1832, '33, '34, and '35; (particulars of which are stated below,) \$3,578

Reception of Don Miguel, in August, 1832, then King de facto of Portugal, and suite, on board the frigate United States, at Lisbon.

Prime minister and admiral of Tripoli, detained on board the frigate United States three days, from bad weather, off Tripoli, and presents to attendants of the Bashaw of Tripoli, when I visited him, in Dec., 1832.

Presents (bayshees) to attendants, as pipe-bearers, coffee-bearers, &c., of the Bey of Tunis, when presented to him in December, 1832.

Reception of the King of Greece and suite on board the frigate United States, in September, 1833, at Napoli de Roman a.

Reception of and collation to the great officers of state of the Sublime Porte, representing the Sultan, and numerous suites, on a visit to the frigate United States; presents to their officers and suites; and a sword to the aid-de-camp of the Pacha of the Dardanelles, in November, 1833, and presents to his suite; and expenses attending the presentation of myself and officers to the Sultan.

Preparing for the reception of Mohammed Ali, the Viceroy of Egypt, and suite, for a promised visit to the United States ship Delaware, and presents to his attendants, when presented to him, in August, 1834.

Transportation and finding of D. S. McCauley, Esq., consul for Tripoli, and family of eleven persons, and baggage, from Malta to Tripoli, in July, 1835.

Reception of and expenses attending a visit from the King of Naples, three brothers, uncle, and suites, on board the United States ship Delaware, and presentation at court of myself and officers, in September, 1835.

To difference of pay, between a captain in command of a squadron and a captain on other duty, from the 25th of October, 1835, to the 9th of March, 1836, inclusive, viz:

One hundred and thirty-six days, at \$4,000 per annum, pay of a captain in command of a squadron	\$1,490 41
One hundred and thirty-six days, at \$3,500 per annum, pay of a captain on other duty...	1,304 10
Difference	<u>\$3,186 31</u>

[24TH CONGRESS.]

No. 634.

[1ST SESSION.]

ON THE EXPEDIENCY OF ESTABLISHING A NAVY YARD AT BALTIMORE, IN MARYLAND.

COMMUNICATED TO THE SENATE MAY 6, 1836.

Mr. SOUTHARD, from the Committee on Naval Affairs, who were instructed by resolution to inquire into the propriety of establishing a Navy yard at Baltimore, and to report their opinion to the Senate, reported:

That they have called upon the Secretary of the Navy to communicate to them his opinion, and such information as was in possession of the Department, in relation to that subject. His answer, with the documents to which he refers, are annexed and made part of this report.

The committee have been called upon, also, to inquire into the expediency of establishing navy yards

at one or two other points upon our coast, and their reflections have led them to the conclusion that it is not expedient, at this time, to increase their number. We already have seven, some of them, in the opinion of the committee, not well situated; and although it may become necessary hereafter to increase them, yet it should be done on some general and well-considered plan, which should have in view the economy and efficiency of the naval service and defences, rather than local convenience and advantages.

For the adoption of such a plan, the committee have not in their possession all the information which is necessary to safe and prudent action upon the subject. They ask to be discharged from further consideration of the resolution.

IN SENATE OF THE UNITED STATES, *February 16, 1836.*

On motion by Mr. Kent,

Resolved, That the Committee on Naval Affairs be instructed to inquire into the propriety of establishing a Navy yard at Baltimore, in the State of Maryland, and that they report their opinion to the Senate.

Attest:

WALTER LOWRIE, *Secretary*,
By W. HICKEY, *Clerk*.

NAVY DEPARTMENT, *April 4, 1836.*

Sir: In answer to your letter of the 21st ultimo, asking my opinion, and such information as may be in possession of this Department, in relation to certain memorials for the establishment of navy yards at Baltimore, and at Charleston, South Carolina, I have the honor to state that, on the 16th of December, 1826, the Secretary of the Navy transmitted to the House of Representatives a report on the survey of the harbor of Baltimore. (See documents of the House of Representatives, 2d session, 19th Congress, No. 13.)

From this report it appears that the harbor of Baltimore presents many advantages as a navy yard, and, in my opinion, it might be made a station for the building and repairing of ships-of-war, at a moderate expense, and with great advantage to the United States.

As to the harbor of Charleston, South Carolina, I must beg leave to refer you to a report made on the 19th of January, 1826, to the Senate, by the Secretary of the Navy. (See Senate documents, 1st session, 19th Congress, No. 27.)

This report contains much satisfactory information as to the harbor of Charleston, and leaves but little doubt that that harbor might be judiciously selected as a navy yard for the building and repairing vessels-of-war (except those of the largest classes).

The position of that harbor, with respect to our squadron in the West Indies and Gulf of Mexico, affords a strong argument in favor of selecting it as a naval station, inasmuch as it is often important to obtain recruits of seamen, and supplies of provisions and stores for our vessels, without the inconvenience and delay of visiting our northern ports.

There is no information in this Department, beyond what is herein stated, as to the propriety of establishing navy yards at Baltimore or at Charleston.

I am, with great respect, your obedient, humble servant,

M. DICKERSON.

The Hon. SAMUEL L. SOUTHARD, *Chairman of the Committee on Naval Affairs, of the Senate of the U. S.*

NAVY DEPARTMENT, *December 16, 1826.*

Sir: In compliance with the resolution of the House of Representatives, of the 14th instant, directing the Secretary of the Navy to report the result of the recent survey of the harbor of Baltimore, I have the honor to transmit a copy of the report made by Master Commandant Claxton, containing the result of the survey of that harbor.

The original chart, prepared with much care, also accompanies this report; and it is respectfully requested that it may be returned to the Department, after it has been used by the House of Representatives.

The survey was executed by Lieut. J. W. Sherburne, under the superintendence, in the first instance, of Capt. Spence, and, subsequently to his death, of Master Commandant Claxton.

I have the honor to be, very respectfully, &c.,

SAM'L L. SOUTHARD.

The SPEAKER of the House of Representatives.

BALTIMORE, *November 4, 1826.*

Sir: I have the honor to inform you that the river Patapsco and harbor of Baltimore were, at the instance of the insurance companies of this city, accurately surveyed in the year 1817, and a chart, predicated on that survey, published, a copy of which I enclose. I also transmit to you a chart founded on the survey recently taken, in which will be observed a more minute examination of the river, and the several points in the harbor supposed useful for naval purposes.

In proceeding to answer your several interrogatories, in the order in which they are given, I beg leave to state that, in addition to my own observation, I have been aided by the experience of the best

pilots, and the sound judgment of well-informed individuals, in obtaining the various facts called for by your letter of instruction.

1st. The depth of water upon the bar being the first point to which you have directed my attention, I reply, by stating that the highest spring tides give a depth of twenty feet, that a common tide gives nineteen feet, and the lowest tides seventeen feet of water upon the bar, at high-water mark. The average perpendicular rise of the tide is eighteen inches.

2d. The depth of water upon the bar is materially affected by particular winds; a gale from the southward and eastward forces the waters of the Atlantic into the Chesapeake Bay, and produces a rise on the bar to the height of three feet above an ordinary tide, giving a depth of twenty-two feet; a gale from the north, on the contrary, drives the waters of the Chesapeake into the ocean, reduces the water three feet below the common low-water mark, and thus leaves a depth of fifteen feet only on the bar.

3d. The current in the river, when unaffected by external causes, runs at the rate of one mile and a half per hour.

4th. The channel way for beating over the bar, varies in breadth from one-third to half a mile. The bar may be said to extend for the space of nine miles; beginning at the sand knolls, six miles below North Point, and terminating at the deep water off Hawkins' Point. The bottom throughout is soft mud, with the exception of the numerous sand knolls above mentioned, having on their surface a depth of eighteen feet water. The wind from the east to southwest is suitable for vessels bound in, and from the north-northeast to southwest, when bound out.

5th. The prevailing winds are from the northwest and southeast. I have ascertained, from a meteorological table, compiled by Lewis Brantz, Esq., that the average of six successive years gave the wind from the northwest one hundred and six days, northeast sixty-seven days, southeast one hundred and five days, southwest seventy-five days, and twelve days of calm.

6th. The anchorage for vessels having crossed the bar, is abundantly extensive for the largest fleets.

7th. The proximity to the city constitutes, in a great measure, the "convenience for receiving supplies from the shore."

8th. Good water can be obtained at various watering places now established in the harbor, and which may be multiplied to any extent desired.

9th. The city of Baltimore, from its magnitude and resources, could at all times afford the necessary provisions and stores for a fleet. These may be said to be her staples.

10th. The harbor of Baltimore possesses favorable positions for a navy yard. Three sites have been examined, two only of which are deemed worthy of present consideration. The one designated on the chart by the letter A, is situated on the eastern side of the harbor, a short distance below Harris' creek. It has for its recommendation the deepest water to be found, perfectly retired by land and water, facility of transportation and intercourse with the commercial part of the city, but seated on a bank of twenty feet in height, and which gradually becomes more elevated as you recede from the river, and open by land to the incursions of an enemy.

11th. To this point, vessels drawing twenty feet water can approach to within 250 feet of the present shore.

12th. The quantity of water it can furnish is not known; but the quality of it, as ascertained from a well on the premises, is found to be nauseous to the palate.

13th. The position bears a reputation for great unhealthfulness, but is supposed to be susceptible of improvement, by filling up a marshy ravine, forming its southern boundary. The soil is clay and sand.

14th. The facility for wharfing is as favorable as can be desired, with the exception of the superabundant earth, which may be disposed of in the manner suggested in the last article.

The other position, marked B, is situated on the west side of the harbor, at and below Locust Point. It is situated on an extensive plane of fourteen feet elevation above the surface of the water; possesses in a still greater degree a facility for wharfing, of transportation and intercourse with the town, is supposed to be healthy, retired in its situation, and is covered from assault by Fort McHenry, but has less depth of water, for at a distance of 400 feet from the shore, there is but seventeen and a half feet of water, and which does not materially deepen until you begin to approach the position A, on the opposite shore. This site appearing to possess great advantages in point of location, health, protection, and defence, I deem it proper to suggest that the water can be readily, and at inconsiderable expense, deepened to twenty feet, by means of the admirable mud-excavators now in operation in the harbor. The soil of this position is clay, and the bottom of the river a very soft mud.

As there are no springs or pumps in the vicinity, it is not known what may be the quality or the quantity of its water; but there is every reason to suppose that an examination would prove satisfactory. It is, however, proper to observe, that to both these positions a sufficiency of good water, for every ordinary purpose, can be conveyed by conduits, similar to those that now supply every part of Baltimore.

15th. The worm exists in the harbor; but, owing to the freshness of the water, is not considered destructive; in fact, no precautionary means are adopted to protect any of the works in the harbor against it.

All which is respectfully submitted.

ALEXANDER CLAXTON.

Hon. SAMUEL L. SOUTHARD, *Secretary of the Navy.*

24TH CONGRESS.]

No. 635.

[1ST SESSION.]

ON THE EXPEDIENCY OF ESTABLISHING A NAVY YARD AT CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE SENATE MAY 6, 1836.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom was referred the memorial of the city council and chamber of commerce of Charleston, South Carolina, for the establishment of a navy yard at that place, reported:

That they have investigated the subject upon such evidence as was in their possession, and which was referred to by the Secretary of the Navy, in answer to an inquiry of the committee, which is annexed to this report, and made a part thereof.

The committee have not been able to persuade themselves that it is expedient greatly to increase the number of our navy yards; they are, however, of opinion that it might be useful to the public interests to have one established at some point between the mouth of the Chesapeake and the southern coast of Florida, but they have not such information as will justify them in making a selection. They, therefore, offer a resolution:

Resolved, That the Executive be requested to cause to be made the necessary examinations and surveys of the several harbors south of the mouth of the Chesapeake Bay, and a report upon the comparative facilities and advantages of the same for the establishment of a navy yard, to the next session of Congress.

NAVY DEPARTMENT, *April 4, 1836.*

SIR: In answer to your letter of the 21st ultimo, asking my opinion, and such information as may be in possession of this Department, in relation to certain memorials for the establishment of navy yards at Baltimore, and at Charleston, South Carolina, I have to honor to state that, on the 16th of Dec., 1826, the Secretary of the Navy transmitted to the House of Representatives a report on the survey of the harbor of Baltimore. (See documents of the House of Representatives, 2d session, 19th Congress, No. 13.)

From this report it appears that the harbor of Baltimore presents many advantages as a navy yard, and, in my opinion, it might be made a station for the building and repairing of ships-of-war, at a moderate expense, and with great advantage to the United States.

As to the harbor of Charleston, South Carolina, I must beg leave to refer you to a report made on the 19th of January, 1826, to the Senate, by the Secretary of the Navy. (See Senate document, 1st session, 19th Congress, No. 27.)*

This report contains much satisfactory information as to the harbor of Charleston, and leaves but little doubt that that harbor might be judiciously selected as a navy yard for the building and repairing vessels-of-war, (except those of the largest classes.)

The position of that harbor, with respect to our squadron in the West Indies and Gulf of Mexico, affords a strong argument in favor of selecting it as a naval station, inasmuch as it is often important to obtain recruits of seamen, and supplies of provisions and stores for our vessels, without the inconvenience and delay of visiting our northern ports.

There is no information in this Department, beyond what is herein stated, as to the propriety of establishing navy yards at Baltimore or at Charleston.

I am, with great respect, your obedient, humble servant,

M. DICKERSON.

The Hon. SAMUEL L. SOUTHARD,

Chairman of the Committee on Naval Affairs of the Senate of the United States.

24TH CONGRESS.]

No. 636.

[1ST SESSION.]

ON THE EXPEDIENCY OF ESTABLISHING A NAVAL RENDEZVOUS AND DEPOT AT THOMPSON'S ISLAND, OR KEY WEST, AND FORTIFYING THE SAME.

COMMUNICATED TO THE SENATE MAY 6, 1836.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom was referred a resolution of the Senate instructing them to inquire into the expediency of providing such defences for Key West† as shall render it a safe rendezvous and depot for the navy, reported:

That they called upon the Secretary of the Navy for such official reports, documents, and evidence as may be in possession of the Department, in relation to that place as a fit rendezvous and depot for the navy, together with the opinion of the Department as to its value and importance to the country as a rendezvous and depot, and as to the extent and cost of such defences as may be required. The answer of the Secretary, with the documents communicated to the committee, are important to the proper understanding of the subject, and are therefore annexed to this report, and made part thereof.

The committee concur in the opinion that a competent rendezvous and depot for the navy, upon that

* For the documents referred to, see American State Papers, Naval Affairs, vol. 2, No. 279.

† For other documents relative to Key West, see Naval Affairs, State Papers, vol. 1, No. 224, and vol. 4, No. 565.

portion of our seaboard, is indispensable to the public interest, and, if no reasonable doubt existed as to the position which ought to be selected, they would not hesitate to report a bill for its immediate establishment. But it is of the first importance that the position should be chosen with great care and accurate knowledge, before the public money is expended upon it. They, therefore, present a resolution, calling upon the Executive to cause a report to be made upon the subject to the next session of Congress; and, also, a bill authorizing the necessary examinations and surveys.

Resolved, That the President of the United States be requested to cause a report to be made to the Senate, at the next session of Congress, upon the expediency of establishing a naval rendezvous and depot near the southern extremity of Florida, the proper location thereof, the necessary defences of the same, and the amount of appropriation necessary to execute the plan which may be proposed.

COMMITTEE ROOM, *January 30, 1836.*

SIR: The Committee on Naval Affairs of the Senate have been instructed to inquire into the expediency of providing such defences for Key West as shall render it a safe rendezvous and depot for the navy.

On behalf of the committee, I am directed to ask of the Department to communicate such official reports and other documents and evidence as may be in its possession, in relation to that place as a fit rendezvous and depot for the navy, together with the opinion of the Department as to its value and importance to the country as a rendezvous and depot, and as to the extent and cost of such defences as may be required.

I am, respectfully, &c.,

SAMUEL L. SOUTHARD.

Hon. M. DICKERSON, *Secretary of the Navy.*

NAVY DEPARTMENT, *April 14, 1836.*

SIR: In answer to your letter asking of this Department to communicate "such official reports and other documents and evidence as may be in its possession, in relation to Key West as a fit rendezvous and depot for the navy, together with the opinion of the Department as to its value and importance to the country as a rendezvous and depot, and as to the nature, extent, and cost of such defences as may be required," I have the honor to state that, as early as the 29th December, 1822, the Secretary of the Navy made a report to the President, which was laid before the House of Representatives on the 20th of January, 1823, by which it appears that Thompson's Island, usually called Key West, was considered highly important as a naval station. The harbor, says the Secretary, "affords a safe and convenient rendezvous for our public vessels cruising in the West Indies and the Gulf of Mexico, and the island a very suitable depot for provisions and supplies. From the peculiar dangers of the navigation along the coast and among the Florida keys, our merchant vessels are frequently driven by distress to seek a harbor, and, for want of one in our own waters, are under the necessity of making a port in the Island of Cuba, which subjects them to considerable additional expense. This island also affords a very eligible depot for wrecked property, and which is highly necessary and advantageous, where the navigation is attended with so many dangers and difficulties. We are, at this time, in a great measure dependent on the wreckers of New Providence for protection of our property in case of shipwreck. This not only gives employment to a great number of foreign vessels and seamen, but it subjects our merchants to heavy expenses. These are some of the obvious benefits of this position, in time of peace; but its advantages in time of war, with any European power having West India possessions, are still more important, both as it respects the protection of our own commerce and the annoyance of our enemy. An enemy with a superior naval force, occupying this position, could completely interrupt the whole trade between those parts of our country lying north and east of it and those to the west, and seal up our ports within the Gulf of Mexico."

To this I will add, that circumstances of late occurrence have afforded the most satisfactory evidence of the correctness of the views taken by the Secretary of the Navy.

The Secretary further stated that, "from a report of Lieutenant Commandant Perry, who was charged with this duty, it was satisfactorily ascertained that this position affords a safe, convenient, and extensive harbor for vessels-of-war and merchant vessels." A copy of this report is hereunto annexed, marked A.

His instructions, however, did not require him to make so minute a survey as was necessary in order to judge of the extent to which this place might be safely and advantageously occupied and improved as a naval depot; but Captain Patterson had been instructed to make a further examination and survey. On the 10th of July, 1823, Captain Patterson made a report upon this subject, a copy of which is annexed, marked B. On the 27th of October of that year, Captain Porter wrote a letter to the Department, of which the paper marked C is an extract.

As my opinion is asked as to the value and importance of this place to the country, as a naval rendezvous and depot, it is my duty to state that this opinion must depend upon a comparison of the advantages of this place compared with those of the Dry Tortugas.

From a comparative view of the advantages of both places, I have no hesitation to express a preference for Key West; yet, it is proper to state the evidence in this Department in favor of the latter place.

In a printed report of Commodore Rodgers, of the 3d of July, 1829, annexed to the annual report of the Secretary of the Navy, of the 1st of December of that year, it is stated that the islands forming the Tortugas enclose an outer and an inner harbor; the first of which, besides affording a safe anchorage at all seasons of the year, is sufficiently capacious to ride in security all the navies of Europe; and that there is within this harbor another, still more secure, uniting sufficient depth of water for ships of the largest class, to a narrow entrance, not more than 120 yards wide, affording easy ingress and egress, and such as to be entered or departed from at all times, let the wind be from what quarter of the compass it may.

He further states that no fresh water, or firewood of any consequence, is to be found at this place; but that water might be collected in cisterns, and wood procured from Key West and the eastern part of Florida, without much inconvenience or expense. On the 28th of February, 1830, Lieutenants Tatnall and Gedney made to the Secretary of the Navy a report of the survey of the keys and harbors of the Dry Tortugas, a copy of which is hereunto annexed, marked D.

When it is considered that all the commerce of the Atlantic States, north and east of Florida, with the West Indies, the Gulf of Mexico, and all the western and southwestern States, whose produce finds its way to market through the Mississippi, must pass through the straits between the reefs of Florida and Cuba, an estimate may be formed of the value of a secure naval depot upon those reefs. The value of such commerce would be the measure of value of such a depot; for, should this station in time of war be seized by our enemy, with a fleet sufficient to enable him to keep possession, this commerce would be destroyed: the interests of the Atlantic and western States would be separated, and the intercourse between these great divisions of our country would be seriously interrupted.

I find it difficult to express an opinion as "to the nature, extent, and cost of such defences as may be required" for this station. In the first place, it is certain that we cannot effectually protect and secure this commerce without a fleet, which may be concentrated upon any point of the coast of Florida or the Gulf of Mexico, superior to any one which an enemy could bring into the same region; and with such a fleet, fortifications, to a certain extent, would be necessary, for a harbor and naval depot, to guard against surprise, and sudden, unexpected attacks from the enemy. A satisfactory estimate of the nature, extent, and cost of such fortifications can only be made upon an accurate survey of scientific engineers of the station to be fortified. This Department is not in the possession of the information necessary for such an estimate.

Several years ago, Lieutenant Tuttle, of the army, examined Key West, and suggested a system of defence for the same; that system was not approved of by the Engineer department.

It appears to me that there should be a further examination and survey of Key West, as well as other portions of the Florida reefs, before an estimate of the nature, extent, and cost of the required fortifications can be made; and that authority may be given for making such further examination, I would respectfully recommend.

I am, very respectfully, your obedient servant,

M. DICKERSON.

The Hon. SAMUEL L. SOUTHARD, *Chairman of the Naval Committee of the Senate.*

A.

UNITED STATES SCHOONER SHARK, *Port Rodgers, Thompson's Island, March 28, 1822.*

SIR: In obedience to your order of the 7th February, I proceeded to this island, for the purpose of carrying into execution your instructions, and in consequence of boisterous weather on our outward passage, by which we lost two of our spars, I was compelled to stop a few hours at Havana for the object of replacing them. This course was, however, by no means out of our route, and it fortunately afforded me an opportunity of taking under convoy five American vessels, a list of which is herewith enclosed.

In regard to the island in question, I have the honor to report that, after carefully examining its whole extent, sounding the harbor, and otherwise making such observations as your instructions directed, I have come to the conclusion that it possesses many advantages, as a naval rendezvous, and in consequence have, in the name of the United States, taken formal possession of it, giving it the name of Thompson's Island, and have left Midshipman Joseph Morehead, and one man, to retain possession, until further assistance can be furnished them. At present, their situation is tolerably comfortable. In selecting this name, I have not only gratified my own wishes, but have complied with the request of the proprietors of the soil present on the occasion of planting the standard, and whose names are, John Warner, Esq., United States commercial agent, at Havana, and Messrs. Fleming and Whitehead, all American citizens.

The western end of the island is the only part that can be approached by anything larger than a boat.

At this extreme the harbor is formed by a part of Thompson's Island, and several mangrove and sand keys, many of which are covered at high water.

The harbor to which I have given the name of Port Rodgers, is capacious, and sheltered from the prevailing northerly and easterly winds. It is, however, open from the south to west, which is a matter of but little importance, as the winds in this part of the world but seldom blow from the southwestern quarter. The depth of water in the harbor is from three to five and a half fathoms, but vessels may find safe anchorage without going into less than four fathoms.

The tides are rapid, and their rise and fall about six feet. Wood and water are abundant, the latter not of the best quality. Fish and game are to be taken in the greatest profusion, and in the course of a year or two the proprietors of the island will be able to supply ships with fruit and vegetables.

The watering place is two miles from the anchorage ground, situated on the south side of the island; the well about one hundred yards from the beach. The landing is at present inconvenient, but will become less so should the island be resorted to by our cruisers, as the officers will naturally, for their own accommodation, add to the facilities of shipping the water.

I have already enlarged the wells, and enclosed one with a fence, cleared a large garden spot, planted stakes on a mud bank that partly obstructs the channel into the harbor, and otherwise employed the period of my stay at the island in making such improvements as will benefit those who may hereafter visit the port.

It may well be supposed that on a coast so dangerous as the Florida keys, the difficulties of navigation must be very numerous, requiring on the part of the navigator the utmost caution to avoid the innumerable shoals, rocks, and sand banks that surround him in every direction; and although these dangers are laid down with admirable accuracy by the English surveyors, yet the tides and currents are so rapid and irregular, that, until proper and skillful pilots are established, it would be imprudent for our large vessels to cross the reef.

In time of war, however, these very dangers will prove of service to our cruisers, as a knowledge of the navigation will enable them to pass and repass the reef without danger, and the want of such knowledge will prevent the enemy from reaping the same benefit.

In regard to the advantages of Thompson's Island as a place of trade, I feel at a loss in forming an opinion. Its location is most certainly in its favor, being situated about midway between Florida and

Cuba, the southern States and Louisiana, which circumstance has induced many to believe that in the course of time the island must become a place of considerable commerce. Heretofore the Florida keys have been the resort of smugglers, New Providence wreckers, and, in fact, of a set of desperadoes who have paid but little regard to either law or honesty. The present establishment, though on a small scale, will, I conjecture, (with the assistance of the settlers) be enabled to keep these lawless people from this island; but I would suggest the necessity of an early augmentation of force, if it be only for the purpose of enforcing the revenue laws. A gunboat would be force sufficient to answer all the purposes required.

In enumerating the advantages possessed by this island and its contiguous waters, and in recommending it as a situation well calculated for a naval rendezvous, I have looked to a period when our country shall be engaged in a war with some great maritime state, and when the undisputed possession of the Florida keys will be a matter of great importance, as it will ensure the undisturbed navigation of the northwest side of the Florida stream (or Gulf of Florida) to our merchant vessels, and will prove a check on the vast resources of the Island of Cuba; vast, indeed, if possessed by the enterprising government of Great Britain.

I may be excused in taking this opportunity of suggesting, through you, sir, to the honorable Secretary of the Treasury, the great want of lighthouses on the Florida keys. The happy transfer of so fair a portion of territory to the United States has led to the belief that, under the enlightened and liberal policy of our government, the navigation of the shores of Florida will be rendered more safe and convenient. Numberless are the vessels and lives that have been lost on this treacherous coast. So common are shipwrecks in this neighborhood, that many vessels are employed solely for the purpose of rescuing property from destruction, of which they receive a very large share as salvage.

That rapid current denominated the gulf stream sweeps the Florida reef with incredible velocity, changing its course at every variation of the wind, thereby baffling the skill of the most experienced navigator; and, as they are deprived of the common beacons so necessary in the navigation of an intricate coast, so are they at all times exposed to the most imminent danger.

The great number of vessels that daily pass through the Gulf of Florida, to and from the ports of New Orleans, Pensacola, Mobile, the ports of Cuba, Jamaica, and the Spanish main, renders the erection of lighthouses not only an act of justice on the part of our government, but humanity, and a regard to the safety of the lives and fortunes of our citizens, seriously demand so desirable a measure.

I should feel diffident in thus intruding my opinion upon you, sir, were I not fully impressed with the belief that the subject requires the prompt and serious consideration of government.

At present, vessels bound into the Gulf of Mexico and Mexican sea, are compelled to make the Island of Cuba, for the purpose of shaping a correct course to clear the Dry Tortugas, (the southern extreme of Florida reef.) By approaching Cuba they expose themselves to the depredations of the numerous picaroons that infest the neighborhood of that island. But if lighthouses were erected on the Florida keys, vessels, in passing and repassing through the gulf, might keep on soundings the whole distance, and indeed might find safe navigation inside the reef.

As to the number and location of the lighthouses, I should presume there ought to be four, one on each extreme of the Florida reef, the other two at intermediate spaces, say one on Cape Florida, another on Key Largo, and the third on Sand Key, (if sufficiently stable,) and the fourth on the southwest Tortugas. A lighthouse is also very much wanted on Canaveral.

I have the honor to be, respectfully, your obedient servant,

M. C. PERRY.

The Hon. SMITH THOMPSON, *Secretary of the Navy.*

B.

Thompson's Island, formerly called Key West, is situated on the southern edge of an extensive shoal bank, off the south shore of East Florida, between that coast and the Florida reef, distant from Cape Sable forty-five miles southwest, and from the reef about seven miles north, in latitude about 24 deg. 34 min. 24 sec. north, and — west longitude from Greenwich, and is the largest of a range of islands or keys which, commencing with the Dry Tortugas west, extend along the southern coast of Florida as far east as Cape Florida, measuring, in a direct line, nearly east and west, four and a half miles in length, and varying from one to two miles in breadth; its greatest elevation above the surface of the sea not exceeding in any part twelve feet.

The foundation or bed of the island is composed of shell or secondary limestone.

The soil on the western part of the island, say about one-third, is from one to four feet deep, apparently formed of alluvial deposit, as shells, exuvia, and the remains of vegetables, &c., intermixed with fragments of calcareous marl; the beach is formed of very minute fragments of shells, the particles worn from the limestone and coral rocks which surround the island.

About the centre of the island there are extensive ponds of water, slightly impregnated with common salt; for the properties of this water, the stone forming the mass of the island, and the qualities of the water in the ponds denominated fresh, I refer to the analysis hereto annexed.

That part of the island comprehended between the west point and a line drawn across, at the west end of the salt ponds, is susceptible of cultivation, the soil being extremely rich and productive, but so intermixed with masses of limestone as to render the cultivation very laborious, and precludes the use of the plough until removed; sugar, cotton, tobacco, and all the fruits of the West Indies, may be produced in perfection.

The growth of timber is neither large or lofty; I saw no tree exceeding two feet in diameter; the undergrowth is small, but so thick as to be almost impassable; the trees and shrubs generally of the description found on the keys adjacent to the islands in the West Indies, and particularly those around the Island of Cuba; among the shrubs, I noticed the cotton plant in abundance, the paupau, the capsicum or bird pepper, and the prickly pear; the three first were in flower in February. One cotton plant, which I measured about a foot above the ground, was 10 $\frac{2}{3}$ inches in circumference, and about eighteen feet high. I noticed a tree the wood of which resembles the Spanish or Cuba mahogany, and has a fine, close grain.

The growth of wood gradually diminishes in size and decreases in quantity towards the eastern end of the island, that is, from the commencement of the salt ponds.

The salt ponds commence about two miles from the southwest point of the island, and extend to a bay or inlet which makes into the eastern end of the island from the passage between it and the next key; and are separated from this inlet only by a narrow and low strip of land, over which the sea flows in blowing weather and at high tides. There is also an inlet from the bay on the western side of the island to these ponds, which are about two feet deep in the middle, and from a quarter to half a mile wide. The island on the west side of these ponds is low, flat, and rocky; on the side next the sea is a sand or shell bank, from eight to ten feet high, having little soil, and that of the poorest description.

Nothing like crystallization of salt could be discovered on the borders of the ponds, nor could we perceive any indication or evidence of salt having been produced there by the effects of the sun; nor, until the water from the sea and bay is prevented from flowing into the ponds at high tides and during gales of wind, can salt be produced by evaporation: of the relative strength of the water in the ponds and that of the ocean, I refer to the analysis.

The fresh-water springs, or wells, as they are termed, were five in number, each of which I visited, and tasted the water. The first examined was a well that had been recently sunk, on the highest part of the island, nine feet deep, through a strata of rich soil four feet, and five feet into the solid limestone bed of the island; had a few inches water in it, clear, but brackish, though represented to have been very good when the well was first sunk. The water in the second, third, and fourth wells bad, and in very small quantities; the third well about seven feet deep; the fourth four feet; these three are situated nearly in the centre of that part of the island susceptible of cultivation. The fifth, or, as it is called, the south spring, is on the south side of the island, distant from the beach about two hundred yards, with an excellent path leading to it from the beach; this is evidently the only watering place on the island; this spring, if any there is, is situated nearly in the centre and at the lowest part of a marsh of some extent, and appears and tastes more like a collection of rain, than water flowing from a spring, and such we believe it to be, not having been able, on close examination, to discover a spring, though the persons on the island state the existence of a spring at that place, and that, in dry seasons, when there is no water in the pond or marsh around it, the water can be seen flowing into it almost as fast as it can be taken out; the water when taken from the pond or spring is clear and pleasant, but becomes offensive and unpalatable after being put into a cask two or three days; the quantity when we first visited the spring was very limited, not sufficient to water a frigate, but after a heavy fall of rain the whole marsh was covered with water, and the water in the other wells was so much improved as to be drinkable for a few days; it was evident to me that a supply of water could not at all times be relied upon at this island, as that which can be obtained there will not keep when confined in a cask.

The surf on the south beach, with the wind on shore, is very heavy; the water being shoal for some distance out, and the bottom rocky, renders it both laborious and difficult to water at this spring.

The beach of this and the neighboring islands, and the keys on the Florida reef, are composed of very fine, broken shells, and minute particles of the limestone rock and coral, almost as fine as sand, but not a grain of sand was discovered on any of them.

Of the climate, a judgment can best be formed from an examination of the accompanying copy of a meteorological journal, kept at the island by the agent of Mr. Limonton, showing the prevailing winds and weather, from which, and its geographical situation and formation, I should conclude the island to be healthy.

Thompson's Island is bounded on the west, north, and east, by very extensive shoal banks; on the west by the banks called the Mangrove Islands, the three southernmost of which have white beaches; on the north by the banks on the southern edge of which it is situated; on the east by the Samba Island, on the bank called Bahia Honda. Between this last island and Thompson's Island the channels are narrow and shoal; navigable only for small boats.

The channel called Boca Grande, between the Marquise bank and Mangrove Islands, was represented to me as having two fathoms water through it, but intricate, and having a dangerous middle-ground.

DAN'L T. PATTERSON, *Captain United States Navy.*

Analysis of the stone which forms the basis of Key West.

Physical character.—After long exposure to the atmosphere, of a grayish white appearance, cleft or fissured; white when taken from under the surface; globular crystals; cohesion of the grains variable; fracture dull; strata inclined; hardens on exposure to the atmosphere.

Chemical character.—When submitted to the *blow-pipe* it became readily phosphorescent, but infusible; yielded an odor of lime, with a mixed color of black and white; partially dissolved in common water, with a sensation of heat; with *nitric acid* effervescent. Its specific gravity lessened one-eighth, from the application of the *blow-pipe*; with the oxalic acid a powder was formed which was insoluble in water, and proved to be the oxalate of lime.

In addition to this mass of secondary limestone, which constitutes the largest portion of the island, there are also extensive fragments of *calcareous marl*.

The soil on some portion of the key is from two to three or four feet in depth; it is apparently formed of alluvial deposit, as fluviatile shells, *exuviae*, and the remains of vegetables.

About the centre of the island there are extensive *ponds of water*, slightly impregnated with the *muriate of soda*, or common salt. The specific gravity of this water was found one and a half grains in each fluid ounce. One fluid pound of this water yielded to evaporation one-sixteenth of discolored and very impure *muriate of soda*, or common salt.

There are other ponds of water on the island that are denominated fresh water; but they are believed (with a single exception) to be somewhat impregnated with saline particles.

Water from a well on the island, when submitted to the *oxalate of ammonia*, yielded a white precipitate, which was ignited, and appeared to be the *carbonate of lime*, held in solution by an excess of the acid.

C.

Extract of a letter from Commodore Porter to the Secretary of the Navy, dated—

OCTOBER 27, 1823.

My experience convinces me that, from the middle of July to the middle of October, the lee side of Thompson's Island is an unfit residence for man; for the rest of the year, no place within the tropics can be more healthy. Those who have resided on the weather side of the island have at all times been exempt from the sickness with which those to leeward have been afflicted. As a place of deposit for our stores, and of repair for our vessels employed on the coast of Cuba, no place can be better adapted; but while the same causes for disease exist, and they must ever exist, it cannot be prudent to make it a permanent station, where many men would be exposed to the baneful influence of the sickly season. As we are now happily situated with regard to the authorities of Cuba, the inconvenience of an absence of three or four months from Thompson's Island would not be felt; and the excellent and healthy harbor of Matanzas, where we enjoy every facility and convenience from the local authorities, will obviate all the inconveniences which might otherwise be experienced. The short delay of receiving stores from on board the ships from the island, and the position they may take outside the harbor, free from influence of the poisonous vapor which arises from the ponds, would render them secure from its effects.

D.

UNITED STATES SLOOP FLORIDA, *February 28, 1830.*

SIR: The duties assigned Lieutenant Gedney and myself, in your orders of the 24th August last, having been completed, we have the honor to lay before you a correct survey of the keys and harbors of the Dry Tortugas, accompanied by the following remarks on the most important points to which our attention was directed by your instructions.

The harbors.—The large or outer harbor is in the centre of the whole group of keys and reefs. Its extent is a mile and three-quarters by a mile and a half, and its depth generally eight fathoms. The anchorage is clear of rock, and the holding ground of the first quality. It has three entrances from the sea, with water sufficient for the largest ships, from the S. E., S. W., and N.; the two former are safe and easy of access; that from the north is difficult, being much intersected by shoals, and should never be attempted by large ships but in cases of emergency. It would however be of great importance in time of war. We experienced, whilst at the Tortugas, several very heavy gales from various quarters, and never found sea enough in the harbor to render it an unsafe anchorage. Our own opinion is confirmed by that of the fishermen, who have frequented it for many years.

We have no hesitation, therefore, in recommending it as a safe and commodious man-of-war harbor. The small harbor consists of two basins, the largest of which is twelve hundred yards by seven hundred and seventy, and the smallest six hundred yards by four hundred. The depth of the former is from twenty-eight to forty feet, and the latter from sixteen to twenty-four. The bottom is clear of rock and the holding ground excellent. The entrances are from the outer harbor, by channels of thirty-five feet into the large, and twenty-three feet into the small basin. The two basins are connected by a channel of twenty-three feet, so that vessels may haul from one to the other, without passing into the outer harbor. This harbor is so completely walled in by the keys and flats, that the water, in the heaviest gales, is perfectly smooth, vessels having nothing to contend with but the mere force of the wind. In the last hurricane which was experienced at the Tortugas, two fishing smacks were at anchor in the small basin, one of which rode it out, the other drove on shore, and when the gale was abated was got off without injury. This information was received from a fisherman who was on board the smack which rode out the gale, and who states that, although it was of almost unprecedented violence, there was not sea enough to cause the vessel to pitch. This harbor is in fact a natural dock, as easy of access and as safe when in as can be desired. It is small, but, if vessels should moor, as is usual in docks, so as to occupy as little space as possible, it would accommodate the greater part of our navy.

The health of the keys.—We arrived at the Tortugas on the 3d of October, previous to which our men had been considerably exposed, and several were invalids. We were immediately occupied at work on the flats, standing in the water during the heat of the sun, and in cutting extensive paths through the keys. An officer and several men were in consequence attacked with the intermittent fever, but so slightly that they were readily cured without the aid of a physician. On recovering, they had not in a single instance the sallow appearance generally following southern bilious fevers, but almost immediately recovered their usual appearance and strength. A second exposure invariably brought on a relapse, but even then the disease was so mild as to be checked without difficulty. We have not, during the whole cruise, lost a man, nor is there a person sick on board the vessel. The family of the keeper of the light-house, consisting of five, (all northern constitutions,) have enjoyed uninterrupted health, and we were assured by the fishermen that they had never heard or known that the keys were otherwise than healthy, and, to use their own words, "that they never consider it necessary, when there, to be particularly careful of their health."

There is indeed nothing to cause disease; no ponds, no deposit of sea weed, as at Key West. They are as healthy as the deck of a ship in the same latitude. The health of this year may be considered as a fair criterion by which to judge it generally; for the neighboring parts of the Florida reef have been more unhealthy than usual. At Key West, the mortality has been so great that sixty-five of the inhabitants died out of one hundred and fifty, and, of the whole population, very few escaped sickness entirely.

Susceptibility of defence.—On this point we can merely venture an opinion, as our profession does not lead us to any accurate knowledge of the subject; as a mere matter of opinion, however, we would say that the outer harbor could not be so defended as to prevent the entrance of an enemy, although the forts for the protection of the basin would prevent its occupation. There can be no difficulty, we think, in fortifying the basins so as to render them perfectly secure. Should the keys not furnish sufficient space, the flats would afford as much as could be required. They are dry in some places, and have generally

but from two to three feet water on them. They are well located for this purpose, do not shift, and appear to be suitable foundations for the heaviest works. We refer you, sir, to the journal of the survey, accompanying the report, for our further views in relation to this subject. The opinion that some have entertained, that the keys are overflowed in heavy gales, is certainly erroneous. This did not occur in the hurricane above alluded to. Their location is very different from that of Sullivan's Island, and other islands on our coast, which have been subject to this inconvenience. They have no mainland near them to back the water, which, meeting with no obstacles, flows freely through them.

The height of the keys which would be fortified is from three feet nine inches to four feet one inch above the level of the highest tides which we experienced in four months.

The facility of supplying the place in the event of war.—By a reference to the chart, it will be seen that the keys and reefs occupy a circumference of thirty miles; that the three channel ways from the sea, for large ships, are all in opposite directions; and that there are numerous passages through the reefs, by which vessels of light draught of water might enter the harbor. To these advantages may be added the excellent navigation for small vessels through the whole Florida reef, where they could be protected by convoys to within seventy miles of the Tortugas, and the vicinity of the gulf stream to the latter, which would subject blockading vessels to be frequently drifted from their stations. It would appear, therefore, that if the station could be effectually blockaded at all, it would require a much larger force than any power could devote to this single object.

The importance of the position.—We can furnish but little information on this subject which the Department does not already possess. Its importance, as the doubling point of our commerce to and from the Gulf of Mexico, is shown by the fact that, in a little over three months, one hundred and thirty-one vessels, principally square-rigged, passed in sight during the day, and it is presumable that an equal number may have passed at night. In this number, the smacks and other vessels frequenting the Tortugas are not included. We would, however, suggest one point of view in which its occupation may prove of great importance. The vicinity of St. Domingo to Cuba, and the nature of the population of the two islands, render it by no means improbable that, at a future day, their political condition may be the same. In this event, the proximity of Cuba to Florida, which must always be the weakest portion of the southern country, may be attended with imminent danger, particularly should we be engaged in a war with a naval power disposed to encourage a descent on the coast. A fortress at the Tortugas, looking directly into the port of Havana, in conjunction with a naval force, would be a strong, if not an effectual check on such a disposition, and give us at all times the control of the island. The principal disadvantage under which the position would labor is the want of fuel; that of water could be remedied by tanks, and in this respect it would be in no worse condition than Gibraltar, and some other important fortresses. The flats would afford for this purpose as much surface as could be required. Fuel might be supplied from the continent, or neighboring keys on the reef. The want of fuel, however, does not appear to be a sufficient ground for not occupying the position, for, if it can be supplied at all, it can as easily be supplied with one article as another. Owing to the mildness of the climate, the expenditure of fuel would be less than on the continent. It would be required only for cooking.

On all minor points, sir, connected with the subject, we beg leave to refer you to the journal.

I am, sir, with great respect and consideration, your obedient servant,

JOSIAH TATNALL.

The Hon. JOHN BRANCH, *Secretary of the Navy.*

CHESTER, December 29, 1829.

SIR: In consequence of your application to me for my opinion of Thompson's Island, or Key West, I have to state, in reply, that since the year 1823 I have, from time to time, been making myself acquainted with the Florida coast and keys, part of the time in command of the United States squadron, and subsequently in command of the Mexican force in that quarter; and, perhaps, there is no man living better qualified than myself to give an opinion on the subject, as my information is derived from actual observation and practical experience.

The harbor of Key West is, in my opinion, the best harbor within the limits of the United States, or its territories, to the south of the Chesapeake:

1. For its easy access and egress, at all times, and with all winds

2. For the excellent anchorage and security it affords, both in the inner and outer harbor, for ships of the largest class. Leading to the harbor of Key West are several excellent channels, some affording water for the largest class of ships, the others suited to vessels drawing ten and twelve feet water.

The advantages which Key West affords, in a commercial point of view, are:

1. Its vicinity to the Island of Cuba and port of Havana, having a ready market for all articles placed there in deposit, or left by the wreckers, of whom this is the rendezvous of those on the coast.

2. It being a convenient touching place for all vessels bound to and from the Gulf of Mexico, Bay of Honduras, and the coasts of Louisiana and Florida.

As a Naval station, Key West has, decidedly, the advantage over all others I have ever known:

1. In its susceptibility of fortification.

2. The ease and number of its approaches with all winds.

3. The difficulty of blockade, as I have proved while in command of the Mexican squadron; it requiring a blockading force equal to three or four times the force to be blockaded to keep up an efficient blockade.

4. The ease with which supplies may be thrown in, in despite of the presence of the enemy.

5. Abundance of wood and water.

In speaking of Key West as a naval station, I have reference only as to its being employed as a depot for stores, and a rendezvous for our ships-of-war: but even as a place for the establishment of a navy yard, it has, most decidedly, the advantage over Pensacola, and every place south of the Chesapeake:

1. On account of the depth of water.

2. Its more central situation, and facility of communication with, and deriving all the advantages by water of supplies from, the northern and southern sections of our Union, viz: provisions from Louisi-

ana; spars and live oak from the Floridas and Georgia; cordage, canvas, iron, gunpowder, shot, &c., from the north. The distance from either being short, the time, risk, and expense of furnishing them must necessarily be reduced in proportion.

3. Its salubrity of climate, being equal in every respect to that of New Providence, or any of the Bahamas.

The malady with which the naval forces under my command for the suppression of piracy were afflicted, had its origin in the excessive severity of the duty performed, and the total absence of every description of comfort. The disease was contracted among the haunts of the pirates on the coast of Cuba, and not, as is generally supposed, at Key West.

It is found that the salubrity of Key West improves yearly, by the filling up of the ponds and clearing the woods; and, by adding to the comfort of those who reside there, it will not be surprising if it should hereafter become a place of resort to the inhabitants of our southern section during the prevalence of the sickly season.

These facts and opinions are stated after an experience of nearly seven years.

The advantages of its location, as a military and naval station, have no equal except Gibraltar:

1. It commands the outlet of all the trade from Jamaica, the Caribbean sea, the Bay of Honduras, and the Gulf of Mexico.

2. It protects the outlet and inlet of all the trade of the Gulf of Mexico, the whole western country of Louisiana, and the Floridas.

3. It holds in subjection the trade of Cuba.

4. It is a check to the naval forces of whatever nation may possess Cuba. It is to Cuba what Gibraltar is to Ceuta.

It is to the Gulf of Mexico, &c., what Gibraltar is to the Mediterranean.

Among its advantages, as a military position, may be enumerated an abundance of freestone for building, which, being a concrete of coral and shells, is easily converted into lime. The island is low, not being more than fifteen or twenty feet above the level of the ocean. The channel into the inner harbor runs bold to its western part, which makes wharves easy of construction. The soil is rich, being formed of a vegetable decomposition, mixed with sand and shells. It produces all the plants and fruits of the tropics, with the exception of coffee, and yields abundantly.

On the eastern part of the island is a very extensive natural salt pond, which, from every appearance, I should judge, from a moderate capital and enterprise, might be made to vie with any of those in the British Bahamas.

Stock of every description live and thrive well on the island, without requiring any care whatever, which has been abundantly proved by those which I imported, on account of the United States, from the Cuba and Bahamas.

The thick growth of wood with which the island is covered, and which affords timber suitable for the construction of small vessels, is filled with small deer and other game, and the seas abound in the finest fish in the world.

In making this statement respecting Key West, I am actuated by no other feeling than the desire that my country should not, by the prejudices, partialities, interested views, and errors of others, be induced to lose sight of the great advantages it presents, whether looked at in a military or a commercial point of view. An effort is now making to form a naval establishment on the insulated cluster of sand keys called the Dry Tortugas, which may easily be surrounded by a small enemy's force, exposed to his cannon without entering the harbor, which afford neither wood nor water, nor scarcely any kind of vegetation, and have the insuperable objection of not affording a sufficient area of land on which to form a naval establishment of even a very limited extent.

Nature seems to have formed it for a place of deposit for the eggs of the turtle and the sea birds, and the art of man can make very little more of it.

Key West has been tried, and is proved to possess all the advantages which are desirable in a naval depot and rendezvous. It is proved that the only objection, insalubrity of climate, has no foundation in fact. Where, then, is the necessity of making further disbursements or useless experiments, when one has already been made in Key West, and has proved satisfactory?

With great respect, your obedient servant,

DAVID PORTER.

24TH CONGRESS.]

No. 637.

[1ST SESSION.]

ON THE EXPEDIENCY AND NECESSITY FOR THE ESTABLISHMENT OF A NAVAL SCHOOL OR ACADEMY.

COMMUNICATED TO THE SENATE MAY 14, 1836.

Mr. SOUTHARD, from the Committee on Naval Affairs, to whom were referred the resolutions of sundry officers of the navy, in relation to a naval school, reported:

The subject to which the attention of the committee has been directed by these resolutions is not new to them. In discharge of the duties assigned by the Senate, they have anxiously deliberated upon it, and before the reference which calls for this report, they had resolved to present it to the consideration of the Senate, and directed their chairman to report a bill for the establishment of a naval school.

In coming to this decision, the committee take leave to refer to the course of others who have preceded them in their action upon this interesting subject.

Upon the earnest recommendation of the Executive, provision was proposed by the Senate for the establishment of a naval school, in the bill for the gradual improvement of the navy, which was approved on the 3d March, 1827, but was lost by a very small majority. At the last session of the Senate, a bill was introduced for this object, and subsequently reported by the committee, but was not finally acted

upon. In again presenting it to the Senate, the committee are influenced by a strong and decided conviction of its indispensable necessity to the public interests, and to the honor, usefulness and efficiency of the navy.

The sense entertained and expressed by the officers, whose resolutions were referred, of the value of education to naval officers, and the impossibility of their obtaining it under the present system, meet the entire approbation of the committee, and they refer the Senate to them as expressing sentiments and opinions worthy of respectful regard.

The nature and situation of the naval service exhibit strongly the necessity for the proposed measure.

Our navy visits every land and every ocean. It protects a commerce at this moment as *valuable* as that of any other nation, though less than one other in amount of men and tonnage—scattered over the whole habitable globe, and exposed to dangers of every possible description. In the protection of this commerce, our naval officers are often brought in contact with the governments and official agents of every civilized nation, and are often obliged to have intercourse with them upon subjects which can only be properly treated by well educated and well informed men. They are, indeed, our national representatives in all other countries, and from them much of the estimate of us, as to our manners, intelligence, and character as a nation, must be drawn. It is not possible that their duties can be performed in the manner in which we should desire them to be performed, without science, intelligence and knowledge. Besides, we are a growing nation, and it is our interest and duty to draw from every other region every species of knowledge which can be useful to us. This can be more effectually and usefully accomplished by this, than by any other class of our citizens. But how can all these be accomplished by them without proper practical and useful education? and when are they to receive this education? They are appointed when mere boys, generally between the ages of fourteen and seventeen, when it is not possible that they should be well-informed and disciplined scholars. Their situation and duties in the service render it equally impossible that they should make extensive literary and scientific acquirements beyond the mere practical duties of the seaman. They have not pay enough at that period of their service to purchase the means of instruction, nor time enough to acquire it; their employments are too active and steady.

The only mode by which it can be secured is by the establishment of a school, which shall combine literary and scientific instruction with practical performance of a portion of their duties; and this may be accomplished by competent teachers, and by connecting with the school one or more small vessels, in which they may be compelled, under proper guidance, to perform, in turn, all the services of the common sailor, with those, also, which belong to office and command.

The expense of such an establishment need not be large; with it, we may dispense with the present inefficient and almost useless system of instruction on board our cruising vessels, and the money expended upon it would go far towards supplying the means necessary for the support of a school.

So many considerations enter into the selection of a place for a naval school, and it is so properly the duty of the Executive, that the committee have thought it proper to leave the selection to the Executive.

They report a bill.

[1ST SESSION.

STATEMENT OF THE TRANSFER OF APPROPRIATIONS IN THE NAVAL SERVICE, IN 1836,
UNDER THE ACT OF JUNE 30, 1834.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 17, 1836.

NAVY DEPARTMENT, *May 17, 1836.*

Sir: In accordance with the act of Congress, approved 10th June, 1834, entitled "An act to authorize the President of the United States to direct transfers of appropriations in the naval service, under certain circumstances," I have the honor to transmit a special account of moneys thus transferred, and of their application during the present session of Congress.

I have the honor to be, very respectfully, your obedient servant,

M. DICKERSON.

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

A statement of transfers of naval appropriations, made during the months of February and May, 1836, under the act of Congress, approved 30th June, 1834, entitled "An act to authorize the President of the United States to direct transfers of appropriations in the naval service, under certain circumstances."

Feb. 24, 1836. There was transferred from "pay and subsistence of the navy," to "pay of marine corps"	\$30,000 00
May 3, 1836. There was transferred from "pay and subsistence of the navy," to "provisions"	40,000 00
	<u>\$70,000 00</u>

No. 639.

[1ST SESSION.]

ON CLAIM OF MASTER COMMANDANT JOHN P. ZANTZINGER, FOR EXTRA PAY WHILE ACTING AS "FLAG CAPTAIN" ON THE COAST OF BRAZIL.

COMMUNICATED TO THE SENATE MAY 21, 1836.

Mr. SOUTHWARD, from the Committee on Naval Affairs, to whom was referred the memorial of John P. Zantzinger, a master commandant of the United States navy, praying additional compensation on account of expenses incurred as "flag captain" in the squadron on the coast of Brazil, reported:

The memorialist claims pay as flag captain, from the 1st of September, 1834, to the 3d of March, 1835, being six months and three days, when the act entitled "An act to regulate the pay of the navy of the United States" was passed. This pay is forty dollars per month, in addition to his pay as master commandant. During the period for which this pay was claimed, he was a master commandant in command of the sloop-of-war Natchez, then in active service on the coast of Brazil. He was appointed flag captain by Commodore Woolsey, who was then in command of the squadron on that coast. His appointment was sanctioned by the Secretary of the Navy.

Commodore Woolsey remained on board with his flag, during the period for which the pay is claimed. On the 1st of September, 1834, an order of the Secretary of the Navy went into operation, which forbade the allowance of the pay claimed; but the petitioner considers himself entitled to the pay, because the commanding officer of the squadron with his flag continued on board, and he was subject to the additional responsibilities and expenses for which the extra compensation of forty dollars per month was allowed.

The committee cannot concur in opinion with the petitioner. The regulation of the Department on this subject is in the following words: "Every commander of a squadron, upon a foreign station, is authorized to appoint a flag captain, or to select any officer to perform the duties, under the sanction of the Secretary of the Navy. The appointment without such sanction is prohibited."—July 21, 1817. "A commodore or commander of a division, having under his command four ships, of a rate not below that of a frigate, shall be entitled to an officer of the rank of master commandant, who shall, while performing this service, receive the pay and emoluments of a captain of a frigate of the second class."

The force under the command of Commodore Woolsey did not, by these regulations, justify the appointment; and as the petitioner was apprised by the Department, by letter of the 4th June, 1834, that the increased pay could not be allowed, (see letter annexed,) the committee are of opinion that the claim of the petitioner ought not to be allowed, and offer the following resolution:

Resolved, That the prayer of the petitioner be not allowed.

NAVY DEPARTMENT, June 4, 1834.

SIR: Since the printed regulations of 1818, no commander of a squadron is authorized to appoint a flag captain, so as to give him increased pay, unless the force under his command be larger than that on the coast of Brazil.

But as you probably may have been induced on this subject to expect my approbation, in consequence of some former precedents, and of a clause in the rule of A. D. 1817, without adverting to the subsequent regulation of 1818, virtually modifying all former rules, and as increased expenses under the same error may have been incurred by those selected, I hereby sanction your appointment of flag captain, to continue to the 1st of September next.

But after that date, no appointments of flag officers on any station, which may give increased pay, will be authorized, continued or sanctioned, except under circumstances described in the thirty-sixth page (octavo edition) of the printed regulations of 1818.

Respectfully,

LEVI WOODBURY.

Com. M. T. WOOLSEY, *commanding United States Squadron, Coast of Brazil.*

24TH CONGRESS.]

No. 640.

[1ST SESSION.]

ON CLAIM OF THE WIDOW OF A LIEUTENANT OF THE NAVY, FOR ARREARS OF PENSION FROM THE DEATH OF HER HUSBAND, AND FOR AN INCREASE OF THE PENSION, TO CORRESPOND WITH THE INCREASED PAY OF LIEUTENANTS OF THE NAVY.

COMMUNICATED TO THE SENATE MAY 21, 1836.

Mr. ROBBINS, from the Committee on Naval Affairs, to whom was referred the petition of Hannah Caldwell, reported:

The petitioner is the widow of William M. Caldwell, a lieutenant in the navy of the United States, who died in September, 1825, of the yellow fever, contracted in the West Indies, in the naval service of the United States. The petitioner has received a pension, granted under and by virtue of the pension act of Congress, passed the 30th of June, 1834, to take effect from the passing of said act, as is required by said act, and which has been and is duly paid to her accordingly. Her petition now prays to have granted to her a sum equal to that she would have received if her pension had been granted to take effect

from the death of said husband; and also a further sum, equal to the difference between the half pay of a lieutenant, at the time her said husband deceased, and the half of the pay and emoluments of a lieutenant at the present time. All which would be in direct violation of the said pension act, of the 30th of June, 1834, in virtue of which her pension has been granted.

The committee therefore report the following resolution, and recommend its adoption:
Resolved, That the prayer of said petition be not granted.

[24TH CONGRESS.]

No. 641.

[1ST SESSION.]

ON THE CLAIM OF A CARPENTER IN THE NAVY FOR A PENSION, ON ACCOUNT OF INJURIES RECEIVED IN THE LINE OF HIS DUTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 31, 1836.

Mr. JARVIS, from the Committee on Naval Affairs, to whom was referred the petition of John March, reported:

That the petitioner represents that he belonged to the carpenter's crew on board the United States ship Adams, commanded by Captain Morris, in the year 1814; and in the month of September of that year, whilst in the performance of his duty, he fell from the berth deck into the lower hold of that vessel, and badly fractured his right shoulder blade and collar bone, and dislocated the same; that he had no recollection of anything which took place for a number of hours, when he found himself on shore, in great pain, and was informed that his wounds had been dressed; that he remained in the house to which he had been removed until after the Adams was destroyed, and had sufficiently recovered to be able to proceed to his home. After his arrival there he continued for several weeks under the care of two physicians, until he was able to proceed to Portsmouth and rejoin his shipmates on board the frigate Congress, from which he was discharged in March, 1815.

He further represents that he has never recovered from the injury which he received. His shoulder is greatly enlarged, and the fractured bone so distorted as to render his right arm almost useless. He would have applied sooner for a pension, but was told it could not be obtained without going to Washington, for which he had not the means. This statement of the petitioner is corroborated by the testimony of five of his shipmates, who, as well as the petitioner, are represented to be men whose declarations may be relied on; and is further supported by the certificates of the physicians, under whose charge he was after his return home. On the other hand, the surgeon and surgeon's mate of the Adams both assert positively that no such accident occurred.

The only way to reconcile such conflicting testimony is by supposing that in the hurry and confusion occasioned by the destruction of the vessel, and the escape of the officers from the enemy, the accident of March may have made so slight an impression as to be entirely erased from their memories, and this explanation is adopted by the committee. They therefore report a bill for the relief of the petitioner.

[24TH CONGRESS.]

No. 642.

[1ST SESSION.]

ON THE CLAIM OF CAPTAIN JOHN DOWNES, OF THE NAVY, TO BE ALLOWED A CREDIT FOR AN AMOUNT IMPROPERLY CHARGED TO HIM ON THE BOOKS OF THE TREASURY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 2, 1836.

Mr. TALLAFERRO, from the Committee on Claims, to whom the bill and report in the case of John Downes, of the United States navy, was recommitted, reported:

That it is represented, by the memorialist, that he stands improperly charged on the books of the Treasury in the amount of \$723.60. That this charge against him is sustained by the accounting officers on the allegation that the \$723.60 had been twice paid to Captain Downes, once to the order of Captain Downes, at the Treasury, again, on the draft of Tobias Watkins, drawn in favor of Captain Downes, on Amos Binney, navy agent at Boston, which draft the memorialist admits was paid to him by A. Binney, but improperly debited to him, the memorialist, at the Treasury.

The facts in this case are fully set forth in the official statements furnished the committee by the Navy Department, and which accompany this report. In these documents it is represented that, in the summer of 1825, the account of Captain J. Downes was settled at the office of the Fourth Auditor, and a balance of \$723.60 found due to him.

Captain Downes gave an order to the messenger in that office, on which to receive the \$723.60, due as above; subsequently thereto, Captain Downes, being about to leave Washington for Boston, received from T. Watkins *his* draft on Amos Binney, navy agent at Boston, for \$723.60, payable to Captain John Downes. This draft was dated 27th of August, 1825, and is as follows: "Sir: You will be pleased to pay, to the order of Captain John Downes, seven hundred and twenty-three dollars and sixty cents, and charge the same in your next account, under the head of pay," &c., &c. Upon this draft Captain Downes received the amount from the navy agent in Boston, who returned it as a voucher in his next account, on a settlement of which, the \$723.60 was admitted to the credit of the navy agent, on the 24th December, 1825; and the same amount was then charged to the account of Captain Downes on the books of the Treasury. Of this charge so made against Captain Downes, he had no information till some time in the

year 1829, when the then Fourth Auditor directed the purser to detain the amount from the pay of Captain Downes, which was accordingly done; and that sum is still retained from the pay of Captain Downes. These appear to be all the material facts in this case; upon a full consideration of which, and of the legal authority, obligations, and responsibilities of the Fourth Auditor and navy agent, respectively, *as such*, the committee can perceive no legal or just ground for the charge made against Captain Downes on the books of the Treasury for the sum received by him, from the navy agent, on the draft of the Fourth Auditor as aforesaid.

The office of Fourth Auditor was created by an act of Congress in 1817, which act defines the duties of that officer. He is to receive the accounts accruing in the Navy Department, or relative thereto, to examine, certify the balances thereon, and transmit them, with the vouchers and his certificate, to the Second Comptroller for his decision.

To an inquiry propounded by the committee to the present Fourth Auditor, "whether the Fourth Auditor, as such, had authority to draw bills for the payment of money, in favor of an individual, on a navy agent, as such, and to direct the navy agent, on paying such bills, to what account to debit the amount paid?" the present Fourth Auditor, in a written communication appended to this report, says: "From an examination of the law defining the duties of Fourth Auditor, and from the present practice in this (the Fourth Auditor's) office, and the reasons of that practice, I should not hesitate to say, in reply to the inquiry of Mr. Taliaferro, that the Fourth Auditor, as such, has no authority to draw bills for the payment of money, in favor of an individual, on a navy agent, and to direct him, on paying such bills, to what account to debit the amount paid. An agent, therefore, who would pay money upon the separate order or certificate of the Fourth Auditor, would pay it, in my opinion, wholly upon his own responsibility."

And in reply to another inquiry, made by the committee, of the Fourth Auditor, he says: "In reply to the last question propounded by Mr. Taliaferro, I answer, that it is the duty of the navy agent to apply the funds placed in his hands to specific objects; and it is not one of those objects, in my opinion, that he should pay drafts drawn on him by the Fourth Auditor. The agent has, for his government, the laws of Congress, the regulations of the Navy Department, and the instructions which may be given him from this office, approved by the Second Comptroller. But I apprehend that neither the *regulations*, nor the *instructions*, are *binding* on him, unless they are in conformity with the *laws*." In this view of the Fourth Auditor, of the powers and duties of an auditor and navy agent, under the law, the committee concurs; and, in accordance with that opinion, the committee comes to the conclusion that the draft in question, drawn by T. Watkins on Amos Binney, and paid by him to Captain Downes, gave to the navy agent no legal claim to a credit for the amount in the settlement of his account with the government. That the amount so paid by the navy agent was properly chargeable to T. Watkins, the drawer, and to no other. The committee cannot perceive on what principle of law or justice the amount of an unauthorized order, drawn by the Fourth Auditor, in favor of an individual, on a navy agent, can be charged to such individual in any transactions he may happen, subsequently, to have with the government.

In the investigation of this case, the committee has ascertained by a communication from the Navy Department, hereto appended, the following facts. The communication referred to states that \$750, being the amount of a draft drawn by T. Watkins, Fourth Auditor, in favor of C. Fowler, of Washington, on James K. Paulding, navy agent at New York, was charged to the United States by J. K. Paulding, as navy agent, in his account of the first quarter of 1828, received at the office of the Fourth Auditor the 5th May, audited the 20th, and admitted by the Second Comptroller, 5th of June, 1828. But in the settlement, the charge of \$750 was suspended, for the want of a voucher to support it.

Subsequently, however, a receipt in favor of the navy agent, together with his check on the Bank of the United States, were received at the office of the Fourth Auditor, and on the 3d of June, 1829, the then Fourth Auditor, A. Kendall, directed the amount to be passed to the credit of the said agent by charging the same to T. Watkins.

It further appears, by evidence derived from the same source, that T. Watkins, as Fourth Auditor, drew two other drafts at or about the time aforesaid for \$500 each, on the said J. K. Paulding, as navy agent, payable to C. Fowler, which amount, after the same proceedings had on these as on the draft for \$750, was charged to T. Watkins on the books of the Treasury.

In like manner T. Watkins drew three several drafts in favor of C. Fowler on R. R. Harris, navy agent at Boston; that is to say, one draft dated on or about the 14th of August, 1827, for \$300; a second draft on or about the 4th of September, 1827, for \$500; a third draft for \$500, on or about the 19th of the same month; and a fourth draft for \$700, on or about 3d of October, 1827; all which drafts were paid, but suspended from the credit of the navy agent, in the settlement of his account, from the first quarter in the year 1828 to the 3d of June, 1829, when, by order of the Fourth Auditor, A. Kendall, these several items, amounting to \$2,000, were admitted to the credit of Harris, the navy agent, and charged to T. Watkins on the books of the Treasury. The committee can suggest no good reasons why all these drafts, drawn by T. Watkins on the navy agents at New York and at Boston, should be charged on the books of the Treasury to T. Watkins; while the draft drawn by him, in favor of Captain Downes, on the navy agent, Amos Binney, should be charged on the same books to Captain Downes.

After a careful examination of this case, the committee is of opinion that the draft in question for \$723.60, drawn, as aforesaid, by T. Watkins, in favor of Captain Downes, on A. Binney, as navy agent, and paid by the navy agent, presents a transaction in which the government, whose agents the drawer and drawee were, had no manner of interest or concern.

The Fourth Auditor, officially, has no control over the public money. A navy agent gives bond and security to disburse the public funds confided to him for specific objects. To pay drafts drawn by the Fourth Auditor on him, as navy agent, is not one of the objects to which he is permitted to apply the public funds in his hands. The committee can see the matter in no other aspect than as an individual transaction between T. Watkins and Amos Binney, in which government could in nowise be affected; nor is it possible for the committee to perceive how Captain Downes can be so implicated as to make him debtor to the government for the amount of a draft drawn by T. Watkins, without official authority, in his favor, on a navy agent, who, without official authority, paid the draft. The following resolution is adopted:

Resolved, That the proper accounting officers of the Treasury be required to allow to Captain John Downes, of the United States navy, a credit for the sum of \$723.60, in the settlement of his account; that sum having been heretofore erroneously charged to him, on account of a draft in his favor, drawn by T. Watkins on Amos Binney, navy agent, at Boston.

24TH CONGRESS.]

No. 643.

[1ST SESSION.

STATEMENT OF THE USUAL AMOUNT OF DISBURSEMENTS MADE BY PURSERS AT NAVY YARDS, ON VESSELS OF DIFFERENT CLASSES, THE COMPENSATION AND PROFITS UNDER EXISTING LAWS, AND PROBABLE AMOUNT, AT THE RATE OF THREE AND A HALF PER CENTUM UPON THEIR DISBURSEMENTS.

COMMUNICATED TO THE SENATE JUNE 11, 1836.

NAVY DEPARTMENT, June 10, 1836.

SIR: In answer to your letter, received the 3d inst., requiring statements of the usual annual disbursements made by pursers at navy yards, &c., I send you a letter from the Fourth Auditor, and a tabular statement accompanying the same, which contain all the information, upon the subject of your inquiries, in the possession of this Department.

The bill "to establish and regulate the navy ration, and for other purposes," is returned. Not having before me the information upon which the bill was reported, I do not think I could offer any important suggestions as to the provisions of the same.

I am, very respectfully, your obedient servant,
HON. SAMUEL L. SOUTHARD, *Chairman Naval Committee, Senate.*

M. DICKERSON.

TREASURY DEPARTMENT, *Fourth Auditor's Office, June 10, 1836.*

SIR: Upon the letter of the Hon. Samuel L. Southard, chairman of the Naval Committee of the Senate, addressed to you on the 31st ultimo, asking information concerning the disbursements made by the pursers of the navy, and which has been referred to this office, I have honor to report as follows:

The first column of the enclosed exhibit shows the amount of the expenditures at the navy yards, in 1835; and also the probable annual expenditure, on every account, except provisions, in each class of vessels, whilst in commission.

The expenditures at the navy yards vary greatly, as the annual appropriations, from the nature of the case, are not and cannot be uniform. It would be difficult, therefore, to say, with much precision, what the usual annual disbursements are.

The sums set down as expenditures in the vessels are but approximations to the exact amounts expended, but it is believed that they do not vary materially from the average annual expenditures. The result has been obtained by taking the expenditure for a cruise, or for two cruises, and dividing it by the years and months the vessel has been in commission. There is often, however, a very considerable difference in the expenditures in vessels of the same class for cruises of the same length. This may be occasioned by a variety of causes and occurrences which it does not appear to be necessary to enumerate in this report: they are such as affect the contingent expenses of a vessel.

The second column shows the amount of annual expenditures in vessels, including expenditures for provisions.

The third column shows the amount of the annual compensation of the pursers, exclusive of their pay and rations. This allowance is for house rent, fuel, and servant hire, and is the same at all the yards; except at Baltimore, being limited at that station to two hundred dollars. This column shows also the profits supposed to be received at present by pursers when at sea in public vessels.

The fourth column shows the amount that will be received annually by the pursers under the three and a half per centum mentioned in the bill which accompanied Mr. Southard's letter, supposing the expenditures in the vessels to correspond with the sums in the first column.

It is difficult to estimate the disbursements on account of provisions with much precision. The issues of provisions, in consequence of the commutation of the ration which is allowed, are irregular, and may vary greatly, according to circumstances, in the same vessel, and with the same number of persons on board. According to a regulation of the Navy Department, the complement of men, including officers and marines, is fixed: For a ship of the first class, at 777; for a ship of the line of the second class, at 722; for a frigate of the first class, at 467; of the second class, at 368; for a sloop of the first class, 196; of the second class, 165; for a schooner, at 70. But in ships of the line, and often in frigates, the number is usually greater, and may be assumed to be, on an average, in a ship of the line of the first class, about 900, and about 750 in the second class. The number often varies considerably during a cruise, and in calculating expenditures on account of provisions, I cannot fix upon any number that seems to be a nearer approximation to the truth.

In a ship with a crew of 900, including officers, supposing one ration to be issued daily to each individual, the number of rations required yearly would be 328,500. Those, at 20 cents each, the present commutation price, would amount to \$65,700. But, as the officers receive money in lieu of the ration to which they are entitled at sea, and the men, also, to a considerable extent, for the spirit part of the ration, and even for complete rations, deductions must be made before the actual expenditure can be ascertained, or rather before it can be approximated; for it would be extremely difficult to fix upon any sum that could be relied on as certainly correct. Estimating the ration at 20 cents, it does not appear that the annual issues, in a 74 of the first class, would exceed fifty-four thousand dollars; and this sum, added to the expenditure of the first column, gives the result in the second. The calculation for commuted rations is made from the amount paid by the purser of the "Delaware," for undrawn rations during her last cruise; and this amount of \$54,000 has been assumed as data for calculating expenditures of provisions in other vessels, supposing the complement of a second rate to be 750; of a frigate of the first class, 500; of the second class, 400; of a sloop, 200; and of a schooner, 80.

The expenditure in a 74 of the first class has been calculated from the accounts of the expenses of the two cruises of the "Delaware" in the Mediterranean, adding eleven thousand dollars per annum on account of the increased pay of the officers, (by the act of the 3d March, 1835,) which increase has been calculated in the same ratio for all the other vessels.

The expenditure in a 74 of the second class is taken from an estimate of the Navy Commissioners, after deducting 20 per centum from their estimate for provisions, and fifteen thousand dollars for contingencies. I estimate the ration at 20 cents, the present commutation price. They estimate it at 25 cents, the former commutation price. The contract price for the year 1835 was, when averaged, about 15 cents. I have not been able to ascertain the contract price for the present year.

No 74 of the second class has been to sea since the "Franklin" returned from the Pacific in 1824. Her annual expenses, including provisions, were \$164,290.33, which is much below the sum that may be assumed as an average annual expenditure at present for a vessel of her class. It is to be accounted for as follows: her account for contingencies was very moderate, and the pay of the officers has been much increased since. The Commissioners of the Navy, in their estimates, make a difference in the expenses of a first and second rate of \$29,241; it may be set down in round numbers at \$30,000, though the difference is greater in the exhibit herewith transmitted.

The expenditure in vessels under the size of 74 has been averaged from two cruises of each, and the result, I think, may be relied on as tolerably correct, with the exception that the difference in the expenditures of frigates of the first and second class appears to be rather great, and is more, in my opinion, than could be fairly assumed as an average difference at all times.

The pursers at the navy yards now receive (all pay, emoluments, and allowances included) the sum of \$1,064, except at Baltimore, where he receives \$200 less. It is impossible to estimate with precision the profits received by them when at sea. In 1832, my predecessor (Mr. Kendall) estimated their "net gains," at sea, as follows: In a ship of line (74) of the first class, at \$5,381; of the second class, at \$5,000; in a frigate of the first class, \$3,257; in a sloop of the first class, \$2,000; in a schooner of the first class, \$1,217; of the second class, at \$1,140.

The profits considered by Mr. Kendall as "net gains," are such as accrue to the purser after allowing for clerk hire, and for certain losses that he may be supposed to sustain from various causes; this may be set down from \$1,200 to \$1,500 in a first rate, and from \$800 to \$1,000 in a frigate. He allows nothing for clerk hire in sloops and schooners. This estimate for the 74's and frigates appears to me to be rather low; but it was made for a 74 upon a complement of 700 persons. I would estimate the profits in those vessels at 15 per centum more, after allowing for clerk hire, as he did, and for incidental losses that might or might not be sustained. For the other vessels his estimates appear to be sufficiently high, and I have adopted them without adding any per centum.

I am satisfied that the profits of the purser are generally overrated, and that they do not acquire fortunes either with the celerity or the certainty that many suppose they do. The profits are never very considerable, except in ships of the line and in frigates; and, as our navy is at present organized, and with but one first-rate generally in commission, no purser can reasonably expect a vessel of that class more than once in his life. And, upon a supposition that the active naval armament will not be increased, and that only one 74 will be kept in commission for many years to come, a purser now entering the navy has not even a very flattering prospect of once getting a vessel of that class. There are, in the navy, forty-two pursers, and only five have had 74's within the last twenty-two years.

Nor is a purser entitled regularly to a frigate, until after ten or twelve years' service at navy yards and in smaller vessels, though through good fortune they sometimes get them sooner; or he may be a portion of the time without employment, waiting orders, and will then receive for his whole annual compensation only \$624; if at the navy yard, he will receive but \$1,064, though he may disburse for the government hundreds of thousands of dollars, as he frequently does. And if he disbursed millions, the compensation would be no more than if he disbursed nothing.

Mr. Southard's letter and bill are herewith returned.

I have the honor to be, very respectfully, your obedient servant,

J. C. PICKETT.

Hon. M. DICKERSON, *Secretary of the Navy.*

Exhibit showing the amount of the usual disbursements made by the pursers at the navy yards, and in each class of vessels while in commission; showing also an estimate of the profits received by the pursers in each class of vessels, and at navy yards, at this time; and also the probable amount which will be received by them under a per centum of three and a half on the amount of their disbursements.

	Amount of annual disbursements without provisions.	Amount including provisions.	Estimate of profits received at this time.	Probable amt't which will be received at 3½ per cent. on disbursements.

24TH CONGRESS.]

No. 644.

[1ST SESSION.]

ON THE CLAIM OF LIEUTENANT COLONEL GAMBLE, OF THE MARINE CORPS, FOR AN ALLOWANCE FOR THE PERFORMANCE OF STAFF DUTIES WHILE IN COMMAND OF A POST IN THE MARINE CORPS, AND PAYMENT FOR CERTAIN RATIONS FURNISHED TO CERTAIN SEAMEN, MARINES, AND PRISONERS OF WAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 15, 1836.

Mr. ELISHA WHITTLESEY, from the Committee on Claims, to whom was referred the bill from the Senate for the relief of John M. Gamble, reported:

That the first section of the bill is as follows: "That the Secretary of the Navy be, and he is hereby, authorized and directed to cause to be paid to John M. Gamble, out of any moneys not otherwise appropriated, at the rate of twenty dollars per month, for certain disbursements made, and other staff duties performed by said John M. Gamble, from the thirty-first day of December, eighteen hundred and seventeen, to the thirty-first day of December, one thousand eight hundred and twenty-two, while in command of a post in the marine corps."

The committee wrote a letter to the Secretary of the Navy, a copy of which is herewith presented, marked A. His answer, marked B, accompanied by a report from the Fourth Auditor, marked C, are received and made a part of this report.

It appears there was no order from the Navy Department directing the petitioner to disburse the money, for the doing of which he now asks a compensation, nor was he in any way accountable to the United States for the money he received, nor did he render any vouchers in his own name for the money he paid out.

Paymaster Desha received a credit for \$37,076.36, and Paymaster Kuhn for \$6,572.02, for the warrants drawn in favor of the petitioner. The Secretary of the Navy says it is presumed the assignment of the staff duties to the petitioner was merely accidental, and a matter of arrangement between himself, as commanding officer, and the staff officers, in paying and supplying the detachment under his command.

The Fourth Auditor says Colonel A. Gale, formerly of the marine corps, made "application for the additional allowance for staff duties from the 6th of August, 1806, to May, 1817, while commanding the marines at Philadelphia, which claim has not been granted. Col. Gamble succeeded Col. Gale in command at Philadelphia, but it does not appear he ever presented at this office any claim for staff duties. Should his claim, however, be sanctioned, the commanding marine officers at the several posts or stations, who have had similar command, and who, it is presumed, have performed similar services to some extent, will no doubt present similar claims."

The committee think this part of the claim should be rejected.

If the commanding officers at stations were paid for performing staff duties, when a competent number of staff officers are in service, the number of staff officers would be virtually increased beyond the authority of the law, and an unnecessary burden imposed on the Treasury.

The second section of the bill directs the Secretary of the Navy to pay to John M. Gamble twenty-five cents for each ration furnished by him to seventeen seamen and four marines, together with six prisoners of war under his command, when left by Commodore Porter in charge of prizes in the Pacific ocean during the years 1813 and 1814.

This committee concur in recommending the payment proposed in this section, on the presentation of proof to the Secretary of the Navy that the rations were furnished; and will recommend the amendment of the bill to meet the views expressed.

A.

WASHINGTON, June 3, 1836.

SIR: I am directed by the Committee on Claims to transmit to you the petition and papers of Lieut. Col. John M. Gamble, and to ask for a statement as to the amount disbursed by him on public account for the purposes mentioned in the petition.

The committee wish to know whether he stands charged by the United States with the money he alleges in his petition he disbursed, and whether he is credited with the sum certified from his books by Archibald Sloane, or any part of it.

Was he accountable directly to the United States for the money disbursed; or did he receive the money from a disbursing officer, who was directly bound to account for the money to the United States?

The committee desire to report on the circumstances of the case as fully as is within the power of the Navy Department to give.

What lineal duties did the petitioner perform at Philadelphia?

When was application first made for the additional allowance?

Are there other officers having claims of the character of the one presented by the petitioner, or who are equally entitled to similar compensation from having performed similar services?

You will perceive the inquiries are made in reference to the claim for disbursements, and do not come within those made by the Committee on Naval Affairs of the Senate.

Very respectfully, yours,

E. WHITTLESEY.

HON. MAHLON DICKERSON, *Secretary of the Navy.*

B.

NAVY DEPARTMENT, *June 9, 1836.*

SIR: I have the honor, in reply to your letter of the 3d instant, in the case of Brevet Lieut. Colonel Gamble, to enclose a report of the Fourth Auditor upon the accounts of Lieut. Colonel Gamble, dated the 6th instant, which contains the desired information, as far as the records of that office will afford it.

Lieutenant Colonel Gamble was, in lineal rank, a captain from the 18th of June, 1814, to the 1st July, 1834, when he was promoted to be a major. He was, however, breveted as a major on the 19th of April, 1816, and as a lieutenant colonel on the 3d March, 1827.

It is not known to the Department who assigned the staff duties to him, but it is presumed it was merely incidental, and matter of arrangement between himself, as commanding officer, and the staff officers, in paying and supplying the detachment under his command.

The papers which you sent are all returned.

I am, very respectfully, sir, your obedient servant,

M. DICKERSON.

Hon. ELISHA WHITTLESEY, *Chairman Committee on Claims, House of Representatives.*

TREASURY DEPARTMENT, *Fourth Auditor's Office, June 6, 1836.*

SIR: In reply to the letter of the Hon. E. Whittlesey, of the Committee on Claims in the House of Representatives, dated the 3d instant, making certain inquiries relative to the claim of Lieut. Col. John M. Gamble, of the marine corps, referred, with the papers and memorial of Colonel Gamble to Congress, from your Department to me on the 4th instant, I have the honor to state that Colonel Gamble has not been charged, on the books of this office, with any moneys during the years 1817, 1818, 1819, 1820, 1821, 1822, except \$200, which sum was accounted for on the 27th of January, 1820; but as the sums under contingent expenses for the years before mentioned, in the exhibit made from Colonel Gamble's book, are in gross amounts, there is no means in this office of ascertaining whether the amount credited to him in his account, settled at this office the 27th January, 1820, say \$843.68, forms any part of the sums stated in the exhibit from his books.

During the years 1817, 1818, 1819, 1820, 1821, and 1822, or nearly all that period, Colonel Gamble was a captain and brevet major, and the commanding marine officer at Philadelphia; and warrants on the Treasury, to the amount of \$43,648.38, were issued in his favor, by order of the then paymasters of the marine corps, by the Secretary of the Navy; of which sum \$37,076.36 was charged on the books of this office to Paymaster R. M. Desha, and \$6,572.02 was debited to Paymaster J. L. Kuhn. These paymasters being held accountable to the government for the money, the vouchers for disbursements of the marine corps at Philadelphia, by Colonel Gamble, were returned to the paymasters who directed the remittances, and they obtained credit for them accordingly; and hence, it does not appear that Colonel Gamble was made "accountable directly to the United States for the money disbursed," he having "received the money from a disbursing officer, who was directly bound to account for the money to the United States."

This office has no knowledge of "who assigned the staff duties to him," Colonel Gamble, while commanding marines at Philadelphia.

During the session of Congress of 1827-'28, Colonel A. Gale, formerly of the marine corps, made "application for the additional allowance" for staff duties, from 6th August, 1806, to May, 1817, while commanding the marines at Philadelphia, which claim has not been granted. Colonel Gamble succeeded Colonel Gale in the command at Philadelphia, but it does not appear that he ever presented at this office any claim for staff duties. Should his claim, however, be sanctioned, the commanding marine officers at the several posts or stations, who have had similar command, and who, it is presumed, have "performed similar services," to some extent, will no doubt present similar claims.

The letter of Mr. Whittlesey, together with the papers accompanying it, is herewith returned.

I have the honor to be, with great respect, sir, your obedient servant,

J. C. PICKETT.

Hon. M. DICKERSON, *Secretary of the Navy.*
